Philosophy Collection Development Policy

University Libraries, University of Nebraska- Lincoln

Kathy Johnson, Liaison Librarian, December 2009

Approved: CDC, December 16, 2009

I. GENERAL ACADEMIC PROGRAM INFORMATION

The philosophy collection supports the teaching, research, and service activities of the entire university community. Its primary audience is the faculty and students of the Department of Philosophy in the College of Arts & Sciences. Its primary focus is support for the undergraduate and graduate curricula for philosophy. Research needs of faculty and students are supplemented through Interlibrary Loan. Although the collection also benefits other citizens of the state of Nebraska, materials are not purchased with them in mind. While the collection focuses on works classified in Library of Congress call numbers B, BC-BD, BH, and BJ, research support is also provided by other areas of the general library collection, especially in BL51 (philosophy of religion), H (social sciences), J (political science), K (philosophy of law), Q (philosophy of science), QA (philosophy of mathematics), and R (philosophy of medicine/medical ethics).

Philosophy

The University of Nebraska-Lincoln Philosophy Department offers a graduate program, leading to either an MA or a PhD, and an undergraduate program, offering a BA in Philosophy, as well as a minor in philosophy. The department currently has sixteen faculty members and approximately 25 graduate students in residence. The research and teaching interests of the faculty are broad and span all the major subject areas of philosophy and many of the important specialties. The faculty offer courses in metaphysics, epistemology, ethics, philosophy of mind, history of philosophy, logic, aesthetics, philosophy of language, philosophy of law, philosophy of mathematics, philosophy of science, philosophy of the social sciences, and social and political philosophy. [Adapted from the Philosophy Department's web page <http://www.unl.edu/philosop/> 2009]

Specialized research interests of the faculty include

a priori knowledge, perception, and metaphysical issues connected with particulars and universals
action theory
analytic philosophy
ancient philosophy
epistemology
ethics
feminist philosophy
Hellenistic philosophy
the intersection of law, psychology and philosophy
medieval philosophy
metaethics
metaphysics

normative ethics
philosophical logic
philosophy of history
philosophy of language
philosophy of logic
philosophy of mathematics
philosophy of mind
philosophy of religion
philosophy of science
philosophy of the social sciences
theory of value and reasons for action
political philosophy

Philosophy is highly interdisciplinary, with many of its concerns overlapping with literature, history, political science, linguistics, law, and science.

There is no accrediting body for philosophy.

II. GEOGRAPHICAL COVERAGE

European and North American philosophers are of primary interest. When funds permit, Asian, African, and South American works are acquired.

III. CHRONOLOGICAL COVERAGE

All historical periods are represented in the collection.

IV. IMPRINT DATE

Recent imprints are preferred over retrospective titles, unless older editions are the only ones available. The standard edition of a philosopher's work is a high priority, regardless of imprint date.

V. FORMAT/TYPE AND LEVEL OF MATERIALS

Collection emphasis is on acquiring monographs, scholarly journals, and reference sources. Proceedings, symposia, dissertations, and textbooks are collected selectively. Philosophical research is more journal-oriented than other humanities disciplines, and this is considered in establishing acquisition priorities. Online journals and reference tools should be acquired when available. Preference is given to print monographs over electronic.

VI. LANGUAGES

English is the preferred language, but materials in French and German are also desirable. Critical editions in the original language of publication are a high priority. Non-English translations are not routinely acquired.

VII. SPECIAL FACTORS

The following types of materials are included in the physical and electronic Reference Collections: handbooks, dictionaries, and encyclopedias; retrospective and serial bibliographies; and biographical tools.

The library attempts to acquire all standard critical editions of the works of Anglo and American philosophers, as well as the standard critical editions of Continental philosophers of all eras.

These standard, critical editions should be shelved in Love Library, for consultation by the users.

VIII. CLASSIFICATION AND INTENSITY LISTING

(The following are listed by Library of Congress Class, Subject, and then by Intensity Level)

B Philosophy see below

B 1-52; Philosophy-Periodicals, Yearbooks; RESEARCH
