June 2007

Volume 40, Number 3

Comments from the Dean

Dear Colleagues:

During the most recent meeting of the ARD Advisory Council, our conversation turned to the “At Work for Nebraska” study prepared by the Battelle Institute. You probably recall that this study, released earlier in the year, was designed to assess the economic impact of IANR programs on the state of Nebraska. You, like the members of the Advisory Council, were probably very pleased and very proud to learn that through your efforts, the people of Nebraska receive more than a 15 to 1 return on their investment in IANR. You may also be wondering, as some of them were wondering, why everyone in the state does not know about the great dividends that are being gained through investing in IANR and why they are not clamoring for greater investments. The simple answer is probably that they just do not know about the study or its remarkable conclusion.

Why don't the people of Nebraska and even our colleagues in other parts of our university, know about these remarkable findings? Have we put the study and excerpts from it on our Web pages? Have we written and delivered press releases to the newspapers and other news media in the state? Have we delivered the same material to state officials, legislators, and IANR support groups? Of course, the answer to each of these questions is “yes”. Some people do know this tremendous story, but not everyone. Most people have not even heard the message, and as teachers you understand that it is a long way from hearing a message to knowing it.

My message to you is that we do have this tremendous story to tell and telling it is not only important to us as educators and researchers, but also important to the citizens we serve. Telling our story to those we serve, students as well as practitioners, will help them know, and they in turn will inform and educate others. The tasks of educating our publics about the value of what we do is the responsibility of each of us.

“At Work for Nebraska” is our story. Each of us can tell it proudly in terms of how our work benefits Nebraskans. That is what it is really about. We are a land-grant university. We are at work for Nebraska. Sometimes we act as if we believe a one-time telling, perhaps in the media, is all that is needed to get the message across. As educators we know that is not true. The more times, the more places, the more ways a message can be delivered, the better it will be known.

The “At Work for Nebraska” study is a tool for us. It is a tool for future planning, and it is a tool for communicating the value of what we do so our constituents can take full advantage of our work.

Other tools are available to help us tell that story. The www.atworkfornebraska.unl.edu Web site has tools already in place for your use, and more are in the works. This is a long-term project.

There are slides to include in a PowerPoint presentation that briefly address the “At Work” study and what it means for Nebraskans. These can be easily incorporated into your programs and presentations for any audience.

There are handouts, each aimed at different aspects of IANR's work. You can print them off or order specific handouts of interest to your audience by contacting Judy Nelson (jnelson5@unl.edu) in CIT. Have a few in your briefcase and office to share with stakeholders and consider them for meetings.

No matter how great the tools, they cannot do a thing if we do not use them. I hope you will make use of all of the tools available and all of your skills as an educator to tell the story of how our being at work for Nebraska benefits our state and its people.

Gary L. Cunningham
Dean and Director

Williams Endowment

The Williams Endowment was established in the University of Nebraska Foundation in 1993 to support high priority experiments and research related to water and land conservation. The endowment interest income has accumulated to a level that competitive grants can be made available. The specific focus of the research may be changed in future solicitations as emerging priorities change.

For the current competitive cycle, project proposals should relate to “management of surface water run-off and erosion from agricultural land to achieve total maximum daily loading (TMDL) compliance”. Examples of approaches to address this could include: (a) land and cropping management, (b) conservation buffer strips, (c) conservation structures, (d) animal waste management, and/or (e) site-specific nutrient management. The proposals received were awarded to:

Dean Eisenhauer, Biological Systems Engineering
[Mike Dosskey, USDA/FS National Agroforestry Center]
“*Improved Prediction of Contaminant Removed by Vegetated Filters*”

Total Amount Received: \$17,930
Funding Period: June 1, 2007 - May 31, 2008

Thomas Franti, Biological Systems Engineering
[David Shelton, Biological Systems Engineering/Northeast Research and Extension Center]
“*A Tool to Evaluate Conservation Buffer Performance Toward TMDL Compliance*”

Total Amount Received: \$19,940
Funding Period: June 1, 2007 - May 31, 2008

Ya Ding, National Drought Mitigation Center/School of Natural Resources
[Karina Schoengold, School of Natural Resources, and Tsegaye Tadesse, National Drought Mitigation Center]
“*The Impact of Weather Extremes on Agricultural Production Methods: Does Drought Increase the Adoption of Conservation Tillage Practices?*”

Total Amount Received: \$19,933
Funding Period: June 1, 2007 - May 31, 2008

Sampson Range and Pasture Management Endowments

Five proposals were submitted to the ARD Sampson Range and Pasture Management Endowment and all five are being funded for 2007-2008. This endowment was established in the University of Nebraska Foundation by the widow of Arthur William Sampson to support range and pasture management programs at the University of Nebraska. Sampson proposals were awarded to the following:

Walter H. Schacht, Agronomy and Horticulture Department
[Jerry Volesky, West Central Research and Extension Center; Tala Awada, School of Natural Resources; and Kelly Brink, Agronomy and Horticulture]
“*Leadplant Utilization and Response to Timing and Intensity of Grazing*”

Total Amount Received: \$8,580
Funding Period: June 1, 2007 - May 31, 2008

Robert Shearman, Agronomy and Horticulture Department
[Bekele Abeyo, Agronomy and Horticulture]
“*Breeding Buffalograss for Improved Seed Yield*”

Total Amount Received: \$9,000
Funding Period: June 1, 2007 - May 31, 2008

Tala Awada, School of Natural Resources
[Walter Schacht and Neal Bryan, Agronomy and Horticulture; Xinhua Zhou, School of Natural Resources; and Amalia Yianaka, Agricultural Economics]
“*Establishing Integrated Agricultural systems in Western Nebraska*”

Total Amount Received: \$9,570
Funding Period: June 1, 2007 - May 31, 2008

Larkin Powell, School of Natural Resources
[Walter Schacht, Agronomy and Horticulture; and Donald Rundquist, School of Natural Resources]
“*Using High-Resolution, Hyperspectral Images to Characterize Vegetation Cover on Sandhills Prairie*”

Total Amount Received: \$10,000
Funding Period: June 1, 2007 - May 31, 2008

Jerry Volesky, West Central Research and Extension Center
[David Baasch and L. Enrique Ramirez, School of Natural Resources; Walter Schacht, Agronomy and Horticulture; and F. Enrique-Ramirez, Platte River]
“*Resource Selection by Cattle in the Central Platte River Valley of Nebraska*”

Total Amount Received: \$10,000
Funding Period: June 1, 2007 - May 31, 2008

ARD Advisory Council Election Results

The following faculty members have been elected to the ARD Advisory Council for a three-year period beginning July 1, 2007.

District 2: **Rhae Drijber** (Agronomy and Horticulture). Representing faculty in the Agronomy and Horticulture Department.

District 3: **Jim Brandle** (School of Natural Resources). Representing faculty in the School of Natural Resources.

Continuing ARD Advisory Council members are:

District 1: **Richard Perrin** (Agricultural Economics). Representing faculty in the Departments of Agricultural Economics and Food Science and Technology.

District 4: **Brett White** (Animal Science). Representing Faculty in the Departments of Animal Science and Biological Systems Engineering.

District 5: **Lance Meinke** (Entomology). Representing faculty in the Departments of Statistics, Entomology and Veterinary and Biomedical Sciences.

District 6: **Jaekwon Lee** (Biochemistry). Representing faculty in the Departments of Biochemistry and Plant Pathology.

District 7: **Nancy Lewis** (Nutrition and Health Sciences). Representing faculty in the Departments of Agricultural Leadership, Education and Communications; Child, Youth and Family Studies; Nutrition and Health Sciences; and Textiles, Clothing and Design.

District 8: **Rick Funston** (West Central Research and Extension Center). Representing faculty in the Northeast Research and Extension Center, Panhandle Research and Extension Center and West Central Research and Extension Center.

Please join the ARD staff in expressing appreciation to **Charles Wortmann and Tala Awada** for their dedicated support of the ARD Advisory Council during the past three years. Their contributions have been invaluable in surfacing concerns, providing input and selecting award recipients. We wish them continued success in their academic careers.

ARD Interdisciplinary Research Grants Program

Fifteen proposals were submitted to the ARD Interdisciplinary Research Grants Program and two proposals were selected for 2007-2008 funding. We were, however, able to fund three continuation projects. New ARD Interdisciplinary Research Grants were awarded as follows:

Tala Awada, School of Natural Resources
[Julie Stone and Jiusheng Lin/Biochemistry; Tom Clemente and James Specht/Agronomy and Horticulture; and Saadia Bihimidine, School of Natural Resources]
“Physiological Effects of Drought Stress-Responsive Transgenes in Soybeans”

Total Amount Received: \$19,650
Funding Period: July 1, 2007 - June 30, 2008

Blair Siegfried, Entomology Department
[David Dunigan, James Van Etten, and Thomas Powers/Plant Pathology and Bradley Plantz and Vicki Schlegel, Food Science and Technology]
“Isolation and Characterization of Novel Cellulose Digesting Enzymes”

Total Amount Received: \$20,000
Funding Period: July 1, 2007 - June 30, 2008

Raul Barletta, Veterinary and Biomedical Sciences
[Robert Powers and James Takacs/Chemistry]
“Development of Broad-Spectrum Antibiotics Against Bacterial Pathogens”

Total Amount Received: \$20,000
Funding Period: July 1, 2006 - June 30, 2007

The following continuing projects have been evaluated and will continue for 2007-2008:

Daniel Snow, School of Natural Resources
[Alan Kolok/Biology-UNO and Galen Erickson/Animal Science]
“Environmental Stewardship of Cattle Wastes: Do Growth Promoting Steroids Alter Toxicity?”

Total Amount Received: \$20,000
Funding Period: July 1, 2007 - June 30, 2008

John Holz, School of Natural Resources
[Aris Holz and James Merchant/School of Natural Resources and Erkan Istanbuluoglu/ Geosciences]
“Determination of Appropriate Lake Water Quality Expectations in Agriculturally Dominated Ecosystems”

Total Amount Received: \$19,964
Funding Period: July 1, 2007 - June 30, 2008

Undergraduate Honors Research Program

Funds for the 2007-2008 Academic Undergraduate Honors Student Research Program have been allocated to units for support of undergraduate student research projects. This program is open to junior and senior University Honors Program students proposing to work with a faculty research mentor who has an ARD appointment. Six proposals were received and funded. The following students have received funding:

Ayako Ebata (Agricultural Economics Department) \$2,500
Mentor: Dr. Lilyan Fulginiti
“Ecologically and Technologically Sustainable Agricultural Productivity Growth”

Emily Veburg (Agricultural Economics Department) \$2,500
Mentor: Dr. Richard Perrin
“A Statistical Analysis of the Location and Economic Effects of Ethanol Plants”

Lauren Volentine (Biochemistry Department) \$2,500
Mentor: Dr. Jaekwon Lee
“Characterization of the Function and Regulation of the CCC2 Copper Transporter”

Megan Elizabeth Krause (Biological Systems Engineering Department) \$2,500
Mentor: Dr. Gregory Bashford
“Safe Patient Handling: A Biomechanical Analysis of Sit to Stand Devices Versus Normal Human Movement”

Robert Com (Biological Systems Engineering Department) \$2,500
Mentor: Dr. Gregory Bashford
“Optimization of Signal Processing Parameters for Analyzing Transcranial Blood Flow in Pediatric Patients”

Isaac Mortensen (Biological Systems Engineering Department) \$2,500
Mentor: Dr. Jeyamkondan Subbiah
“Near Infrared Reflectance Spectroscopy to Detect Moisture Content in Unshelled Peanuts”

David H. and Annie E. Larrick Fund 2007

The David H. and Annie E. Larrick fund supports travel of graduate students who are conducting research in fields other than animal science, agricultural education and leadership, and veterinary and biomedical sciences. The Larrick endowment will assist the following students with \$500 travel grants to present research findings at national or regional meetings.

Name: Almed Al-Wadaey
Department: Agronomy and Horticulture
Meeting: American Society of Agronomy
Place: New Orleans, LA

Name: Zhanbei Liang
Department: Agronomy and Horticulture
Meeting: American Society of Agronomy/Crop Science
Place: New Orleans, LA

Name: Darrin Roberts
Department: Agronomy and Horticulture
Meeting: American Society of Agronomy/Crop Science
Place: New Orleans, LA

Name: Boon Hoe Lim
Department: Biochemistry
Meeting: Plant Biology and Botany Joint Congress
Place: Chicago, IL

Name: Michael Moxley
Department: Biochemistry
Meeting: National Institute of Health/Proline Symposium
Place: Fredrick, MD

Name: Shah Huda
Department: Biological Systems Engineering
Meeting: Society of Plastics Engineers
Place: Sahar, Mumbai, India

Name: Govindarajan Suresh Babu
Department: Biological Systems Engineering
Meeting: Institute of Food Technology Food Expo
Place: Chicago, IL

Name: Mahesh Pun
Department: Biological Systems Engineering
Meeting: National Ground Water Expo
Place: Orlando, FL

Name: Heartwin Pushpadass
Department: Biological Systems Engineering
Meeting: American Association of Cereal Chemists
Place: San Antonio, TX

Name: Siew-Yoong Lee
Department: Biological Systems Engineering
Meeting: American Association of Cereal Chemists
Place: San Antonio, TX

Name: Eric Newgard
Department: Biological Systems Engineering
Meeting: American Association of Cereal Chemists
Place: San Antonio, TX

Name: Megan Borer
Department: Child, Youth and Family Studies
Meeting: Child Care Policy Research Consortium
Place: Washington, DC

Name: Belle Howell
Department: Child, Youth and Family Studies
Meeting: Child Care Policy Research Consortium
Place: Washington, DC

Name: Analiza P. Alves
Department: Entomology
Meeting: Entomological Society of America
Place: San Diego, CA

Name: Andre Luiz Barreto Crespo
Department: Entomology
Meeting: Entomological Society of America
Place: San Diego, CA

Name: Michael Fisher
Department: Entomology
Meeting: Entomological Society of America
Place: San Diego, CA

Name: Julia Colby
Department: Entomology
Meeting: Entomological Society of America
Place: San Diego, CA

Name: Audrey Wesseling
Department: Food Science and Technology
Meeting: Institute of Food Technology
Place: Chicago, IL

Name: David Monsalve
Department: Food Science and Technology
Meeting: American Society of Animal Science/Poultry Science
Place: San Antonio, TX

Name: Lakshman Rajagopal
Department: Nutrition and Health Sciences
Meeting: Council of Hotel, Restaurant & Instructional Study
Place: Dallas, TX

Name: William Rittenour
Department: Plant Pathology
Meeting: American Phytopathological Society
Place: San Diego, CA

Name: Giane M. Yanai-Balser
Department: Plant Pathology

Meeting: American Society of Virology
Place: Corvallis, OR

Name: Saadia Bihmidine
Department: School of Natural Resources
Meeting: Ecological Society of America
Place: San Jose, CA

Name: Zhaoning Liang
Department: School of Natural Resources
Meeting: American Geophysical Union
Place: San Francisco, CA

Name: Kimberly Payne
Department: School of Natural Resources
Meeting: Ecological Society of America
Place: San Jose, CA

Name: Manmeet Waria
Department: School of Natural Resources
Meeting: International Conference/Soils Sediments
and Water
Place: Amherst, MA

William G. Whitmore Student Travel Endowment

The William G. Whitmore memorial fund was established at the University of Nebraska Foundation in 1980 as a memorial to William G. Whitmore, a member of the Board of Regents at the University of Nebraska from 1902-1916. The income from the fund supports a travel grant program for graduate students within IANR whose advisor or co-advisor has an ARD research appointment. In accordance with the donor instructions, this program will support attendance to professional society meetings in the fields of animal science, agricultural education and leadership, and veterinary and biomedical sciences. Priority for grants will be given to graduate students who are personally presenting the results of their research and/or scholarly investigations.

The Whitmore Research Travel Committee makes grants for expenses, including transportation (which is not to exceed coach class airfare), registration, lodging, meals, etc. Grants under this program are limited to a maximum of \$500 per individual per fiscal year for travel during the period July 1 through December 31, 2007 as follows:

Name: Jacqueline Smith
Department: Animal Science
Meeting: Society for the Study of Reproduction
Place: San Antonio, TX

Name: Krishman Navasona
Department: Biochemistry
Meeting: Gordon Research Conference
Place: Des Moines, Iowa

The next call for these travel funds will be sent to the unit administrators around the second week in October 2007 for travel from January 1 to June 30, 2008.

Arch and Frances Jorgenson Fund

A charitable trust was established at the University of Nebraska Foundation through the estate of Arch and Frances Jorgensen. The funds were designated to be used as research initiative funds for new research addressing agricultural research priorities in the Sandhills and graduate student fellowship supplement for students conducting research on crop production on sandy soils, range management and ecology of beef/range systems. This foundation grant was awarded to:

Aaron Stalker, Animal Science Department
“*Wet Distillers Grains as a Range Supplement and Forage Substitute*”

Total Amount Received: \$2,300
Funding Period: June 1, 2007 - May 31, 2008

Ralph H. Bainbridge Memorial Fund

A charitable memorial fund was established at the University of Nebraska Foundation through the Ralph H. Bainbridge Estate. These funds are to be used to support interdisciplinary research teams working in the area of beef production and grassland research and development. Two proposals were received and two were awarded.

Aaron Stalker, Animal Science Department
[Terry Klopfenstein, Animal Science; Walter Schacht, Agronomy and Horticulture; and Jerry Volesky, West Central Research and Extension Center]
“*Wet Distillers Grains as a Range Supplement and Forage Substitute*”

Total Amount Received: \$ 5,000
Funding Period: June 1, 2007 - May 31, 2008

Rick Funston, Panhandle Research and Extension Center
[Matt Stockton and Jerry Volesky, Panhandle Research and Extension Center; and Aaron Stalker, Animal Science]
“*Effect of Supplement Nutrition on Embryo Survival and Pregnancy Rate in Beef Heifers*”

Total Amount Received: \$5,000
Funding Period: June 1, 2007 - May 31, 2008

Helen Porter Van Spronsen Charitable Trust

A charitable trust was established at the University of Nebraska Foundation for Helen Porter Van Spronsen by Lucille Porter. The trust mandates that funds be used for agricultural and water research or related farm and agricultural study. Funds are for a graduate research assistant (GRA) assigned to an approved ARD project in range and livestock research at the Gudmundsen Sandhills Laboratory. The proposal received was awarded to:

Aaron Stalker, Animal Science Department
[Terry Klopfenstein, Animal Science Department; Jerry Volesky,

West Central Research and Extension Center; and Walter Schacht, Agronomy and Horticulture]
“Wet Distillers Grains as a Range Supplement and Forage Substitute”

Total Amount Received: \$10,000
Funding Period: June 1, 2007 - May 31, 2008

New or Revised Projects March and April 2007

NEB 22-321 Environmentally-appropriate management of soils for high intensity human uses

Investigator: Dennis McCallister, Agronomy and Horticulture
Status: Hatch project effective April 1, 2007, through March 31, 2012

NEB 37-035 Process and property investigations of fibers from Nebraska's agricultural products and by-products

Investigator: Yiqi Yang, Textiles, Clothing and Design
Status: Hatch project effective April 1, 2007, through March 31, 2012

NEB 39-145 NC 1027, An integrated approach to control of bovine respiratory diseases

Investigator: Clinton Jones, Veterinary and Biomedical Sciences
Status: Multistate project effective Oct. 1, 2006, through Sept. 30, 2011

NEB 42-102 The economics of alternative beef cattle production systems using strategic specific simulation modeling

Investigator: Matthew Stockton, West Central Research and Extension Center
Status: Hatch project effective April 1, 2007, through March 31, 2012

Proposals Submitted for Federal Grants March and April 2007

The following is a listing of proposals that were submitted during March and April 2007 by faculty for federal grant programs. While not all grants will be funded, we are appreciative of the faculty members' outstanding efforts in submitting proposals to the various agencies.

James Alfano – NIH – ADP-ribosyltransferase – \$1,815,506

Robert Wright – USDA/APHIS – Grasshoppers of the Western United States: Electronic identification and information tool development (07-8456-0975-CA) – \$25,907

James Van Etten – NSF-University of Massachusetts-Lead – Chlorella genomics: Comparison of symbiotic chlorella spp. NC64A – \$352,877

Kyle Hoagland – USGS – Water Resources Research Institute Annual Base Program – \$92,335

David Marx – NIH-University of Missouri-Kansas sub-contract – Joules in the human TMJ: Differences in mechanical work done in women and men – \$119,828

Larkin Powell and Richard Tyre – NRCS – State wildlife surveys as sources of information of wildlife benefits from Farm Bill programs – \$70,935

David Carter and Leon Higley – National Institute of Justice – Presumptive testing for bloodstains associated with insect artifacts – \$134,913

Vadim Gladyshev – NIH – Methionine sulfoxide reduction selenium and aging – \$240,601

Greg Somerville – NIH – Environmental regulation of staphylococcus epidermidis PIA synthesis – \$31,379

Ken Hubbard – NOAA – Improvement and implementation of instrument-change adjustment models for U.S. daily historical maximum and minimum temperatures (1950s to 2000s) – \$59,522

Steve Hu – NOAA – Transition of weather and climate forecasts into effective decision-making tools – \$99,359

Greg Somerville, Robert Powers (PI), Ronald Cerny, Mark Griep, David Hage, and Peter Revesz – Department of Energy – Functional annotation of novel microbial proteins using NMR spectroscopy – \$1,490,822

Jaekwon Lee – NIH – Mechanistic insights into homeostatic copper acquisition – \$90,148

David Steffen – USDA/APHIS/WS ADS Procurement Branch – AI lab testing for the State of Nebraska (Avian Influenza Testing) (Req #78122) – \$47,000

David Steffen – USDA/APHIS/MRPBS/ASD Procurement Branch – AI lab testing for the State of Kansas (Avian Influenza Testing Services) (Req #78723) – \$33,425

Rhae Drijber – USDA/ARS – Developing technologies to improve soil and nutrient management – \$34,000

Stevan Knezevic, Charlie Shapiro, Tom Hunt, and Mark Bernards – U.S. Army Corps of Engineers – Total vegetation control on sandbars along the Missouri river utilizing lime and herbicides – \$198,136

Stephen Ragsdale – National Institute of General Medical Sciences – Enzymology of the Reductive Acetyl-CoA Pathway – \$294,173

Charles Wortmann – USAID – Crop, soil and water management to optimize grain yield and quality for value-added markets in eastern and southern Africa – \$348,500

Robert Hutkins and Jayne Stratton – USDA/AMS – Improving safety, quality and accessibility of farmer's market products

through targeted training of farmers and producers – \$52,906

Richard Perrin and Lilyan Fulginiti – U.S. Department of Energy – Cellulosic ethanol and welfare change – \$348,149

Ismail Dweikat – INTSORMIL – Breeding sorghum with improved grain quality, performance, stability and resistance to biotic and abiotic stresses – \$352,750

Sandra Scofield – Department of Housing and Urban Development – UNL enterprise development in rural Nebraska in the city of Lincoln – \$198,000

Sandra Scofield – Department of Housing and Urban Development – UNL expansion of rural business enterprise development – \$99,000

Donald Wilhite, Tsegay Tadesse, Charles Wortmann, James King, and David Forsythe – USAID, Higher Education for Development, Collaborative Ethiopia/Uganda – Disaster risk reduction and sustainable development: partnership of Bahir Dar University and University of Nebraska-Lincoln – \$200,000

Linda Boeckner – UNMC-University of Nebraska Medical Center, NIH funding – Modifying lifestyle in prehypertensive older rural women – \$45,530

Qi Hu – NSF – Collaborative research: How has the ENSO teleconnection with warm season rainfall in the Central United States been modulated at mulidecadal timescale – \$219,480

Grants and Contracts Received for March and April 2007

Agronomy and Horticulture:

Rhae Drijber – USDA/ARS	\$34,000.00
Miscellaneous Grants under \$10,000	\$39,839.00

Animal Science:

Chris Calkins and Galen Erickson – Nebraska Beef Council	\$90,919.00
Phil Miller, Rodger Johnson, and Tom Burkey – Monsanto	\$19,152.00
Miscellaneous Grants under \$10,000	\$2,750.00

Biochemistry:

Donald Becker – NIH	\$297,863.00
Vadim Gladyshev – NIH	\$240,601.00
Steve Ragsdale – National Institute of General Medical Sciences	\$294,173.00

Biological Systems Engineering

Derrel Martin – Nebraska Department of Natural Resources	\$209,440.00
---	--------------

Entomology:

Blair Siegfried and John Foster – USDA/CSREES	\$106,814.00
Robert Wright – USDA/APHIS	\$25,907.00
Miscellaneous Grants under \$10,000	\$6,300.00

Food Science and Technology:

Lloyd Bullerman – Kraft Foods Global, Inc.	\$25,000.00
Miscellaneous Grants under \$10,000	\$1,690.00

Northeast Research and Extension Center:

Keith Jarvi – Syngenta	\$16,000.00
Miscellaneous Grants under \$10,000	\$10,200.00

Panhandle Research and Extension Center:

Miscellaneous Grants under \$10,000	\$81,670.00
-------------------------------------	-------------

Plant Pathology:

Gary Yuen and Thomas Powers – NRI	\$58,089.00
Miscellaneous Grants under \$10,000	\$33,450.00

School of Natural Resources:

Xun-hong Chen – Lower Platte North Natural Resources District	\$119,504.00
Steve Comfort and Vital Ziotnik – Environmental Science and Technology Certification	\$98,777.00
John Holz, Aris Holz, Tadd Barrow, and Kyle Hoagland – Nebraska Department of Environmental Quality	\$201,700.00
Steve Hu – NOAA	\$99,359.00
Ken Hubbard – NOAA	\$59,522.00
Ken Hubbard – NPDC and NCF	\$60,370.00
Susan Lackey – Upper Elkhorn Natural Resources District	\$27,000.00
James Merchant – Nebraska Health and Human Services	\$33,000.00
Steven Thomas – NDEQ	\$149,952.00
Richard (Drew) Tyre – Nebraska State Wildlife	\$64,990.00
Miscellaneous Grants under \$10,000	\$2,400.00

Veterinary and Biomedical Sciences:

Greg Somerville – NIH	\$31,379.00
David Steffen – USDA/APHIS/WS	\$47,000.00
David Steffen – USDA/APHIS/MRPB	\$33,425.00
Miscellaneous Grants under \$10,000	\$2,500.00

West Central Research and Extension Center

Miscellaneous Grants under \$10,000	\$15,014.00
-------------------------------------	-------------

TOTAL	\$2,639,749.00
--------------	-----------------------
