It has been accepted for inclusion in Dissertations and Student Research in Entomology by an authorized administrator of DigitalCommons@University of Nebraska - Lincoln.
Master’s Project Proposal
Insectography: Insects in the World of Fiction
By Erin Bauer

My proposed Master’s Project is to develop a comprehensive list of fictional works (films/TV episodes, video games, children’s books, and novels) originally published or produced in the United States between 1950 and 2012 about or including insects, spiders, related arthropods (many times anthropomorphized or mutated) and/or entomologists as main characters and playing a major role in the plot. Although the list will encompass both entertaining and educational works, it will not include textbooks or other non-fictional works. It will also not include “fictionalized” accounts of real processes. For example, a book such as *Hope for the Flowers*, where the story is told from the perspective of the main character, a caterpillar discovering its true nature through metamorphosis, or a book where an insect character learns the importance of friendship, would be included in this list. On the other hand, a book about a child character learning from her parents or teacher in a straightforward manner how a caterpillar turns into a butterfly, would not.

Each main topic area will include bibliographic information about the work, including but not limited to title, author/director, publisher/distributor, and copyright date. Following this will be a detailed description/synopsis of the work with an emphasis on how insects are involved.

Sections of the Insectography project will include:

**Bibliography: Children’s Books**

This list will include selected books about fictional insects/spiders/related arthropods written for older children (in general between the ages of 5-12). Because of the extensive number of insect books written for children, this list will be restricted to fictional books that include an insect or insects as the main character/s (i.e. Kelly Katydid learns a life lesson), rather than realistic representations used in teaching human characters or the reader (i.e. learning to count using ladybugs or learning about the life cycle of an aquatic insect in class). The list will not include books below the kindergarten level or books that are non-fictional instructional guides to insects.

**Bibliography: Novels (Adult and Young Adult)**

This list will include novels (young adult and adult) that involve insects or entomologists. This might include science fiction depictions that have an insect base.

**Filmography**

This list will include movies and television shows/episodes featuring insect/spider or entomologist related characters or insects as a main part of the plot. Genres might include
science fiction, sitcoms, animation, etc. but will not include nature programs or other non-fictional depictions.

**Video Games**

This section will list video games that are about or include insects...both those used strictly for entertainment purposes and those for education. Games in this list will be those that are full length, commercially available and available either free or sold as downloads or physical CDs. They may be developed by universities or other educational institutions, individuals, or companies.

**Strategy**

The Insectography will be listed alphabetically by type (Bibliography, Filmography, Video Games), subdivided by “Entertainment” or “Educational” where applicable, and finally by author/title, depending on the resource.

To compile the lists, I will search through various online and print resources, including movie and book databases, Amazon.com, Barnes and Noble, Netflix, library lists (such as bibliographies and filmographies), etc. I will also be able to include books, films, TV shows, and games I have personally seen and reviewed, and possibly interview or consult with librarians, teachers, or bibliographers.

A proposed timeline for this project is to begin summer 2012 and complete by summer 2013.

**Background**

As someone who has a library background (received my MLIS in 1996), I have always enjoyed bibliographical information. Also having an interest in entomology, I thought it would be fun to pull together a list of pop culture references about insects found in fiction. Being insects are the most diverse animals on this planet, it’s also fun to see how they are portrayed (realistically, as monster mutants, or anthropomorphically!) in various media.

Additionally, after creating the Pest Private Eye video game to teach youth about pests and integrated pest management, I began to wonder what all materials about insects were available for children and thought this might be worth exploring.

Although there are numerous small bibliographies of films or books about insects, there does not appear to be a full pop culture list that incorporates all of these media comprehensively within the timeframe of 1950-2012. It is my hope to fill that gap in the literature by offering such a list as a reference to others in the field (or anyone who is interested!)

**Outcomes and Future Directions**
My hope with this project is to offer a list of insect/entomologist fictional works in one document that will be beneficial to others in the field or the general public. The bibliographic data will provide readers with the references they need to access books, films/TV shows, and video games quickly. It will also increase awareness and publicize some works that may be more obscure or less well known and present them to the public so they can be enjoyed. For parents or teachers, this list will give a good starting point for resources to introduce insects in a fun way.

The portfolio will include the comprehensive Insectography list and perhaps a few “hard copy” examples of materials (i.e. Pest Private Eye Video game). In order to make it readily available to the public, I propose posting it on the UNL Entomology Departmental or similar website after completion. This format would allow direct links to where items can be viewed or purchased (i.e. Amazon, Barnes and Noble, Netflix, etc.), and photographs of the resources could possibly accompany each entry. These additions would greatly enhance the usability of the list.

This project has the potential for further expansion in the future. Additions might include pre 1950 and post 2012 titles, titles geared toward pre-kindergarten age groups, and foreign titles. A comprehensive list of non-fictional works about entomology would also be beneficial to both scientists and the public.
Master’s Project: Insectography: Insects in the World of Fiction

By Erin Bauer

The following bibliography/filmography lists works of fiction (movies, books, video games, TV shows, and other related media) from 1950-2012 that feature insects or entomologists as major characters or plot points. References at the end include locations where these titles may be found for purchase or rental (Amazon.com, Netflix, etc.), and resources I consulted during my research for this project.

Final Comments.............................................................................................................62
Movies

The following movies range from B sci-fi insect mutant films from the 1950’s to more recent animated or post-apocalyptic features. The majority of these are meant for a teenage-adult audience, but a few animated movies are appropriate for children (if the latter, this is noted in the citation). Some involve anthropomorphized insect characters, others pit man against beast when entomologists or scientists deal with experiments gone wrong or natural disasters where insects have the upper hand. The list is organized alphabetically by director/s, and each entry includes a synopsis of the plot.

Synopsis: Invading killer bees wreak havoc on the citizens of North America.

Synopsis: Exterminators Dave and Steve fight gigantic insects that have a taste for humans!

Synopsis: Disaster strikes when scientist Leo Carroll accidentally creates a monster spider that wreaks havoc on the human population.

Synopsis: British Secret Service agent Frances and American Bill must investigate an East European country where allegedly insects are being used to develop germ-warfare.

Synopsis: After a cosmic event in the desert town of Paradise city, super intelligent, well organized ants begin building vast structures and communicating in a way never seen before. Scientists Ernest Hubbs and James Lesko are called to investigate this strange new behavior.

Synopsis: A young couple, in the small town of Mesquite, discovers that toxic waste has created a new species of mosquito intent on destroying mankind.

Synopsis: A veterinarian and entomologist try to save a town infested by spiders.

Synopsis: Janice Starlin, an aging cosmetics company owner, transforms into a giant wasp after taking a youth rejuvenating potion.

**Synopsis**: When a rocket containing a wasp’s nest crashes, the wasps are exposed to radiation from space, and they are transformed into hungry mutant monsters with a taste for human flesh.

**Synopsis**: Remake of the 1958 film. Scientist Seth Brundle has discovered how to transport living matter. Thinking he has perfected the experiment, he tries it himself, unaware that a fly has entered the chamber with him. Now he must deal with the consequences of a fly/human mutation.

**Synopsis**: A lowly worker ant, Z, switches places with his soldier friend in order to be closer to his new love, the princess of the colony. Z must also squash the plans of a scheming general who wishes to annihilate the worker ants.

**Note**: Animated; Children

**Synopsis**: Bullied Lucas takes out his frustration on an ant hill, but the ants fight back and shrink Lucas down to ant-size. Now Lucas must learn to live like an insect and appreciate the value of the microscopic world and its inhabitants.

**Note**: Animated; Children

**Synopsis**: After creating “short-lived” and sterile genetically altered insects to control the disease ridden cockroaches beneath the city, entomologist Susan Tyler and her husband discover that their “Judas” breed has not only continued to thrive, but evolved.

**Synopsis**: After being exposed to radiation during a bomb tests, ants are transformed into giant monsters intent on wreaking havoc on a town and its inhabitants.

**Synopsis**: A chemical spill in a small Arizona town turns spiders into giant mutants.

**Synopsis**: Dr. Cahill’s island vacation doesn’t go quiet as expected when the island is overrun by biting, parasitic cockroaches. With the help of the local sheriff, Cahill must find out what’s causing the infestation and how to stop it.

**Synopsis**: A British pop singer meets a mad scientist breeding deadly bees.
**Synopsis:** Agnes has recently escaped her abusive husband and moves to a sleazy motel to hide out. Her friend introduces her to Peter, and a short romance ensues. When they are faced with a horrifying insect infestation, Agnes questions what is real and what is imaginary.

**Synopsis:** A reporter and scientist investigate the devastation of a small Illinois town being overrun by giant grasshoppers. And now they are on their way to Chicago!

**Synopsis:** Phony realtor Marilyn tries to sell property on a Florida island, but she is unaware it is overrun with giant ants.

**Synopsis:** When farmers feed toxic goo to their chickens to increase their size, inevitably the fowl aren’t the only animals to become mutated. The farmers and scientist soon discover it’s not a good idea to mess with nature.

**Synopsis:** This Victorian costume drama follows explorer William Adamson as he studies, then writes about an ant colony he is observing while trying to make it through his own life challenges.

**Synopsis:** “Mail order” newlyweds Christopher and Joanna must put aside their differences when Christopher’s South American jungle plantation is threatened by a horde of ferocious ants that will destroy anything in their path.

**Synopsis:** After a UFO crashes into swampland and introduces alien blood to the mosquito population, mutated monsters emerge with a great lust for human blood.

**Synopsis:** A giant mantis recently thawed from a glacier is ready for some prey!

**Synopsis:** Flik, an ant whose home is being threatened by cruel grasshoppers, uses determination and friendship to help him save the day.
**Note: Animated; Children**

Manus, P. (Director). (2008). *The Hive* [Motion picture]. United States: RHI Entertainment. **Synopsis:** Entomologists investigate a nest of 200 million ferocious army ants in the Brazilian forest that eat everything in their path, and appear to have nefarious plans.

Marshall, F. (Director). (1990). *Arachnophobia* [Motion picture]. United States: Buena Vista Pictures. **Synopsis:** After a rare Venezuelan spider is accidently shipped to a small U.S. town, a new doctor suspects his patients are dying from spider bites. But his arachnophobia makes his case a hard sell.

McDonagh, K. & Fallows, M. (Directors). (2004). *Miss Spider’s Sunny Patch Kids* [Motion picture]. United States: MGM. **Synopsis:** Miss Spider and her husband Holley have just been blessed with 5 spiderlings, and they inevitably end up going on some adventures after one child wants to reunite a chicken egg with its mother.  
*Note: Animated; Children*

Payson, J. (Director). (1996). *Joe’s Apartment* [Motion picture]. United States: Warner Brothers Pictures. **Synopsis:** Iowan Joe needs a cheap apartment when he moves to New York, but gets more than he bargained for when he finds out he shares his new home with thousands of friendly talking cockroaches.

Pool, L. (Director). (2004). *The Blue Butterfly* [Motion picture]. United States: Porchlight Entertainment. **Synopsis:** Entomologist Alan Osborn agrees to fulfill a dying boy’s last wish...to capture a Blue Morpho butterfly. They travel to South America in search of the insect, learning about each other and the ways of nature during their unusual but unforgettable journey.

Synopsis: Cooper wakes up to find himself entangled in a cocoon made by man-eating insects. Saving himself and others around him, he gathers a small force to fight the invasion.

**Synopsis**: Scientists investigate the cause of mysterious bites a local man received on a South Pacific island near Guam. When their plane crashes, they discover large, mutated spiders that kill humans with their bite are residents of the island.

**Synopsis**: Barry B. Benson is a new college graduate, but finds making honey is his only career option. Flying into New York to find pollen, he is befriended by florist Vanessa. Through her he discovers that mankind uses bees to produce honey for itself, and decides to sue.

*Note: Animated; Children*

**Synopsis**: In the 1960’s, three young flies want reach the moon, and hitch a ride aboard Apollo 11 to get there.

*Note: Animated; Children*

**Synopsis**: In the future, young people are urged to help save mankind by joining the military and fighting in a war with alien insects.

**Synopsis**: A deputy, her daughter, and several scientists fight to destroy a swarm of genetically engineered wasps that were developed as a military weapon.

**Synopsis**: Remake of the 1960 film about a woman who turns into a giant wasp after using a scientist’s secret formula.
TV Episodes, Series, and Movies

The following lists television series, TV show episodes, or made-for-TV movies that are about or feature insects or entomologists. They include genres such as cartoons, sitcoms, and science fiction. All are for entertainment, rather than educational.

**TV Episodes:**

**Synopsis:** FBI agents Dana Scully and Fox Mulder visit a forest where loggers have been disappearing. They find a body wrapped in what looks like an insect cocoon and while staying in a cabin in the area, discover a swarm of green bugs that come out every night to attack any living thing.

**Synopsis:** In an alternate universe, the Fringe team investigates and tries to stop an entomologist whose research with a new insect now requires him to feed it human flesh.

**Synopsis:** A mummy full of insects infests the small town of Eureka, OR.

**Synopsis:** After a spokesperson of a honey-using cosmetics company is stung to death, Chuck disguises herself as the new “Bee Girl” to get to the bottom of things.

**Synopsis:** FBI agents Dana Scully and Fox Mulder visit the arctic with three other scientists and encounter an alien worm that uses humans and animals as its host.

**Synopsis:** FBI agents Fox Mulder and Dana Scully investigate deaths in a small town, which are seemingly caused by killer cockroaches.

**Synopsis:** Brothers Sam and Dean Winchester, supernatural hunters, travel to Oklahoma to investigate insect related deaths.
**Synopsis:** Nerds Sheldon Cooper and Howard Wolowitz hear a cricket chirping in their apartment and argue over what species it is (a snowy tree cricket or a field cricket). After making a bet over a prized comic book, they capture the cricket and bring it to an eccentric Cal Tech entomologist for identification.

**Synopsis:** Cockroaches and bees abound in this episode where Sam and his friends must send a soul back to hell using a toaster.

**Synopsis:** The SG-1 team comes back to Earth and begin to see giant bugs that phase in and out of sight.

**TV Series**

**Synopsis:** This children’s series followed the adventures of four teenage insect musicians in Tranquility Forest and their nemesis, Benita Bizarre.

**Synopsis:** This cartoon follows the adventures of a young fly and her family.

**Synopsis:** Entomologist Gil Grissom and his Crime Scene Investigation team solve Las Vegas murders. Using forensic techniques such as the timing of insect colonization to predict time of death, the investigators gather clues that lead to killers.

**Made-For-TV Movies**

**Synopsis:** A plane flying from South America crashes and releases hitchhiking venomous tarantulas onto an unsuspecting California town. After several deaths occur from the spiders, law enforcement and citizens must work to fight the infestation, including an invasion of the town’s important orange-production factory.
**Synopsis:** Don’t walk, run! A secret government lab has produced genetically altered locust that are ready to ravage the Earth.

**Synopsis:** A USDA scientist investigates a swarm of genetically engineered grasshoppers that are destroying everything in their path.

**Synopsis:** Six friends find themselves trapped on an island with nightmarish creatures and only an MTV crew is there to protect them. Plus, they must find Carmen Electra!

**Synopsis:** The world is in danger when insects lash out against us!

**Synopsis:** A group of American hikers are visiting Bolivia when one of their friends is bitten by a venomous spider. Seeking out an American doctor who is living with one of the tribes, the girl is treated, but the doctor is hiding something and the group’s encounters with spiders are far from over.
Books

This bibliography includes books subdivided into novels (adult and young adult), children’s books, and children’s/young adult series. Novels listed may feature insects or entomologists (professionals or amateurs!), as a main part of the plot.

Because of the extensive number of children’s books about insects, this bibliography is limited to works that involve an insect as a main character, learning life lessons or something about their world (i.e. Katy Katydid learns about friendship). It does not include fictionalized accounts of real-world skills, such as using insects to learn how to count or alphabetize, or showing how a child learns about the life cycle of insects. One thing of note here is that children’s fictionalized works aren’t always accurate scientifically, but focus more on the moral or adventure of the character. For example, there are many books where worker bee or biting mosquito characters are male, when realistically they would be female.

The children’s books included here are in general for school aged children, aged 5 and up. In some cases age ranges may also include younger children, but as long as the older age group is included, the book is on the list (i.e. a book for ages 4-8 would be included, but one for ages 1-4 would not). Recommended age ranges are listed in the citation when this information was available.

This bibliography includes books published in the United States (traditional or self-published) from 1950-2012. Where possible, publication city is included in the citation, but in some cases this isn’t available for self-published books or if the book is only available in electronic format.

For purposes of this bibliography, novels must be approximately 100 pages or more in length to accommodate both adult novels, which tend to be longer, and young adult novels. Individual short stories and novellas are not included but a few anthologies may be. Adult novels that may be in a series are also included where applicable.

For series, one title within the series is listed bibliographically and other titles within that series are noted at the end of the citation. In some cases only one book in a series has an entomological focus.

Each title includes an online link to an internet source where you can purchase the work. This may be from Barnes and Noble, Amazon, or other online bookstores. Please note that some linked versions may be reprints as the originals may be out of print, and in some cases, they are electronic only.
Novels:

Adult novels (Ages 15 and up)

**Synopsis:** A collection of science fiction/fantasy short stories about odd and unusual insects and their interaction with man.

**Synopsis:** Kevin begins high school on a strange note; he gets superpowers and follows a butterfly into a strange world.

**Synopsis:** Rajel and her spouses experience insect marital trials and errors.

**Synopsis:** A journalist travels to Aries Island after receiving a letter about a rare mosquito, the Ganges Red. What he finds is a nightmarish insect and the collector who is studying it.

**Synopsis:** Survivors from a shipwrecked South American cruise must learn to live on an island with giant insects.

**Synopsis:** A group of graduate science students, including an entomologist and arachnologist, are shrunk to a half inch in size and enter the unique and dangerous world of microorganisms and insects.

**Synopsis:** PeeDee3 the bug must capture a time jumper. The challenge---bringing back at least part of the body instead of just disintegrating it!

**Note:** Other titles in this series: *Gut Feeling, Fafafalala and Dosido My Eggplant, The Pachydwerp in the Room, In Sheep’s Clothing*, and *Chase Seen Seven*.

**Synopsis:** When forensic entomologist Nick Polchak helps an insect phobic client solve a case about her friend’s death, he steps into a mystery about the death of his client’s husband.

**Note:** Other books in this series: *Nick of Time*, and *First the Dead*
**Synopsis:** Jason Carter experiences tragedy when loved ones are killed by venomous centipedes and his town is destroyed by giant ants. Now he must fight against those who have created this ecological disaster.

**Synopsis:** Inspired by Franz Kafka’s early 20th century novella, *Metamorphosis*, *Insect Dreams* explores what happens when the Samsa family’s chambermaid sells Gregor Samsa, a salesman who’s been transformed into a cockroach, to a carnival.

**Synopsis:** Reporter Nathan Brewster discovers an island where biogenetically altered thrips are resistant to pesticide and have increased reproductive capabilities. Together with others on the island, he must try to stop the thrips that are killing people and wreaking havoc in the community.

**Synopsis:** Moth, a half-moth mutant, has been used as a science experiment, and now wants revenge. Nina, a barmaid pulled into helping out with a documentary about “Moth-man” soon learns that he’s not just a myth.

**Synopsis:** Large ants and roaches have taken over the world and created complex civilizations. But like any species, they are dependent on certain resources, in this case, plastic left over from the ruins of the extinct Duo-Pods. Henry must help convince his fellow citizens that they must work and live together if they hope to avoid extinction like the Duo-Pods.  
**Note:** This is a series. Other titles include: *To Build a Tunnel*, *New South Dairy Colony 50*, and *The Recreation of Roacheria*.

**Synopsis:** Lady Margaret’s family wants to see her married, but she’s more interested in insects than a husband.

**Synopsis:** Kriffle and Fargeeta live in the Krephiloff Tree. When they notice some funny business going on in the overgrown area of the tree, they set out to solve the problem before disaster strikes.

**Synopsis:** When their ship crashes on Jupiter, siblings Walt and Mindy must battle sword fighting butterflies, giant grasshoppers, praying mantids, and other predators that want to eat them.

Synopsis: Juan Rico and other soldiers who have gone through a grueling boot camp must fight against a dangerous enemy in “The Bug War.”

**Synopsis:** Agents from a futuristic Big Brother government investigate a secret laboratory run by Dr. Hellstrom, who has created a nightmarish project involving insects.

**Synopsis:** The International Ecological Organization tries to eradicate dangerous insect life in the Earth’s jungles to make them more habitable for humans. Unfortunately, Mother Nature retaliates with a vengeance in the form of large, mutated insect creatures.

**Synopsis:** Murderous Brazilian bees begin to attack New York and soon reach across the U.S. Now scientists are working against the clock to stop the infestation.

**Synopsis:** It’s started raining and hasn’t stopped. The world is flooded and those who have survived have sought higher ground. Now the worms have come, and there’s a new enemy to contend with.

**Synopsis:** In the world of Mynoot, everyone loves sourgrass. But what will happen if the sourgrass runs out?

**Synopsis:** A cockroach in the 1950’s awakens as a human. A take off of the classic early 20th century novella, *Metamorphosis*, by Franz Kafka.

**Synopsis:** Winkon’s world is full of diminishing resources and war. Will anything be able to reduce the threat?

**Synopsis:** Alien insects planning to take over the world are hiding inside a woman’s backyard weeds.

**Synopsis:** Humans and Insects have lived peaceably for years, but something has changed and now a universal war is starting. Gracie, a woman who can interpret Insect language, and a small team of soldiers, work to discover who is behind the war and stop them.

**Synopsis:** This novel follows Victorian naturalist Russell Darlington as he pursues a new butterfly species, goes to college, and experiences love, tragedy, and death.

**Synopsis:** After several gruesome killings in a small town, Tom Goodman, an expert in biological control, must pursue the unusual creature that is causing them.

**Synopsis:** Customers are horrified when a girl enters an Annapolis bar and dies. Cause: a strange creature attached to her head. But this is only the beginning...more creatures wait outside for new hosts.

**Synopsis:** One hundred years after World War V, Krey and Cassie are exiled from Earth for minor crimes. Traveling to outlying planets in a beat up spaceship, they must fight against robotic insects and aliens who have destroyed those planets and are now bent on invading Earth.

**Synopsis:** Three drone honeybees become engaged in a conflict with an invading species of colored bees.

**Synopsis:** A NASA experiment gone wrong brings the wrath of ten thousand trillion angry ants against humanity.

**Synopsis:** In this sequel to *The Response*, it is revealed that social insects such as ants, bees, and wasps were brought to Earth by an advanced civilization of large alien insects to rule humanity. Now with their scheme threatened, the aliens are ready to come join the fight themselves.

**Synopsis:** An entomologist from Earth fights vampires on Venus.

**Synopsis:** When Angeline and her entomologist husband attend the Annual Giant Insect Contest in Utopia, OR, Angeline begins to have nightmarish flashbacks about her past. Elsewhere, an escaped prisoner being pursued by a U.S. Marshall will go to any lengths to remain free.

**Synopsis:** Keiko turns insects into a work of art.

**Synopsis:** Karen Spellman and her daughters move from the city to the country when Karen is going to remarry. One of the daughters, Julie, is attacked by a new, potent bee species created by a serial killer. Julie survives only to be infested by internal insect parasites that she then passes to other human hosts.

**Synopsis:** After being stung by a strange insect, two people experience strange neurological effects. They consult an entomologist and together discover a potential alien plot. Can they convince the government that the world is in danger?

**Synopsis:** Greg needs some bug killer but doesn’t want to spend the money for a 50 lb bag. That’s when he spots a truck in a parking lot that may have just what he’s looking for.

**Synopsis:** Vinny is a new pest management professional whose learning the business from his Uncle Guy. He ventures off on his first assignment and through strange events finds himself shrunk to the size of the insects he’s trying to kill. Can he find his uncle and grow back to normal size?

**Synopsis:** Tonino is a cricket boy who is interested in finding out more about his family roots. What he finds is the Blue Fairy, who tells him he has the responsibility of maintaining the conscience of whole world!

**Synopsis:** Giant fire ants are attacking and killing the populace. And the entomologist who can possibly save the situation is being held hostage by lunatics who are enjoying the chaos!

**Synopsis:** Vanguard Corporation has created genetically altered seeds that could help the agricultural industry produce more and better crops. However, when reports begin coming in of strange insect behavior, it is discovered that the properties of the seeds have transferred to the insects, which are now resistant to pesticides, larger in size, and more aggressive. Can they be controlled?

**Synopsis:** Balsa the yellowjacket must now stay with her cousin Juniper after the Beeman destroys her colony. Will Balsa be able to protect Juniper and her young from being destroyed, too?

**Synopsis:** It is the 30th Century and scientists have discovered a planet with seemingly intelligent termites. After a collected termite dies on Earth, linguist Kaitrin and entomologist Griffen are sent on an expedition to the planet to learn more. Meanwhile, the termite civilization is experiencing problems of its own.

**Synopsis:** Kaitrin and Griffen arrive on the termite planet, while the termites continue to face their own battles. Kaitrin learns the termite language and is able to communicate with the termite civilization. Griffen begins to exhibit troubling behavioral changes as the plot leads to an explosive end.

**Synopsis:** Tee Rutledge discovers magical coffee beans that temporarily transform her into various insects each time she eats one. Using her small size to do some snooping, she discovers information that allows her to become a “superhero” of sorts.

**Synopsis:** The Wells family inherits a family home in Paris and is told to never enter the cellar. Inevitably this warning goes unheeded and the Wells’ find a world inhabited by an intelligent ant civilization trying to survive any way they can.

**Synopsis:** Susan and Alex move into what they believe is their dream home... until Susan starts getting bitten by what she thinks is bedbugs. Is it only bedbugs or something worse?

**Synopsis:** Gazer the worker ant lives in Entgora, a colony with strict rules. After observing a ritual she’s not supposed to see, then having a revealing dream, Gazer is caught up in a mystery and adventure that will change her life and the lives of others forever.

**Young Adult Novels**

Age ranges for young adult novels range from about 7-18. If a novel gave a particular age range, it is included here. Books in this category are much longer and have more text than the Children’s books, which are often very visually oriented with less text.

**Ages 8-12**

**Synopsis:** Lerner discovers that her pet worm, Fip, likes to eat paper, and whatever words or phrases he eats make those items vanish from the world! What will Lerner do with this newfound knowledge?

Ages 9-12
**Synopsis:** Marvin the beetle and James the boy live in the same apartment in New York. When James gets a pen set for his birthday and Marvin uses it to draw an artistic masterpiece, boy and beetle become friends and end up on a mysterious adventure at the Metropolitan Museum of Art.

Ages: 10-14
**Synopsis:** Art receives a new spyglass from his grandfather, the ringleader for an insect circus. He’s told not to use the spyglass for spying, but inevitably he, his friend Daisy, and their pet ladybug uncover a conspiracy that could shake up the circus!

Ages: 9-12
**Synopsis:** James Trotter and his insect friends have a fun adventure inside a large, magical peach!

Ages: 8-11
**Synopsis:** Bailey likes her long hair, but she doesn’t like the head lice that are infesting it!

Ages: 12-17
**Synopsis:** When a colony of ants awake after a long winter, they discover from a neighboring scout that enemy Red Ants are on the way to destroy them. Can they find out more about their foe and save their colony before it’s too late?

Ages: 8-12
**Synopsis:** Simms becomes friends with a cricket beneath the floorboards in his room. Learning to communicate through Morse code, the two friends update each other on all the triumphs and troubles of their human and insect lives.

Ages: 8-12
**Synopsis:** A cockroach is transformed into a boy and adopted by a human family.

Ages: 7-12
**Synopsis:** Ned and Nancy shrink to insect size and ride a bee into adventure. They join a beehive where they meet many strange new friends.
*Synopsis*: Giant killer bees are kidnapping people, including the Tibb twins. What can be done?

*Synopsis*: Harry loves bugs, and his newest favorite is earwigs. When his class is assigned to do a play about a fairy tale, Harry decides to incorporate his love of earwigs into the story.

*Synopsis*: Inspector Mantis and his trusty sidekick, Dr. Hopper, meet clients and solve five engaging mysteries in Bugland.

*Synopsis*: Emily and her brother Bud must discover the secrets of an unsettling book about insects that is more than what it seems.

*Synopsis*: Simon’s love of collecting insects leads him to adventure in a fantastical world called Glarney.

*Synopsis*: Petronella is turning 16 in Edwardian London, and it’s time for a party. This should be an exciting time, but her guardian, Uncle Augustus, has taken to eating insects and to make things worse, guests are disappearing and insects seem to hold the key. Can Petronella solve the mystery and preserve her dignity?

*Synopsis*: Prehistoric spiders thawed from the ice show up at a Vermont elementary school.

**Synopsis:** Mirasol lives in the Willowlands as a beekeeper. But her destiny changes when she is asked to become the Chalice, a responsibility that requires her to bring the Willowland people together with a Master.

**Synopsis:** Jake rescues some worms and keeps them in his bedroom, only to discover they have turned into flies! Now he must try to rid his house of the flies before too much trouble ensues.

Ages: 9-12

**Synopsis:** Julia and her neighbor Patrick decide to raise silkworms for their state fair project. It’s more complex than they imagined, but can they be successful and possibly win the blue ribbon?

**Synopsis:** A caterpillar’s journey into metamorphosis explores discovering your true self and how life can bring some unexpected, but wonderful turns.

Ages: 10 and up

**Synopsis:** Yarunt is a spider who is born without the usual spider instincts. Now she must face many dangers and a catastrophe outside her own web.

Ages: 7-10

Ages: 9-11
**Synopsis:** Megan has a hard time when she needs to collect insects for her sixth-grade project.

**Children’s Fictional Books**

Children’s fiction books often have an educational scope as well as being entertaining. Because I am not including books that have to do with learning a skill (such as counting, alphabet, etc.), “Educational” here can be defined as an insect character learning or teaching about a life process (metamorphosis) or a life lesson (i.e. friendship or self-esteem). In my research I have found that most all of these books fit within this definition. However, there are also a few which involve a character’s adventure or fun experience (i.e. solving a mystery, saving the day, going on vacation). In cases where the book has this latter element instead of or in addition to a moral lesson, I have marked it as being “Entertaining.” Note also that age ranges are listed where they were available from the sources consulted.

Ages: 9-12
**Synopsis:** A young snail gets lost in the woods after entering a race to be the fastest snail.

Ages 4-8; Entertaining
**Synopsis:** Martina the cockroach learns about love, marriage, and...coffee.

Ages: 1-9
**Synopsis:** Little fat bug has never met the other bugs who share her blanket. They all live in separate holes, but little fat bug decides to invite them all to her birthday party. Here the insects discover that no one looks the same, and are shocked and offended by it. Eventually they learn about tolerance and acceptance of those who are different, and gain an appreciation for diversity.
**Synopsis:** Spinner the spider teaches Timmy yo-yo tricks, increasing his confidence.

**Ages:** 3-8  
**Synopsis:** Gary hops a lot because he’s happy, but when his best friend moves away, can he get his legs moving again?

**Ages:** 4-8; Entertaining  
**Synopsis:** A little beetle ponders how to get a berry back home.

**Ages:** 4-8; Entertaining

Synopsis: A tangled web is blocking Miss Golden-Silk’s door, so she can’t see friends and they can’t come visit her. So she sets out to solve the problem.

Ages 10 and up; Entertaining
Synopsis: Ant and Grasshopper fall in love and get married. They find that they complement each other in this extended version of the old Aesop fable.

Ages: 3-6; Entertaining
Synopsis: A bug is compelled to go to Mexico. She doesn’t realize she’s migrating, she just knows she must get there!

Ages: Entertaining
Synopsis: Kentucky cricket Jeremiah meets a New York cricket and is interested to hear about life in the Big Apple. He decides to set out in pursuit of the city to see it for himself.

Ages 5-9
Synopsis: Beatrice the bee does very well in her hive, as long as she follows the rules. But when she doesn’t, it can be disastrous!
Ages: 3-7; Entertaining
**Synopsis:** Coyote thinks he is so smart, until he is outwitted by some butterflies.

**Synopsis:** Frida the spider experiences the everyday trials of rebuilding her web, catching food, and avoiding predators.

Ages: 5-7; Entertaining
**Synopsis:** Gil is lost, but can he find his way home with a little sleuthing?

Ages 6-8; Entertaining
**Synopsis:** A South African worm follows her dreams and goes on adventures.

**Synopsis:** Henry the butterfly desperately wants friends, but nothing is working. Then he meets Hannah, and he discovers a kindred spirit.

Ages: 4-8; Entertaining
**Synopsis:** Reporter Katy Did interviews Harry the Tarantula to learn all about spiders.

Ages 9-12
**Synopsis:** Nick and Sparky go on a quest for food for their hungry colony in the underworld of New York City.

**Synopsis:** A little ant wonders how large the ocean is and where it ends.

**Synopsis:** Henry the honeybee helps his hive thrive, but when he decides one day to quit work, what will be the consequences to him and his hive?

Ages 6-8
**Synopsis:** A ladybug born without spots does everything to fit in, even making some spots herself. But in the end, she realizes that there is nothing wrong with being unique.

**Synopsis:** Olivia the firefly is friends with a little boy named Owen, and enjoys spending time with him and other children. But one day she curiously flies into a jar of honey and only friendship can save the day.

**Ages:** 4-8
**Synopsis:** Two ants decide to explore a kitchen without the safety of others.

**Ages:** 5-8
**Synopsis:** Marigold is a Monarch caterpillar who dreams of one day joining her fellow Monarchs on their flight to Mexico.

**Ages:** 4-8; Entertaining
**Synopsis:** A bark beetle is put on trial for killing trees. But will the witnesses be reliable, and what will be the bark beetle’s fate?

**Ages:** 3-9
**Synopsis:** Wormy’s friends have all become butterflies. When will it be his turn?

**Ages:** 5-8
**Synopsis:** Torchy the firefly’s light is so bright that it angers or scares away the other animals. But are there advantages to being different?

**Ages:** 4-7
**Synopsis:** This story chronicles a spider’s everyday life: from avoiding predation, eating, spinning silk, and finding a new home of her own.

**Ages:** 5-8; Entertaining
**Synopsis:** Squash likes to make people jump; who will he scare next?

**Synopsis:** Experience a ladybug’s life...what she eats and how she avoids predators.

**Synopsis:** Mr. W doesn’t like spider webs and he does everything he can to get rid of him. The spider is tolerant, and eventually convinces Mr. W to accept him and be more tolerant too.

**Synopsis:** Monarch caterpillar Mac is addicted to drugs. Now he faces a long road to recovery.

**Synopsis:** When Eglin visits a tobacco field, he hears from his ladybug friend about the problems associated with using tobacco.

**Synopsis:** Edgar the earthworm hates digging in the dirt. But his friend Esther shows him the importance of hard work.

**Synopsis:** Amy Firefly likes to play with her friends, but one day she is approached by a toad, who wants help finding his pet. Amy is not quite sure what to do, but is warned that it’s not wise to talk to strangers.

Williams, G. (2011). *Crazy Cleo the Caterpillar*. Bloomington, IN: Authorhouse. Ages 6-9; Entertaining

**Synopsis:** Is Cleo crazy for wanting to fly?

**Synopsis:** Imani is a special grasshopper who can produce beautiful music when the rest of the world cannot. Asking the ancestors to give the world music, they respond, only for Imani to be swept away from his home with only music to help him.

**Ages: Entertaining**

**Synopsis:** Lilly the ladybug and her friends must compete against Swebster the spider in a circus act.

*Ages 9-12*

**Synopsis:** A noble worm family gives birth to Willy, a blue-speckled worm, and gives him up for adoption to more “common” worms. He has many adventures and discovers that being different isn’t a bad thing.

*Ages 4-8; Entertaining*

**Synopsis:** Khepri the scarab beetle becomes friends with the Pharaoh of Egypt. When Khepri discovers a plot against the Pharaoh, he must find a way to warn his friend.

*Ages 6-8; Entertaining*

*Ages: Up to 6; Entertaining*

**Synopsis:** A bear tries to get the honey from bees while they happily invade picnics and other events in the neighborhood.

*Ages: 3-7; Entertaining*

**Synopsis:** Insects greet each other and have a party to celebrate the coming of spring.

---

**Children/Young Adult Book Series**

Titles listed in this section include books that belong to a series, either 2 or more books with the same characters by the same author, or a set of books by different authors that follow a similar theme or feature the same characters. A bibliographical example is given for one book in each series, followed by a list of other titles in the series (if applicable or if the other books within the series are entomology related).

Like the adult and young adult novels listed in this document, the majority of these series are for Entertainment (whereas many stand-alone children’s books are educational even if they are also entertaining) If a series book is deemed to have an educational focus, this is noted.

*Ages: 4-8*
Synopsis: A collection of books about Fly Guy, a smart fly, his friend Buzz (a boy!) and all the adventures the two of them have.

Ages: 8-12

Synopsis: Join Harry in his adventures in the strange and scary world of the Hoo-Mins.

Note: Other titles in this series: *Harry the Poisonous Centipede’s Big Adventure* and *Harry the Poisonous Centipede Goes to Sea*.

Synopsis: Alien entomologist Mantus goes exploring the universe for insect specimens, but finds more than he bargained for.

Ages: Up to 12 years

Synopsis: Jacob the Bug becomes “Sharp-Eye” and must save Bugville from an ant colony.

Ages: 8 and up

Synopsis: Cody feels relieved when his headmaster leaves his school, but there seems to be darker forces still at work.

Ages: 6 and up

Synopsis: Ace Lacewing is on the case! Queenie Bee and Royal Jelly are missing and he’ll need some help from friends and witnesses to find them.

Note: Other titles in this series: *The Big Swat*, and *Bad Bugs are My Business*.

Ages: 2-7

Synopsis: Bugtown residents are bug-eyed! Inspector Cricket investigates the attempted murder of Charlie Roach.

Ages: 9 and up

Synopsis: Ryan is on medication that allows him to see his teacher’s true colors...they are bugs in disguise and plan to take over the town!

Synopsis: A beautiful bug learns that looks will fade but friends will not.
Note: There are more than 10 other books in this series. Some titles include: Bugg Bk Vee-Dubb, Bugg Bk Shoe-fly Flu, Bugg Bk Tik Tok, and Bugg Bk Jitterbug. Amazon.com can be searched for others in the collection.

Ages: 4 and up
Synopsis: Join Inspector Hopper, an insect detective, and his sidekick McBugg, on a mystery!
Note: Other titles in the series: Inspector Hopper’s Mystery Year

Synopsis: Isabella the sunflower wants to learn how to fly with her bee friends.

Ages: 5-11
Synopsis: B Cool and his Hombeez friends must help make toys to save Christmas!
Note: Other titles in the series: The Spelling Bee, Extra Large, Goldstinger, and Slam Dunk

Ages: 8-11
Synopsis: Andrew, his cousin Judy, and robot Tudd have shrunk in size and everyday things become big adventures! In this story, the group is confronted with large cockroaches and pesky flies!

Ages: 7-10
Synopsis: Private eye Incognito Mosquito is interviewed by a reporter about his adventures with the likes of Mickey Mantis, F. Flea Bailey, and the Warden of Sting Sting Prison
Note: Other titles in this series: Incognito Mosquito Takes to the Air, Incognito Mosquito Makes History, and Incognito Mosquito Flies Again.

Ages 3-5
Synopsis: The Ant Hill kids are in their classroom working on a Valentine’s Day card!
Note: Other title in the series: Spring Is Here!: A Story about Seeds

Ages: 6 and up
**Synopsis:** Nancy Drew and her Clue Crew must seek out the Bug Club’s prized insect.

Ages: 4 and up
**Synopsis:** Miss Spider wants to throw a tea party, but other insects are afraid she’ll serve *them* for tea!
**Note:** There are over 10 books within the Miss Spider series. A few other titles include: *The Listening Walk*, *Little Miss Spider: A Christmas Wish*, *Bedtime Story*, and *Miss Spider’s Wedding*.

Ages: 7-10
**Synopsis:** The Deadlies are toxic, but these spiders are really friendly just want to find a home where they aren’t in danger and can live in peace. Now they’ve taken residence in the Boston Library.
**Note:** Other title in this series: *Felix Takes the Stage*

**Synopsis:** Junior Bee Detective Ben and his pal Scooter investigate the theft of a starlet’s missing necklace.
**Note:** Other titles in this series: *Case 163 - Captain Blackbee and the Hunt for Stinger Cave: A Ben the Bee Mystery*

Ages: 9 and up
**Synopsis:** Ethan Black is told that he is under mind control by aliens, and must choose if he wants to resist the lie and flight against the aliens and their giant robot insects.
**Note:** Other title in this series: *The Resistors 2: Sterling Squadron*

Ages: 9 and up
**Synopsis:** Two mysteries in one about Spider Kane.

Ages: 4-8
**Synopsis:** Archie is a Scottish spider who is not-scary and just wants to make friends with everyone!

Ages: 5-8
**Synopsis:** An activity book full of mazes and discovery as Anthony Ant goes through his day.
Note: Other titles in the series: Find Anthony Ant, Anthony Ant’s Treasure Hunt, and Anthony Ant’s Creepy Crawly Party.

Ages: 2-5
**Synopsis:** Ant is in a parking lot...with lots of dangers!

Note: Other title in this series: *I Saw an Ant on the Railroad Track*

Ages: 9-12
**Synopsis:** Mandy and Travis must escape metal insects!

Ages: 9 and up
**Synopsis:** Jaime and her brother try to determine what to do when they find an abandoned treehouse full of spiders.

Ages: 4-7
**Synopsis:** A grasshopper father tries to protect his friends and family from a tarantula.

Note: Other titles in the series: *Scary Larry Meets Big Willie*

Ages: 7 and up
**Synopsis:** Joey is working on a case to find a stolen diamond pencil box for his client, but solving the case isn’t easy when witnesses and assistants keep bumbling things up!

Note: Other title in this series: *Big Hairy Drama*

Ages: 7 and up
**Synopsis:** Dung beetles are missing from a ranch. Could the culprit be Stinky McCree?

Note: There are many other titles in this series. Some examples include: *Tiger Moth and the Dragon Flight Contest, Insect Ninja*, and *Tiger Moth: Adventures of an Insect Ninja*

Ages: 6 and up; Educational
**Synopsis:** Sammy the Spider travels with the Shapiro’s and, using his senses, explores Israel.

Note: This series about Jewish Life includes over 10 titles, including *Sammy Spider First Day of School*, and *Sammy Spider’s First Sukkot*. Amazon.com can be searched for others in the collection.

**Synopsis:** Join Flik the ant and his friends in a variety of adventures. 12 book set.

**Ages:** 6-8

**Synopsis:** When a group of insects finds a tennis ball, they work to make it their new home.

**Note:** Other title in this series: *Snow Bugs*

**Ages:** 8-11

**Synopsis:** Tucker the mouse and Harry the cat meet Chester, a cricket who has hitchhiked along in a picnic basket and now finds himself in the middle of New York City. The three become friends and have many adventures in this classic story.

**Note:** There are over 10 titles in the Chester Series. Some titles include *Chester Crickets’ Pigeon Ride*, *Harry Cat and Tucker Mouse: Tucker’s Beetle Band*, and *Chester Cricket’s New Home*. Amazon.com can be searched for others in the collection.

**Ages:** 8 and up

**Synopsis:** In this hard boiled style mystery, Bug Muldoon must find some missing earwigs.

**Note:** Other in the series: *Bug Muldoon and the Killer in the Rain*.

**Ages:** 4-8

**Synopsis:** What happens when worker bees won’t make honey?

**Note:** Other title in this series: *The Ants Dig to China*.

**Ages:** 5-9; Educational

**Synopsis:** The Dilly Dally family likes to play more than work, so they don’t prepare for winter the way they should and learn a valuable lesson.

**Note:** Other titles in this series: *The Ugly Caterpillar, It’s Not Fair!*

Ages: 8-12

**Synopsis:** Charlie receives a Bug-a-View in the mail and had trouble believing it can give him a bug’s eye view of the world until he tries it.

**Note:** Other title in the series: *Bug Girl*

Ages: 7 and up

**Synopsis:** Maybelle the cockroach decides to venture from under the refrigerator…during Mr. and Mrs. Peabody’s dinner party!

**Note:** Other titles in this series: *Maybelle and the Haunted Cupcake*, and *Maybelle Goes to Tea*.

---

**Synopsis:** Insects have a surprise party!

Note: There are over 20 books within the Bugville Critters series by R. Stanek, some that even include a subseries! Listed here are a few of the other titles: *Remember Their Manners*, *Go to School*, *Go on Vacation*, *Have a Sleepover*, *Start Summer Vacation*, *Explore the Solar System*. You can search for the entire listing on Amazon.com.

Ages: 8-12

Ages: 5-9; Educational

**Synopsis:** Billy Bee learns all about winning, losing, and playing the game.

Note: Other title in the series: *Colors of Love*.

Ages 6-8; Educational

**Synopsis:** Belinda bee teaches about all the steps in running a successful hive.

**Note:** Other title in this series: *Belinda the Bee Swarms Away*
**Miscellaneous Other Works**

**Video Games**

The following list includes selected video games that can be primarily found on CD. They are listed as either educational (teaching an entomological concept) or entertaining (shoot em’ ups, etc.). Ages are listed by video game ratings: Everyone, Teen, Mature.

Ages: Everyone 10+; Entertaining
**Synopsis:** In this reimagining of the classic Atari game, Max the insect slayer must battle a myriad of beasties including centipedes, spiders, beetles, and caterpillars to protect the girl who can bring life back to a post-apocalyptic world.

Ages: Teen; Entertaining
**Synopsis:** In this third person shooter, the player destroys hoards of giant insects.

Ages: Everyone; Entertaining
**Synopsis:** As Tumble, save your beetle friends from the evil Black Bug Empire by matching groups of similarly colored bugs.

Ages: Teen; Entertaining
**Synopsis:** In this revamped version of the 1996 original, Roger Samms is transformed into a cockroach by an insect shaped locket that was given to him by his deceased mother. Now he must navigate through his enemy Eddie’s bar, facing rats, garbage disposals, cats and other dangers until he can discover the truth behind the locket and his meet his fate.

Ages: Everyone; Entertaining
**Synopsis:** Flik the ant tries to save his colony from grasshoppers led by the evil Hopper.

Ages: Everyone; Educational
Synopsis: In this first person role-playing game, host Penny Poe first introduces the Integrated Pest Management (IPM) concept. Users portray Pest Private Eye, a detective that helps solve school pest problems by working with staff and using IPM.

Note: There is an online version of this game that can be accessed here.

Cartoons/Comic strips
Many published cartoons or comic strips have featured insects or entomologists over the years. Two of the better known and popular strips that have frequently used insects as subjects include Gary Larson’s The Far Side and Mark Parisi’s Off the Mark. Individual cartoons will not be listed here, but you can find a comprehensive list at the following locations:

References: Databases

I used all of the following Databases/Websites extensively during the course of my research. I am listing their general URL’s here as I did many searches within them rather than for one particular citation.

Barnes and Noble. http://barnesandnoble.com

Internet Movie Database. http://imdb.com

References: Specific

The following references were used in the research for this bibliography/filmography. Some of them are also good resources for those wishing to view, rent, or purchase specific titles.

Acknowledgements

I would like to thank the following people for their guidance and assistance with this project.

Stephen Danielson, Entomology Department Professor
Leslie Delserone, UNL Library Entomology Liaison
Tom Weissling, Entomology Department Distance Ed Coordinator

Final Comments:

It is my hope that this bibliography/filmography will be of interest and benefit to other entomologists as well as the general public. Anyone with a strong desire to see films or read books about insects should find a lot of choice here! In addition, one of the biggest surprises I had during the course of this project was finding how often insects are featured in children’s literature. Insect characters make great protagonists for teaching life lessons!

A possible future direction/expansion for this project would be to increase accessibility to others by posting it to the UNL Entomology Departmental or similar website. Then perhaps promotion through ESA, other entomological organizations, and public libraries would increase awareness of its existence. Finally, after the tool is available to a wide audience, it would be useful to collect data from the community by developing a survey that measures its impact.

This project is a snapshot in time. Our popular culture and media is ever changing, and as such, there are many additions/expansions that could be made to this project in the future. These might include extending the range of publication years (pre-1950 and post 2012, once this occurs), titles targeted toward pre-school groups or skills (i.e. counting, alphabetizing, etc.), and foreign titles. A non-fictional list of works about entomology would also be beneficial to both scientists and the public. I would certainly enjoy seeing such publications!
