Abstract

My project is based around conspiracy surrounding the American government. Throughout my research I found detailed information based on the John F. Kennedy assassination, Area 51, and Osama Bin Laden.

Throughout my in-depth research and discovery, I found the JFK assassination to be the most intriguing. I found a rather large list of the abnormal similarities between this and the Lincoln assassination. I found this to be rather tormenting and abnormal. I concluded that each and every individual should see the truth behind the research I have found due to its importance and its capability to change the views of so many.

Key Points

• Friday, November 22nd, 1963 Robert F. Kennedy was eating lunch in his Virginia home when he received the news from FBI Chief J. Edgar Hoover that his brother had been shot.

• Later on in life, Robert recalled that the man debriefing the news seemed to be reporting the story with pleasure. This caused him to distrust the secret service and the FBI.

• Robert F. Kennedy is considered America’s first J.F.K assassination conspiracy theorist.

• There are 16 similarities between Kennedy’s assassination and Lincoln’s.

• An example of this would be, John Booth “Lincoln’s assassin” ran from the theater and was caught in a warehouse. Lee Harvey Oswald ran from a warehouse and was caught in a theater.

Conclusion and Discussion

The findings I have uncovered seem to speak for themselves. I say this because each and every thing I found has the capability to make any sane or somewhat intelligent person question their beliefs or have them think harder about their views. When it comes to the JFK assassination, there is no doubt there is more to it than people think.
