It has been accepted for inclusion in Electronic Texts in American Studies by an authorized administrator of DigitalCommons@University of Nebraska - Lincoln.
John Smith (1580-1631) made one voyage to the coast of Massachusetts and Maine in 1614, and attempted a second one the following year, only to be captured by French pirates and detained for several months near the Azores before escaping and making his way back to England. This book is the story of these two voyages.

Smith went the coast of America north of Virginia to explore the opportunities for fisheries, fur trading, and settlement. Smith was a veteran soldier, sailor, traveller, explorer, cartographer, and colonist: he had fought the Spanish in France and Italy, the Turks in Hungary and Transylvania, and the Algonkians in Virginia; he had sailed the Atlantic, Mediterranean, and the Caribbean; he had been a prisoner of the Ottomans and a slave in Constantinople, had journeyed through Russia, Europe, and North Africa; he had been both a president and a prisoner in the Jamestown colony, and had explored the Potomac River and mapped the Chesapeake Bay.

His Description of New England describes the fishing, soils, inhabitants, fauna, flora, and climate of the coastal region from Cape Cod to Penobscot. This work is the first to apply the term “New England” to that portion of the North America from Long Island Sound to Newfoundland. At that time it held a few trading and fishing stations, and French traders from the north and Dutch from the south carried on commerce in furs with the natives. There was a prosperous fishery to the north, where cod were taken by ships from Portugal, Holland, and Spain. To Smith, these were evidence of the richness of commodities to be had, and signs of the strategic importance to England of securing permanent settlements in the region. Smith had departed Virginia in 1609 under a cloud of accusations and had quarrelled with the leaders of the privately-held Virginia Company. Seeking a new arena for colonial opportunities in the new world, Smith saw New England as a place where English life could be transplanted to America, and this work is an extended advertisement and prospectus for investors and settlers, with Smith to provide the expertise and leadership.

This open-access online electronic text edition is based on the London edition of 1616, and preserves the spelling and punctuation of that original. Some explanatory notes have been added, along with a discussion of the text and a list of typographical errors corrected. A PDF version of Smith’s map is included as a supplemental file.
A note on the orthography:

In the sixteenth and early seventeenth centuries, English printers and typesetters used the “u” and “v” interchangeably to represent either sound (thus, “Beuer” for “beaver,” “vse” for “use,” “seauen” for “seven,” etc.), and the “i” was used both for “i” and “j”. Vowels were occasionally printed with either a macron (¨) or a tilde (¨) to indicate a following (implied) nasal “n” or “m” (thus “cöstancy” for “constancy” or “thè” for “them”). These features of John Smith’s original edition are preserved in this electronic text.

Some copies of A Description of New England contain the following on an inserted leaf:

BECAUSE THE BOOKE WAS PRINTED ERE the Prince his Highnesse had altered the names, I intreate the Reader, peruse this schedule; which will plainely shew him the correspondence of the old names to the new.

A Description of New England:

Or

The Observations, and discoveries, of Captain John Smith (Admirall of that Country) in the North of America, in the year of our Lord 1614: with the success of sixe Ships, that went the next yeare 1615; and the accidents befell him among the French men of warre:

With the proffe of the present benefit this Countrey affoords: whither this present yeare, 1616, eight voluntary Ships are gone to make further tryall.

At LONDON
Printed by Humfrey Lownes, for Robert Clerke; and are to be sould at his house called the Lodge, in Chancery lane, ouer against Lincolnes Inne. 1616.
TO THE HIGH
HOPEFVL CHARL:ES,
Prince of Great Britaine.

SIR:

O favourble was your most
renowned and memorable
Brother, Prince Henry, to all
generous designes; that in my
discovery of Virginia, I pre-
sumed to call two namelesse
Headlands after my Souer-
aignes heires, Cape Henry, and Cape Charles. Since
then, it beeing my chance to range some other
parts of America, whereof I heere present your
Highness the description in a Map; my hum-
brable sute is, you would please to change their Bar-
barous names, for such English, as Posterity may
say, Prince Charles was their Godfather. What here
in this relation I promise my Countrey, let mee
liue or die the slave of scorne & infamy, if (having meanes) I make it not apparent; please God to blesse me but from such accidents as are beyond my power and reason to preuent. For my labours, I desire but such conditions as were promised me out of the gaines; and that your Highnesse would daigne to grace this Work, by your Princely and fauourable respect vnto it, and know mee to be

Your Highnesse true
and fauithfull servant,
John Smith.
as the chance of warre doth cast upon poore Souldiers. So
that, if I bee not able to judge of what I haue see ne, con-
tinued, and done; it is not the fault either of my eyes, or
fourc quarters. And these nine yeares, I haue bent my en-
deauours to finde a sure foundation to begin these en-
suing projects: which though I neruer so plainely and se-
riously propound; yet it resteth in God, and you, still to
dispose of. Not doubting but your goodnesse will par-
don my rudenesse, and ponder erroers in the balance
good will; No more: but sacring all my best abilities to the
good of my Prince, and Countrey, and submitting
my selfe to the exquisit iudgements of
your renowned vertue, I
ever rest

Your Honours, in
all honest seruice,
I. S.
lant to crop the fruits of my labours. Then would I not doubt (did God please I might safely arrive in New England, and safely returne) but to performe somewhat more then I haue promised, & approve my words by deeds, according to proportion.

I am not the first hath been betrayed by Pirats: And foure men of warre, prouided as they were, had beene sufficent to haue taken Sampson, Hercules, and Alexander the great, no other way fur-nisht then I was. I knowe not what assurance any haue do passe the Seas, Not to bee subiect to casualty as well as my selfe: but least this disaster may hinder my proceedings, or ill will (by rumour) the behoofefull worke I pretend; I haue writ this little: which I did thinke to haue concealed from any publike vse, till I had made my returnes speake as much, as my pen now doth.

But because I speake so much of fishing, if any take mee for such a deuote fisher, as I dreame of nought else, they mistake mee. I know a ring of golde from a graine of barley, aswell as a golde-smith: and nothing is there to bee had which fishing doth hinder, but furder vs to obtaine. Now for that I haue made knowe vnsto you a fit place for plantation, limited within the bounds of your Patent and Commission; hauing also receiued meanes, power, and authority by your directions, to plant there a Colony, and make further search, and discovery in those parts there yet vnknowne: Considering, withall, first those of his Maiesties Coun-cell, then those Cities aboue named, and diuerse others that haue beene moued to lend their assistance to so great a worke, doe expect (especially the adventurers) the true relation or event of my proceedings which I heare are so abused; I am inforced for all these respects, rather to expose my imbecillitie to contempt, by the testimonie of these rude lines, then all should condemne me for so bad a Factor, as could neither giue reason nor account of my actions and designes.

Tours to command,

John Smith.
In the deserved Honour of the Author, Captaine John Smith, and his Worke.

Amn’d Enuie is a sp’rite, that ever haunts Beasts, mis-nam’d Men; Cowards or Ignorants. But, onely such shee follows, whose deere WORTH (Maugre her malice) sets their glorie forth.

If this faire Overture, then, take not; It Is Enuie’s spight (dear friend) in men-of-wit; Or Fear, lest morsels, which our mouthes possesse, Might fall from thence; or else tis Sottishnesse.

If either; (I hope neither) thee they raise; Thy Letters are as Letters in thy praise; Who, by their vice, improv(e (when they reprooue) Thy vertue; so, in hate, procure thee Loue.

Then, On firme Worth: this Monument I frame; Scorning for any Smith to forge such fame.

Io: Danies, Heref:

To his worthy Captaine the Author.

Hat which wee call the subject of all Storie, Is Truth, which in this Worke of thine giues glorie To all that thou hast done. Then, scorne the spight Of Enuie; which doth no mans merits right.

My sword may helpe the rest: my Pen no more Can doe, but this; I’ue said enough before.

Your sometime soouldier,
I. Codrinton, now Templer.

To my Worthy friend and Cosen, Captaine John Smith.

It oyer-joyes my heart, when as thy Words Of these designes, with deeds I doe compare. Heere is a Booke, such worthy truth affords, None should the due desert thereof impare; Sith thou, the man, deserving of these Ages, Much paine hast ta’en for this our Kingdoms good, In Climes unknowne, Mongst Turks and Saluages, T‘inlarge our bounds; though with thy losse of blood.

Hence damn’d Detraction: stand not in our way. Enuie, it selfe, will not the Truth gainsay.

N. Smith.
To that worthy and generous Gentleman, my verie good friend, Captaine Smith.

May Fate thy Projie prosper, that thy name may be eternised with living fame: Though foule Detraction Honour would pervert, And Enuie euer waits upon desert: In spight of Pelias, when his hate lies colde, Returne as Iason with a fleece of Golde.

Then after-ages shall record thy praise, That a New England to this Ile didst raise: And when thou dy'st (as all that liue must die) Thy fame liue heere; thou, with Eternitie.

R: Gunnell.

To his friend Cap: Smith, vpon his description of New England.

Sir; your Relations I haue read: which shewe, Ther's reason I should honour them and you: And if their meaning I haue understood, I dare to censure, thus: Your Projie's good; And may (if follow'd) doubtlesse quit the paine, With honour, pleasure and a trebble gaine; Beside the benefit that shall arise To make more happie our Posterities.

For would we daigne to spare, though 'twere no more Then what o're-filles, and surfects vs in store, To order Nature's fruitfulnesse a while In that rude Garden, you New England stile; With present good, ther's hope in after-daies Thence to repaire what Time and Pride decaies In this rich kingdome. And the spacious West Beeing still more with English blood possest, The Proud Iberians shall not rule those Seas, To checke our ships from sayling where they please; Nor future times make any forraire power Become so great to force a bound to Our.

Much good my minde fore-tels would follow hence With little labour, and with lesse expence. Thriue therefore thy Designe, who ere enuie: England may ioy in England's Colony, Virginia seeke her Virgine sisters good, Be blessed in such happie neighbourhood: Or, what-soere Fate pleaseth to permit, Be thou still honor'd for first mooving it.

George Wither, è societate Lincol.
In the desired honour of my honest
and worthie Captaine, John Smith,
and his Worke.

Aptaine and friends when I peruse thy booke
(With Judgements eyes) into thy heart I looke:
And there I finde (what sometimes-Albyon knew)
A Souldier, to his Countries-honour, true.
Some fight for wealth; and some for emptie praise;
But thou alone thy Countries Fame to raise.
With due discretion, and undanted heart,
I (oft) so well haue seene thee act thy Part
In deepest plunge of hard extremitie,
As forc't the troops of proudest foes to flie.
Though men of greater Ranke and lesse desert
Would Pish-away thy Praise, it can not start
From the true Owner: for, all good-mens tongues
Shall keepe the same. To them that Part belongs.
If, then, Wit, Courage, and Successe should get
Thee Fame; the Muse for that is in thy debt:
A part whereof (least able though I bee)
Thus heere I doe disburse, to honor Thee.

Rawly Croshaw.
If in the sleight bee not the truest art,
That makes men famoused for faire desert.
Who saith of thee, this savors of vaine-glorie,
Mistakes both thee and vs, and this true storie.
If it bee ill in Thee, so well to doe;
Then, is it ill in Vs, to praise thee too.
But, if the first bee well done; it is well,
To say it doth (if so it doth) excell!
Praise is the guerdon of each deere desert,
Making the praised act the praised part
With more alacritie: Honours Spurre is Praise;
Without which, it (regardlesse) soone decays.
And for this paines of thine wee praise thee rather,
That future Times may know who was the father
Of this rare Worke (New England) which may bring
Praise to thy God, and profit to thy King.

A DESCRIPTION OF
New-England, by Captaine
John Smith.

N the moneth of Aprill, 1614. with two
Ships from London, of a few March-
ants, I chanced to arrive in New-Eng-
land, a parte of Ameryca, at the Ile of
Monahiggan, in 43½ of Northerly lat-
titude: our plot was there to take
Whales and make tryalls of a Myne of Gold and Cop-
per. If those failed, Fish and Furres was then our ref-
ge, to make our selues sauers howsoever: we found
this Whale-fishing a costly conclusion: we saw many,
and spent much time in chasing them; but could not
kill any: They beeing a kinde of Inbartes, and not the
Whale that yeeldes Finnes and Oyle as wee expected.
For our Golde, it was rather the Masters deuice to get
a voyage that projected it, then any knowledge hee had
at all of any such matter. Fish & Furres was now our
guard: & by our late arrival, and long lingering about
the Whale, the prime of both those seasons were past
ere wee perceived it; we thinking that their seasons se-
rued at all times: but wee found it otherwise; for, by the
midst of Iune, the fishing failed. Yet in Iuly and Au-
gust some was taken, but not sufficient to defray so
great a charge as our stay required. Of dry fish we made
about 40000. of Cor fish about 7000. Whilst the sail-
ers fished, my selfe with eight or nine others of them
might best bee spared; Ranging the coast in a small
boat, wee got for trifles near 1000 Beuer skinnes, 100
MARTINS, and neer as many Otters; and the most of
them within the distance of twenty leagues. We ranged
the Coast both East and West much furder; but Eastwards
our commodities were not esteemed, they were so neare
the French who affords them better: and right against
vs in the Main was a Ship of Sir FRANCES POPPHAMES,
that had there such acquaintance, having many yeares vsed
onely that porte, that the most parte there was had by
him. And 40 leagues westwards were two French Ships,
that had made there a great voyage by trade, during
the time wee triied those conclusions, not knowing the
Coast, nor Saluages habitation. With these Furres, the
Traine, and Cor-fish I returned for ENGLAND in the Bark:
where within six monthes after our departure from the
DOWNES, we safe arrini back. The best of this fish was
solde for five pound the hundreth, the rest by ill vsage
betwixt three pound and fifty shillings. The other Ship
staid to fit herselfe for SPAINe with the dry fish which
was sold, by the Sailers reporte that returned, at forty
ryalls the quintall, each hundred weighing two quintalls
and a halfe.

NEW ENGLAND is that part of AMERICA in the Ocean Sea
opposite to NOUA ALBYON in the South Sea; discouered
by the most memorable Sir Francis Drake in his voyage about
the worlde. In regard whereeto this is stiled NEW EN-
GLAND, beeing in the same latitude. NEW FRANCE, off it, is
Northward: Southwardes is VIRGINIA, and all the adioyn-
ing Continent, with NEW GRANADO, NEW SPAIN, NEW AN-
dolosia and the West Indies. Now because I haue beene so

ted asked such strange questions, of the goodnesse and
greatnesse of those spatiouss Tracts of land, how they
can bee thus long vnknown, or nor possessed by the
SPANIARD, and many such like demands; I intreat your
pardons, if I chance to be too plaine, or tedious in re-
lating my knowledge for plaine mens satisfaction.

FLORIDA is the next adioyning to the INDES, which vn-
prosperously was attempted to bee planted by the FRENCH.
A Country farre bigger then ENGLAND, SCOTLAND, FRANCE
and IRELAND, yet little knowne to any Christian, but by
the wonderful endeoures of Ferdinando de Soto a valiant
SPANIARD: whose writings in this age is the best guide
knowne to search those parts.

VIRGINIA is no Ile (as many doe imagine) but part of
the Continent adioyning to FLORIDA; whose bounds may
be stretched to the magnitude thereof without offence
to any Christian inhabitant. For from the degrees of 30.
to 45. his MAJESTIE hath granted his Letters patents,
the Coast extending South-west and North-east aboute
1500 miles; but to follow it aboard, the shore may well
be 2000. at the least: of which, 20. miles is the most gi-
ues entrance into the Bay of Chisapeak, where is the Lon-
don plantation: within which is a Country (as you may
perceiue by the description in a Booke and Map printed
in my name of that little I there discouered) may well
suffice 30000. people to inhabit. And Southward ad-
ioyneth that part discouered at the charge of Sir WAL-
TER RAWLEY, by Sir RALPH LANE, and that learned Mathe-
matician Mr. THOMAS HERYOT. Northward six or seauen
degrees is the Riuer Sagadahock, where was planted the
Westerne Colony, by that Honourable Patrone of ver-
tue Sir JOHN POPPHAM Lord chief Justice of ENGLAND. Ther
is also a relation printed by Captaine Bartholomew Gos-
nould, of Elizabeths Iles: and an other by Captaine Way-

Notes of Florida.

Notes of Virginia.
The description of New England, by Captaine Iohn Smith.

moth, of Pemmaquid. From all these diligent obsueruers, posterity may be bettered by the fruits of their labours. But for divers others that long before and since haue ranged those parts, within a kenning sometimes of the shore, some touching in one place some in another, I must entreat them pardon me for omitting them; or if I offend in saying that their true descriptions are concealed, or neuer well observed, or died with the Authors: so that the Coast is yet still but euен as a Coast vnknowne and vndiscovered. I haue had six or seauen severall plots of those Northren parts, so vnlike each to other, and most so differing from any true proportion, or resemblance of the Countrey, as they did mee no more good, then so much waste paper, though they cost me more. It may be it was not my chance to see the best; but least others may be deceived as I was, or through dangerous ignorance hazard themselves as I did, I haue drawn a Map from Point to Point, Ile to Ile, and Harbour to Harbour, with the Soundings, Sands, Rocks, & Land-marks as I passed close aboard the Shore in a little Boat; although there be many things to bee observed which the haste of other affaires did cause me omit: for, being sent more to get present commodities, then knowledge by discoveries for any future good, I had not power to search as I would: yet it will serue to direct any shall goe that waies, to safe Harbours and the Salvages habitations: What marchandize and commodities for their labour they may finde, this following discourse shall plainly demonstrate.

Thus you may see, of this 2000. miles more then halfe is yet vnknowne to any purpose: no not so much as the borders of the Sea are yet certainly discovered. As for the goodnes and true substances of the Land, wee are for most part yet altogether ignorant of them, vnlesse it bee those parts about the Bay of Chiapeack and Sagadahock: but onely here and there wee touched or haue scene a little the edges of those large dominions, which doe stretch themselves into the Maine, God doth know how many thousand miles; whereof we can yet no more judge, then a stranger that saileth betwixt England and France can describe the Harbors and dangers by landing here or there in some Riuier or Bay, tell thereby the goodnesse and substances of Spaine, Italy, Germany, Bohemia, Hungaria & the rest. By this you may perceiue how much they erre, that think euery one wth hath bin at Virginia vnderstandeth or knowes what Virginia is: Or that the Spaniards know one halfe quarter of those Territories they possessse; no, not so much as the true circumference of Terra Incognita, whose large dominions may equalize the greatnesse and goodnes of America, for any thing yet known. It is strange with what small power hee hath raigned in the East Indes; and few will understand the truth of his strength in America: where hee haueing so much to kepe with such a pampered force, they neede not greatly feare his furie, in the Bermudas, Virginia, New France, or New England; beyond whose bounds America doth stretch many thousand miles: into the frozen partes whereof one Master Hutson an English Mariner did make the greatest discouerie of any Christian I knowe of, where he unfortunately died. For Affrica, had not the industrious Portugales ranged her vnknowne parts, who would haue sought for wealth among those fryed Regions of blacke brutish Negers, where notwithstanding all the wealth and admirable adventures & eendeavours more then 140 yeares, they knowe not one third of those blacke habitations. But it is not a worke for euery one, to manage such an affaire as makes a discouerie, and plants a Colony: It
requires all the best parts of Art, Judgement, Courage, Honesty, Constancy, Diligence and Industrie, to doe but neere well. Some are more proper for one thing then another; and therein are to be employed: and nothing breedes more confusion then misplacing and misemploying men in their undertakings. Columbus, Cortez, Pizarra, Soto, Magellanes, and the rest served more then a prentiship to learn how to begin their most memorable attempts in the West Indies: which to the wonder of all ages successully they effected, when many hundreds of others farre above them in the worlds opinion, being instructed but by relation, came to shame and confusion in actions of small moment, who doubtlesse in other matters, were both wise, discreet, generous, and courageous. I say not this to detract any thing from their incomparble merits, but to answer those questionlesse questions that keep vs back from imitating the worthinesse of their braue spirits that advanced themselves from poore Souldiers to great Captaines, their posterity to great Lords, their King to be one of the greatest Potentates on earth, and the fruites of their labours, his greatest glory, power and renowne.

That part wee call New England is betwixt the degrees of 41. and 45: but that parte this discourse speaketh of, strecheth but from Pennobscot to Cape Cod, some 75 leagues by a right line distant each from other: within which bounds I have seen at least 40. severall habitations uppon the Sea Coast, and sounded about 25 excellent good Harbours; In many whereof there is anchorage for 500. sayle of ships of any burthen; in some of them for 5000: And more then 200 Isles overgrown with good timber, of divers sorts of wood, which doe make so many harbours as requireth a longer time then I had, to be well discouered.

The principal habitation Northward we were at, was Pennobscot: Southward along the Coast and vp the Riuers we found Metacut, Segocket, Pemmacuad, Nuscocus, Kenebeck, Sagadabock, and Aumoughcarven; And to those Countries belong the people of Segatago, Pahbuntanuck, Pocopassum, Taughtanakagnet, Warbogannus, Nassaque, Matherosucheck, Warwigweck, Moshoquen, Wakogo, Passharmanack, &c. To these are allied the Countries of Aucocisco, Acominticus, Pasataquack, Aggawom, & Naemkeck: all these, I could perceiue, differ most little in language, fashion, or government: though most be Lords of themselves, yet they hold the Bashabes of Pennobscot, the chiefe and greatest amongst them.

The next I can remember by name are Mattahunts; two pleasant Isles of groves, gardens and corne fields a league in the Sea from the Mayne. Then Totant, Massachusset, Pocapawmet, Quonahassit, Sagoquas, Nahapassumkeck, Topent, Seccasaw, Totheet, Nasnoocomack, Acomack, Chawum; Then Cape Cod by which is Pawmet and the Ile Nanwet, of the language, & alliance of them of Chawum: The others are called Massachusets; of another language, humor and condition: For their trade and merchandize; to each of their habitations they have diuerse Townes and people belonging; and by their relations and descriptions, more then 20 severall Habitations and Riuers that stretch themselves farre vp into the Countrie, euen to the borders of diuerse great Lakes, where they kill and take most of their Beuers and Otters. From Pennobscot to Sagadabock this Coast is all Mountainous and Isles of huge Rocks, but ouergrown with all sorts of excellent good woodes for building houses, boats, barks or shippes; with an incredible abundance of most sorts of fish, much fowle, and sundry sorts of good fruites for mans vse.
Betwixt Sagadabocck and Sowocatuck there is but two or three sandy Bayes, but betwixt that and Cape Cod very many: especialy the Coast of the Massachusetts is so indifferently mixed with high clayie or sandy cliffes in one place, & then tracts of large long ledges of divers sorts, and quarries of stones in other places so strangely diuided with tinctured veins of divers colours: as, Free stone for building, Slate for tiling, smooth stone to make Fornaces and Forges for glasse or iron, and iron ore sufficient, conueniently to melt in them: but the most part so resembeth the Coast of Devonshire, I thinke most of the cliffes would make such lime-stone: If they be not of these qualities, they are so like, they may deceipte a better judgement then mine; all which are so neere adjoyning to those other advantages I observed in these parts, that if the Ore proue as good iron & steele in those parts, as I know it is within the bounds of the Countrey, I dare engage my head (hauing but men skilfull to worke the simples there growing) to haue all things belonging to the building and the rigging of shippes of any proportion, and good marchandise for the fraught, within a square of 10 or 14 leagues: and were it for a good rewarde, I would not feare to proue it in a lesse limitation.

And surely by reason of those sandy cliffes and cliffes of rocks, both which we saw so planted with Gardens and Corne fields, and so well inhabited with a goodly, strong and well proportioned people, besides the greatnesse of the Timber growing on them, the greatnesse of the fish and the moderate temper of the ayre (for of twenty five, not any was sicke, but two that were many yeares diseased before they went, notwithstanding our bad lodging and accidental diet) who can but approoue this a most excellent place, both for health & fertility?

And of all the four parts of the world that I haue yet seene not inhabited, could I haue but meanes to transport a Colonie, I would rather liue here then any where: and if it did not maintaine it selfe, were wee but once indifferently well fitted, let vs starue.

The main Staple, from hence to bee extracted for the present to produce the rest, is fish; which however it may seeme a mean and a base commoditie: yet who will but truely take the pains and consider the sequell, I thinke will allow it well worth the labour. It is strange to see what great adventures the hopes of setting forth men of war to rob the industrious innocent, would procure; or such massie promises in grosse: though more are choked then well fedde with such hastie hopes. But who doth not know that the poore Hollander, chiefly by fishing, at a great charge and labour in all weathers in the open Sea, are made so mighty, strong and rich, as no State but Venice, of twice their magnitude, is so well furnished with so many faire Cities, goodly Townes, strong Fortresses, & that aboundance of shipping and all sorts of marchandise, as well of Golde, Siluer, Pearles, Fortresses, Precious stones, Silkes, Velvets, and Cloth of golde; as Fish, Pitch, Wood, or such grosse commodities? What Voyages and Discoueries, East and West, North and South, yea about the world, make they? What an Army by Sea and Land, haue they long maintained in despite of one of the greatest Princes of the world? And neuer could the Spaniard with all his Mynes of golde and Siluer, pay
his debts, his friends, & army, halfe so truly, as the Hollanders still haue done by this contemptible trade of fish. Divers (I know) may alledge, many other assistances: But this is their Myne; and the Sea the source of those siluered streames of all their vertue; which hath made them now the very miracle of industrie, the pattern of perfection for these affairs: and the benefit of fishing is that *Primum mobile* that turnes all their *Spheres* to this height of plentie, strength, honour and admiration.

Herring, Cod, and Ling, is that triplicitie that makes their wealth & shippings multiplicities, such as it is, and from which (few would thinke it) they yearly draw at least one million & a halfe of pounds starling; yet it is most certaine (if records be true): and in this faculty they are so naturalized, and of their vents so certainly acquainted, as there is no likelihood they will ever bee paralleld, hauing 2 or 3000 Busses, Flat bottomes, Sword pinks, Toades, and such like, that breedes them Saylers, Mariners, Souldiers and Marchants, neuer to be wrought out of that trade, and fit for any other. I will not deny but others may gaine as well as they, that will use it, though not so certainly, nor so much in quantity; for want of experience. And this Herring they take vpon the Coast of Scotland and England; their Cod and Ling, vpon the Coast of Iceland and in the North Seas.

**Hamborough, & the East Countries** for Sturgion and Cauiare, gets many thousands of pounds from England, and the Straites Portugale, the Biskaines, and the Spaniards, make 40 or 50 Saile yearly to Cape-blank, to hooke for Porogos, Mullet, and make Puttardo: and **New found Land**, doth yearly fraught neere 800 sayle of Ships with a sillie leane skinny Poore-IOhn, and Corfish, which at least yearly amounts to 3 or 400000 pound. If from all those parts such pains is taken for this poore gaines of fish, and by them hath neither meate, drinke, nor clothes, wood, iron, nor steele, pitch, tarre, nets, leades, salt, hookes, nor lines, for shipping, fishing, nor prouision, but at the second, third, fourth, or fift hand, drawne from so many seuerall parts of the world ere they come together to be vsed in this voyage: If these I say can gaine, and the Saylers liue going for shares, lesse then the third part of their labours, and yet spend as much time in going and comming, as in staying there, so short is the season of fishing; why should wee more doubt, then Holland, Portugale, Spaniard, French, or other, but to doe much better then they, where there is victual to feede vs, wood of all sorts, to build Boats, Ships, or Barks; the fish at our doores, pitch, tarre, masts, yards, and most of other necessaries onely for making? And here are no hard Landlords to racke vs with high rents, or extorted fines to consume vs, no tedious pleas in law to consume vs with their many years disputations for Justice: no multitudes to occasion such impediments to good orders, as in popular States. So freely hath God & his Maiesty bestowed those blessings on the that will attempt to obtaine them, as here every man may be master and owner of his owne labour and land; or the greatest part in a small time. If hee haue nothing but his hands, he may set vp this trade; and by industrie quickly grow rich; spending but halfe that time wel, w^h in England we abuse in idlenes, worse or as ill. Here is ground also as good as any lyeth in the height of forty one, forty two, forty three, &c. which is as temperate and as fruitfull as any other parallell in the world. As for example, on this side the line West of it in the South Sea, is **Noua Albion**, discouered as is said, by Sir Francis Drake. East from it, is the most temperate part of Portugale, the ancient kingdomes of Galazia, Biskey, Nauarre, Arragon, Examples of the altitude comparatiuvely.
Catalonia, Castilia the olde, and the most moderatest of Castilia the new, and Valentia, which is the greatest part of Spain: which if the Spanish Histories bee true, in the Romanes time abounded no lesse with golde and siluer Mines, then now the West Indies; The Romanes then vsing the Spaniards to work in those Mines, as now the Spaniard doth the Indians.

In France, the Provinces of Gasconie, Langadock, Auignon, Province, Dolphin, Pyamont, and Taryne, are in the same paralel: which are the best & richest parts of France. In Italy, the provinces of Genua, Lumbardy, & Verona, with a great part of the most famous State of Venice, the Dukedoms of Bononia, Mantua, Ferrara, Rauenna, Bologna, Florence, Pisa, Sienna, Vrime, Ancona, and the ancient Citie and Countrey of Rome, with a great part of the great Kingdome of Naples. In Slaunonia, Istrya, and Dalmatia, with the Kingdomes of Albania. In Grecia, that famous Kingdome of Macedonia, Bulgaria, Thessalia, Thracia, or Romania, where is seated the most pleasant and plétifull Citie in Europe, Constantinople. In Asia also, in the same latitude, are the temperatest parts of Natio, Armenia, Persia, and China, besides divers other large Countries and Kingdomes in these most milde and temperate Regions of Asia. Southward, in the same height, is the richest of golde Mynes, Chily and Baldiuia, & the mouth of the great Riuier of Plate, &c: for all the rest of the world in that height is yet unkown. Besides these reasons, mine owne eyes that haue seene a great part of those Cities and their Kingdomes, as well as it, can finde no advantage they haue in nature, but this, They are beautifed by the long labour and diligent of industrious people and Art. This is onely as God made it, when he created the worlde. Therefore I conclude, if the heart and intralls of those Regions were sought: if their Land were cultured, planted and manured by men of industrie, judgement, and experience; what hope is there, or what neede they doubt, haung those advantages of the Sea, but it might equalize any of those famous Kingdomes, in all commodities, pleasures, and conditions? seeing euin the very edges doe naturally afford vs such plenty, as no ship need retourne away empty: and onely vse but the season of the Sea, fish will retourne an honest gaine, beside all other advantages; her treasures haung yet neuer beene opened, nor her originalls wasted, consumed, nor abused.

And whereas it is said, the Hollanders serue the Easterlings themselves, and other parts that want, with Her- ring, Ling, and wet Cod; The Easterlings, a great part of Europe, with Sturgion and Cauiare; Cape-blanke, Spaine, Portugale, and the Leuant, with Mullet, and Puttargo; New found Land, all Europe, with a thin Poore Iohn: yet all is so ouerlaide with fishers, as the fishing decay-eth, and many are constrained to retourne with a small fraught. Norway, and Polonia, Pitch, Tar, Mastes, and Yarde; Sweatland, and Russia Iron, and Ropes; France, and Spaine, Canvas, Wine, Steele, Iron, and Oyle; Italy and Greece, Silks, and Fruites. I dare boldly say, because I haue seen naturally growing, or breeding in those parts the same materialls that all those are made of, they may as well be had here, or the most part of them, within the distance of 70 leagues for some few ages, as from all those parts; vsing but the same meanes to haue them that they doe, & with all those advantages.

First, the ground is so fertill, that questionless it is capable of producing any Grain, Fruits, or Seeds you will sow or plant, growing in the Regions afore named: But it may be, not euery kinde to that perfection of delicacy; or some tender plants may miscarie, because the

\[\text{The par-ticular staple commodities that may be had.}\]

\[\text{The nature of ground approoued.}\]
Summer is not so hot, and the winter is more cold in those parts we have yet tried near the Sea side, then we finde in the same height in Europe or Asia; Yet I made a Garden upon the top of a Rockie Ile in 43° 1/2, 4 leagues from the Main, in May, that grew so well, as it servd vs for sallets in June and July. All sorts of cattell may here be bred and fed in the Iles, or Peninsulaes, securely for nothing. In the Interim till they encrease if need be (observing the seasons) I durst ventake to haue corn enough from the Saluages for 300 men, for a few trifles; and if they should bee vtoward (as it is most certaine they are) thirty or forty good men will be sufficient to bring them all in subjiction, and make this prouision; if they understand what they doe: 200 whereof may nine monethes in the yeare be imployed in making marchandable fish, till the rest prouide other necessaries, fit to furnish vs with other commodities.

In March, Aprill, May, and halfe June, here is Cod in abundance; in May, June, July, and August Mullet and Sturgeon; whose roes doe make Cauari and Puttargo. Herring, if any desire them, I haue taken many out of the bellies of Cod, some in nets; but the Saluages compare their store in the Sea, to the haires of their heads: and surely there are an incredible abundance vpon this Coast. In the end of August, September, October, and November, you haue Cod againe, to make Cor fish, or Poore Iohn: and each hundred is as good as two or three hundred in the New-found Land. So that halfe the labour in hooking, splitting, and turning, is saued: and you may haue your fish at what Market you will, before they can haue any in New-found Land; where their fishing is chiefly but in June and July: whereas it is here in March, Aprill, May, September, October, and November, as is said. So that by reason of this plantation, the Marchants may haue fraught both out and home: which yeelds an advantage worth consideration.

Your Cor-fish you may in like manner transport as you see cause, to serue the Ports in Portugal (as Lisbon, Auera, Porta port, and divers others, or what market you please) before your Ilanders returne: They being tyed to the season in the open Sea; you hauing a double season, and fishing before your doors, may every night sleep quietly a shore with good cheare and what fires you will, or when you please with your wives and familie: they onely, their ships in the maine Ocean.

The Mullets here are in that abundance, you may take them with nets, sometimes by hundreds, where at Cape blank they hooke them; yet those but one foot and a halfe in length; these two, three, or foure, as oft I haue measured: much Salmon some haue found vp the Riuers, as they haue passed: and heer the ayre is so temperate, as all these at any time may well be preserued.

Now, young boyes and girles Saluages, or any other, be they never such idlers, may turne, carry, and return fish, without either shame, or any great paine: hee is very idle that is past twelve yeares of age and cannot doe so much: and she is very olde, that cannot spin a thred to make engines to catch them.

For their transportation, the ships that go there to fish may transport the first: who for their passage will spare the charge of double manning their ships, which they must doe in the New-found Land, to get their fraught; but one third part of that companie are onely but proper to serue a stage, carry a barrow, and turne Poor Iohn: notwithstanding, they must haue meate, drinke, clothes, & passage, as well as the rest. Now all I desire, is but this: That those that voluntarily will send shipping, should make here the best choise they can, or

The facility of the plantation.

The seasons for fishing approved.
accept such as are presented them, to serve them at that rate: and their ships returning leave such with me, with the value of that they should receive coming home, in such provisions and necessary tools, arms, bedding and apparel, salt, hooks, nets, lines, and such like as they spare of the remainings; who till the next return may keep their boats and do them many other profitable offices: provided I have men of ability to teach them their functions, and a company fit for Soldiers to be ready upon an occasion; because of the abuses which have been offered the poor Salutages, and the liberty both French, or any that will, hath to deal with them as they please: whose disorders will be hard to reforme; and the longer the worse. Now such order with facility might be taken, with every port Towne or Citie, to observe but this order, With free power to convert the benefits of their frauds to what advantage they please, and increase their numbers as they see occasion; who ever as they are able to subsist of themselves, may begin the new Townes in New England in memory of their old; which freedome being confined but to the necessity of the general good, the event (with God's help) might produce an honest, a noble, and a profitable emulation.

Salt upon salt may assuredly be made; if not at the first in ponds, yet till they be provided this may be used: then the Ships may transport Kine, Horse, Goates, course Cloath, and such commodities as we want; by whose arrivall may be made that provision of fish to fraught the Ships that they stay not: and then if the sailors goe for wages, it matters not. It is hard if this returne defray not the charge: but care must be had, they arrive in the Spring, or else provision be made for them against the Winter.

Of certaine red berries called Alkermes which is worth ten shillings a pound, but of these hath been sold for thirty or forty shillings the pound, may yearly be gathered a good quantitie.

Of the Musk Rat may bee well raised gaines, well worth their labour, that will endeavor to make tryall of their goodness.

Of Beuers, Otters, Martins, Blacke Foxes, and Furres of price, may yearly be had 6 or 7000: and if the trade of the French were prevented, many more: 25000 this year were brought from those Northen parts into France; of which trade we may have as good part as the French, if we take good courses.

Of Mines of Golde and Silver, Copper, and probabilities of Lead, Christall and Allum, I could say much if relations were good assurances. It is true indeed, I made many trials according to those instructions I had, which doe persuade mee I need not despare, but there are metallis in the Country: but I am no Alchymist, nor will promise more then I know: which is, Who will undertake the rectifying of an Iron forge, if those that buy meate, drinke, coals, ore, and all necessaries at a dearer rate gaine; where all these things are to be had for the taking vp, in my opinion cannot lose.

Of woods seeing there is such plenty of all sorts, if those that build ships and boats, buy wood at so great a price, as it is in England, Spain, France, Italy, and Holland, and all other provisions for the nourishing of man's life; live well by their trade: when labour is all required to take those necessities without any other tax; what hazard will be here, but doe much better? And what commoditie in Europe doth more decay then wood? For the goodness of the ground, let vs take it fertile, or barren, or as it is: seeing it is certaine it beares fruities, to nour-
ish and feed man and beast, as well as England, and the Sea those severall sorts of fish I have related. Thus seeing all good provisions for mans sustenance, may with this facility be had, by a little extraordinarie labour, till that transported be increased; and all necessaries for shipping, onely for labour: to which may bee added the assistance of the Salluages, which may easily be had, if they be discreetly handled in their kindes; towards fishing, planting, and destroying woods. What gains might be raised if this were followed (when there is but once men to fill your store houses, dwelling there, you may serve all Europe better and farre cheaper, then can the Ieland fishers, or the Hollanders, Cape blank, or New found Land: who must be at as much more charge, then you) may easily be coniectured by this example.

2000. pound will fit out a ship of 200. & 1 of a 100 tuns: If the dry fish they both make, fraught that of 200. and goe for Spaine, sell it but at ten shillings a quintall; but commonly it giueth fifteen, or twentie: especially when it commeth first, which amounts to 3 or 4000 pound: but say but tenne, which is the lowest, allowing the rest for waste, it amounts at that rate, to 2000 pound, which is the whole charge of your two ships, and their equipage: Then the returne of the money, and the fraught of the ship for the vintage, or any other voyage, is cleere gaine, with your shippes of a 100 tuns of Train and oyle, besides the beuers, and other commodities; and that you may have at home within six monethes, if God please but to send an ordinarie passage. Then saving halfe this charge by the not staying of your ships, your victual, ouerplus of men & wages; with her fraught thither of things necessarie for the planters, the salt being there made: as also may the nets & lines, within a short time: if nothing were to bee expected but this, it might in time equalize your Hollanders gaines, if not exceed them: they returning but wood, pitch, tarre, and such grosse commodities; you wines, oyles, fruits, silkes, and such Straits commodities, as you please to provide by your Factors, against such times as your shippes arriue with them. This would so increase our shipping and sailers, and so employ and encourage a great part of our idlers and others that want imployments fitting their qualities at home, where they shame to doe that they would doe abroad; that could they but once taste the sweet fruities of their owne labours, doublese many thousands would be advised by good discipline, to take more pleasure in honest industrie, then in their humours of dissolute idlenesse.

But, to returne a little more to the particulars of this Countreyy, which I intermingle thus with my projects and reasons, not being so sufficiently yet acquainted in those parts, to write fully the estate of the Sea, the Ayre, the Land, the Fruites, the Rocks, the People, the Gouernment, Religion, Territories, and Limitations, Friends, and Foes: but, as I gathered from the niggardly relations in a broken language toy my understanding, during the time I ranged those Countries &c. The most Northren part I was at, was the Bay of Pennobscot, which is East and West, North and South, more then ten leagues: but such were my occasions, I was constrained to be satisfied of them I found in the Bay, that the River ranne farre vp into the Land, and was well inhabited with many people, but they were from their habitations, either fishing among the Iles, or hunting the Lakes and Woods, for Deer and Beuers. The Bay is full of great Ilands, of one, two, six, eight, or ten miles in length, which diuides it into many faire and excellent good harbours. On the East of it, are the Tarrantines, their mortall en-
The description of New England, by Captaine John Smith.

... the French, as they report that live with those people, as one nation or family. And North-west of Pennobscot is Metaddacut, at the foot of a high mountaine, a kinde of fortresse against the Tarrantines, adjoyning to the high mountaines of Pennobscot, against whose feet doth beat the Sea: But ouer all the Land, Iles, or other impediments, you may well see them sixteene or eighteene leagues from their situation. Se-gocket is the next; then Nuwconcus, Penmaquid, and Sagadabock. Vp this Riuver where was the Western plantation are Aumuccewagen, Kinnebeck, and divers others, where there is planted some corne fields. Along this Riuver 4o or 5o miles, I saw nothing but great high cliffs of barren Rocks, ouergrown with wood: but where the Saluages dwelt there the ground is exceeding fat & fertill. Westward of this Riuver, is the Countrey of Awoocise, in the bottome of a large deepe Bay, full of many great Iles, which divides it into many good harbours. Sowocotuck is the next, in the edge of a large sandy Bay, which hath many Rocks and Iles, but few good harbours, but for Barks, I yet know. But all this Coast to Pennobscot, and as farre I could see Eastward, is sandie) not much inferior; neither for the harbor, nor any thing I could perceiue, but the multitude of people. From hence doth stretch into the Sea the faire headland Trogabigzanda, fronted with three Iles called the three Turs heads: to the North of this, doth enter a great Bay, where wee founde some habitations and corne fields: they report a great Riuver, and at least thirtie habitations, doo possesse this Countrie. But because the French had got their Trade, I had no leasure to discouer it. The Iles of Mattahunts are on the West side of this Bay, where are many Iles, and questionlesse good harbors: and then the Countrie of the Massachusets, which is the Paradise of all those parts: for, heere are many Iles all planted with corne; groues, mulberries, saluage gardens, and good harbors: the Coast is for the most part, high clayie sandie cliffs. The Sea Coast as you passe, shewes you all along large corne fields, and great troupes of well proportioned people: but the French hauing remained heere neere sixe weakes,
left nothing, for vs to take occasion to examine the inhabitants relations, viz. if there be neer three thousand people upon these Iles; and that the Riner doth pearce many daies journeyes the intralles of that Countrye. We found the people in those parts verie kinde; but in their furie no lesse valiant. For, vpon a quarrell wee had with one of them, hee onely with three others crossed the harbor of Quonahassit to certayne rocks whereby wee must passe; and there let flie their arrowes for our shot, till we were out of danger.

Then come you to Accomack, an excellent good harbor, good land; and no want of any thing, but industrious people. After much kindnesse, vpon a small occasion, we fought also with fortie or fiftie of those: though some were hurt, and some slaine; yet within an houre after they became friendes. Cape Cod is the next presents it selfe: which is onely a headland of high hils of sand, overgrowne with shrubbie pines, hurts, and such trash; but an excellent harbor for all weathers. This Cape is made by the maine Sea on the one side, and a great Bay on the other in forme of a sickle: on it doth inhabit the people of Pawmet; and in the bottome of the Bay, the people of Chawum. Towards the South and Southwest of this Cape, is found a long and dangerous shoale of sands and rocks. But so farre as I incircled it, I found thirtie fadom water aboard the shore, and a strong current: which makes mee thinke there is a Channell about this shoale; where is the best and greatest fish to be had, Winter and Summer, in all that Countrie. But, the Salvages say there is no Channell, but that the shoales beginne from the maine at Pawmet, to the Ile of Nausit; and so extends beyond their knowledge into the Sea. The next to this is Capawack, and those abounding Countries of copper, corne, people, and mineralls; which I went to discouer this last yeare: but because I miscarried by the way, I will leaue them, till God please I have better acquaintance with them.

The Massachusetts, they report, sometimes haue warres with the Bashabes of Pennobskot; and are not alwaies friends with them of Chawum and their alliants: but now they are all friends, and haue each trade with other, so farre as they haue societie, on each others frontiers. For they make no such voyages as from Pennobskot to Cape Cod; seldom to Massachusetts. In the North (as I haue said) they begunne to plant corne, whereof the South part hath such plentie, as they haue what they will from them of the North; and in the Winter much more plenty of fish and foule: but both Winter and Summer hath it in the one part or other all the yeare; being the meane and most indifferent temper, betwixt heat and colde, of all the regions betwixt the Lyne and the Pole: but the furs Northward are much better, and in much more plentie, then Southward.

The remarkeablest Iles & mountains for Landmarkes are these; The highest Ile is Sorico, in the Bay of Pennobskot: but the three Iles and a rock of Matinnack are much furder in the Sea; Metinic is also three plaine Iles & a rock, betwixt it & Monahigan: Monahigan is a rounde high Ile; and close by it Monanis, betwixt which is a small harbor where we ride. In Damerils Iles is such another: Sagadahock is knowne by Satquin, and foure or fivce Iles in the mouth. Smyths Iles are a heape together, none neere them, against Accominticus. The three Turks heads are three Iles seen far to Sea-ward in regard of the headland.

The cheefe headlands are onely Cape Tragabigzanda and Cape Cod.
The description of New England, by Captaine Iohn Smith.

The cheefe mountaines, them of Penobscot: the twinkling mountaine of Aucocisco; the greate mountaine of Sasanon; and the high mountaine of Massachusetts: each of which you shall finde in the Mappe; their places, formes, and altitude. The waters are most pure, proceeding from the intrals of rockie mountaines; the hearbes and fruits are of many sorts and kindes: as alkermes, currans, or a fruit like currans, mulberries, vines, respicies, goosberryes, plummes, walnuts, chestnuts, small nuts, &c. pumpions, gourds, Strawberrie, beans, pease, and mayze; a kinde or two of flax, wherewith they make nets, lines and ropes both small and great, verie strong for their quantities.

Oke, is the chiefe wood; of which there is great difference in regard of the soyle where it groweth. Firre, pyne, walnut, chesnut, birch, as, elme, cypressse, ceder, mulberry, plumtree, hazell, saxefrage, and many other sorts.

Eagles, Gripes, diverse sorts of Haukes, Cranes, Geese, Brants, Cormorants, Ducks, Sheldrakes, Teale, Meawes, Guls, Turkies, Dite-doppers, and many other sorts, whose names I knowe not.

Whales, Grampus, Porkpisces, Turbut, Sturgion, Cod, Hake, Haddock, Cole, Cusk, or small Ling, Shark, Mackerell, Herring, Mullet, Base, Pinacks, Cunners, Pearch, Eels, Crabs, Lobsters, Muskles, Wilkes, Oysters, and diverse others &c.

Moos, a beast bigger then a Stagge; deere, red, and Fallow; Beuers, Wolues, Foxes, both blacke and other; Aroughcons, Wild-cats, Beares, Otters, Martins, Fitches, Musquassus, & diverse sorts of vermine, whose names I know not. All these and diverse other good things do heere, for want of vse, still increase, & decrease with little diminution, whereby they growe to that abundance. You shall scarce finde any Baye, shallow shore, or Coue of sand, where you may not take many Clampes, or Lobsters, or both at your pleasure, and in many places lode your boat if you please; Nor Iles where you finde not fruits, birds, crabs, and muskles, or all of them, for taking, at a lowe water. And in the harbors we frequented, a little boye might take of Cunners, and Pinacks, and such delicate fish, at the ships sterne, more then sixe or tenne can eate in a daie; but with a casting-net, thousands when wee pleased: and scarce any place, but Cod, Cuske, Holybut, Mackerell, Scate, or such like, a man may take with a hooke or line what he will. And, in diverse sandy Bayes, a man may draw with a net great store of Mullets, Bases, and diverse other sorts of such excellent fish, as many as his Net can drawe on shore: no Riuers where there is not plentie of Sturgeon, or Salmon, or both; all which are to be had in abundance observing but their seasons. But if a man will goe at Christ-masse to gather Cherries in Kent, he may be deceived; though there be plentie in Summer: so, heere these plenties haue each their seasons, as I have expressed. We for the most part had little but bread and vinegar: and though the most part of Italy when the fishing decayed they wrought all day, laie abroade in the Iles all night, and liued on what they found, yet were not sicke: But I would wish none put himself long to such plunges; except necessitie constraine it: yet worthy is that person to starue that heere cannot line; if he have sense, strength and health: for, there is no such penetye of these blessings in any place, but that a hundred men may, in one houre or two, make their prouisions for a day: and hee that hath experience to mannge well these affaires, with fortie or thirtie honest industrious men, might well vndertake (if they dwell in these parts) to subject
the Salvages, and feed daily two or three hundred men, with as good corne, fish, and flesh, as the earth hath of those kindes, and yet make that labor but their pleasure: prouided that they haue engins, that be proper for their purposes.

Who can desire more content, that hath small means; or but only his merit to aduance his fortune, then to tread, and plant that ground hee hath purchased by the hazard of his life? If he haue but the taste of virtue, and magnanimitie, what to such a minde can bee more pleasant, then planting and building a foundation for his Posteritie, gotte from the rude earth, by Gods blessing & his owne industrie, without prejudice to any? If hee haue any graine of faith or zeale in Religion, what can hee doe lesse hurtfull to any; or more agreeable to God, then to seeke to convert those poore Salvages to know Christ, and humanitarian, whose labors with discretion will triple requite thy charge and pains? What so truely sutes with honour and honestie, as the discovering things vnknowne? erecting Townes, peopling Countries, informing the ignorant, reforming things vnjust, teaching virtue; & gaine to our Native-mother-countrie a kingdom to attend her; finde employment for those that are idle, because they know not what to doe: so farre from wronging any, as to cause Posteritie to remember thee; and remembring thee, euer honour that remembrance with praise? Consider: What were the beginnings and endings of the Monarkies of the Chaldeans, the Syrians, the Grecians, and Romanes, but this one rule: What was it they would not doe, for the good of the commonwealth, or their Mother-citie? For example: Rome, What made her such a Monarchesse, but onely the adventures of her youth, not in riots at home; but in dangers abroade? and the justice and judgement out of their experience, when they grewe aged. What was their ruine and hurt, but this; The excesse of idlenesse, the fondnesse of Parents, the want of experience in Magistrates, the admiration of their undeserved honours, the contempt of true merit, their vnjust jealousies, their politike incredulities, their hypocritickall seeming goodness, and their deeds of secret lewdnesse? finallly, in fine, growing onely formal temporists, all that their predecessors got in many years, they lost in few daies. Those by their pains & vertues became Lords of the world; they by their ease and vices became slaves to their servants. This is the difference betwixt the use of Armes in the field, & on the monuments of stones; the golden age and the leaden age, prosperity and miserie, justice and corruption, substance and shadowes, words and deeds, experience and imagination, making Commonwealths and marring Commonwealths, the fruits of vertue and the conclusions of vice.

Then, who would liue at home idly (or thinke in himselfe any worth to liue) onely to eate, drink, and sleepe, and so die? Or by consuming that carelessly, his friends got worthy? Or by vsing that miserably, that maintained vertue honestly? Or, for being descended nobly, pine with the vaine vaunt of great kindred, in penurie? Or (to maintaine a silly shewe of brauery) toyle out thy heart, soule, and time, basely, by shifts, tricks, cards, & dice? Or by relating newes of others actions, sharke here or there for a dinner, or supper; deceuie thy friends, by faire promises, and dissimulation, in borrowing where thou never intendent to pay; offend the lawes, surfeit with excesse, burden thy Country, abuse thy selfe, despaire in want, and then couzen thy kindred, yea even thine owne brother, and wish thy parents death (I will not say damnation) to haue their estates? though thou
seest what honours, and rewards, the world yet hath for them will seeke them and worthily deserve them.

I would be sory to offend, or that any should mistake my honest meaning: for I wish good to all, hurt to none. But rich men for the most part are growne to that dot-age, through their pride in their wealth, as though there were no accident could end it, or their life. And what hellish care do such take to make it their owne miserie, and their Countries spoile, especially when there is most neede of their employment? drawing by all manner of intentions, from the Prince and his honest subjects, even the vitall spirits of their powers and estates: as if their Bagges, or Braggges, were so powerfull a defence, the malicious could not assault them; when they are the onely baite, to cause vs not to be onely assaulted; but betrayed and murdered in our owne security, ere we well perceiue it.

May not the miserable ruine of Constantinople, their impregnable walles, riches, and pleasures last taken by the Turk (which are but a bit, in comparison of their now mightines) remember vs, of the effects of priuate couetousnesse? at which time the good Emperour held himselfe rich enough, to haue such rich subjects, so formall in all excesse of vanity, all kinde of delicacie, and prodigalitie. His pouertie when the Turk besieged, the citizens (whose marchandizing thoughts were onely to get wealth, little conceiuing the desperate resolution of a valiant expert enemy) left the Emp. so long to his conclusions, hauing spent all he had to pay his young, raw, discontented Souldiers; that sodainly he, they, and their citie were all a prey to the devoureing Turk. And what they would not spare for the maintenance of them who adventured their lives to defend them, did serue onely their enemies to torment them, their friends, and coun-

trey, and all Christendome to this present day. Let this lamentable example remember you that are rich (seeing there are such great theeues in the world to robbe you) not grudge to lend some proportion, to breed them that haue little, yet willing to learne how to defend you: for, it is too late when the deede is a-doing. The Romans estate hath beene worse then this: for, the meere couetousnesse and extortion of a few of them, so mooved the rest, that not hauing any employment, but contemplation; their great judgements grew to so great malice, as themselves were sufficient to destroy themselves by faction: Let this moove you to embrace employment, for those whose educations, spirits, and judgements, want but your purses; not onely to prevent such accustomed dangers, but also to gaine more thereby then you haue. And you fathers that are either so foolishly fond, or so miserably couetous, or so willfully ignorant, or so negligently carelessse, as that you will rather maintaine your children in idle wantonness, till they growe your masters; or become so basely vnkinde, as they wish nothing but your deaths; so that both sorts growe dissolute: and although you would wish them any where to escape the gallowes, and ease your cares; though they spend you here one, two, or three hundred pound a yeer; you would grudge to give halfe so much in adventure with them, to obtaine an estate, which in a small time but with a little assistance of your prudence, might bee better then your owne. But if an Angell should tell you, that any place yet vnknowne can afford such fortunes; you would not beleue him, no more then Columbus was beleuued there was any such Land as is now the well knowne abounding America; much lesse such large Regions as are yet vnknowne, as well in America, as in Affrica, and Asia, and Terra incognita; where were courses
for gentlemen (and them that would be so reputed) more
suing their qualities, then begging from their Princes
generous disposition, the labours of his subiects, and
the very marrow of his maintenance.

I haue not beene so ill bred, but I haue tasted of
Plenty and Pleasure, as well as Want and Miserie: nor doth
necessity yet, or occasion of discontent, force me to
these endeaurs: nor am I ignorant what small thanke
I shall haue for my paines; or that many would haue the
World imagine them to be of great judgement, that can
but blemish these my designes, by their witty objections
and detractions: yet (I hope) my reasons with my deeds,
will so preuaile with some, that I shall not want employ-
ment in these affaires, to make the most blinde see his
owne senselesnesse, & incredulity; Hoping that gaine
will make them affect that, which Religion, Charity,
and the Common good cannot. It were but a poore
device in me, To deceive my selfe; much more the King,
& State, my Friends, and Countrie, with these induce-
ments: which, seeing his Maiestie hath giuen permis-
sion, I wish all sorts of worthie, honest, industrious
spirits, would understand: and if they desire any further
satisfaction, I will doe my best to giue it: Not to per-
swade them to goe onely; but goe with them: Not leave
them there; but lye with them there. I will not say,
but by ill prouiding and vndue managing, such courses
may be taken, may make vs miserable enough: But if
I may haue the execution of what I haue proiected; if
they want to eate, let them eate or neuer digest Me.
If I performe what I say, I desire but that reward out of
the gaines may sute my paines, quality, and condition.
And if I abuse you with my tongue, take my head for
satisfaction. If any dislike at the yeares end, defray-
ing their charge, by my consent they should freely re-
turne. I feare not want of companie sufficient, were it
but knowne what I know of those Countries; & by the
profe of that wealth I hope yearly to returne, if God
please to blesse me from such accidents, as are beyond
my power in reason to prevent: For, I am not so sim-
ple, to thinke, that euer any other motiue then wealth,
will euer erect there a Commonweale; or draw com-
panie from their ease and humours at home, to stay in
New England to effect my purposes. And lest any should
thinke the toile might be insupportable, though these
things may be had by labour, and diligence: I assure my
selfe there are who delight extremly in vaine pleasure,
that take much more paines in England, to enjoy it, then
I should doe heere to gaine wealth sufficient: and yet I
thinke they should not haue halfe such sweet content:
for, our pleasure here is still gaines; in England charges
and losse. Heer nature and liberty affords vs that freely,
which in England we want, or it costeth vs dearly. What
pleasure can be more, then (being tired with any occa-
sion a-shore) in planting Vines, Fruits, or Hearbs, in
contriving their owne Grounds, to the pleasure of their
owne mindes, their Fields, Gardens, Orchards, Build-
ings, Ships, and other works, &c. to recreate themselves
before their owne doores, in their owne boates vpon the
Sea, where man woman and childe, with a small hooke
and line, by angling, may take diuerse sorts of excellent
fish, at their pleasures? And is it not pretty sport, to pull
vph two pence, six pence, and twelvne pence, as fast as you
can hale and veare a line? He is a very bad fisher, can-
not kill in one day with his hooke and line, one, two, or
three hundred Codds: which dressed and dried, if they
be sold there for ten shillings the hundred, though in
England they will giue more then twenty; may not both
the seruant, the master, and marchant, be well con-
tent with this gaine? If a man worke but three dayes in seauen, he may get more then hee can spend, vnlesse he will be excessive. Now that Carpenter, Mason, Gardiner, Taylor, Smith, Sailer, Forgers, or what other, may they not make this a prettie recreation though they fish but an houre in a day, to take more then they eate in a weeke? or if they will not eate it, because there is so much better choise; yet sell it, or change it, with the fisher men, or marchants, for any thing they want. And what sport doth yeeld a more pleasing content, and lesse hurt or charge then angling with a hooke, and crossing the sweete ayre from Ile to Ile, over the silent streames of a calme Sea? wherein the most curious may finde pleasure, profit, and content. Thus, though all men be not fishers: yet all men, whatsoeuer, may in other matters doe as well. For necessity doth in these cases so rule a Commonwealth, and each in their seuerall functions, as their labours in their qualities may be as profitable, because there is a necessary mutuall vs of all.

For Gentlemen, what exercise should more delight them, then ranging dayly those vnknowne parts, vsing fowling and fishing, for hunting and hauking? and yet you shall see the wilde haukes give you some pleasure, in seeing them stoope (six or seauen after one another) an houre or two together, at the skuls of fish in the faire harbours, as those a-shore at a foule; and neuer trouble nor torment your selues, with watching, mewing, feeding, and attending them: nor kill horse and man with running & crying, See you not a hauk? For hunting also: the woods, lakes, and riuers, affoord not onely chase sufficient, for any that delights in that kinde of toyle, or pleasure; but such beasts to hunt, that besides the delicacy of their bodies for food, their skins are so rich, as may well recompence thy dayly labour, with a Captains pay.

For labourers, if those that sowe hemp, rape, turnups, parsnips, carrats, cabidge, and such like; giue 20, 30, 40, 50 shillings yearly for an acre of ground, and meat drinke and wages to eate it, and yet grow rich: when better, or at least as good ground, may be had and cost nothing but labour; it seemes strange to me, any such should there grow poore.

My purpose is not to perswade children from their parents; men from their wives; nor seruants from their masters: onely, such as with free consent may be spared: But that each parish, or village, in Citie, or Countrey, that will but apparell their fatherlesse children, of thirteene or fourteen years of age, or young maried people, that have small wealth to live on; heere by their labour may line exceeding well: provided alwaies that first there bee a sufficient power to command them, houses to receiue them, meanes to defend them, and meet provisions for them; for, any place may bee ouerlai: and it is most necessary to have a fortesse (ere this grow to practice) and sufficient masters (as, Carpenters, Masons, Fishers, Fowlers, Gardiners, Husbandmen, Sawyers, Smiths, Spinsters, Taylors, Weaveres, and such like) to take ten, twelve, or twenty, or as ther is occasion, for Apprentises. The Masters by this may quicklie growe rich; these may learne their trades themselves, to doe the like; to a generall and an incredible benefit, for King, and Countrey, Master, and Seruant.

It would bee an historie of a large volume, to recite the aduentures of the Spanyards, and Portugals, their affronts, and defeats, their dangers and miseries; which with such incomparable honour and constant resolution, so farre beyond beleefe, they have attempted and indured in their discoueries & plantations, as may well condemne vs, of too much imbecillitie, sloth, and neg-
adox opinion, to say, that halfe seaven yeeres is scarce sufficient, for a good capacitie, to learne in these affaires, how to carrie himselfe: and who euer shall trie in these remote places the erecting of a Colony, shall finde at the ende of seaven yeares occasion enough to use all his discretion: and, in the Interim all the content, rewards, gaines, and hopes will be necessarily required, to be gien to the beginning, till it bee able to creepe, to stand, and goe, yet time enough to keepe it from running, for there is no feare it wil grow too fast, or euer to any thing; except libertie, profit, honor, and prosperitie there found, more binde the planters of those affaires, in devotion to effect it; then bondage, violence, tyranny, ingratitude, and such double dealing, as bindes free men to become slaves, and honest men turne knaues: which hath euer bin the ruine of the most popular common-wealths; and is verie unlikelie euer well to begin in a new.

Who seeth not what is the greatest good of the Spaniard, but these new conclusions, in searching those vnknowne parts of this vnknowne world? By which meanes hee diues euen into the verie secret of all his Neighbours, and the most part of the world: and when the Portugale and Spaniard had found the East and West Indies; how many did condemn themselues, that did not accept of that honest offer of Noble Columbus? who, vpon our neglect, brought them to it, persuading our selues the world had no such places as they had found: and yet euer since wee finde, they still (from time to time) haue found new Lands, new Nations, and trades, and still daily dooe finde both in Asia, Africa, Terra incognita, and America; so that there is neither Soldier nor Mechanick, from the Lord to the begger, but those parts afforde them all imploiment; and discharge their
Native soile, of so many thousands of all sorts, that else, by their sloth, pride, and imperfections, would long ere this have troubled their neighbours, or have eaten the pride of Spain it selfe.

Now he knowes little, that knowes not England may well spare many more people then Spain, and is as well able to furnish them with all manner of necessaries. And seeing, for all they haue, they cease not still to search for that they have not, and know not; It is strange we should be so dull, as not maintaine that which wee haue, and pursue that wee knowe. Surely I am sure many would taste it ill, to bee abridged of the titles and honours of their predecessors: when if but truely they would judge themselves; looke how inferior they are to their noble vertues, so much they are vnworthy of their honours and livings: which never were ordained for showes and shadowes, to maintaine idlenesse & vice; but to make them more able to abound in honor, by heroycall deeds of action, judgement, pietie, and vertue. What was it, They would not doe both in purse and person, for the good of the Commonwealth? which might moue them presently to set out their spare kindred in these generous designes. Religion, above all things, should moue vs (especially the Clergie) if wee were religious, to shewe our faith by our worke; in converting those poore salluages, to the knowledge of God, seeing what paines the Spaniards take to bring them to their adulterated faith. Honor might moue the Gentrie, the valiant, and industrious; and the hope and assurance of wealth, all; if wee were that we would seeme, and be accounted. Or be we so far inferior to other nations, or our spirits so far deiected, from our auncient predecessors, or our mindes so vpon spoile, piracie, and such villany, as to serue the Portugal, Spain, Dutch, French, or Turke (as to the cost of Europe, too many dooe) rather then our God, our King, our Country, & our selues? excusing our idlenesse, and our base complaints, by want of imployment; when here is such choise of all sorts, and for all degrees, in the planting and discovering these North parts of America.

Now to make my words more apparent by my deeds; I was, the last yeare, 1615. to haue staid in the Countrie, to make a more ample triall of those conclusions with sixteene men; whose names were

- Thomas Dirmir
- Edward Stalings
- Daniel Cage
- Francis Abbot
- John Gosling
- Thomas Digbie
- Daniel Baker
- Adam Smith

I confesse, I could haue wished them as many thousands, had all other prouisions bin in like proportion: nor would I haue had so fewe, could I haue had meanes for more: yet (would God haue pleased wee had safely arrieved) I never had the like authoritie, freedom, and prouision, to doe so well. The maine assistance next God, I had to this small number, was my acquaintance among the Salluages; especially, with Dohannida, one of their greatest Lords; who had liued long in England. By the meanes of this proud Salvage, I did not doubt but quickly to haue gotte that credit with the rest of his friends, and alliants, to haue had as many of them, as I desired in any designe I intended, and
that trade also they had, by such a kind of exchange of their Countrie commodities; which both with ease & securitie in their seasons may be vsed. With him and diverse others, I had concluded to inhabit, and defend them against the Terentynes; with a better power then the French did them; whose tyranny did inforce them to imbrace my offer, with no small devotion. And though many may thinke me more bolde then wise, in regard of their power, dexterrity, treacherie, and inconstancie, having so desperately assaulted & betrayed many others: I say but this (because with so many, I have many times done much more in Virginia, then I intended heere, when I wanted that experience Virginia taught me) that to mee it seemes no daunger more then ordinarie. And though I know my selfe the meanest of many thousands, whose apprehensive inspection can pearce beyond the boundes of my habilities, into the hidden things of Nature, Art, and Reason: yet I intreate such give me leave to excuse my selfe of so much imbecillitie, as to say, that in these eight yeares which I have been conversant with these affairs, I have not learned there is a great difference, betwixt the directions and judgmet of experimentall knowledge, and the superficiall coniecture of variable relation: wherein rumor, humor, or misprison have such power, that oft times one is enough to beguile twenty, but twenty not sufficient to keep one from being deceived. Therefore I know no reason but to beleue my owne eies, before any mans imagination, that is but wrested from the conceits of my owne proiects, and indeaunts. But I honor, with all affection, the counsell and instructions of judiciable directions, or any other honest advertisement; so farre to observe, as they tie mee not to the crueltie of vnknowne euents.

These are the inducements that thus drew me to neglect all other imployments, and spend my time and best abilities in these adventures. Wherein, though I have had many discouragements by the ingratitude of some, the malicious slanders of others, the falsenesse of friends, the trechery of cowards, and slownesse of adventurers; but chiefly by one Hunt, who was Master of the ship, with whom oft arguing these proiects, for a plantation, however hee seemed well in words to like it, yet he practiced to haue robbed mee of my plots, and observations: and so left mee alone to a desolate Ile, to the fury of famine, and all other extreamities (leste I should haue acquaintted Sir Thomas Smith, my Honourable good friend, & the Councell of Virginia to the end, he and his associates, might secretly ingrosse it, ere it were knowne to the State: Yet that God that alway hath kept me from the worst of such practices, delivered me from the worst of his dissimulations. Notwithstanding after my departure, hee abused the Saluages where hee came, and betrayed twenty seaven of these poore innocent soules, which he sold in Spaine for slaues, to mooue their hate against our Nation, as well as to cause my proceedings to be so much the more difficult.

Now, returning in the Bark, in the fift of August, I arriued at Plimouth: where imparting those my purposes to my honourable friende Sir Ferdinando Gorge, and some others; I was so incouraged, and assured to haue the managing their authoritie in those parts, during my life, that I ingaged my selfe to vndertake it for them. Arriving at London, I found also many promise me such assistance, that I entertained Michaell Cooper the Master, who returned with mee, and others of the company. How hee dealt with others, or others with him I
know not: But my publike proceeding gave such encour-
agement, that it became so well apprehended by some
fewe of the Sout hern Company, as these project s were
liked, & he furnished from London with foure ships
at Sea, before they at Plimouth had made any provi-
sion at all, but onely a ship cheefely set out by sir Ferdi-
nando Gorge; which vpon Hunts late trecherie among the
Saluages, returned as shee went, and did little or noth-
ing, but lost her time. I must confesse I was beholde to
the setters forth of the foure ships that went with Cooper;
in that they offered mee that imploiment if I would ac-
cept it: and I finde, my refusall hath incurred some of
their displeasures, whose favor and loute I exceedingly
desire, if I may honestly enioy it. And though they doe
censure me as opposite to their proceedings; they shall
yet still in all my words and deedes finde, it is their
error, not my fault, that occasions their dislike: for hauing
ingaged my selfe in this businesse to the West Countrie;
I had beene verie dishonest to haue broke my promise;
nor will I spend more time in discouerie, or fishing, till
I may goe with a companie for plantation: for, I know
my grounds. Yet euer one that reads this booke can
not put it in practice; though it may helpe any that haue
scene those parts. And though they endeaouur to worke
me even out of my owne designes, I will not much enuy
their fortunes: but, I would bee sory, their intruding ig-
norance should, by their defailements, bring those cer-
tainties to doubtfulnesse: So that the businesse prosper,
I haue my desire; be it by Londoner, Scot, Welch, or En-
gle, that are true subjects to our King and Countrie:
the good of my Countrey is that I seeke; and there is
more then enough for all, if they could bee content but
to proceed.

At last it pleased Sir Ferdinando Gorge, and Master
Doctor Sutliffe Deane of Exceter, to conceiue so well of
these projects, and my former imployments, as induced
them to make a new aduenture with me in those parts,
whither they haue so often sent to their co-tinuall
losse. By whose example, many inhabitants of the west
Cou-try, made promises of much more then was looked
for, but their private emulations quickly qualified that
heat in the greater number; so that the burden lay prin-
cipally on them, and some few Gentlemen my friends,
in London. In the end I was furnished with a Ship of
200. and another of 50. But ere I had sayled 120 leagues,
shee broke all her masts; pumping each watch 5 or 6000
strokes: onely her spret saile remayned to spoon before
the wind, till we had reaccommodated a Jury mast, &
the rest, to returne for Plimouth. My Vice-admirall bee-
ing lost, not knowing of this, proceeded her voyage:
Now with the remainder of those provisions, I got out
again in a small Barke of 60 tuns with 30 men (for this
of 200 and provision for 70) which were the 16 before
named, and 14 other saylors for the ship. With those I
set saile againe the 24 of Iune: where what befell me
(because my actions and writings are so publicke to the
world, enuy still seeking to scandalize my indeauours,
& seeing no power but death, can stop the chat of ill
tongues, nor imagination of mens minde)s lest my owne
relations of those hard events, might by some construc-
tors, be made doubtfull, I haue thought it best to in-
sert the examinations of those proceedings, taken by
Sir Lewis Stukley a worthie Knight, and Viceadmirall of
Deuonshire; which were as followeth.

My reim-
barkment, inconters
with prats
and impris-
onment by
the French.
Who saith, being chased two days by one Fry, an English Pirate, that could not board vs, by reason of foule weather, Edmund Chambers, the Master John Minter, his mate, Thomas Digby the Pilot, and others importuned his saide Captaine to yeeld; houlding it vppossi-ble hee should defend himselfe: and that the saide Captaine should send them his boate, in that they had none: which at last he concluded vpon these conditions, That Fry the Pyrate should vow not to take any thing from Captaine Smith, that might ouerthrowe his voyage, nor send more Pirats into his ship then hee liked off; other-waies, he would make sure of them he had, and defend himselfe against the rest as hee could.

More: he confesseth that the quarter-masters & Chambers receiued golde of those Pirats; but how much, he knoweth not: Nor would his Captain come out of his Caben to entertaine them; although a great many of them had beene his saylers, and for his loue would haue wafted vs to the Iles of Flowers.

At Fyall, wee were chased by two French Pyrats, who commanded vs Amaine. Chambers, Minter, Digby, and others, importuned againe the Captaine to yeeld; alledging they were Turks, and would make them all slaues: or Frenchmen, and would throw them all ouer board if they shot a peece; and that they were entertained to fish, and not to fight: vtill the Captaine vowed to fire the powder and split the ship, if they would not stand to their defence; whereby at last wee went cleere of them, for all their shot.

At Flowers, wee were chased by foure men of warre; all with their close fights afore and after. And this examinants Captaine hauing provided for our de-fence, Chambers, Minter, Digby, and some others, againe importuned him to yeeld to the favour of those, against whom there was nothing but ruine by fighting: But if he would goe aboard them, in that hee could speak French, by curtesie hee might goe cleere; seeing they offered him such faire quarter, & vowed they were Protes-tants, and all of Rochell, and had the Kings commission onely to take Spaniards, Portugales, and Pyrats; which at last hee did: but they kept this examinates Captaine and some other of his company with him. The next day the French men of warre went aboard vs, and tooke what they listed, and diuided the company into their seuarall ships, and manned this examinates ship with the French-men; and chased with her all the shippes they saw: vtill about five or six dayes after vpon better consideration, they surrendered the ship, and victualls, with the most part of our prouision, but not our weapons.

More: he confesseth that his Captain exhorted them to perfore their voyage, or goe for New found Land to returne fraughted with fish, where hee would finde meanes to proceed in his plantation: but Chambers and Minter grew vpon tearms they would not; vtill those that were Souldiers concluded with their Captaines reso-lution, they would; seeing they had clothes, victualls, salt, nets, & lines sufficient, & expected their armes: and such other things as they wanted, the French men promised to restore, which the Captaine the next day went to seeke, and sent them about loading of com-modities, as powder, match, hookes, instruments, his sword and dagger, bedding, aqua vitæ, his commission,
apparell, and many other things; the particulars he remembrith not: But, as for the cloath, canuas, and the Captaines cloathes, Chambers, and his associats diuided it amongst themselues, and to whom they best liked; his Captaine not hauing any thing, to his knowledge, but his wastecoat and breeches. And in this manner going from ship to ship, to regaine our armes, and the rest; they seeing a sayle, gaue chase vntill night. The next day being very foule weather, this examinate came so neere with the ship vnto the French men of warre, that they split the maine sayle on the others spret sayle yard. Chambers willed the Captaine come aboard, or hee would leaue him: whereupon the Captaine commanded Chambers to send his boate for him. Chambers replyed shee was split (which was false) telling him hee might come if he would in the Admiralls boat. The Captaine's answer was, he could not come aboard her, nor come when hee would: so this examinate fell on sterne; and that night left his said Captaine alone amongst the French men, in this manner, by the command of Chambers, Minter, and others.

Daniel Cage, Edward Stalings, Gentlemen; Walter Chisell, David Cooper, Robert Miller, and Iohn Partridge, being examined, doe acknowledge and confesse, that Daniel Baker his examination aboue writen is true.

Now the cause why the French detayned me againe, was the suspicion this Chambers and Minter gave them, that I would reuenge my selfe, vpon the Bank, or in New found Land, of all the French I could there encounter; & how I would have fired the ship, had they not ouerperswaded mee: and many other such like tricks to catch but opportunitie in this manner of leave me. And thus they returned to Plimouth; and perforce with the French I thus proceeded.

Being a Fleet of eight or nine sayle, we watched for the West Indies fleet, till ill weather separated vs from the other 8. Still we spent our time about the Iles neere Fjall: where to keepe my perplexed thoughts from too much meditation of my miserable estate, I writ this discourse; thinking to haue sent it you of his Maiesties Councell, by some ship or other: for I saw their purpose was to take all they could. At last we were chased by one Captain Barra, and English Pirat, in a small ship, with some twelve pieces of ordinance, about thirty men, and neer all starued. They sought by curtesie releefe of vs; who gave them such faire promises, as at last wee betrayed Captaine Wolliston (his Lieftenant) and foure or fve of their men aboard vs, and then prouided to take the rest perforce. Now my part was to be prisoner in the gun-roum, & not to speake to any of them vpon my life: yet had Barra knowledge what I was. Then Barra perceiving wel these French intents, made ready to fight, and Wolliston as resolutely regarded not their threats, which caused vs demurre vpon the matter longer, som sixtene houres; and then returned their prisoners, and some victualls also, vpon a small composition. The next wee tooke was a small English man of Poole from New found Land. The great caben at this present, was my prison; from whence I could see them pillage those poore men of all that they had, and halfe their fish; when hee was gone, they sould his poore cloathes at the maine mast, by an outcry, which scarce gaue each man seauen pence a peece. Not long after, wee tooke a Scot fraught from Saint Michaels to Bristow: hee had better fortune then the other. For, hauing but taken a boats loading of suger, marmelade, suckets, and such like, we discied foure sayle, after whom we stood; who forling their maine sayles attended vs to fight. But our
French spirits were content only to perceive they were English red crosses. Within a very small time after, we chased four Spanish shippes came from the Indies: we fought with them four or five hours, tore their sayles and sides, yet not daring to board them, lost them. A poore Caruell of Brasile, was the next we chased: and after a small fight, thirteene or fourteen of her men being wounded, which was the better halfe, we took her, with 370 chests of sugar. The next was a West Indies man, of 160 tuns, with 1200 hides, 50 chests of cutchanell, 14 coffers of wedges of siluer, 8000 ryalls of 8, and six coffers of the King of Spaines treasure, besides the pillage and rich coffers of many rich passengers. Two moneths they kept me in this manner to manage their fights against the Spaniards, and be a prisoner when they tooke any English. Now though the Captaine had oft broke his promise, which was to put me a-shore on the Iles, or the next ship be tooke; yet at last, he was intreated I should goe for France in the Caruell of sugar: himself resolued still to keepe the Seas. Within two dayes after, we were haled by two West Indy men: but when they saw vs waue them for the King of France, they gaue vs their broad sides, shot through our mayne mast and so left vs. Having liued thus, neer three moneths among those French men of warre; with much adoe, we arriued at the Gulion, not far from Rochel; where instead of the great promises they alwaies fed me with, of double satisfaction, and full content, they kept me fiue or six daies prisoner in the Caruell, accusing me to bee him that burnt their Colony in New France; to force mee give them a discharge before the Iudge of the Admirality, and so stand to their curtesie for satisfaction, or lie in prison, or a worse mischiefe.

To prevent this choise, in the end of such a storme that beat them all vnder Hatches, I watched my opportunity to get a-shore in their boat; where-into, in the darke night, I secretly got: and with a halfe pike that lay by me, put a drift for Rat Ile: but the Current was so strong and the Sea so great, I went a drift to Sea; till it pleased God the winde so turned with the tide, that although I was all this fearefull night of gusts and raine, in the Sea, the space of 12 hours, when many ships were driven a shore, and diverse split (and being with sculling & bayling the water tired, I expected each minute would sinke mee) at last I arrived in an oazie Ile by Charowne; where certaine fowlers found mee neere drowned, and halfe dead, with water, colde, and hunger. By those, I sound meanes to gette to Rochell; where I understand the man of warre which we left at Sea, and the rich prize was split, the Captaine drowned and halfe his companie the same night, within seauen leagues of that place, from whence I escaped alone, in the little boate, by the mercy of God; far beyond all mens reason, or my expectation. Arriving at Rochell, vpon my complaint to the Judge of the Admiralitie, I founde many good words, and faire promises; and ere long many of them that escaped drowning, told mee the newes they heard of my owne death: these I arresting, their seuerall examinations did so confirm my complaint, it was held prooue sufficient. All which being performed according to the order of iustice, from vnder the iudges hand; I presented it to the English Ambassador then at Burdeaux, where it was my chance to see the arriuall of the Kings great mariage brought from Spaine. Of the wrack of the rich prize some 36000. crownes worth of goods came a shore & was saued with the Caruell, which I did my best to arrest: the Judge did promise me I shold have
The description of New England, by Captaine John Smith.

They betrayed mee having the broad seal of England: and never twenty sail of English more, besides them concealed, in like manner were betrayed that year.

The succease of my vice Admirall and the foure ships of London, from New England.

justice; what will bee the conclusion as yet, I know not. But under the colour to take Pirats and West-Indie men (because the Spanyards will not suffer the French trade in the West-Indies) any goods from thence, though they take them upon the Coast of Spaine, are lawful prize; or from any of his territories out of the limits of Europe.

Leaving thus my businesse in France, I returned to Plimouth, to find them that had thus buried me amongst the French: and not only buried mee, but with so much infamy, as such trecherous cowards could suggest to excuse their villanies: But my clothes, booke, instruments, Armes, and what I had, they shared amongst them, and what they liked; faying, the French had all was wanting; and had throwne them into the Sea, taken their ship, and all, had they not runne away & left me as they did. The cheefe-taines of this mutinie that I could finde, I laied by the heeles; the rest, like themselves, confessed the truth as you haue heard. Now how I haue or could preuent these accidents, I rest at your censures. But to the matter.

Newfound-land at the first, I haue heard, was held as desperate a fishing, as this I proiect in New England. Placentia, & the Banke, were also as doubtful to the French: But, for all the disasters happened mee, the businesse is the same it was: and the five ships (whereof one was reported more then three hundred tunnes) went forward; & found fish so much, that neither Izeland-man, nor Newfound-land-man, I could heare of hath beene there, will goe any more to either place, if they may goe their. So, that vpon the returne of my Viceadmirall that proceeded on her voyage when I spent my masts, from Plimouth this yeare are gone foure or five saile: and from London as many, onely to make voyages of profit: where the Englishmen haue yet beene, all their returnes together (except Sir Fr. Popham) would scarce make one a sauer of neere a dozen I could nominate; though there be fish sufficient, as I perswade my selfe, to fraught yearly four or five hundred saile, or as many as will goe. For, this fishing stretcheth along the Coast from Cape Cod to Newfound-land, which is seaven or eight hundred miles at the least; and hath his course in the deepes, and by the shore, all the yeare long; keeping their hants and feedings as the beasts of the field, & the birds of the aire. But, all men are not such as they should bee, that haue undertaken those voyages: and a man that hath but heard of an instrument, can hardly use it so well, as hee that by use hath contriued to make it. All the Romans were not Scipioes: nor all the Geneweses, Columbuses: nor all Spaniards, Cortes: had they dined no deeper in the secrets of their discoveries, then wee, or stopped at such doubts and poore accidentall chances; they had never beene remembred as they are: yet had they no such certainties to begin as wee. But, to conclude, Adam and Eue did first beginne this innocent worke, To plant the earth to remaine to posteritie; but not without labour, trouble & industrie. Noe, and his family, beganne againe the second plantation; and their seede as it still increased, hath still planted new Countries, and one countrie another: and so the world to that estate it is. But not without much hazard, trouell, discontentts, and many disasters. Had those worthie Fathers & their memorable off-spring not beene more diligent for vs now in these Ages, then wee are to plant that yet vnplanted, for the after liuers: Had the seede of Abraham, our Saviour Christ, and his Apostles, exposed themselves to no more daungers to
teach the Gospell, and the will of God then wee; Euen wee our selues, had at this present beene as Saluage, and as miserable as the most barbarous Saluage yet vncivilized. The Hebrewes, and Lacedæmonians, the Goths, the Grecians, the Romanes, and the rest, what was it they would not undertaake to inlarge their Territories, enrich their subjects, resist their enemies? Those that were the founders of those great Monarchies & their vertues, were no siluered idle golden Pharises, but industrious iron-steeled Publicans: They regarded more provisions, and necessaries for their people, then jewels, riches, ease, or delight for themselves. Riches were their servants, not their Maisters. They ruled (as Fathers, not as Tyrantes) their people as children, not as slaves: there was no disaster, could discourage them; and let none think they encountered not with all manner of incumbrances. And what haue ever beeene the workes of the greatest Princes of the earth, but planting of countries, and ciuilizing barbarous and inhumane Nations, to ciuilitie and humanitie? whose eternall actions, fill our histories. Lastly, the Portugales, and Spanyards: whose euerliuing actions, before our eyes will testifie with them our idlenesse, and ingratitude to all posterities, and the neglect of our duties in our pietie and religion we owe our God, our King, and Countrie; and of want charity to those poore saluages, whose Countrie wee challenge, vse and possess; except wee bee but made to vse, and marre what our Fore-fathers made, or but onely tell what they did, or esteeme our selues too good to take the like paines. Was it vertue in them, to provide that doth maintaine vs? and basenesse for vs to doe the like for others? Surely no. Then seeing we are not borne for our selues, but each to helpe other, and our abilities are much alike at the houre of our birth, and the minute of our death: Seeing our good deedes, or our badde, by faith in Christes merits, is all we have to carrie our soules to heaven, or hell: Seeing honour is our liues ambition; and our ambition after death, to have an honourable memorie of our life: and seeing by noe meanes wee would bee abated of the dignities & glories of our Predecessors; let vs imitate their vertues to bee worthily their successors.

FINIS.

At London printed the 18. of June, in the yeere of our Lord 1616.
To his worthy Captaine,  
the Author.

O  
Ft thou hast led, when I brought vp the Rere  
In bloodie wars, where thousands haue bin slaine.  
Then giue mee leaue, in this some part to beare;  
And as thy servaunt, heere to read my name.  
Tis true, long time thou hast my Captaine beene  
In the fierce wars of Transiluania:  
Long ere that thou America hadst seene,  
Or led wast captiued in Virginia;  
Thou that to passe the worlds foure parts dost deeme  
No more, then t'were to goe to bed, or drinke,  
And all thou yet hast done, thou dost esteeme  
As nothing. This doth cause mee thinke  
That thou I'aue seene so oft approu'd in dangers  
(And thrice captiu'd, thy valor still hath freed)  
Art yet preserved, to convert those strangers:  
By God thy guide, I trust it is decreed.  
For mee: I not commend, but much admire  
Thy England yet vnowne to passers by-her.  
For it will praise it selfe in spight of me;  
Thou it, it thou, to all posteritie.

Your true friend,  
and soldiier,  
Ed. Robinson.

To my honest Captaine,  
the Author.

M  
Alignant Times! What can be said or don,  
But shall be censur'd and traduc't by some!  
This worthy Work, which thou hast bought so dear,  
Ne thou nor it, Detractors neede to fear.  
Thy words by deeds so long thou hast approu'd,  
Of thousands knowe thee not thou art belou'd.  
And this great Plot will make thee ten times more  
Knowne and beleu'd, than ere thou wert before.  
I never knew a Warryer yet, but thee,  
From wine, Tobacco, debts, dice, oaths, so free.  
I call thee Warrier: and I make the bolder;  
For, many a Captaine now, was neuer Souldier.  
Some such may swell at this: but (to their praise)  
When they haue don like thee, my Muse shall raise  
Their due deserts to Worthies yet to come,  
To live like thine (admir'd) till day of Doome.

Your true friend,  
somtimes your soldier,  
Tho. Carlton.
3.2–3 CHARLES, Prince of Great Britaine. Younger son of James I, who became heir to the throne on the death of his brother Henry (b.1594) in 1612. He became king in 1625 and was deposed and executed in 1649.

6.4 foure quarters Fore-quarters, i.e., upper limbs (arms).

6.10 sacring Perhaps an error or an abbreviation for “sacrificing.”

11.9 I. Codrinton, now Templer John Codrington (c. 1580–c.1622) was a colonist at Jamestown in 1608; he was admitted to the Inner Temple (bar) in London in 1616.

11.22 N. Smith Probably Nicholas Smyth of Theddlethorpe, brother of Robert Smyth, headmaster of the Free Grammar School attended by John Smith; he was a “relation,” though the exact degree is unknown.

12.8 Pelias Uncle of Jason who sent him on the quest for the golden fleece, hoping he would not return.

12.14 R: Gunnell. Richard Gunnell (c.1585–1634) was an actor, dramatist, and theater manager in London.

14.22 Rawly Croshaw Colonist with Smith in Virginia

15.1–2 Michael Phettiplace . . . Wiffing Brothers Michael and William Fettiplace were colonists and investors in Jamestown, as was Richard Wiffin.

15.12 Pamunkes king The Pamunkey were an Algonkian nation of eastern Virginia; Powhatan was their king, and Pocahontas his daughter.

15.21 Powhatan (c.1540–1618) Algonkian ruler of eastern Virginia

17.15 Iubartes Baleen whale or rorqual; humpback whale.

18.2 Cor fish Fish, usually cod, preserved in salt.

18.11 Sir Frances Popham Sir Francis Popham (1573–1644) was a director of the Virginia Company and a promoter of his father’s settlement in Maine.

18.28 Nova Albion The Pacific coast of North America

18.33 New Granado Present-day Colombia

18.33 New Spain Mexico

18.33–34 New Andolosia Chile

19.28 Sir Ralph Lane He was recruited by Sir Walter Ralegh in 1585 to lead the colonizing enterprise in North America that settled at Roanoke. Lane explored the Chesapeake Bay before he and the unsuccessful colonists returned to England with Sir Francis Drake in 1586.

19.32 Sir John Popham Sir John Popham (c.1531–1607), chief justice of the king’s bench 1592–1607. He was a founder of the Virginia Company and investor in an unsuccessful colony in Maine in 1606–07.

19.33 Bartholomew Gosnould An explorer of the New England coast in 1602, and sometime privateer. He is thought to be the recruiter who enlisted John Smith to go to Virginia in 1606.

19.34-20.1 Captaine Waymouth George Waymouth’s explorations of the New England coast in 1605 included the abduction of five natives.

25.19 Easterlings Germans of the Baltic Sea coast

26.8 Primum mobile . . . Spheres Reference to the outermost sphere of heaven, bearing the fixed stars, whose motion directed the movements of all other celestial bodies.
Types of fishing vessels

the Straites] Gibraltar

Cape-blank] Cap Blanc, on the west coast of Africa, between the Cape Verde and Canary Islands.

Puttardo] Elsewhere “puttargo”–botargo (It. bottarga, bottarica; Sp. botarga; Fr. boutargue): a paste made of salted mullet or tuna roe, or a sausage or cake made from it.

Poore-Iohn] Dried salted hake or small cod

Natolia] Anatolia, in Asia Minor.

Baldivia] Apparently a reference to Pedro de Valdivia, conqueror of Chile and founder of Santiago.

Alkermes] “The Kermes, or Scarlet Grain insect (the female of Coccus Ilicis), formerly supposed to be a berry, and sometimes described erroneously as a ‘gall’.”—O.E.D.

Train] Fish oil or seal oil

hurts] Hurtleberries, or whortleberries; native blueberries, later known as huckleberries

respices] Raspberries

Gripes] Vultures

Aroughonds] Raccoons

Fitches] Fitchews; the European polecat (ancestor of the domestic ferret), from whence the North American fisher, a type of marten, derives its name.

Dobannida] One of five Algonkians kidnapped by George Waymouth in 1605; he was returned in 1606 by Thomas Hanham.

Hunt] Thomas Hunt, shipmaster on Smith’s 1614 voyage.

Sir Thomas Smith] Sir Thomas Smyth (1558–1625), a London merchant, was governor of the East India Company and treasurer of the Virginia Company.

Sir Ferdinando Gorge] Sir Ferdinando Gorges (1568–1647) of Plymouth was an active proponent of English colonization and sponsor of several commercial settlements in New England. He was appointed governor-general of New England in 1635, but was never able to assume duties there and his authority was opposed by the Puritan colonies of Massachusetts Bay, Plimouth, Connecticut, and New Haven.

Doctor Sutcliffe] Matthew Sutcliffe (1550–1629), dean of Exeter and founder of Chelsea College. He was a member of the council for Virginia from 1607 until its dissolution in 1624.

murtherers] Mortars or small cannon.

Iles of Flowers] Flores, in the Azores.

Fyall] Fayal, in the Azores.

close fights] These are identified in Smith’s Sea Grammar (1627) as fortifications on the ship’s deck.

suckets] Succades: candied fruit or fruit peels preserved in sugar.

Caruell] Caravel: a small ship, fast and maneuverable, up to 100 tons and 100 feet long.

Cutchanell] Cochineal: an expensive red dye made from dried insects (Dactylopius coccus) of Mexico and South America.

Ed. Robinson] He served with Smith in the Austrian army during the campaign in Transylvania in 1602.

THO. CARLTON] He also served with Smith in Transylvania.
Note on the Text

John Smith’s *A Description of New England* was printed and published in London in 1616. Smith later incorporated many portions into *The Generall Historie of Virginia, New England, and the Summer Isles* (London, 1624). The work was first reprinted in 1837 by the Massachusetts Historical Society (*Collections*, 3rd series, volume VI), again the same year in volume II of Peter Force’s *Tracts and Other Papers, Relating Principally to the Origin, Settlement, and Progress of the Colonies in North America* (Washington, DC, 1837), and later in a separate edition by William Veazie (Boston, 1865). It was included in Edward Arber’s edition of *Travels and Works of Captain John Smith* (Birmingham, 1884) and most recently in Philip Barbour’s edition of *The Complete Works of Captain John Smith* (Williamsburg & Chapel Hill, 1986). The two latter editions make editorial corrections and modernize the spelling and orthography of the work. The Barbour edition contains much useful information and scholarship on Smith’s life, writings, and associates, and it has been consulted in the preparation of this online electronic text and apparatus.

The text presented in this electronic edition was transcribed from digital page images of the copy of the London 1616 edition held in the British Library, accessed online in the Early English Books Online Series, no. 22788. It was collated against page images of the copy held in the Henry E. Huntington Library in San Marino, California, accessed online in the same series, no. 22788-3. The Huntington Library copy may contain a later impression of some signatures, since it shows a correction of the error listed here at 33.6 (on page 45, lines 1-2 in the 1616 edition). It also shows the “” that is missing from “Ind es” (at 62.9 in this edition; 55.27 in the first edition), suggesting that its impression of that signature (“H”) may have been made before the “” dropped out in the course of printing.

The design and layout of this edition are based on those of the London edition of 1616. The typeface is IM Fell English, probably cut originally by Christoffel van Dijck (roman) and Robert Granjon (italic), and digitized and furnished by Igino Marini (http://iginomarini.com/fell.html). Some accommodations have been made in the composition: in deference to modern readers, the long “” and its ligatures have not been used, nor have the ligatures for “”, “”, “”, “”, “”, “” in order to allow for easier and more accurate searching and excerpting. Headpieces, initials, and ornaments are reconstructions of those in the London first edition, some using the Fell Flowers from Igino Marini.

This edition retains the spelling, capitalization, italics, and punctuation of the London 1616 edition. No attempt has been made to standardize spellings or orthography. Some typographical errors have been corrected, and a list of these emendations is given below, keyed to page and line number of the present edition (the line count includes chapter headings, but not running heads, blank lines, or hairlines):
