Credibility Theory and Geometry
Elias S.W. Shiu and Fuk Yum Sing.............................................................. 197
EDITORIAL POLICY

The aim of this international journal is to publish articles pertaining to the "art" and/or "science" involved in contemporary actuarial practice.

The Journal welcomes articles providing new ideas, strategies, or techniques (or articles improving existing ones) that can be used by practicing actuaries. One of the goals of the Journal of Actuarial Practice is to improve communication between the practicing and academic actuarial communities. In addition, the Journal provides a forum for the presentation and discussion of ideas, issues (controversial or otherwise), and methods of interest to actuaries.

The Journal publishes articles in a wide variety of formats, including technical papers, commentaries/opinions, discussions, essays, book reviews, and letters. The technical papers published in the Journal are neither abstract nor esoteric; they are practical and readable. Topics suitable for this journal include the following:

- AIDS
- annuity products
- asset-liability matching
- cash-flow testing
- casualty ratemaking
- credibility theory
- credit insurance
- disability insurance
- expense analysis
- experience studies
- FASB issues
- financial reporting
- group insurance
- health insurance
- individual risk taking
- insurance regulations
- international issues
- investments
- liability insurance
- loss reserves
- marketing
- pensions
- pricing issues
- product development
- reinsurance
- reserving issues
- risk-based capital
- risk theory
- social insurance
- solvency issues
- taxation
- valuation issues
- workers' compensation

REVIEW PROCESS

A paper submitted to the Journal first is screened for suitability. If it is deemed suitable, copies are sent to several independent referees. The name of the author(s) of the paper under consideration is usually anonymous to the referees, and the identities of referees are never revealed to the author(s).

The paper is reviewed for content and clarity of exposition. Papers do not have to contain original ideas to be acceptable. On the basis of the referee reports, the editor makes one of the following decisions: (1) accept subject to minor revisions, (2) accept subject to major revisions, or (3) reject.

The editor sends the author(s) of the decision and along with copies of the referee reports. The referee process is expected to take three to four months (depending on the length of the paper).

See inside back cover for instructions to authors.
