Getting Started

The University of Nebraska’s Institute of Agriculture and Natural Resources offers more than 1,500 publications on topics for the home, farm or business. These publications are one means by which the University shares the results of its research, extension and teaching functions. In addition, new publications are released throughout the year and are available from your local extension office.

Publications in this catalog are listed under 15 major headings. Publication titles are preceded by a code consisting of letters and numbers. The numbers designate individual publications and may include the year of publication. The letters describe the type of publication.

Extension publications are written in a popular style for a general audience. G’s and HEG’s are NebGuides and Home Economics Guides, two- to four-page publications on farm, home and business topics. EC’s and CC’s are Extension Circulars and Campaign Circulars which are more detailed. AE’s are similar to EC’s and prepared by the Department of Biological Systems Engineering. LH’s designate Learn at Home publications — packets of publications specially selected to provide an in-depth understanding of the topic. CP’s, which denote computer programs, are listed separately from topic headings on page 22.

Research publications often may be more technical and directed toward an audience with some background of the topic. They are designated by the letters: RB — Research Bulletin, RP — Regional Publication, SB — Station Bulletin (Issued by Research and Extension Centers), and MP — Miscellaneous Publications.

Most publications are available free or at a nominal charge. Shipping and handling are extra. To order publications, contact your local extension office or use the form in the center of this catalog. If the form is missing, contact the Department of Agricultural Communications, 105 Agricultural Communications Building, University of Nebraska-Lincoln, Lincoln, NE 68583-0918.

How to Order Publications

Most bulletins listed here are available at your local extension office. If your extension office doesn’t have the publications you want, you can write to the Department of Agricultural Communications with your request or use one of the order forms found in this catalog.

NEBRASKA residents can be sent single copies of up to 10 different publications free of charge plus a mailorder charge of $1 for 1 through 10 copies. To get single copies of more than 10 different publications, you must pay the prices listed following the title for the extra copies plus the $1 mailorder charge. Payment must accompany order. NOTE: Publications with the prefix G or HEG in the publication number have no price listed following the description. They are one price, $.10 per copy.

OUT-OF-STATE residents are encouraged to contact their own land-grant university for publications that will apply more specifically to their needs. Out-of-state orders will have a charge for each publication ordered (shown at the end of each description) plus a minimum mail order charge of $1 for 1 through 10 copies. NOTE: Publications with the prefix G or HEG in the publication number have no price listed following the description. They are one price, $.10 per copy. Payment must accompany order.

There are a few publications for which a charge is made even if only a single copy is requested. These publications are listed as FOR SALE ONLY. Payment must accompany order.

All orders for delivery to NEBRASKA addresses must include sales tax of 6 1/2%. Nebraska addresses claiming a sales tax exemption must furnish an exempt sales certificate when ordering.

FOR SALE ONLY publications cannot be returned for credit or refund.

Checks or money orders should be made payable to the University of Nebraska.

The following programs are available for IBM and IBM-compatible computers.

**CP 1 Nebraska PC-Cowcard - A Beef Cow-Calf Microcomputer Program.** This program, written for the commercial cow-calf producer, stores, summarizes and analyzes large quantities of information on the cow herd including cow-calf histories and bull histories. It generates worksheets, reports and at the end of the year, automatically transfers pertinent data to the cow card and recalculates a new MPPA and averages for important traits. Requires 640K capacity and 10 megabyte hard disk. Specify diskette size. *(FOR SALE ONLY: $150.00)*

**CP 2 Share Arrangements for Cow-calf or Cow-yearling Operation: COWSHARE A Spreadsheet Program.** This computer program is to assist in the analysis of cow-calf or cow-yearling share arrangements. Available on 5 1/4" diskette only. *(FOR SALE ONLY: $15.00)*

**CP 3 Erosion - Universal Soil Equation: A Handbook for Nebraska Producers.** This program helps landowners learn the effects of varying cropping practices, soil types and rainfall amounts on soil erosion. It includes a copy of the publication, EC 88-116: Universal Soil Loss Equation: A Handbook for Nebraska Producers. Available on 5 1/4" diskette only. *(FOR SALE ONLY: $5.00)*

**CP 4 Pump Alternatives.** This computerized spreadsheet was developed to calculate the operating costs for a number of possible changes in an established pumping plant. It was designed to help irrigators calculate the cost of savings of these changes. Includes a copy of the publication EC 88-729, Irrigation Pumping Plant Alternatives. Available on 5 1/4" diskettes only. *(FOR SALE ONLY: $10.00)*

**CP 5 European Corn Borer.** This program is a powerful tool to manage the European Corn Borer in Nebraska field corn. The program predicts when second generation moths will lay eggs and when fields should be scouted. Scouting information is analyzed for relevant factors in deciding if insecticide treatment would be profitable, comparing predicted economic losses and control costs for individual fields. *(FOR SALE ONLY: $65.00 plus $4.23 sales tax and $2.00 shipping [$71.23] for each copy ordered). Specify diskette size. Note: This software package will be sold only to Nebraska residents. *(FOR SALE ONLY: $65.00)*

**CP 6 TERM—Term Loan Amortization and Calculation of Loan Balances.** This spreadsheet program was developed to help analyze financial matters related to loans. *(FOR SALE ONLY: $15.00)*
