GENERAL INFORMATION

INSTRUCTIONS FOR WRITING ORDERS
All orders must be signed by the customer—and, to insure accuracy should be accompanied by customer’s letterhead or other printed material.
Please check each order carefully so that it can be put into production promptly. State clearly: Stock Number; Quantity; Description; Colors; Copy; Price; Packaging; etc. Note also special instructions such as: Shipping Date; Mailing Containers; Special Cuts; Dies; Screens; etc.
All orders are subject to approval by our Credit Department. Credit information should accompany all orders from new customers to help expedite processing.

MINIMUM-ORDER REQUIREMENTS
Prices shown are “quantity” prices, therefore minimum requirements must prevail. These quantities are indicated on each sheet and represent the smallest quantity that can be shipped without extra charge.
All orders for less than the minimum (but not less than one-half the minimum) will bear a $2.50 (net) charge. Full Retail List Prices apply to quantities of less than one-half the minimum—no copy included.
A minimum requirement of $15.00 applies on orders consisting only of Refill items. Orders for less than this minimum are filled at full retail prices.
CORY PRODUCTS are subject to minimum requirements as shown on the CORY schedule, and cannot be combined with AUTOPOINT items to meet order requirements.

PRICES
All prices are “net” and not subject to further discounts (except Refill items). Refill items are subject to quantity discounts as shown on catalog sheet.
The correct price for each item is determined by the total number of items ordered per order. (Example: 250 pens and 250 pencils carry the 500 unit price).
Where applicable, state and city taxes will be added to the invoice price.
Terms are Net 30 Days. Shipment—F. O. B. our Chicago factory. All prices subject to change without notice.

CHANGE OF COPY
Each copy setup should meet the minimum quantity of that item. For quantities of less than the minimum (but not less than one-half the minimum) a $2.50 (net) charge must be made for each copy setup. Items that require the identical copy and utilize the same process of application can be combined to meet the minimum quantity requirement.

OVERRUNS AND UNDERRUNS
Production methods require copy application before final assembly, thus we reserve the right to ship and bill approximately 5% over or under the amount specified on the order. When “no overruns” are specified, we reserve the right to ship 5% under the amount specified.

PROOFS
Paper proofs—$1.00 net. Proof on actual item—$2.50 net plus cost of item and cost of dies, screens, or cuts.

BLANKET ORDERS
Customers may place a firm order for their annual requirements of 2,500 or more units. The total number of units ordered will determine the price per unit. This merchandise may be withdrawn during a twelve-month (maximum) period, subject to following charges per withdrawal:

<table>
<thead>
<tr>

<tbody>

</tr>
<tr>
<td>500 pieces and over</td>

<td>No Charge</td>
</tr>
<tr>

</tbody>
</table>

All withdrawals should be for at least minimum quantity per item as indicated on catalog sheet. CORY items cannot be considered as part of a Blanket Order.

REPRODUCTION OF ADVERTISING COPY
IMPRINTING: Copy is “hot stamped” into the material using upper case, block type letters. Paint filled for permanency.

PRINTING OR SILKSCREEN PROCESS: Copy applied to surface of material using a cut or a screen, then covered with transparent protective coating.

TRADEMARKS AND SPECIAL COPY require special dies, cuts or screens. Submit good black and white glossies of such trademarks or copy.

SUBMITTING MATERIAL FOR QUOTATION: Material should not exceed six times the actual size, nor should it be smaller than the actual size it is to appear on the merchandise. Avoid newspaper ads, book match covers, cloth labels. Ben-Day or half-tone prints are not suitable.

Artwork must not be defaced in any way and should be shipped flat. All signatures should be written in black ink. Unless customer provides specifications, AUTOPOINT assumes the responsibility of arranging copy and layout to the best advantage.

FOR BLACK & WHITE REPRODUCTION: Submit two clear black and white drawings for photography.

FOR COLOR REPRODUCTION: Submit a separate copy for each color (2 copies for 2 colors; 3 copies for 3 colors). All copies should be clean, unmarred and identical in size and appearance.

PENCIL IDENTIFICATION AND CONTROL
Pencils may be ordered in different colors for each department of an organization. Example: Black pencils for traffic department, blue for accounting department, and red for sales, etc., etc. Pencils can further be identified imprinted, “Property of—Co.” Accurate control can be obtained by having pencils numbered. One hundred pencils numbered consecutively, numbers 1 through 100, costs only $1.44. (Only 4% of one cent per digit).

MAILING SERVICE
Sturdy mailing containers are available for all AUTOPOINT products. Tubes for pens and/or pencils—.05 each (net); for Pen and Pencil Sets—.10 each (net). Other mailers are priced on individual catalog sheet.

Individual Mailing Service includes enclosing cards, when supplied: packing; sealing; labeling and mailing. If pre-addressed labels are supplied, individual AUTOPOINT items will be mailed for .05 (net) per item—individual CORY items .25 (net) per item. Add .05 to each item if we are to address labels. The cost of the mailing carton, postage and insurance is additional, of course.

CANCELLATIONS
Since all items are manufactured and assembled in accordance with the customer’s specifications, cancellations cannot be accepted without prior written approval from the AUTOPOINT Company.

GUARANTEE
AUTOPOINT “Grip-Tite” Tip pencils are Unconditionally Guaranteed for the User’s Lifetime in accordance with written guarantee accompanying each pencil. All AUTOPOINT merchandise is guaranteed against defective workmanship or materials. Any product found to be defective in these respects will be repaired at no charge when returned to our factory. Products misused or damaged will be repaired at cost.
The exclusive "GRIP-TITE" Tip
Three vice-like jaws expand under pressure to hold the lead with resilient spring-tension. Supports lead uniformly at the point of greatest writing pressure...lead can't turn, wobble, or fall out. Makes lead usable down to the last 1/32" of an inch...Even when broken into pieces, the lead will function efficiently.

The precision SPIRAL GUIDE TUBE
Goes right into the shank of the pencil tip...pulls (does not push) lead-plunger downward, so plunger cannot jam or bend. Guides the lead and prevents clogging.

The special SAFETY ZONE
Automatically limits plunger-travel to keep pencil from being turned too far after last particle of lead is used.

The keyed ENGAGER HEAD
Precisely fits into the guide-slotted barrel to make movement absolutely unvarying.

The perfect LEAD/PLUNGER ALIGNMENT
Two strong plunger teeth infallibly align plunger with lead. As barrel turns, plunger uniformly exerts 1-1/2 lbs. of pressure to propel lead.

The spring-tension CRESCENT FRICTION PADS
Engineered for just the right resistance when finger-grip is turned. Holds finger-grip firmly in place when re-inserted after lead change. Never too loose—never too tight.

The multiple-LEAD MAGAZINE
The exact leads of the writer's choice kept right inside the pencil for quick refilling when another lead is necessary.

The efficient ERASER GRIPPER
High-quality erasers are held between "Grip-Tite" talons that hold the last half of the eraser as firmly as the first half. Quickly slips in and out for eraser extension or new eraser installation.

The easy INSTANT ADJUSTMENT
Easy load; pull off finger-grip, unscrew plunger, insert lead. Writing continues with only an occasional twist of the finger-grip to extend lead.

The superlative MATERIAL COMPONENTS
Molded barrels cured for additional strength, with Bakelite cones molded right into the tip. Over-strength metal parts throughout.

AutoPoint pencils thrive on the toughest use, yet have precision limits comparable to those of a fine wristwatch. The exacting 57 INSPECTIONS
Over 57 different, carefully engineered inspections insure every AutoPoint pencil to be a precision-built machine-in-miniature.

THE FAMOUS AUTOPOINT TUNGSTAR™ BALL!

AutoPoint Ball Point Pens are scientifically designed to provide the finest in writing ease and dependability.

As illustrated in the above drawing, ink is fed to AutoPoint's exclusive TUNGSTAR® Ball through the main ink channel plus five microscopic feeder channels. This insures complete ink coverage of the ball at all times. The ball is held in suspension by swaging which keeps it in perfect feed clearance...and it rotates on a thin film of ink. The result: perfect writing ease and performance from the instant you set the pen on paper!

In addition, AutoPoint pens employ only the finest inks, composed of expensive dyes and special solvents. These inks will not fade, smear or transfer. They flow smoothly—even in temperature extremes—and dry almost instantaneously. They are constantly checked for homogeneity, feathering, drying time, penetration, resistance to water and light, and microfilm reproduction. They meet the most rigid government and bank specifications—and are constantly checked and re-checked according to the most modern quality control methods.

It's unwise to pay too much . . . but it's worse to pay too little. When you pay too much, you lose a little money . . . that is all. When you pay too little, you might lose everything, because the thing you bought was incapable of doing the thing it was bought to do.

The common law of business balance prohibits paying a little and getting a lot—it can't be done. If you deal with the lowest bidder it is well to add something for the risk you run. If you do that, you will have enough to pay for something better.

John Ruskin
