Speaker Presentations

Rodger Holdsworth

Director, Management Systems Risk, Reliability and Safety Engineering

Dr. Chris Oynes

Regional Director, Gulf of Mexico Region, U.S. Minerals Management Service

Ken Arnold

Chief Operating Officer Paragon Companies

Tom Theriot

ExxonMobil Production Company Manager, Safety, Health and Environment

James Card

Senior Vice President American Bureau of Shipping

Carlos TadeuDa Costa Frage

E&P Structural & Naval Technology South/Southeast Division, PETROBRAS

Pedro Jose Barusco Filho

E&P Structural & Naval Technology Manager, Exploration & Production, PETROBRAS Welcome/Introductions

Opening Remarks

1996 WORKSHOP PURPOSE

Define the status of human factors spanning the life cycle of an offshore facility including design, fabrication and installation, field operations, management systems, standards and regulation and science and application.

WHAT WE LEARNED

- The 1996 workshop brought together three human and organizational factor disciplines:
 - Engineering & ergonomics
 - Process safety
 - Behavioral science as applied to the life cycle of offshore operations

ABB Lummus Global

US Department of Energy (DOE)

WHAT WE LEARNED (CONT)

To apply human and organizational factor disciplines within an organization, engineers and corporate leaders need a high level of confidence that the approach(es) they choose will meet the anticipated objectives

US Department of Energy (DOE)

WHAT WE LEARNED (CONT)

Practical application of time-proven science and technology, as related to each human and organizational factor discipline, supported by industry and regulatory consensus is needed for industry to embrace human factors as accepted practice as opposed to an add-on to existing safety programs

HFW2002 WORKSHOP PURPOSE

To work together to demystify human factors by documenting practical solutions to reduce incidents and improve safety, quality and reliability in the lifecycle of offshore facilities

US Department of Energy (DOE)

WORKSHOP OBJECTIVES

- Establish human factors awareness
- Identify human factors tools that can be used or developed to prevent incidents
- Integrate human factors principles into offshore design by assessing available guidance and identifying gaps and barriers

MOST COMMON QUESTIONS AND ANSWERS

Who is responsible for facilitating each work group?

Workgroup Chairs together with Co-Chairs and Scribes will facilitate the discussion on each working group paper topic.

US Department of Energy (DOE)

MOST COMMON QUESTIONS AND ANSWERS (CONT)

How can I provide input or contribute my knowledge and experience to the workgroup?

By submitting input and comments related to the working group paper at the workgroup session of choice or within 60 days following the workshop.

MOST COMMON QUESTIONS AND ANSWERS (CONT)

Can I move from one workgroup to another workgroup?

Yes, participants can move from one workgroup to another. However, it is requested that the flow of the discussion not be disrupted. Submit comments and input related to previous discussion during reviews or during breaks.
