BLOCK AND BRIDLE

Annual
The 1990-1991 Block and Bridle Annual is dedicated to those U.S. servicewomen and servicemen who served in Operation Desert Shield and Operation Desert Storm in the Persian Gulf, as Todd Laird, a member of our club, was on reserve call since September.
I face a new challenge . . . 

As each one of us takes a new direction,
We look back on the past,
The memories and fun,
the work and success.

Friends – old and new,
We have struggled and faced many a challenge
But together we have achieved success.

For tomorrow I face a new horizon and new people,
I face a new challenge.

But I will always remember
and cherish the lasting memories that will help
me face my new challenges.

Welcome to the 1990-91 UNL Block & Bridle Annual

PURPOSE

On December 2, 1919, student representatives from four animal husbandry clubs met in Chicago, Illinois, and formed the National Block and Bridle Club, the local clubs becoming chapters in the new national organization. Nebraska was a charter chapter along with Iowa, Kansas, and Missouri. During this meeting the chapters formed a constitution which included a statement of the club’s objectives. They are (1) To promote a higher scholastic standard among students of Animal Husbandry, (2) To promote animal husbandry, especially all phases of student animal husbandry work in colleges and universities, (3) To bring about a closer relationship among the men and women pursuing some phase of animal husbandry as a profession.

The Nebraska Chapter of Block and Bridle Club has experienced a year of meaningful and enjoyable activities in the interest of Animal Science. This Annual is a reflection of our growth and development of leadership, integrity, scholarship, fellowship, cooperation, and participation. Through these activities we will grow and be better able to serve the Animal Science Industry.

Membership in the Block and Bridle Club is open to any student of agriculture, on the college level, who has a sincere interest in Animal Science.

EMBLEM

The Block and Bridle Emblem is significant to club members. It represents the principles on which this club is built. Character, sincerity, and a moral life are asked of members when they join and are depicted in the straight perpendicular of the “B.” The distinct curves of the “B” are symbolic of the social pleasure, mental energy and determination of members.

The meat block represents the material aspects of our life. The bridle stands for the behavior of Block and Bridle members, the control over ourselves that we try to maintain, the mannerisms and respect we show toward others, and the way in which we treat animals.
April 8, 1991

Block & Bridle Club  
C201 Animal Sciences  
University of Nebraska-Lincoln  
Lincoln, NE

Dear Block & Bridle Club Members:

The Department of Animal Science is proud to recognize the Block & Bridle Club as our undergraduate student club and to support the club's activities. You have a distinguished history. Nebraska is one of the four charter chapters of the national Block & Bridle Club. Representatives from Iowa, Kansas, Missouri and Nebraska established the national organization in 1919 and became the charter chapters. For more than 70 years, the Nebraska chapter has continued as one of the outstanding chapters in the United States.

Your club maintains a full and varied schedule of activities and continues to receive recognition for excellence in your programs. These provide a multitude of opportunities for members to develop and practice their leadership skills. I congratulate each of you on your accomplishments and thank you for your contributions to our Department's total program.

Nebraska's animal agriculture, as that of the entire United States, has continued to undergo rapid change in the past decade. The Block and Bridle Club has changed its programs accordingly. But you must continue to change in the future if you are to provide the activities, experiences and programs that are relevant to today's undergraduate students with their wide variety of rural and urban backgrounds and that will be relevant for animal agriculture in the 21st century.

On behalf of the Department of Animal Science, I extend congratulations and best wishes.

Sincerely,

[Signature]

Elton D. Aberle

Presidents’ Address

Another successful year for the University of Nebraska Block and Bridle is coming to a close. We would like to take time and reflect on past accomplishments and future endeavors.

Our success with all of our activities is due to the commitments made by members and faculty. Their time, effort and hard work make all of the events enjoyable for both members and participants alike. This talented group has been a pleasure to work with and hold a very promising future for the club.

We would especially like to thank Dr. Edgar Clemens, Dr. Ted Doane and Dr. Jeff Keown, our faculty advisors, who give time, energy and support to the club. The entire Animal Science faculty are also deeply thanked for their time and the support they have contributed during this past year.

As retiring presidents of the Block and Bridle Club, we hope that the tradition will carry on and that new ideas and people will create new opportunities and advances in the future.

Sincerely,

Chris Evans
Fall President

UNL Animal Science Graduate Students
Are You an Active Member?

Are you an active member
the kind that would be missed
Or are you just contented
that your name is on the list?
Do you attend the meetings
and mingle with the flock
Or do you stay home
and criticize and talk?
Do you take an active part
to help the work along
Or are you satisfied to be
the kind that just belongs?
Do you bring in new members
and help the old ones stick
Or do you leave the work to a few,
and talk about the clique?
Our organization has a progressive program
that you’ve heard plenty about
And you’ll be well rewarded if you will cooperate in helping us out
So join in our activities often
and help with hand and heart
Don’t just be a member
but take an active part
Think this over,
you know right from wrong
Are you an active member
or do you just belong?

INITIATES

Fall Initiates

Spring Initiates
It has been an honor and privilege for me to recap this year of Block and Bridle events. It took a tremendous club effort to put this 1990-1991 annual together and I would like to thank all members and initiates who took part. Special thanks to those who took the time to sell ads and to those who advertised in this year's annual. Without the advertisers this annual would not be possible and I hope that you will support them continually.

Brian Kabel
Cris Evans reads the new initiates "their rights."

Initiates stand and wait as they are auctioned off.

Suzy Foley, Assistant Marshal, catches some initiates cheating on their test.

U of N BLOCK & BRIDLE ANNUAL, 1990-91
Welcome Back
Fall, 1990

Once again showing his excellent
taste in snacks, Dr. Mandigo serves
to the B & B students.

Making conversation, Nancy Rathje
and Sharon Dobesh wait for the
competition to begin.

As division winners in the scavenger
hunt, Karen Cull, Shawn and
Tami Crick wait for their prizes,
while Dr. Jones hunts for
their names.

After the scavenger hunt, everyone pigs out on
ice cream, cake and pop.

As Brian Krabel looks on, Dr. Clemens shows Kelly
where to sign in as well as telling Todd and Chuck the
object of the contest.
Little Ak-Sar-Ben

Tucker Thompson anticipates a shot as Shelly Goodwater and Sharon Dobesh look on.

Amy Prokop explains why she is having trouble with her sheep.

The Judge having a hard time.
1990

KIDS'

Huffing and puffing, Tucker Thompson attempts to blow the biggest balloon.

Waiting for a female, Brian Krabel tries to show proper nursing procedures. Chuck Krysl looks on for some pointers.

Showing her equatation skills, Suzy Foley "hams it up" while Todd Capple and Kevin Hoffschneider take the ride of their lives.

Being careful not to get too close, an elementary student at Kids' Day tries to pet one of the steers.

Our Block and Bridle Kids' Days give the Lincoln grade schools a chance to see animals used in Production Ag.
Tucker Thompson joins a group of kids as they "get the feel" of the baby calf. Apparently, he's learning from the underaged.

As Todd Capple looks on, Doug Olson gives a student participating in Kids' Day a joy ride. The only problem is that no one ever learned that a horse doesn't rock from side to side when it walks.

Even big kids have fun at Kids' Day, as Brian Krabel and Cheri Borgelt demonstrate.

Just see how cute they are when they are little.

Thanks to our Committee Chairs Shelly Goodwater (Fall) and Ellen Hopkins (Spring) for their hard work.
1990-1991
Block and Bridle Queen

Nancy Rathje
Animal Science - Production Major
Ham Sales

Ham Sales was once again a large money making project for the year. The club sold close to 4,000 pounds of Hormel Cure 81 boneless hams. This year's sales were down from previous years, but the processing of the hams ran smoothly. The club owes a large thank-you to Dr. Roger Mandigo for his many hours of time and effort in helping with the ham sales. Congratulations to the Block and Bridle Club and its top sales people!

The SECRET Is Out....
The 1990 AHIR RESULTS Are In....

One of the most productive Angus cow herds in the country makes a statement with its 1990 bull calf crop!

85 BULL CALVES - Avg. 205 Day Wt. 665 lb.
- 20 Bull Calves Exceeded - 700 lb. (24%)
- 76 Bull Calves Exceeded - 600 lb. (99%)

85 BULL CALVES - Avg. Birth Wt. EPD +3.5 lb.
- 85 Bull Calves +6.5 or Less (100%)
- 73 Bull Calves +4.9 or Less (86%)

85 BULL CALVES - Avg. Weaning Wt. EPD +26.5 lb.
- 79 Bull Calves Exceeded +20.0 lb. (93%)
- 66 Bull Calves Exceeded +25.0 lb. (88%)

85 BULL CALVES - Avg. Milk EPD +11.6 lb.
- 84 Bull Calves Exceeded +7.0 lb. (98%)
- 81 Bull Calves Exceeded +5.0 lb. (95%)

How deep is the quality? The high 205 day wt. of 751 lb. was only 12% above average with a nursing ratio of 112.

Let our Program put uniformity and consistency into your cattle operation. Look to Rishel Angus as your Source for Angus bulls with this tremendous Balance of superior genetics.

They are the kind that are Fertile, Functional, Practical, Predictable and, most importantly, Profitable for us and FOR YOU!

Canaday Simmentals
Home of Quality Simmentals Since 1971
CO is your assurance of quality

- This marks our 20th year of using artificial insemination on our beef cows. Our genetics and EPD's of our herd just keep getting better and better.
- All 19 steers we have entered in the Nebr. Simmental Carcass Futurity have graded choice in the last five years (1986-87-88-89-90).
- We have 8 steers on central steer test this year. We stress raising easy fleshing cattle that grade choice.
- We also offer a few Gelbvieh and Salers bulls in our annual March production sale.

Our goal at Upstream Ranch is to produce bulls for commercial cattlemen that combine performance, soundness, and quality. We're striving for balanced trait selection with an emphasis on moderate birth weights, optimum, growth performance, and high maternal traits.

Our program consists of two production sales a year. Our Fall Sale consists of 100 bulls and 40 bred heifers, and with our Spring Sale consisting of 60 bulls. All animals sell with complete EPD information, fertility and pelvic examinations, first breeding season guarantee, and free delivery.

**FALL SALE:** Monday, October 28, 1991  
**SPRING SALE:** Monday, February 17, 1992

Why Nebraska SPF is first in the nation in supplying boars.

Quite true! Nebraska SPF has the honor and distinction of achieving first place in America in the number of boars supplied to swine producers. That's largely because successful producers know that profitable swine production begins with superior breeding stock... superior boars and gilts. And that's the story at Nebraska SPF. Profitability in a swine operation depends, of course, upon the highest possible net returns in the market place. And the Nebraska SPF program is geared to the production of breeding stock that results in the very best feed efficiency - even up to 240 pounds.

Further, Nebraska SPF, through high technocracy continuously applied, has a program which assures producers of lowest backfat standards, so essential in meeting present-day consumer demands. Producers are assured of premium expectancy on carcass merit.

Carcass shown left illustrates excessive backfat which is undesirable in today's markets.

And, of course, health and litter size are highly important in today's swine operations. These factors work to provide the competitive edge.

Now operating worldwide, Nebraska SPF is perhaps the finest swine disease-control system in existence today. Look to Nebraska SPF for the finest in breeding stock - PRO LINES: PURE-PRO specific breed lines: PRO-MASTER boars of specific hybrids: PRO-ELITE F, gilts, for maximum litter production and high levels of health.

Carcass shown right illustrates the low backfat that meets present-day market preference.
