This Article is brought to you for free and open access by the Industrial and Management Systems Engineering at DigitalCommons@University of Nebraska - Lincoln. It has been accepted for inclusion in Industrial and Management Systems Engineering -- Instructional Materials by an authorized administrator of DigitalCommons@University of Nebraska - Lincoln.

PROJECT REPORT EVALUATION

Team Being Evaluated	Your Team						
REPORT CHARACTERISTIC		Strongly Agree	Agree	Indifferent	Disagree	Strongly Disagree	Not Applicable
PROJECT SUMMARY							
The executive summary <i>briefly</i> summarizes the project, objectives, analysis, and conclusions without introducing any statistical or simulation jargon or a mass of numbers generated by the simulation model.		<input type="radio"/>					
PROBLEMS AND ISSUES							
The problem statement describing objectives/goals is clearly stated		<input type="radio"/>					
SYSTEM DESCRIPTION AND CONCEPTUAL MODEL							
The system under study is described so that a person unfamiliar with it can understand it (possibly includes a picture).		<input type="radio"/>					
Performance measures for evaluated the system are defined		<input type="radio"/>					
Assumptions are clearly stated		<input type="radio"/>					
Limitations are defined		<input type="radio"/>					
INPUT DATA COLLECTION							
Input data requirements - what specific data needs to be estimated/collected.		<input type="radio"/>					
Data collection or sampling plan is defined		<input type="radio"/>					
Method of sampling is appropriate		<input type="radio"/>					
Methods utilized in analyzing the data are correctly applied		<input type="radio"/>					
ANALYSIS OF THE RESULTS							
Results are clearly stated and presented (with graphics)		<input type="radio"/>					
Comparisons are appropriately connected		<input type="radio"/>					
Conclusions are substantiated by the data presented		<input type="radio"/>					
Generalizations are confined to the population from which the data was drawn		<input type="radio"/>					
Alternative hypotheses or explanations of the data are ruled out		<input type="radio"/>					
CONCLUSIONS							
State your interpretation of results and offer insight on whether you met your modeling goals.		<input type="radio"/>					
Improvements or modifications to the system are proposed		<input type="radio"/>					
CLEAR COMMUNICATION							
Writing is clear, logical, and organized		<input type="radio"/>					
Work is written with clarity and without error		<input type="radio"/>					

Overall, how would you rate the current quality of the report

Excellent

Good

Average

Poor

Unsatisfactory

Specify any improvements needed to the report
