U.S. Drought Monitor

May 7, 2013
Valid 8 a.m. EDT

Intensity:
- D0 Abnormally Dry
- D1 Drought - Moderate
- D2 Drought - Severe
- D3 Drought - Extreme
- D4 Drought - Exceptional

Drought Impact Types:
- Delineates dominant impacts
  - S = Short-Term, typically <6 months (e.g. agriculture, grasslands)
  - L = Long-Term, typically >6 months (e.g. hydrology, ecology)

The Drought Monitor focuses on broad-scale conditions. Local conditions may vary. See accompanying text summary for forecast statements.

Released Thursday, May 9, 2013
Author: David Miskus, NOAA/NWS/NCEP/CPC
**U.S. Corn Areas Experiencing Drought**

**Reflects May 7, 2013**

U.S. Drought Monitor data

Approximately 35% of the corn grown in the U.S. is within an area experiencing drought, based on historical NASS crop production data.

---

Major and minor agricultural areas are derived from NASS county-level crop production data from 2006 to 2010. Additional information on these agricultural data can be found at: http://www.nass.usda.gov/.

Mapped drought areas are derived from the U.S. Drought Monitor product and do not depict the intensity of drought in any particular location. More information on the Drought Monitor can be found at: http://droughtmonitor.unl.edu/.

- Major areas combined account for 75% of the total national production annually.
- Major and minor areas combined account for 99% of the total national production annually.

U.S. Hay Areas Experiencing Drought

Reflects May 7, 2013
U.S. Drought Monitor data

Approximately 41% of the domestic hay acreage is within an area experiencing drought, based on NASS 2007 Census of Agriculture data.

Major and minor agricultural areas are based on NASS 2007 Census of Agriculture data. Counties shaded in gray contain data that are not published by NASS, and hence were not used in delineating the major and minor agricultural areas. Additional information on these agricultural data can be found at: http://www.agsurvey.usda.gov/.

Mapped drought areas are derived from the U.S. Drought Monitor product and do not depict the intensity of drought in any particular location. More information on the Drought Monitor can be found at: http://droughtmonitor.unl.edu/.

• Major areas combined account for 75% of the total national acreage.
• Major and minor areas combined account for 99% of the total national acreage.
