# Agricultural Experiment Station

Vol. 9, No. 1, July 1976

## FROM THE DIRECTOR'S DESK

We have been reexamining our respective work assignments in the Station office; the result is the following division of specific tasks. Of course, all of us represent the Station in a variety of ways in addition to these assignments.

With basic accountability for the Station program, I am concerned with general policy, program development, staff administration, budget and finance, program evaluation, publication policy, and out-of-state travel. I serve as Administrative-Technical Representative for McIntire-Stennis forestry research; of course, I participate in project and departmental reviews.

Associate Director Kleis is responsible for grants, contracts and Regional Research Funds, and is in charge of project monitoring, management, and reviews. He is the Newsletter editor and represents our office with respect to facilities and major technical equipment. He handles matters relating to support staff in the Station (B, C, D, and F, and Research Assistants and Associates). As of July 1, Bob is also serving part-time as Dean and Director of International Programs for the Institute.

Assistant Director Sahs is Supervisor of the Field Laboratory, including coordination of programs there, general purview of maintenance development, and housekeeping in assigned areas; he manages unassigned land areas. He "trouble shoots" operational matters in the Station, and monitors the revolving fund accounts. He serves as Station safety officer, and coordinates the purchase and use of major operational equipment. He is also involved in certain research projects.

In addition to being Associate Dean of the College of Home Economics, Dr. John Woodward serves as Assistant Director in the Station for Home Economics research. In this capacity he assists in the development of research projects, participates in project reviews, assists with project reporting, and generally facilitates research in Home Economics areas.

In addition to being Director of the Water Resources Research Institute, Dr. Wayne Hall is also an Assistant Director in the Station, with responsibility relating to research on water. His assignment involves working with projects, grants, and contracts, including records, plans, and reviews. He is concerned with equipment and facilities for water research. He coordinates water research in the Station.

In addition to serving as Assistant to the Vice Chancellor, Charles Koopmann serves as Personnel and Finance Officer for the Station. He handles budgets and accounts, processing of personnel actions, and monitors expenditures of funds. He trouble shoots and solves problems with respect to finance and personnel.

Current Research Information System (CRIS): The use of CRIS by Station research staff has been increasing. We encourage it. As a matter of policy we expect every staff member who is preparing a new project, or revising an existing one, to query the CRIS system for information relative to work in his area. Your chairman or district director has information on how to query CRIS. Let us know if you need further help.

## GENERAL NOTES

1. There have been extensive media coverage and many highly complimentary comments on the STAR summary report released June 24. Many of you had major time and effort investments in the effort. Thank you.
2. Over 2,000 people attended the national meeting of the American Society of Agricultural Engineers at UN-L, June 27-30.
3. Congratulations to Lowell Satterlee, Les Larsen and Dermot Coyne for recent national peer recognitions of their professional accomplishments.
5. A man is only as big as the things that annoy him.
