Marj Wileke Consultant

The Public Policy Center also thanks Beverly Buck and Peggy Cuciti, authors of the University of Colorado – Denver report "Funding Map for After-School Programs in Colorado: Proposal to Colorado Afterschool Network" for their advice and authorization to use the federal funding template they developed.

We thank the many representatives of Nebraska organizations provided helpful information about expanded learning opportunity programs and funding.

Funding for this project was made possible by the Nebraska Community Learning Center Network through a grant from the National Governors Association Center for Best Practices in support of Governor Heineman's Summit on Expanded Learning Opportunities.

Introduction

In January 2008, Nebraska Governor Dave Heineman hosted the Governor's Summit for Expanded Learning Opportunities. The Summit explored collaborative efforts of schools and community leaders to create expanded learning opportunities for Nebraska's children and youth. Following the event, Governor Heineman asked the Nebraska Children and Families Foundation and the Nebraska Community Learning Centers Network to map funding for expanded learning opportunities in Nebraska. This report is a first step toward fulfilling that request.

This report begins to summarize and present current and potential federal, state, local, and private dollars available to support expanded learning opportunities. It is the long term goal of the Nebraska Children and Families Foundation and the Nebraska Community Learning Centers Network to promote greater efficiencies through increased coordination, advocate for additional support for projects, and enhance the ability to build a broad constituency for additional, stable cross-sector funding for such community-based initiatives.

A Note on Terminology and Population

Throughout this report, the term "expanded learning opportunities" will be used to collectively refer to early childhood programs for children from birth to five, afterschool programs for school-age children (including Community Learning Center programs), and parental involvement programs. In Nebraska, persons under 18 years of age comprise a sizable portion of the state's population: approximately 25% (or 445,410 children and youth). Approximately 14% (or 62,357) of Nebraska's children and youth live in poverty.

Fund Mapping Challenges

What is the challenge in tracking how much funding is being spent on expanded learning opportunities in Nebraska? Mapping funds for expanded learning opportunities is difficult because of: the multitude of organizations who deliver programs; the diverse sources of personal, public, and private funds that support programs; and the sometimes duplicative or overlapping information about funding sources (see *Follow the Money: A Tool for Mapping Public and Private Funds for Afterschool Programs* for a discussion of challenges). Across Nebraska, many individuals and organizations provide expanded learning opportunities for Nebraska's children. These range from at-home care providers to large, statewide programs for youth. Some programs are licensed or certified, while others are not. Some are operated by governmental agencies and others are operated by faith-based organizations, other non-profits, or individuals. As of now, there is no single point of contact for the many programs that comprise expanded learning opportunities across Nebraska.

Analyzing the flow of funds to support these programs is crucial to understanding what financial commitments are being made, by whom, to provide educational opportunities for our children and youth. To what extent are Nebraskans funding programs? Are there opportunities for collaboration to make better use of funding? What kinds of programs are not receiving funding? Are there funds available that are not being tapped? These are important questions that this report begins to answer.

¹ This document can be found online: http://www.financeproject.org/publications/mappingtoolv2.pdf. Document accessed June, 2008.

Approach and Presentation

The fund mapping this report describes relied on a variety of sources to develop a picture of funding for expanded learning opportunities. Some of the data presented in this report was gathered by other organizations and is presented or summarized here, and some of the data was collected expressly for this report. This report is a snapshot that presents data about how programs are currently funded, as well as information about other possible sources of information, and the report is organized accordingly:

Current funding for programs is presented first to describe the funding that is currently supporting Nebraska's expanded learning opportunities. The information includes:

- The results of a 2008 Survey of Nebraska Funding Sources;
- Summary of Federal Funding Programs;
- Early Childhood Care: A summary of funding sources contributing to the early childhood system in Nebraska reported in the *Child Care and Development Fund Plan for Nebraska FFY 2008-2009*;
- A Survey of Nebraska Afterschool Programs;
- A summary of Federal 21st Century Community Learning Center funding in Nebraska;
- Summary of grants from the Nebraska Crime Commission; and,
- Parental Involvement.

Potential funding is presented next to indicate the array of federal and other funding that may also be available to support Nebraska's expanded learning opportunities. There is some overlap between current funding and possible funding as this project did not attempt to "deduplicate" reported funding. The data includes:

- A summary of federal programs that appear to support expanded learning opportunities; and,
- Additional funding opportunities based on discussion of the 2008 survey of funding sources.

The report ends with a discussion of **future directions and conclusions**.

Fund Mapping Results

This report presents fund mapping in two ways: current funding devoted to expanded learning opportunities and future funding that is available to support expanded learning opportunities. As noted above, the data come from many information sources, thus there are areas of overlap and duplication. For example, there are some federal programs currently funding programs in Nebraska (e.g., U.S. Department of Education's 21st Century Community Learning Center program) that are reported in the *Current Funding* sections, as well as in the *Potential Funding* sections of this report. In order to provide as complete a picture as possible of current and potential funding available to all expanded learning opportunities throughout the state, this report errs on the side of inclusion of funding information rather than erring in omitting information.

Current Funding

Funding for expanded learning opportunities comes from a wide range of programs. In this section the results of a survey of public and private funders in Nebraska is presented. Next, a review of federal funding for programs is provided. Finally, funding targeted for each of the three the specific types of expanded learning opportunities (early childhood, afterschool, and parent involvement) is presented.

Survey of Nebraska Funding Sources

To begin describing the types of public and private funding being used to support expanded learning opportunities, a convenience sample of Nebraska funders was surveyed. Approximately 40 organizations were invited to complete an on-line survey; 18 organizations responded. Although the survey only begins to reach the multitude of funders in the state, the results provide a starting place and a glimpse of funding sources.

Table 1 categorizes the survey responses based on the type of organization. The broad array of organizations represented is indicative of the range of funding streams that contribute to the delivery of services in this area. As noted earlier, a number of the funding sources reported in this table also appear in other sections throughout this report.

Table 1

SUMMER 2008 SURVEY OF ORGANIZATIONS THAT FUND EXPANDED LEARNING OPPORTUNITIES IN NEBRASKA					
Organization	Description of Amount/Range of Annual Funding				
Nebraska Department of Health and Human Services	 Approximately \$15.67 million in child care funds for eligible school-aged children, with additional \$4.68 million in earmarked funds for raising quality in child care. 				
	 \$2.5 for services through child welfare. 				
	 \$9 million federal grant to fight youth alcohol use over the next 4 years 				
Nebraska Department of Education	 Over \$26 million for Education for Individuals with Disabilities; 				
	 About \$60 million from No Child Left Behind, including about \$4.5 million for 21st CCLC 				
Nebraska Workforce Development – Department of Labor	 About \$2.5 million for Workforce Investment Act Title I B 				
Nebraska Coalition for Juvenile Justice	 About \$500,000 for Juvenile Services Grant Funds 				
	 Around \$1.5 million for County Juvenile Services Aid Program 				
Foundation/Charitable Organizations	Varied levels of funding reported:				
	 \$3,000 from a small local foundation, 				
	 \$100,000 from a large local foundation, 				
	 \$260,000 from a statewide charitable organization, 				
	 \$3.5 million budget for 43 programs from large charitable organization 				

In this small convenience survey of funders, an overwhelming majority (90%) believed that funding for their programs was "firm/reliable," meaning they felt that funding for their particular programs is secure into the foreseeable future. This evidence suggests a much greater confidence in funding than may be felt at the service delivery level. Appendix A includes additional results from the survey.

Summary of Federal Funding Programs

The federal government provides funding for expanded learning opportunities. A table developed for a Colorado Afterschool Network fund mapping project was adapted and updated to include information pertinent to Nebraska (see Appendix B). Federal funding has been categorized based on the department/agency granting the funding, including: Agriculture, Education, Health and Human Services, Interior, Justice, Labor, Environmental Protection Agency, and Corporation for National and Community Service. The information presented in the table was collected directly from the Catalog of Federal Domestic Assistance (CFDA) website (http://www.cfda.gov/) and federal program websites. In some cases, there was incomplete or conflicting information about the funding and grantees.

Although the table attempts to portray information on federal funding for expanded learning opportunities as completely as possible, it is possible that some programs were missed. The federal programs identified are on-going direct service-related programs, and do not include, for example, research grants that have an element of service delivery, or special federal grant competitions. Thus these figures should be considered neither exhaustive nor authoritative, rather they are a representation of federal funding in Nebraska. However, it is instructive to note that the majority of funding identified in Appendix B, explicitly or partially supporting expanded learning opportunities, comes from the U.S. Department of Health and Human Services. Table 2 provides a summary of the current federal funding through programs identified in Appendix B.

Table 2

SUMMARY OF NEBRASKA GRANTS THROUGH FEDERAL EXPANDED OPPORTUNITY LEARNING-RELATED PROGRAMS IDENTIFIED IN APPENDIX B							
Federal Department/Agency Number of Nebraska Total Nebraska Grantees Funds							
Department Of Health & Human Services	32	\$49,251,221					
Department Of Education	24	\$11,615,862					
Department Of Agriculture	3	\$8,847,018					
Department Of Justice	19	\$6,810,530					
Corporation For National And Community Service	6	\$3,889,400					
Department Of Labor	1	\$2,544,921					
Environmental Protection Agency	1	\$12,624					
Department Of Interior	0	\$0					

_

² The format and layout for the table was based on the report: "Funding Map for After-School Programs in Colorado: Proposal to Colorado Afterschool Network," prepared by The Center for Public Private Sector Cooperation and Center for Education Policy Analysis, School of Public Affairs University of Colorado at Denver and Health Sciences Center, July 2007. The information in the table was derived from the Catalog of Federal Domestic Assistance (CFDA); all information can be found online at: http://www.cfda.gov/.

Early Childhood Care

Early childhood programs are those designed for children from birth to five. There are a large number of federal and state programs that fund early childhood programs. Appendix C contains a table of state and federal funding for early childhood programs in Nebraska that was originally included as an appendix to the Child Care and Development Fund Plan for Nebraska FFY 2008-2009.³ The table includes funding that is available exclusively, or partially, for early childhood programs. Some of the programs include those for young children, as well as those that make funding available for older children. For example, U.S. Department of Education and State of Nebraska Child Care and Development Funds provided \$71 million during 2007-08. Of that amount 69% (\$49 million) went to children birth through preschool ages, 22% (\$16 million) went to school-aged eligible children, and the remaining 8% (\$6 million) was spent for other categorical expenditures (e.g., children having special care needs, care provided in the family's home, other miscellaneous fees charged in child care settings).

The table in Appendix C shows that federal funding far outstrips state spending in this area. The federal government provided approximately \$174 million dollars for programs including those that serve the 0-5 population: over \$91 million through the U.S. Department of Health and Human Services; over \$51 million through the U.S. Department of Education; and over \$35 million for Head Start (Head Start is a U.S. Health and Human Services program, but was listed separately for illustrative purposes). In contrast, the State of Nebraska contributed approximately \$42 million: approximately \$37 million through the Department of Health and Human Services, and just over \$5 million through the Nebraska Department of Education.

Survey of Nebraska Afterschool Programs

Afterschool programs serve school-age children. Some programs operate only during the school year, while others also offer summer programming. During early 2008, Nebraska Children and Families Foundation and the Nebraska Community Learning Center Network surveyed afterschool programs throughout the state. The survey asked numerous questions about the characteristics of each program, including sources of funding (see Table 3).

The survey showed that there is a wide range of funding that support afterschool programs in Nebraska, and there are numerous combinations of funding streams that are employed by these programs. Most afterschool programs typically rely upon more than one source of funding; indeed, 58 of the 105 afterschool programs (55%) indicated that they rely upon two or more sources of funding.

When asked about the specific source of funding, over half (51%) of the afterschool programs report relying at least partly upon program fees to fund operations; 35% rely upon local funding from sources other than school districts; 31% rely upon local school districts; about 25% receive foundation funding; and Nebraska Department of Health and Human Services provides funding to 15%. Local governments also contribute to afterschool programming. For example, the City of Lincoln provided funding for afterschool programs in the city. However, the city has recently

announced a plan to reduce funding by about \$200,000 beginning with the 2009-2010 fiscal year.⁴ This situation highlights the sometimes tenuous nature of funding for such programs.

TABLE 3

percentages in this table do not add up to 100%.

Federal Funding for 21st Century Community Learning Centers Community Learning Centers (CLCs) are a specific type of afterschool program that are school-based or linked, operate during non-school hours, and serve school-age children. There are variations in the types of programming CLCs offer, but generally, they bring together core program components including afterschool and summer activities for youth, early childhood care and education programs, parental involvement activities, health and behavioral health

services, and community development programs. Nebraska's CLCs were also among the afterschool programs that responded to the afterschool programs survey discussed in the previous section.

The primary federal source of funds that contribute to Nebraska CLCs is the 21st Century Community Learning Center program from the U.S. Department of Education, and granted through the Nebraska Department of Education. (This funding is likely also reported above in Table 1 as "Nebraska Department of Education" funds.) As part of the No Child Left Behind Act, this program supports the creation of CLCs that provide academic enrichment opportunities during non-school hours for children. The program helps students meet state and local student standards in core academic subjects, offers a broad array of enrichment activities, and offers literacy and other educational services to the families of participating children. Because the 21st Century CLC is a formula grant, Nebraska has relatively little control over the amount of money

_

⁴ Information available online: http://www.lincoln.ne.gov/city/mayor/media/2008/062508.htm. Accessed: July, 2008.

it receives from the federal government, though the state does hold discretion over the direction those funds will take once they are obtained. Table 4 presents the funding made available through this program in recent years.⁵

Table 4

Nebraska Crime Commission
A "nontraditional" source of
afterschool programs in Nebraska
comes from the Nebraska Crime
Commission. The Crime
Commission administers grants to
localities in the state that are used
for both afterschool and mentoring
programs. The Commission
granted nearly \$600,000 in 2006.

Tuble 4

2002	\$1,522,706				
2003	\$2,755,958	81%			
2004	\$4,895,445	78%			
2005	\$4,856,279	-1%			
2006	\$4,807,715	-1%			
2007	\$4,807,715	0%			

\$5.297.714

10%

This money was used to serve over

1,000 youth at eight afterschool programs, and approximately 150 youth through seven mentoring programs. Appendix E provides a detailed description of some of the programs funded through Crime Commission programs.

2008

Parental Involvement

Although parental involvement is one of the three segments of expanded learning opportunities, there is little funding specifically for parental involvement. In fact, the review of federal funding in Nebraska (Appendix B) includes only one program, the Parental Involvement and Research Centers grant, exclusively dedicated to ensuring parental involvement in academic achievement. The surveys and other data sources collected for this report revealed little additional information about funding sources dedicated specifically to parental involvement.

Potential Funding

Summary of Federal Programs

The federal government provides a variety of funding sources for expanded learning opportunities, some of which have already been noted. Appendix B, which identifies current Nebraska federal funding grantees, also identifies federal programs for which there are no current Nebraska grantees; thus, the table presents a number of federal programs that have the potential to be used for expanded learning opportunities. However, some of these programs may have additional eligibility requirements or limitations on the amount of funding that could support expanded learning opportunities since programs vary in the ways in which funds may be disbursed and the amounts that can be distributed. For instance, some funding may be granted through formulas and others through competitive applications, while some funding may limit the amount that may be spent on "service delivery" (i.e., directly providing services/care to children) and others may have no such limitation. More in-depth information should be gathered about each of these programs to gauge how Nebraska might best maximize funding opportunities. A complete description of program criteria associated with possible funds will require a more in-

⁵ Appendix D provides a more detailed description of 21st CCLC funds in Nebraska, including a list and a map of Nebraska recipients of 21st Century Community Learning Center funding from 2005-2008.

⁶ Nebraska Coalition for Juvenile Justice: 2006 Annual Report to the Governor and Nebraska Legislature. http://www.ncc.state.ne.us/pdf/annual reports/NCJJ/2006 annual report10-07.pdf. Accessed: July, 2008.

depth analysis that is beyond the scope of this report. While Appendix B focuses on on-going, delivery-focused funding, it should be noted that special funding streams and research grants may also be available that could support expanded learning opportunities and that many federal programs, including those in Table 5 below, fund expanded learning opportunities *along with other programs*. The largest federal programs are listed in Table 5.

TABLE 5

LARGEST FEDERAL PROGRAMS WITH THE POTENTIAL TO FUND EXPANDED LEARNING OPPORTUNITIES					
CFDA#	Program Name	Federal Funding For Most Recent Year Available			
84.287	Twenty-First Century Community Learning Centers	\$981,166,230

84.282	Public Charter Schools Program	\$214,783,000			

Discussion of 2008 Survey of Funding Sources

As previously noted, the 2008 Survey of Nebraska Funding Sources only begins to document Nebraska funding that is, or may be, available to fund expanded learning opportunities. However, the results of the survey do begin to point to other funding sources. Such sources may include:

- Employers
- Private Non-Profits, including those that deliver or fund programs (YWCA's, YMCA's, Boys & Girls Clubs, etc.)
- Faith Based Organizations
- School districts
- Post-secondary Educational Institutions
- University Extension Programs
- State and Local Foundations and Charitable Giving organizations
- County and City governments, (including public libraries, recreation departments and centers, public safety departments, etc.)

Future Directions and Conclusion

This report presents and summarizes some of the current and possible funding available for expanded learning opportunities in Nebraska. The data show that there are numerous funding

streams for expanded learning opportunities. It is difficult to determine the exact flow of public and private dollars, since intergovernmental transfers are so common, a multitude of individual and organizations provide services, and because there are so many possibilities for the braiding of funds. The research conducted for this report does not allow for a full description of the ways in which dollars flow and the ways in which various organizations choose to seek out and combine funding streams. However, the report provides an initial glimpse of current and potential funding.

In conclusion:

- 1. A review of current and possible funding for expanded learning opportunities indicates that there are possible additional funding sources that may be tapped for support. There are federal programs for which there were no Nebraska grantees identified, and some programs were being successfully funded by sources that other programs had not yet tapped (e.g., Community Development Block Grants, faith-based support). It would be beneficial for advocates to further explore funding opportunities:
 - a. Data suggest that there may be untapped federal funding available to support expanded learning opportunities in Nebraska. Further investigation should be initiated to identify likely funding, based on eligibility and other program requirements.
 - b. Partnerships with researchers might yield funding for delivery of services under the umbrella of research projects.
 - c. Information sharing and collaboration among Nebraska's expanded learning opportunity programs may spawn ideas for additional organization-specific or statewide funding.
 - d. Studies of Nebraska or other states' programs may yield promising ideas. Interested parties may want to take different methodological approaches than those utilized in this report. Case studies of localities where successful, innovative expanded learning opportunities have been implemented have the potential to provide stakeholders with blueprints for other communities to use. In-depth interviewing and consulting might yield similarly valuable lessons and information.
 - e. There may be some previously untried funding opportunities through vouchers, tax incentives, or other legislatively-created mechanisms.
- 2. Although this report cannot be construed as comprehensive in scope, the data presented clearly indicate that millions of dollars are being spent to provide expanded learning opportunities throughout the state. However, caution is needed in interpreting these results as indicative of adequate funding for these programs.
 - a. Seemingly large amounts of funding, when calculated on a per student basis, may quickly become fairly nominal amounts. For example, the \$71 million in federal Child Care and Development Funds serves, on average, 16,857 children each month, or \$350 per child per month. Advocates for improved funding should assemble evidence of a definitive need for greater funding based on relative rather than absolute amounts.

- b. Funding for expanded learning opportunities is not evenly divided among its three segments: early childhood, afterschool, and parent involvement. It would be incorrect to assume that all three areas are faring as well, or as poorly, as the other. Parental involvement, in particular, is an important objective in many early childhood and afterschool programs; however, we could identify only one program, U.S. Department of Education's Parental Information and Resource Centers (CFDA 84.310) with funding specifically for parental involvement.
- 3. Greater coordination among programs that provide expanded learning opportunities may reveal opportunities for collaboration, certainly for funding, but also for delivery of quality of services and advocating for Nebraska's children. While this is certainly true for programs and collaborations serving rural Nebraska communities, greater coordination of programs serving the needs of Nebraska's larger metropolitan areas would also be likely to lead to greater opportunities to attract new funding and braid existing funding streams to expand services to meet the needs of more Nebraskans.

Appendix A

Summer 2008 Survey of Organizations that Fund Expanded Learning Opportunities

A survey of organizations that fund expanded learning opportunities was conducted in July and August 2008. Potential funders were identified in consultation with the Fund Mapping Advisory Committee. Each potential respondent was contacted via telephone or email and was invited to complete an online survey. In the hope that the survey would reach as many organizations as possible, each organization was encouraged to forward the online survey link to others who might be able to provide useful information. In the end, there were 17 respondents to the survey and 4 respondents that chose to report on more than one program, effectively giving us 22 responses to our inquiry. The survey was in no way intended to be scientific; the survey simply served to provide greater texture to the other information sources that have been compiled in this report.

Funding Sources

Respondents were asked to provide information on numerous programs. The results of that question show that the primary source of dollars was the federal government, followed by state government, businesses and corporations, donations and foundations. A large majority of respondents reported using a combination of these funding sources to fund various services. However, the survey did not allow us to measure how heavily each organization relies on one source of funds compared to another.

Table C1

What is (are) the source(s) of funds that are made			
available for this program?			
Source	Frequency		
Federal Government	13		
State Government	8		
Businesses/Corporations	7		
Donations	7		
Foundation	5		
Fee for Service	3		
Other	2		
City/County Government	0		

The Future of Funding

Respondents were asked how they felt about the future of funding for the mechanism they identified in the survey. A vast majority (20) of the respondents reported feeling that the funding for their programs was firm/reliable. This is in comparison to two respondents that felt funding for their program was soft/vulnerable.

Table C2

How do you view the sustainability of the program?		
Firm/Reliable	20	
Soft/Vulnerable	2	

Specifics of Funding

When asked whether there was a matching requirement for the program in question, 18 of 22 respondents indicated that no matching requirement existed.

Table C3

Is there a matching requirement for the program?	
Yes	4
No	18

⁸ Attachment 2.1.2B of the "Child Care and Development Fund Plan for Nebraska FFY 2008-2009." The information can be found on the Nebraska Department of Health and Human Services website at http://www.dhhs.ne.gov/chs/chc/docs/CCDF-StatePlan.pdf. Accessed July, 2008. This table provides a "snapshot" of the funding sources contributing to the early childhood system in Nebraska. These funds are generally made available annually, but may represent different fiscal years. The document summarizes allocations made, the general purpose of the funds, and when available, data was provided as to numbers served, and eligibility required. The information provided is for those allocations/appropriations as known and communicated during the time period October 2006-May 2007. Information was compiled by Nebraska's Together for Kids and Families Project.
