A Dysfunctional Tricarboxylic Acid Cycle Enhances Fitness of Staphylococcus epidermidis during β-Lactam Stress

Department of Pathology and Microbiology, Center for Staphylococcal Research, and Department of Cellular and Integrative Physiology; University of Nebraska Medical Center, Omaha, Nebraska, USA; Department of Microbiology and Immunology, Faculty of Pharmacy, Beni-Suef University, Beni-Suef, Egypt; School of Veterinary Medicine and Biomedical Sciences, University of Nebraska, Lincoln, Nebraska, USA

Volume 4, no. 4, doi:10.1128/mBio.00437-13, 2013. Below are two errors that were noted recently.

The first author’s name was spelled incorrectly. The byline should appear as shown above.

The units associated with Fig. 1A to E were mislabeled. The correct units on the x axis should be μg/ml instead of mg/ml. Figure 1 should appear as shown below.
