FROM THE DIRECTOR'S DESK

The Hatch fund cut recommended by the President is a little worse than we estimated in our letter of February. The reason—a new allocation formula applied to us and the other states based on the new agriculture census gives us a bigger share of increases, when there are any, and decreases, as in this year. Here are the effects of the new formula:

Hatch formula: -$186,639 instead of -$165,503
Hatch Regional: -$73,572 instead of -$57,300

So, the story is $37,000 worse than we indicated in February.
