This Article is brought to you for free and open access by the Buros-Nebraska Series on Measurement and Testing at DigitalCommons@University of Nebraska - Lincoln. It has been accepted for inclusion in The Future of Testing by an authorized administrator of DigitalCommons@University of Nebraska - Lincoln.
Subject Index

A
Abilities
assessment of, 158–167
Academic skills, 101, 102
Achievement testing, 3, 73–89
Actuarial assessment, 194–195
Adaptive testing, 37–39, 83, 84
and criterion referenced tests, 38
Albermarle Paper Company v. Moody, 132
American College Test (ACT), 76, 86
American Educational Research Association (AERA), 100
American Psychological Association (APA), 100
Anderson v. Banks, 117, 128
Aptitude testing, 3, 73–89
Aptitude-treatment interaction, 14
Armstead et al. v. Starkville
Mississippi municipal separate school district, 118

B
Back to basics, 75–77
Barclay Classroom Assessment System, 49
Base rates, 191–192
Behavioral deficits, 233
Behavioral objectives, 15
Bias, 73–74, 152
determination procedures, 153

Board of Education of Northport East Northport v. Ambach, 130
Brain
damage to, 213–214, 219, 224–225
lesions, 204
relationship to behavior, 204
zones of, 216
Brito v. Zia Company, 132

C
Case study research (naturalistic), 17
Certificates of attendance
special diplomas, 130
Certification examinations, 4, 16, 145–181
cognitive level of items, 169
level of proficiency, 169–170
licensure and certification, 168–169
validity, 170
Civil Rights Movement, 74
Civil Service Reform Act, 131
Classification
competent/incompetent, 120, 156
error rates, 105
pass/fail, 156
Classification schemes, 108, 110–111, 113–114, 196
in clinical assessment, 188–189
continuum models, 108
decision-theoretical approaches, 110
Classification schemes (cont.)
judgment methods, 108
judgment/empirical methods, 108
purposes, 111
recommendations, 113–114
state models, 108
Client outcomes, 164–165
Clinical assessment, 186–194
and base rates, 191–192
and illusory correlation, 191
and lack of adequate knowledge base, 187
and lack of classification system, 188–189
and multicultural issues, 190
Cognitive level of items, 169
Competency-based education, 132
Competency testing for the handicapped, 129–130
Computer, 30–61
and achievement testing, 32
in data analysis, 36–37
computerized testing, 83
in instruction, 30–33
micro computers, 9
simulations, 175–177
use in test administration, 3, 38, 42–43
use in test development, 3
use in test interpretation, 3, 43, 44, 194–195
Construct
Interpretation of, 281–283
in organizational psychology, 282
in personality measurement, 282
Construct validity, 154
Content domains, 173
impact of public policy on, 175
Content validity, 153, 277–278
Criterion-referenced testing, 15, 33, 38, 75, 89–143
Criterion validity, 153–157
criterion problem, 155–156
technical problems, 156–157
Criterion problem, 155–156
and predictive validity, 155
Critical abilities, 157–159, 164, 178
client outcomes, 164
department of learning, 158–159, 170, 174
identification, 157
linkage between critical abilities & relation to performance, 159
requirements for licensure, 158
structure of validity arguments, 159
Critical abilities approach, 160–161
Curriculum referenced assessment
and item banking, 53
factor analysis, 54
test scoring, 56–59
Cut-off scores, 15, 105, (see also standard setting methods)

D
Debra P. v. Turlington, 115, 117, 128
Decisions errors, 111
Differential diagnosis, 206, 214
Determination of passing score, 150 (see also standard setting methods)
judgment-based procedures, 150
norm-based methods, 150
and norms group, 150
Diagnosis, 205
of dementia, 227
Dickerson v. U.S. Steel, 132
Domain of competencies, 100, 101, 126
Domain of human motives ("Affective"), 18
Domain specification strategies, 103
Draw-a-Person Test, 197
DSM III, 5, 188–189

E
Educational accountability, 75, 86, 91
Educational objectives, 271
Educational requirements, 147–148
and licensure examination, 147–148
Elevations, 50
Equal Employment Opportunity Commission, 131
Equality of educational opportunity, 17
Equating, 100, 124–126, 129
horizontal, 125
major approaches, 125
scaled scores, 126
vertical, 125
Ethics, 148
Extraneous factors, 167–168
and measures of stability, 167–168
and standard test development procedures, 168
External validity, 274
F
Follow-through evaluation, 17
Functional mental disorders, 229–232
Functional psychosis, 230
Functional systems, 215–216
Functional theory of the brain, 215
Future
and computers, 50, 194–195
classification systems, 196
situational variables, 196–197
standardized interviews, 198
and test administration, 54–56
and test development, 51–54
and test scoring, 56–59

G
Georgia Association of Education v. Nix, 108
Generalizability, 167
Graduate Management Admissions Test (GMAT), 76
Graduate Record Examination (GRE), 75–76
Griggs v. Duke Power, 132

H
Halo effect, 280
Halstead Impairment Index, 220
Halstead-Reitan Battery, 209–214, 230
Hemispheric lateralization, 208
Historical elements, 204–206
and behavioral effects of brain damage, 204
brain lesions, 204
quantitative approach, 204

I
Illusory correlation, 191
Impact of public policy, 175
Impairment Index, 219–220
Inferential techniques, 208, 219
Information processing, 78, 80, 81
Intellectual functioning, 228
Interest testing, 246–260
Intellectual processing, 3
Intelligence
comptential theory of intelligence, 78
crystallized, 86
metacomponents, 78
Internal validity, 274

Intraindividual differences, 218
Item banking, 15, 33–35, 52–53
and curriculum-referenced, 53
Item bias, 118
aposteriori (judgmental) analysis, 118
definition, 118
judgmental review, 118
statistical analysis, 118
Item calibration, 33–35, 51–52
and criterion-referenced achievement tests, 33
and item banks, 33
and item pools, 33
and item response theory, 33–35
and response bias, 35
Item pools, 33
Item response theory, 33–35, 84
Rasch model, 33–34
two and three parameter model, 33
Item writing, 30–33
and computer assisted instruction, 30–33
and Coursewriter, 31
and vocalic center groups, 31

J
Job analysis, 162–167, 173–178, 283
empirical, 167, 173, 178
procedures, 162
Job proficiency measurement, 284–285
Joint technical standards
for educational and psychological tests, 4,
35–36, 44, 161–163
Judgment-based standard setting procedures, 150
and minimal pass level, 150
Kaufman Assessment Battery for Children, 78, 223
Knowledge structures, 11, 79–82, 86

L
Larry P. et al. v. Wilson Riles et al., 118
Law School Admissions Test (LSAT), 76
Learning abilities, 15, 16
Lesions, 210, 211
Level of performance, 208
Level of proficiency, 169–170
Licensure and certification, 168–169
Licensure examinations, 4, 16, 145–181
Life skills, 101, 102
LISREL, 53
Localization, 205
Localization of brain damage, 220
Luria-Nebraska Neuropsychological Battery, 215–218, 230
emotion disturbance, 237
and functional theory of the brain, 215–216
validity, 218
zones of the brain, 216
predicting individuals neurological status, 219
Nonbiased assessment, 120, 130
Noninvasive technique, 204
Normative data, 228

O
Objective records, 284
Organic mental disorder, 229–231
Organicity, 205
Organizational psychology, 282

P
Pase et al. v. Joseph P. Hannon et al., 118
Passing score, 95 (see also cut-off scores)
Pathogenic signs, 208
Pathonomonic signs, 215
Pattern analysis, 208–209
Performance assessment, 127
Performance measurement, 5
Performance standard, 93, 100
Personality assessment, 32–33, 282
Predictive validity, 155, 160–161
Process structures, 80–82
Profile analysis, 47–48
Projective tests, 197
   Draw-a-Person, 197
   Rorschach, 197
Psychotherapy outcome research, 16
Public disclosure, 150

Q
Quantitative approach, 204, 206–209
differential diagnosis, 206, 214
inferential techniques, 208
pathogenic signs, 208, 215
pattern analysis, 208–209

R
Rasch model, 33–34
Reading level of examination, 168
Reliability, 35–37, 121–124, 129, 167, 246–47
decision consistency
interscorer consistency, 123
interclass correlation, 123

M
Mastery, 15 (see also criterion referenced testing)
Mastery tests, 32
Measurement of self-concept, 19–20
Memory losses, 227
Minimal pass level, 150, 171, 172–173
Minimum competency testing, 4, 16, 75, 89–143
Minimum competency testing movement, 89
Minnesota Multiphasic Personality Inventory, 193–94, 210
Multicultural issues, 190
Multivariate analysis, 35, 220

N
National Academy of Sciences Committee on Ability Testing, 74
National Assessment of Educational Progress (NAEP), 76, 91
National Commission for Health Certifying Agencies, 163
National Commission on Excellence in Education, 82, 91
National Council on Measurement in Education (NCME), 100
National Institute of Education, 93, 97
Neurological diagnosis, 220
Neuropsychological assessment
   of adult psychiatric patients, 229–233
   of children, 224–228
   functional mental disorders, 229–231, 232
   and functional psychosis, 230
   and organically related disorders, 229–230
Neuropsychological test interpretation
   and brain damage, 219
   interpretation of patient’s protocol, 219

P
Performance assessment, 127
Performance measurement, 5
Performance standard, 93, 100
Personality assessment, 32–33, 282
Predictive validity, 155, 160–161
Process structures, 80–82
Profile analysis, 47–48
Projective tests, 197
   Draw-a-Person, 197
   Rorschach, 197
Psychotherapy outcome research, 16
Public disclosure, 150

Q
Quantitative approach, 204, 206–209
differential diagnosis, 206, 214
inferential techniques, 208
pathogenic signs, 208, 215
pattern analysis, 208–209

R
Rasch model, 33–34
Reading level of examination, 168
Reliability, 35–37, 121–124, 129, 167, 246–47
decision consistency
interscorer consistency, 123
interclass correlation, 123
indices of, 124
parallel forms, 122
Replicated correlates, 50
Response bias, 35
Response set, 166
Rising tide of incompetence
(regression toward mediocrity), 131
Role of judgments, 111
Rorschach, 197

S
Self-scored inventories, 259
Setting standards
responsible for, 105
Situation effects, 189
Situation and examiner effects, 189–190, 196
Situational determinants, 273–274
Social darwinists, 11
Specific validity, 274–278
Standard setting, 171–173
interpretability of standards, 171–172
validity, 172–173
Standard setting methods, 107–108, 128
criteria, 107
methods, 107 (see also setting standards)
Standards, 159, 169, 171–172
improving, 172
interpreting, 172
Standards for educational and psychological
tests
(see joint technical standards for educational
and psychological tests)
Standardized interviews, 198
Standardized test administration, 127
Strong-Campbell Interest Inventory, 251–252

T
Test administration, 37–41, 54–56
Test development, 30–37, 51–52
Test items (see Item Calibration), 31–35
Test scoring, 41–42, 56–59
Testing
alternatives to, 285–286

V
components, 115
computational methods, 160–161
concurrent, 120
construct, 154, 161
content, 115, 153, 159, 160, 164
criterion-related, 120, 154–157, 160
curricular, 115
decision, 120
definition, 114
instructional, 116, 128
predictive, 120, 155
Validity generalization, 279–280

W
Wade v. Mississippi Cooperative Extension
Service, 132
Wechsler Adult Intelligence Scale, 210, 228
Wechsler Intelligence Scale for Children, 211, 225
Wide Range Achievement Test, 210
