"ARD News August 1992" (1992). *Agricultural Research Division News & Annual Reports*. 43.  
<http://digitalcommons.unl.edu/ardnews/43>

This Article is brought to you for free and open access by the Agricultural Research Division of IANR at DigitalCommons@University of Nebraska - Lincoln. It has been accepted for inclusion in Agricultural Research Division News & Annual Reports by an authorized administrator of DigitalCommons@University of Nebraska - Lincoln.

August 1992

Volume 26, Number 7

## COMMENTS FROM THE DEAN

Dear Colleagues:

During the past three years, ARD has been assembling data regarding resources provided to units, grants obtained by units and performance characteristics of units. This information has been summarized to provide a historical perspective on the progress units are making toward achieving both ARD and unit goals. The data also assists units in establishing goals and in identifying those areas where emphasis should be placed to increase overall unit productivity.

All data are summarized on a "per FTE" basis so that an overall ARD average can be calculated and some comparisons of units can be made. All units are provided with the indicators for their units and the ARD averages. The unit administrators are free to use the information in any manner that they deem appropriate for improving the unit's research program. None of the data refer to individual performance and the unit averages should not be considered as the "standard" for all faculty members in the unit. For example, if the average grant income for a unit was \$50,000 per research FTE, we would not expect that all faculty members in the unit would feel obligated to obtain the average level of grant income each year. We realize that opportunities for grant income vary greatly between disciplines and within subject areas in a given discipline.

Unit or ARD averages should not necessarily become goals for faculty members in a unit. Individual output goals should be jointly agreed to by the unit administrator and the faculty member and should reflect the individual's assignment, program area, rank, availability of resources, and other intangible factors. By summarizing unit performance data, ARD does not want to establish output standards for faculty members or to become excessively bureaucratic.

Darrell W. Nelson  
Dean and Director

## FY1993 CSRS BUDGET OUTLOOK

The Agriculture Subcommittees of the House and Senate Appropriations Committees have "marked up" the USDA budget for FY 1993. Listed below are FY 1992 appropriations and House and Senate proposed FY 1993 funding levels for CSRS research programs. Any differences between the House and Senate versions will be rationalized in the conference committee process. We are disappointed that Congress will appropriate funds for FY 1993 that are similar to those provided in FY 1992.

<i>Program</i>	<i>FY92 Actual</i>	<i>FY93 House</i>	<i>FY93 Senate</i>
----- thousands of dollars -----			
<b>Base Funds:</b>			
Hatch Act	168,785	168,758	168,758
McIntire-Stennis	18,533	18,533	18,533
Animal Health	5,551	5,551	5,551
National Research Init.	97,500	97,500	97,500
Special Grants	73,979	57,151	61,612
<b>Other Programs:</b>			
Critical Ag Mat.	400	400	400
Rangeland Research	475	475	475
Aquaculture Center	4,000	4,000	4,000
Sustainable Ag	6,725	6,725	6,725
Alternative Crops	1,168	1,168	500
Ag Weather Inform.	400	0	400

## UNIVERSITY OF NEBRASKA FOUNDATION AWARDS

Each year the University of Nebraska Foundation provides about \$400,000 to the University of Nebraska System for support of "cutting edge" programs of special interest to Nebraskans. Traditionally most of the funding has been used to purchase research equipment. This year the great bulk of funding was provided for innovative teaching programs. The only research grant provided to UNL was awarded to Dr. Raul Barletta of the Department of Veterinary Science in support of a proposal entitled "Improved Biological Detection by Luminometry".

The Agricultural Research Division provides information and educational programs to all people without regard to race, color, national origin, sex or handicap.

Congratulations to Dr. Barletta and other faculty in the Veterinary Science Department who contributed to development of the proposal. ARD also thanks all faculty who submitted proposals to the UN Foundation grant program.

### ARD ADVISORY COUNCIL ELECTION RESULTS

As a result of recent elections, the following individuals were selected to serve on the Agricultural Research Division Advisory Council for a three-year period:

- District 3: **David Mortensen (Agronomy)** - Representing faculty in the Department of Agronomy.
- District 4: **Ken Hubbard (Agricultural Meteorology)** - Representing faculty in the Departments of Agricultural Meteorology, Environmental Programs, Entomology, and Horticulture.
- District 9: **David Baltensperger (Panhandle R & E Center)** - Representing the faculty in the Panhandle and West Central R & E Centers.

Returning ARD Advisory Council Members are:

- District 1: **John Rupnow (Food Science and Technology)** - Representing faculty in the Departments of Agricultural Economics and Food Science and Technology.
- District 2: **Dean Eisenhauer (Biological Systems Engineering)** - Representing faculty in the Department of Biological Systems Engineering and the Northeast and South Central R & E Centers.
- District 5: **Chris Calkins (Animal Science)** - Representing faculty in the Department of Animal Science.
- District 6: **Edward Peters (Forestry, Fisheries and Wildlife)** - Representing faculty in the Departments of Biometry; Forestry, Fisheries and Wildlife; and Veterinary Science.
- District 7: **James Partridge (Plant Pathology)** - Representing the faculty in the Departments of Biochemistry and Plant Pathology.
- District 8: **Julie Albrecht (Nutritional Science and Hospitality Management)** - Representing faculty in the Departments of Agricultural Leadership, Education and Communications; Consumer Science and Education; Human Development and the Family; Nutritional Science and Hospitality Management; and Textiles, Clothing and Design.

The Agricultural Research Division appreciates the dedicated service and contributions to the Council by the outgoing members - **Pat Shea, Shashi Verma, and Jack Campbell.**

### HARDIN DISTINGUISHED GRADUATE FELLOWSHIP FOR 1992-1993

The recipient of the Hardin Distinguished Graduate Fellowship for 1992-1993 is **Robert K. D. Peterson** from the Entomology Department. This particular fellowship is made possible by an endowment established at the University of Nebraska Foundation by former University of Nebraska Chancellor Clifford Hardin to support outstanding graduate students doing research in plant physiology.

Robert Peterson is completing his Ph.D. in plant stress physiology associated with biotic stressors. His research project focuses specifically on physiological responses of plants to arthropod-induced leaf injury. Dr. Leon Higley in the Department of Entomology is his advisor.

### WIDAMAN TRUST DISTINGUISHED GRADUATE ASSISTANT AWARD

The Widaman Trust was established in 1975 through a generous gift provided to the University of Nebraska Foundation by Ms. Blanch Widaman. Ms. Widaman asked that the income from the trust be used by UNL for basic research in agriculture and the funds support people rather than purchase supplies and/or equipment. She suggested that the money be used for scholarships or fellowships for graduate students conducting basic research in agriculture.

The criteria established for the Widaman Trust Distinguished Graduate Assistant Award specifies that only 5% of the graduate students in a department can receive the recognition and that the awardees must demonstrate outstanding scholarship and excellence in research. We congratulate the following graduate students for receiving the Widaman Trust Distinguished Graduate Student Award for 1992-1993:

- |              |                            |

Name: Luis Schang  
 Thesis area: Virology  
 Department: Veterinary Science  
 Advisor: F. Osorio

## SUSTAINABLE AGRICULTURE GRANTS AVAILABLE

The North Central Region of the Sustainable Agriculture Research and Education Program will award approximately \$900,000 in competitive grants for FY-93 in the Low-input Sustainable Agriculture (LISA) research and education program. This year approximately 25% of the funds have been allocated to special areas of interest: 1) implication and utilization of the sustainable agriculture provisions of the 1990 Farm Bill, and 2) community development focused on sustainable agriculture. There will be an additional \$440,000 allocated under the Agriculture in Concert with the Environment (ACE) grant program focusing on preventing agricultural pollution and enhancing diverse and abundant fish and wildlife. A third competitive grant program, which is unique to the North Central Region and offered for the first time, is available for producers to identify obstacles to their conversion from conventional to a more sustainable agricultural system and develop strategies to address the problems. This program has \$100,000 available for approximately 20 mini grants. All of these grant programs have a September 4, 1992 deadline.

### GRANTS AND CONTRACTS RECEIVED JUNE & JULY, 1992

<b>Agricultural Meteorology</b>		
Wilhite, D. A. - U.N. Environment Programs		30,000
<b>Agronomy</b>		
Andrews, D. J. - AID		113,400
Clegg, M. D. - AID		8,100
Eastin, J. D. - AID		40,500
Maranville, J. W. - AID		45,360
Mason, S. C. - AID		58,725
Mortensen, D. A. - USDA/ARS		30,000
Shearman, R. C. - USDA/ARS		40,000
Sullivan, C. Y. - AID		14,838
Miscellaneous grants under \$5,000 each		62,775
<b>Animal Science</b>		
Grotjan, H. E. - NSF		76,000
Keown, J. F. - Nat'l Ass'n of Animal Breeders		10,000
Klopfenstein, T. J. - Nebraska Ethanol Authority		16,375
Klopfenstein, T. J. - Syntex Animal Health		16,500
Lewis, A. J. - Lilly Research Laboratories		28,400
Miscellaneous grants under \$5,000 each		22,514
<b>Biochemistry</b>		
O'Leary, M. H. - NIH		133,846
<b>Biological Systems Engineering</b>		
Miscellaneous grants under \$5,000 each		1,651
<b>Entomology</b>		
Miscellaneous grants under \$5,000 each		20,080

Environmental Programs	
Miscellaneous grants under \$5,000 each	3,000
Food Science & Technology	
Miscellaneous grants under \$5,000 each	1,434
Forestry, Fisheries & Wildlife	
Hoagland, K. D. - Nebr. Dept. of Environmental Control	8,340
Hoagland, K. D., Peters, E. J., Savidge, J. A., Seibert, T. F., Brandle, J. R., Case, R. M., Holland, R. S., & Hygnstrom, S. E. - U.S. Fish & Wildlife Service	194,000
Miscellaneous grants under \$5,000 each	22,156
Horticulture	
Riordan, T. P. - Nat'l Turfgrass Evaluation Program	6,000
Miscellaneous grants under \$5,000 each	13,980
Industrial Ag Products Center	
Hanna, M. A. - NEOS System	24,900
Miscellaneous grants under \$5,000 each	7,375
Northeast Research & Extension Center	
Miscellaneous grants under \$5,000 each	15,500
Panhandle Research & Extension Center	
Smith, J. A. - John Deere Company	8,000
Miscellaneous grants under \$5,000 each	46,041
Plant Pathology	
Mitra, A. & Dickman, M. - Midwest Plant Biotechnology Consortium - Purdue University	83,750
Yuen, G. - UN Foundation - Sampson Endowment	9,000
Miscellaneous grants under \$5,000 each	500
South Central Research & Extension Center	
Miscellaneous grants under \$5,000 each	24,750
Veterinary Science	
Chen, Sway-Shen Alex - Nebr. Dept. of Health	28,800
Jones, C. - National Cancer Institute	77,330
Miscellaneous grants under \$5,000 each	23,549
West Central Research & Extension Center	
Adams, D. C. - UN Foundation - Sampson Endowment	7,500
Miscellaneous grants under \$5,000 each	22,161
<b>Grand Total</b>	<b>1,397,130</b>

## NEW OR REVISED PROJECTS

The following station projects were approved recently by the USDA Cooperative State Research Service:

### 10-117 (Ag Economics) Factors Affecting the Evolution of World Agricultural Markets: Implications for U.S. Policy

*Investigator:* E. W. F. Peterson

*Status:* New Hatch project effective November 12, 1991

### 12-218 (Agronomy) Soil and Crop Management Practices for Erosion Control and Sustained Productivity

*Investigator(s):* J. W. Doran, L. N. Mielke, W. W. Wilhelm, J. R. Ellis, J. F. Power, and J. E. Gilley

*Status:* New State project effective March 1, 1992

### 12-219 (Agronomy) Management of Soil, Water, and Nitrogen Resources to Protect Ground Water Quality

*Investigator(s):* J. S. Schepers, W. W. Wilhelm, L. E. Stetson, G. E. Varvel, J. W. Doran and J. F. Power

*Status:* New State project effective March 1, 1992

### 12-221 (Agronomy) Physiology, Growth, and Development of Selected Perennial Forage Grasses

*Investigator:* L. E. Moser

*Status:* New Hatch project effective May 6, 1992

### 12-222 (Agronomy) Physiological Eval. of Cultural & Genetic Factors Influencing Seasonal & Instantaneous WUE

*Investigator:* J. E. Eastin

*Status:* New Hatch project effective June 30, 1992

### 13-087 (Animal Science) Uterine Function in the Bovine with Luteal Phase Deficiency

*Investigator:* J. E. Kinder

*Status:* Revised Animal Health project effective October 1, 1992

### 13-114 (Animal Science) Feed Quality Improvement of Sorghum Grain

*Investigator(s):* R. A. Britton, R. A. Stock, J. F. Pedersen, K. J. Moore, and D. J. Andrews

*Status:* New State project effective July 1, 1992

### 14-066 (Veterinary Science) Functional Analysis of the BHV-1 Latency Related Gene

*Investigator:* C. Jones

*Status:* New Hatch project effective May 13, 1992

### 14-067 (Veterinary Science) Evaluation and Modulation of Bovine Immune Function

*Investigator:* L. J. Perino

*Status:* New State project effective June 1, 1992

### 15-063 (Biochemistry) Enzymology of Anaerobic CO<sub>2</sub> Fixation and Bioremediation

*Investigator:* S. W. Ragsdale

*Status:* New Hatch project effective June 1, 1992

### 16-061 (Food Science and Technology) Utilization of Poultry Skin

*Investigator(s):* G. W. Froning, R. W. Mandigo, S. S. Sumner, C. L. Weller and S. L. Cuppett

*Status:* New State project effective July 1, 1992

### 19-002 (Food Processing Center) Development and Quality/Safety Enhancement of Specialty Food Products

*Investigator(s):* S. L. Taylor and D. A. Neumeister

*Status:* New Special Grant effective May 1, 1992

### 19-003 (Food Processing Center) Development and Evaluation of Food Products, Processes and Markets

*Investigator:* S. L. Taylor

*Status:* New State project effective June 1, 1992

### 20-053 (Horticulture) Breeding & Development of Buffalograss & Other Low Maintenance Species for the Central Great Plains

*Investigator:* T. P. Riordan

*Status:* New Hatch project effective July 1, 1992

**26-020 (Forestry, Fisheries & Wildlife) Evaluation of Environmental Factors and Fish Species for Aquaculture Development in Nebraska**

*Investigator:* T. B. Kayes

*Status:* New Hatch project effective May 8, 1992

**29-002 (Industrial Ag Products Center) Investigating Milkweed as an Alternative Source of Fiber**

*Investigator:* M. A. Hanna

*Status:* New Special Grant effective July 1, 1992

**42-019 (Northeast Research & Extension Center) Increasing Fertilizer Efficiency in Northeast Nebraska**

*Investigator:* C. A. Shapiro

*Status:* New Hatch project effective May 1, 1992

**43-054 (West Central Research & Extension Center) Evaluation of Management Practices to Improve Reproductive Efficiency of Beef Heifers**

*Investigator(s):* G. H. Deutscher and D. C. Adams

*Status:* New Hatch project effective May 1, 1992

**44-035 (Panhandle Research & Extension Center) Feed Resources and Beef Production Systems in Western Nebraska to Optimize Total Efficiency**

*Investigator(s):* I. G. Rush and B. Weichenthal

*Status:* Revised Hatch project effective May 1, 1992

**44-045 (Panhandle Research & Extension Center) Resource Efficient Dryland Cropping Systems for Western Nebraska**

*Investigator:* D. J. Lyon

*Status:* New Hatch project effective February 1, 1992

**PROPOSALS SUBMITTED FOR FEDERAL GRANTS**

The following is a listing of proposals that were submitted after June 1, 1992 by faculty for federal grant programs. While not all grants will be funded, we applaud the faculty member's effort in submitting proposals to the various agencies.

**James Van Etten** - National Institute of Health - DNA Replication and Gene Expression of *Chlorella* Viruses - \$1,409,955

**John H. Golbeck** - National Science Foundation - Resolution and Reconstitution of Photosystem I in Cyanobacteria and Higher Plants; Molecular Biological and Physiochemical Studies - \$513,000

**Robert J. Spreitzer** - National Institute of Health - Chloroplast Heteroplasmic Suppression - \$409,065

**Marion O'Leary** - U.S. Department of Energy - Dynamics of Photorespiration in Plants - \$316,936

**Stephen G. Ernst** - Midwest Plant Biotechnology Consortium - Isolation and Characterization of the Bark Storage Gene Family of Poplar - \$192,274

**Shashi B. Verma and Frank G. Ullman** - National Science Foundation - Measurement and Analysis of Methane Fluxes in a Northern Peatland Ecosystem - \$164,600

**Elizabeth A. Walter-Shea and Timothy Arkebauer** - National Oceanic and Atmospheric Administration - Radiation and Gas Exchange of Canopy Elements in a Boreal Forest - \$398,469

**James S. Schepers, Darrell G. Watts and Todd A. Peterson** - USDA Special Grant - Soil and Tissue Testing Strategies to Reduce Nitrate Leaching Under Irrigation - \$57,855

**Daniel T. Walters and Donald H. Sander** - USDA Special Grant - Analysis of Soil Nitrate Depth Distribution Effects on Fertilizer N Use by Corn - \$55,176

**Richard B. Ferguson and Gary W. Hergert** - USDA Special Grant - Variable Rate Nitrogen Application for Corn Based on Spatially Variable Grain Yield and Soil Nitrate - \$59,525

**Donald H. Sander, Kenneth D. Frank and Edwin J. Penas** - USDA Special Grant - Calibration of Residual Soil Nitrate for Predicting Supplemental N for Sorghum - \$59,970

**George E. Meyer and James Schepers** - USDA Special Grant - Improvement of Water Quality by Use of an Optical Plant Nitrogen Sensor - \$48,584
