### Nebraska Ag Facts

- Cash receipts from farm marketings contributed over \$12 billion to Nebraska's economy in 2006, ranking 4th in the nation.
- Nebraska's six leading commodities (in order of importance) for cash receipts are cattle and calves, corn, soybeans, hogs, wheat, and dairy products, which represent 95 percent of the state's total farm receipts.
- Every dollar in agricultural exports generates \$1.64 in economic activities such as transportation, financing, warehousing, and production. Nebraska's \$3.3 billion in agricultural exports translate into \$5.3 billion in additional economic activity.
- Nebraska has 47,300 farms and ranches; the average operation consists of 964 acres (383 hectares); average net income per farm averaged \$50,977 during the 2002-2006 period.
- In 2007, Nebraska ranked second in ethanol production capacity, with 20 operating plants having production capacity of 1.3 billion gallons (4,921,035,600 liters). Over 40% of the state's 2006 corn crop was utilized in ethanol production.
- The Nebraska livestock industry accounted for 64% of the state's total agricultural cash receipts in 2006. Nearly 55% of Nebraska farms have livestock or poultry operations.
- In 2005, Nebraska was ninth nationally in certified organic cropland acres (77,820 acres/31,493 hectares) and 10<sup>th</sup> in certified organic pasture acres (17,655 acres/7,145 hectares).
- Of every dollar spent on food in 2002, the farm value was 19 cents; 38 cents went to labor used by manufacturers, wholesalers, and retailers. The remaining 43 cents paid for marketing costs such as packaging, transportation, and advertising.

### Nebraska's Natural Resources

- Nebraska's farms and ranches utilize 45.6 million acres (18,453,739 hectares) – 93% of the state's total land area.
- Nebraska is fortunate to have aquifers below it. If poured over the surface of the state, the water in those aquifers would have a depth of 37.9 feet (12 meters). The state has 91,609 registered, active irrigation wells supplying water to 7.6 million acres (3,075,623 hectares) of harvested cropland and pasture. Of the total cropland harvested during 2002, 43 percent was irrigated.
- Nearly 24,000 miles (38,624 kilometers) of rivers and streams add to Nebraska's bountiful natural resources.
- There are nearly 22 million acres (8,903,120 hectares) of rangeland and pastureland in Nebraska – half of which are in the Sandhills.
