*Abstract: This paper aims at evaluation of “financial times” newspaper citation in scholarly publications during 2001-2010 indexed in Web of Science. The study found that, the highest citation of “financial times” newspaper was during the year 2010 with 35.95% citations and the lowest was during year 2001 with 1.09% citations. Financial times are highly cited in journals research articles i.e. 87.77%, followed by review articles with 5.38% citations. Journal of Business Ethics (Netherlands) cited financial times highest with 1.79% citations, followed by Review of International Political Economy (UK) with 1.70% citations. It was cited highest in subjects of Arts and Social Sciences with 91.78% citations, and only 08.22% citations in subjects from Science and Technology. Beeson, M. has cited financial times highest i.e. 9 times, followed by Cooke, P. and Hodson, D cited 6 times each. Among the citing countries, highest citations i.e. 29.38% are from US, followed by UK with 25.27% citations. From the data it was found that a strong negative correlation between newspaper circulation and citation and a positive correlation between citation and internet penetration index.*

**Key words:** Newspaper, Citations, Financial times, Bibliometric, Primary Source

## **Introduction**

Newspaper is a periodical publication containing news, research findings, other important information and advertisement; most newspapers focus on political developments, economy, business and finance, education, development, environment, art, culture, sports, entertainment, health and medicine, science and technology etc (Dutt, Garg & Bhatta, 2013). Newspaper have being playing a vital role in the communication process of scientific research findings and publications in the world. Scientists across the world access to news sources or mass media like everyone else, which suggests that the scientific impact of a research will be boosted by coverage in newspapers and other media etc., Fanelli (2013). Newspapers are a primary source of communication for general public on issues related to any new developments. Many scientific research activities and findings on various disciplines are published daily in the newspapers across the globe. It helps subject field or discipline to reach out to its readers in very short span of time.

Newspaper industries encountered with disruptive internet technologies in the 1990's; and the first web-based newspaper was launched in 1994 called the "Electronic Signpost" in April 1994 (Gunter, 2003). In May 1995 Quill reported that more than one hundred Newspaper publishing houses had gone online with their web-edition (Cochran, 1995). The launch of web-edition broke the geographical boundaries of Newspaper reach; as internet penetration started to move in north direction across the globe.

Dailies are broadly classified in two categories; General Newspaper and Financial Newspaper. General Newspaper caters the need of all type of user, while Financial daily covers exclusive economic and financial subjects. One of the leading financial daily is "The Financial Times" it is an English-language international daily newspaper started in 1888 in United Kingdom by Pearson PLC, London. It emphasis mainly on business and economic news. The Financial Times has an average daily circulation of 391,657 in 2010 (Financial Times, 2017).

## **Literature Review**

Few prominent studies in past had identified the citation pattern in various disciplines and to identify the sources which attract more citation. Journals are highly cited and it is one of the most important sources in scholarly publications followed by thesis and dissertation (Madkey & Rajyalakshmi, 1994);

(Chikate & Patil, 2008); (Keat & Kaur, 2008); (Vimala & Dominic, 2012); (Kagra & Sharma, 2014). Source specific study by Singh & Bebi (2013); Gupta & Khare (2013); Ezema & Asogwa (2014) Singh & Bebi (2014) highlighted the importance of books as citation sources by researchers.

Online newspaper have evolved over the period of time, researcher have studied on variety of features like, content, inter-activeness, revenue etc., (Kamere & Bressers, 1998); Dibeau & Garrions, 2001); (Li, 2002). Newspaper as source was studied by Ravikumar & Agrahari (2015) and found that, newspaper is highly cited in scholarly publications. Old and most circulated newspaper is more cited than the new newspapers. They also found that, there is no correlation between rank of newspaper circulation and the rank of citation count.

Earlier studies had been carried out to find out the use of different forms of document; as a source of citations. From the literature it was found that financial newspaper specific studies have not been carried out till now. As these tabloids caters the information need to select audience. Thus, this study tries to bridge the gap using citation analysis to identify the role of Financial Times newspaper in scholarly publications and flow of information from dailies to serials.

## **Objectives**

The objectives of the study are:-

- i. To examine the citation pattern of financial time newspaper during 2001-2010
- ii. To find out types of documents citing financial times newspaper
- iii. To study the citation pattern of financial time newspaper in different journals

## **Research Questions**

- i. Is there any relationship between Citation and Circulation of Financial Times?
- ii. Does internet penetration contribute to Citation of Newspaper?

## **Sources of data**

There are many bibliographic databases covering different disciplines. Web of Science and Scopus are such two popular databases. Many authors have carried out citation studies using Web of Science and Scopus database. Erfanmanesh, Didegah & Omidvar (2010); Mishra, Panda & Goswami (2010); Upadhye,

Kademani, Mohan & Bhanumurthy (2012); Thapar & Sengar (2013); Baskaran (2014); Sagar, Kademani & Bhanumurthy (2014); Ravikumar and Agrahari, (2015) carried citation studies to find out the citation patterns, documents, countries, authors and subjects using Web of Science database. Similarly, Sagar, Kademani, Garg & Kumar (2010); Gupta, Bala & Kshitig (2012); Gupta, Kumbar & Gupta (2013) too carried out citation studies to find out the citation patterns, documents, countries, authors and subjects using Scopus database.

Haddow & Genoni (2010) in their studies mentioned that, Web of Science and Scopus it is difficult to separate in terms of preferred source. It appears from the previous research that neither source is best for all citation needs and that their usefulness is dependent upon subject areas and the age of publications. Thus, for the present study Web of Science was chosen for downloading citation data for “Financial Times” newspaper. Country wise internet penetration data was downloaded from Global Internet Map (“Global Internet Maps”, 2017) .

## **Methodology**

The study used Web of Science database to extract relevant data on Financial Times newspaper citation during 2001-2010. The relevant data was downloaded during January, 2016, from Web of Science core collection. The search string “Cited Reference Search” “Cited work” and the keywords “Financial Times” OR “The Financial Times” were used to download the relevant data for the study. During downloading relevant data, the citations of only six years including the year of newspaper article publication in financial time was considered (i.e. citation from 2001-2006 was considered to find out the citations of financial times newspaper article of 2001). Haddow & Genoni, (2010) too have adopted citation gap of six years in their citation study on Australian social science journals. This method was carried out keeping in mind to give equal time period for citing a newspaper article in scholarly publications and to avoid bias in data collection since the data is considered only up to 31<sup>st</sup> December, 2015. During the study period there were 3016 records indexed in Web of Science up to 31<sup>st</sup> December, 2015. Out of 3016 records, only 2713 records having a total of 2117 citations were found with complete information. In the present study analysis is carried out for 2713 records having 2117 citations. The downloaded data was transferred into excel sheet and fitted into the SPSS software for the analysis and interpretation of the result.

In this study, the method adopted by Ravikumar and Agrahari (2015) for deriving the citing countries and subjects was used. Thus, only the first author's affiliated institution was considered to derive the citing countries of Financial Times newspaper. Further only the first subject indexed in Web of Science is also considered to derive the different subjects citing financial times newspaper during the study period.

### **Data analysis and interpretation**

Citation of Financial Times newspaper in scholarly publications was examined to find out its importance as a citation source by researchers. The data analysis is carried out for 2713 records having 2117 citations in different scholarly publications of financial times during 2001-2010, indexed in Web of Science upto 31<sup>st</sup> December, 2015. However, these numbers of citations may change as the coverage of publications in the Web of Science is regularly updated.

#### *Citation Pattern of financial times*

Scanning the financial times newspaper articles and the citations during ten years i.e. during 2001-2010 period shows that there is gradual increase in citing financial times in scholarly publications except in the year 2003 with 41 (1.94%) citations. The highest citation of financial times was 761 (35.95%) during the year 2010, and the lowest was 23 (1.09%) citations in the year 2001, in different scholarly publications. The no. of articles indexed year-wise and the no. of scholarly publications citing financial times newspaper is shown in Table-1.

Table-1: Citation pattern of Financial Times during 2001-2010

Sl. No	Year	No. of Records	No. of Citations in Scholarly Publications	Citation (%)
1.	2001	75	23	1.09
2.	2002	110	54	2.55
3.	2003	111	41	1.94
4.	2004	128	56	2.65
5.	2005	161	57	2.69
6.	2006	200	90	4.25

7.	2007	292	203	9.59
8.	2008	394	325	15.35
9.	2009	582	507	23.95
10.	2010	660	761	35.95
Total =		2713	2117	100.00

\*Source WoS

#### *Distribution of different documents types citing financial times*

From the present study it is observed that, financial times is highly cited in journals research articles 1858 (87.77%) followed by review articles 114 (5.38%), editorial materials 69 (3.26%), Proceedings 45 (2.13%), book review 16 (0.76%), book chapter 8 (0.38), letter 5 (0.24%), Film review 1(0.05%) and Biographical-Items 1 (0.05%). The distribution of different types of documents citing financial times newspaper during 2001-2010 is shown above in table-2. Financial times newspaper is most frequently cited in journal research articles during the study period.

Table 2: Distribution of citing document types during 2001-2010

Sl. No	Document Type	No. of Citations	Percentage	Rank
1.	Article	1858	87.77	1
2.	Review	114	5.38	2
3.	Editorial Material	69	3.26	3
4.	Proceedings Paper	45	2.13	4
5.	Book Review	16	0.76	5
6.	Book Chapter	8	0.38	6
7.	Letter	5	0.24	7
8.	Film Review	1	0.05	8
9.	Biographical Item	1	0.05	9
Total =		2117	100.00	

\*source WoS

### *Scholarly publications citing financial times*

The study found that altogether there are 911 scholarly publications citing financial times during 2001-2010. Table-3, displays the top 10 ranked journals citing financial times newspaper. There are 12 journals within the top 10 journals citing financial times, contributing 12.33 % citations during the period. The citing journals are shown in appendix-I (a).

Table 3: Top 10 scholarly publications citing financial times during 2001-2010

Sl. No	Journals	No. of Citations in scholarly publications	Percentage	Rank
1.	Journal of Business Ethics	38	1.79	1
2.	Review of International Political Economy	36	1.70	2
3.	International Affairs	24	1.13	3
4.	New Political Economy	23	1.09	4
5.	Third World Quarterly	21	0.99	5
6.	Cambridge Journal of Economics	20	0.94	6
7.	Global Policy	20	0.94	6
8.	Washington Quarterly	18	0.85	7
9.	JCMS-Journal of Common Market Studies	16	0.76	8
10.	Survival	16	0.76	8
11.	Journal of Contemporary China	15	0.71	9
12.	Energy Policy	14	0.66	10
	Total =	261	12.33	

\*source WoS

Among the top 10 journals, Financial times newspaper was cited highly in Journal of Business Ethics (Netherlands) having 38 (1.79%) citations, followed by Review of International Political Economy (UK) having 36 (1.70%) citations, International Affairs (UK) having 24 (1.13%), New Political Economy (UK) having 23 (1.09), Third World Quarterly (UK) having 21 (0.99%) citations. Financial times newspaper is cited more in journals from United Kingdom.

### *Academic field (Subjects) citing financial times*

The study observed that, there are 107 subjects citing financial times newspaper during this period. There are 62 (91.78%) subjects from Arts and Social Sciences and 45 (08.22%) subjects from Science and Technology out of total 2117 citations. Among the Arts and Social Sciences, financial times is highly cited

in Economics 342 (17.59%) followed by International Relations 281 (14.45%), Business 218 (11.27%). and among the Science and Technology, financial times is highly cited in Computer Science 28 (16.09%) followed by Energy and Fuels 21 (12.07%) and Medicine, General & Internal 19 (10.09%).

Table- 4, below displays top 10 subjects citing financial times during 2001-2010, where the study found that financial times is cited more in Arts and Social Science disciplines in comparison to Science and Technology disciplines. The citing subjects are shown in appendix-I (b).

Table 4: Top 10 subjects citing financial times during 2001-2010

Arts and Social Sciences				Science and Technology			
Sl. No.	Subject	Citation	%	Sl. No.	Subject	Citation	%
1	Economics	342	17.59	1	Computer Science	28	16.09
2	International Relations	281	14.45	2	Energy & Fuels	21	12.07
3	Business	218	11.27	3	Medicine, General & Internal	19	10.09
4	Business, Finance	165	8.49	4	Engineering, Industrial	9	5.17
5	Area Studies	142	7.30	5	Pharmacology & Pharmacy	7	4.02
6	Political Science	138	7.10	6	Food Science & Technology	6	3.45
7	Management	91	4.68	7	Health Care Sciences & Services	6	3.45
8	Law	85	4.37	8	Health Policy & Services	6	3.45
9	Environmental Studies	62	3.19	9	Multidisciplinary Science	6	3.45

#### *Authors citing financial times in the scholarly publication*

Financial times newspaper is cited 2117 times by different authors in the scholarly publications during 2001-2010. Among the authors there are 17 authors who cited financial times most frequently i.e 4 and above in the scholarly publications. Among the 17 most active authors, Beeson, M. affiliated to University of Western Australia, Nedlands, WA 6009, Australia, have cited financial times 9 times in different subjects, followed by Cooke, P. affiliated to University of Cardiff Wales Cardiff CF10 3BB, Wales (UK) and Hodson, D. affiliated to University of London, London WC1E 7HX, England (UK) have cited 6 times each financial times in the scholarly publications. The most active authors are shown in Appendix-I (c).

The study found that, among the 17 most active authors majority of the authors are from USA (6) followed by authors from UK(3), Peoples Republic of China (2) and 1 each from Australia, France, Canada, Portugal, Finland and Belgium.

#### *Countries citing financial times most frequently*

Financial Times newspapers are cited in scholarly publications in different countries. There are 65 countries citing financial times newspaper. Maximum citations are from US with 622 (29.38%) and UK with 535 (25.27%) citations respectively. It is found that, 54.65% citations of financial times are from USA and UK together.

Table-5: Top 10 country citing financial times during 2001-2010

Sl. No	Country	No. of Citations	Percentage	Rank
1.	USA	622	29.38	1
2.	UK	535	25.27	2
3.	Australia	96	4.53	3
4.	Canada	94	4.44	4
5.	Peoples Republic of China	64	3.02	5
6.	Germany	61	2.88	6
7.	Netherlands	59	2.79	7
8.	France	39	1.84	8
9.	Belgium	35	1.65	9
10.	Spain	34	1.61	10
	Total =	1639	77.42	

\*source WoS

## Research Questions

(i) Is there any relationship between Citation and Circulation of Financial Times?

To test the research question rank correlation test was carried out, this tool allows us to identify which two variable rate in a monotonic function (i.e., that when one member increases, so does the other, or vice versa). For this particular test two rank data was generated based on “Financial times” newspaper circulation and its citation count. From the graph below, it is clear that newspaper circulations rank and its citation count rank form the linear pattern.

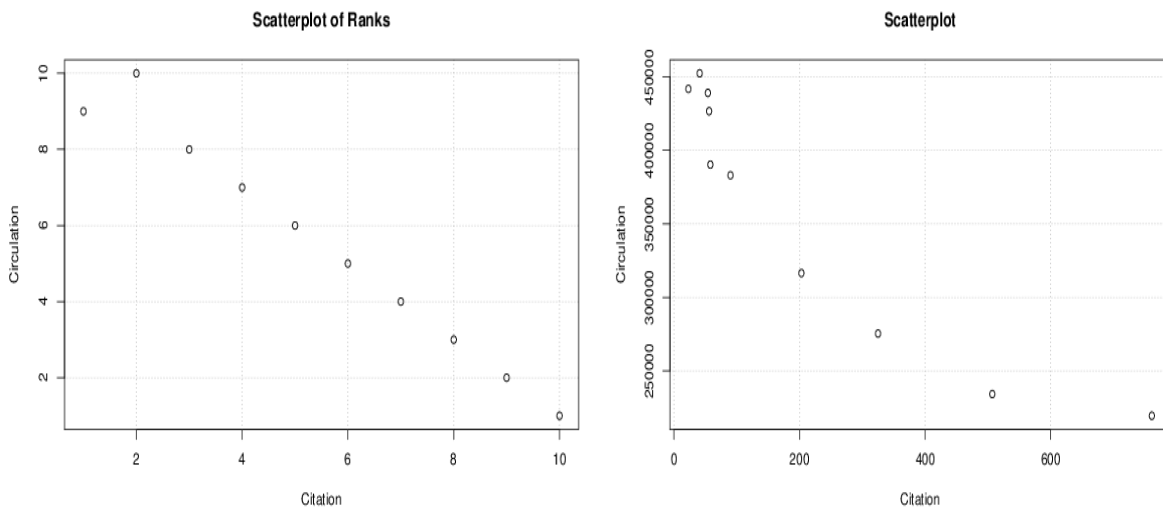

Fig.-1: Graphical presentation of circulation and citation

The graph also indicates that, the scatter is in single line showing strong negative linear relationship between circulation of financial times and its citation count. The larger value of circulation of financial times in ‘Y’ correspond to the small value of citation count in the ‘X’, vice versa the large value of citation count in ‘X’ correspond to the small value of circulation in ‘Y’. So there is negative correlation between circulation and citation count of financial times newspaper. Thus it is observed that citation is not based on the circulation of newspaper.

To prove it statically rank correlation was performed using Spearman’s rank correlation test.

Table.-6: Spearman's Rank Correlation test

Correlation Test circulation vs citation	
rho	-0.98
2-sided p-value	0

\*\*. Correlation is significant at the 0.01 level (2-tailed).

The result shows that there is a strong negative linear relation as r value -.0.98, significant at 0.01 level. From the above result, it is clear that the “Financial Times” newspaper circulations and the number of citation data are negatively correlated.

(ii ) Does internet penetration contribute to Citation of Newspaper

Table.-7: Spearman's Rank Correlation test

Correlation Test internet penetration vs citation	
rho	.595
2-sided p-value	0

\*\*. Correlation is significant at the 0.01 level (2-tailed).

Table.-8: Spearman's Rank Correlation test

Spearman's rho Correlations	
Internet penetration	vs citation
Country	Internet
Australia	.966**
Belgium	.864**
Canada	.736*
China	.832**
France	.794**
Germany	.939**
Netherlands	.782**
Spain	.565
UK	.952**
USA	.821**
**, sig at the 0.01 level	
*, sig at the 0.05 level	

The online edition of the Newspaper has enabled the readers to access many newspaper outside their country. For example the “Financial Times”, which is published from UK has been accessed by readers across the global which is clear from the citation data, the technology advancement had facilitated these dailies to be cited in scientific documents like journal articles. Analysis was done to find the association between internet penetration index and citation received by “Financial Time” newspaper across the world and individual country wise. The *rho* value is .595 from Table.7 which means that internet penetration across various countries and the citation received by “Financial Time” from across the global in strongly

correlation at 0.01. The same analysis was done from top ten citing countries and the data revealed that all the top ten countries data on internet penetration and citation was strongly correlation in which Australia was leading the chart; whose *rho* value was .966 at 0.01 except Spain's *rho* value is .565 which was significant at 0.05, Table-8 details about the country wise correlation.

## Conclusion

This present study illustrates the impact of “Financial Times” newspaper over scholarly communication by analyzing the characteristics of citation indexed in web of science database up to 31<sup>st</sup> December, 2015. There were 2713 records indexed in web of science having 2117 citations in different scholarly publications during the period 2001-2010. The study found that, the citation pattern shows that there is gradual increase in citing financial times in scholarly publications and further it's noticed that country wise internet penetration data has a strong correlation with citation but it's not the causation for citation. The highest citation of financial times was 761 (35.95%) during the year 2010 and the lowest was 23 (1.09%) citations in the year 2001. Financial times is highly cited in journals research articles 1858 (87.77%) followed by review articles 114 (5.38%), editorial materials 69 (3.26%), Proceeding 45 (2.13%), book review 16 (0.76%), book chapter 8 (0.38), letter 5 (0.24%), Film review 1(0.05%) and Biographical-Items 1 (0.05%). Moreover, there are 911 journals citing financial times during the study period. Financial times newspaper was cited highly in Journal of Business Ethics (Netherlands) having 38 (1.79%) citations, followed by Review of International Political Economy (UK) having 36 (1.70%) citations. Altogether, there are 107 subjects citing financial times newspaper during this period. There are 62 (91.78%) subjects from Arts and Social Sciences and 45 (08.22%) subjects from Science and Technology.

The present study found that, there are 17 most active authors, Beeson, M. have cited financial times 9 times in different subjects, followed by Cooke, P. and Hodson, D. have cited 6 times each. It is also found that, there are 65 countries citing financial times newspaper. From the citing countries, financial times newspaper is cited maximum by US with 622 (29.38%) citations followed by UK with 535 (25.27%) citation. Newspaper is a useful resource for citation in scholarly publications. This study was carried out to bring out the importance financial times newspaper as a citation source in scholarly publications.
