Agricultural Experiment Station News

FROM THE DIRECTOR'S DESK

Dean and Director Search and Selection:

As Vice Chancellor Arnold has informed you, the Search Advisory Committee has submitted its report and recommendations including three candidates. The interviews were scheduled and provided opportunities for staff to meet informally with the candidates. We hope you did so. This important process should be completed in the next few weeks.

Instrument Repair Service:

All AES scientists are reminded that we have established a scientific instrument repair service on the East Campus in Agricultural Biochemistry Hall (Phone 472-6866). This service is on a charge basis through arrangements the AES has made with Scientific Stores and a private firm. This service has already demonstrated reduced "down time" for users.

Advisory Committee to Secretary Block:

R. W. Kleis has been appointed by Secretary Block to serve a two year term on the USDA Joint Committee on Science and Technology starting immediately.

ARS Program Distribution:

There is much current concern in Washington and in this region about the geographic distribution of USDA in-house research. A spring 1982 report by Dr. Hodgson of the Wisconsin Station "identified" the following data which others are pursuing in the interest of the North Central region.

Region	Cash Receipt from Farming*	ARS Research Support*
North Central	44	22
North East	6	26
Southern	29	32
Western	21	20
	100	100

* Percent of U.S. Total

Indirect Costs on Grants:

Please be reminded that indirect costs (31 percent of Total Modified Direct Costs) are to be budgeted into all

grants (except industry grants of \$2,500 or less). These are real and legitimate costs and to not include them is unfair to other segments of the Station program which then must "subsidize" those grants.

Vacation Time:

If you haven't yet taken vacation time this year, you are encouraged to work it into your schedule. It is important to you, to families and to your work.

R. W. Kleis
Acting Dean & Director

EXPERIMENT STATION ADVISORY COUNCIL

Three new members were elected recently to the Agricultural Experiment Station (AES) Advisory Council. They are:

Dr. George W. Rehm, Extension Agronomist and Professor of Agronomy, Northeast Station

Dr. Austin J. Lewis, Associate Professor, Department of Animal Science

Dr. James R. Gilley, Associate Professor, Department of Agricultural Engineering

They will join the following staff to make up the Agricultural Experiment Station Advisory Council for the 1982-83 year:

Dr. Dale G. Anderson (Chairman), Professor, Department of Agricultural Economics

Dr. Robert A. Olson, Professor, Department of Agronomy

Dr. Ralph E. Neild, Professor, Department of Horticulture

Mr. Marvin B. Rhodes, Associate Professor, Department of Veterinary Science

Dr. Khem M. Shahani, Professor, Department of Food Science and Technology

Dr. D. Murray Danielson, Swine Nutritionist and Professor of Animal Science, North Platte Station

Sincere thanks goes to the following staff just completing their terms on the Council:

Dr. Eric D. Kerr, Professor of Plant Pathology, Panhandle Station

Dr. John K. Ward, Professor, Department of Animal Science

Mr. Gerald R. Bodman, Associate Professor, Department of Agricultural Engineering
