It has been accepted for inclusion in Great Plains Wildlife Damage Control Workshop Proceedings by an authorized administrator of DigitalCommons@University of Nebraska - Lincoln.
Eighth Great Plains Wildlife Damage Control Workshop Proceedings

April 28-30, 1987
Rapid City, South Dakota
Abstract

These proceedings consist of more than 40 presented papers on damage caused by many different animals. Panel presentations that followed two special sessions—one on prairie dogs and related small mammals and another on ways to enhance waterfowl production—are also included. In addition to information on mechanical and chemical control methods, the ecosystem processes involved are considered.

Keywords: Prairie dogs, waterfowl, coyotes, rodents, bird repellents, predacides, rodenticides

Pesticide Precautionary Statement

This publication reports research involving pesticides. It does not contain recommendations for their use, nor does it imply that the uses discussed here have been registered. All uses of pesticides must be registered by appropriate state and/or federal agencies before they can be recommended. CAUTION: Pesticides can be injurious to humans, domestic animals, desirable plants, and fish or other wildlife—if they are not handled or applied properly. Use all pesticides selectively and carefully. Follow recommended practices for the disposal of surplus pesticides and pesticide containers.

NOTE: Mention of a trade name or proprietary product does not constitute a guarantee or warranty of the product by the U.S. Department of Agriculture and does not imply its approval to the exclusion of other products that may also be available.

Wildlife Damage Control
Workshop Proceedings

April 28-30, 1987
Rapid City, South Dakota

Technical Coordinators:
Daniel W. Uresk, Rocky Mountain Forest and Range Experiment Station
Greg L. Schenbeck, Nebraska National Forest
Rose Cefkin, Rocky Mountain Forest and Range Experiment Station

Sponsor:
Great Plains Agricultural Council, Wildlife Resources Committee

In cooperation with:
USDA Forest Service, Rocky Mountain Forest and Range Experiment Station
USDA Forest Service, Nebraska National Forest
USDA, Animal and Plant Health Inspection Service, Animal Damage Control
South Dakota Cooperative Fish & Wildlife Research Unit
South Dakota Department of Game, Fish & Parks
South Dakota Department of Agriculture
National Park Service
More than 200 people attended the Eighth Great Plains Wildlife Damage Control Workshop in Rapid City, South Dakota. The workshop brought together field technicians, managers, administrators, researchers, educators, students, legislators, and extension and industry representatives to further technology and information transfer. In addition to a general session on damage caused by many different animals, two special sessions were held: (1) prairie dog management and control, and (2) predator management and control to enhance waterfowl production. Both of these topics are currently high-interest issues on the northern Great Plains, the site of this workshop. Each of these sessions consisted of individual presentations followed by panel/audience discussions. A well-attended field trip to review black-tailed prairie dog management on the Buffalo Gap National Grassland and Badlands National Park brought the workshop to a close. These proceedings document this workshop.

Rapid publication of these proceedings was facilitated largely by the excellent efforts of the authors (and the typists!) in preparing the manuscripts, most of which we received camera-ready. Since papers are, essentially, being printed as received, each contributor is responsible for the accuracy of his or her paper; opinions expressed by the authors may not necessarily reflect the policy of the U.S. Department of Agriculture.

We extend our thanks to Steve Denison, Robert Hodorff, and Lisa Hold for technical and operations assistance during symposium sessions. Shary Kennedy and Susan Scott graciously typed final drafts of many manuscripts. We appreciate the time and effort spent by personnel of various sponsoring agencies in making this workshop a success.

Finally, we would like to express appreciation to the Rocky Mountain Forest and Range Experiment Station, Rapid City, SD; the Rapid City Chamber of Commerce; and to the Nebraska National Forest, for being excellent workshop hosts.

We believe the proceedings of this workshop will serve as a valuable vehicle for continued improvement in the effectiveness, soundness, and professionalism of the field of wildlife damage control and management. It is our hope that the success of this workshop will provide further incentive for the Great Plains Agricultural Council to continue its promotion of similar workshops in the future.

Daniel W. Uresk, Chairman
Greg Schenbeck, Co-Chairman
