GENERAL NOTES

1. There are four newly elected members of the Experiment Station Advisory Committee who join five continuing members. They and their terms are:

<u>New</u>	<u>Continuing</u>
Dr. LeRoy Peters (1 year)	Dr. David Lewis (1 year)
Dr. Gerald Bodman (3 years)	Dr. Robert Mumm (1 year)
Dr. Eric Kerr (3 years)	Dr. Donald Ferguson (2 years)
Dr. John Ward (3 years)	Dr. Lowell Satterlee (2 years)
	Dr. Raymond Supalla (2 years)

2. Assistant Secretary Cutler spoke at the recent dedication of the Roman Hruska U.S. Meat Animal Research Center. He announced the planning for a national workshop to analyze problems and develop research priorities for "Animal Agriculture" similar to a crops workshop of three years ago. He further indicated that this could lead to a competitive grants program focusing on priority issues similar to the "highly successful" one for crops. We heard this with mixed feelings. Certainly development of research priorities is desirable. But whether the competitive grants approach is an efficient process for addressing them is doubtful, particularly at the cost of further erosion of formula support to the national agricultural research system recognized throughout the world for its effectiveness.
3. Diane Mohrhoff has replaced Barb Collins in the AES office and will be working with project document processing as well as serving as Dr. Sahs' secretary.
4. We along with others have been working to cause the serious 1980 federal budget shifts and reductions in agriculture proposed by the Executive branch to be restored in Congress. There have been some encouraging actions by the House Committee and we are cautiously optimistic at this stage.
5. "What you are stands over you the while, and thunders so that I cannot hear what you say to the contrary." --Ralph Waldo Emerson
