INTRODUCTION AND ACKNOWLEDGEMENTS

The importance of Charles E. Bessey in the world of science was recognized by several researchers who have extensively used his papers in the past. The evaluation of the Bessey papers by Professor Richard Overfield appearing elsewhere in this Guide is indicative of this significance. The reason to publish the papers by microfilming was twofold. First, it was to prevent the original papers from further deterioration by frequent handling. Secondly, and perhaps even more importantly, copies of the microfilm edition are being made available to libraries of other institutions, thus enabling researchers easier access to the collection. Archivists, special collections librarians and manuscript curators in many institutions gave their time to help us to collate as complete a set of Bessey papers for the microform edition as possible. We wish to thank in particular the following institutions for their cooperation and/or contributions:

The Academy of Natural Sciences, Philadelphia;

University of California-Berkeley, Jepson Herbarium;

Cornell University Libraries, Archives;

Farlow Reference Library & Herbarium of Cryptogamic Botany,
Harvard University;

Gray Herbarium, Harvard University;

Harvard University Library;

Hunt Institute for Botanical Documentation, Carnegie-Mellon
University, Pittsburgh;

University of Illinois at Urbana-Champaign, Archives;

Iowa State University Library, Ames;

University of Iowa Libraries, Iowa City;

Library of Congress, Manuscript Division

Michigan State University Archives, East Lansing;

Missouri Botanical Garden, St. Louis;

The New York Botanical Garden, Library, Bronx;

University of Rochester Library;

Smithsonian Institution Archives;

Stanford University Libraries, Archives;

Washington State University Library, Pullman.

All these institutions provided us with copies of Charles E. Bessey items found among their holdings. While some of these copies were included in extant Bessey letterpress books or among Bessey's carbons in our collection, most constituted a welcomed addition to the microfilm edition.

We extend our thanks to the National Historical Publications and Records Commission, particularly to George L. Vogt, the Commission's assistant director in charge of Publications Programs, who organized a very useful seminar in Washington, D.C., in August, 1980, for a group of editors microfilming projects. The editor of this project participated and profited in numerous ways from the program and the suggestions offered in the seminar's formal presentations and follow-up informal discussions.

Patricia Churray who was hired to implement the project proved to be the embodiment of efficacy and zeal. Without her competent dedication the project could not be accomplished in time. She maintained correspondence and kept in touch by telephone with archivists and special collections librarians regarding additional Bessey materials. When the materials were obtained as copies, she provided them with appropriate identification targets, indexed and interfiled them. She kept the record of all expenditures and expedited the payment of all bills. She made a major reorganization of the Bessey Papers and completely revised the index to Bessey's correspondence. This in itself was a major undertaking. When some documents in the letterpress books were barely legible and would be therefore practically illegible in the microfilm, she typed them, reconstructing imaginatively the faint script of the original. She designed the targets and prepared the materials for filming. She assisted in the supervision of the student help who did the bulk of filming and when she found time in her busy schedule she lent her hand in filming. Finally she checked the processed film for errors and legibility.

Our thanks are also due to Jolaine Kaminski, assistant in the University Archives, who devoted much of her time in the continuing and often seemingly never ending process of the final revision of the index. She was able to continue with

the same efficiency and accuracy demonstrated by Patricia Churray who had to leave when money allotted for the project was exhausted.

Dr. Gerald A. Rudolph, Dean of Libraries, reviewed the draft of the Guide and offered useful suggestions leading to its final version. Mr. Dean A. Waddel, Assistant Dean of Libraries, encouraged the editor in all phases of the project even though it was obvious that the time consumed by editor's participation in it far surpassed the allotted period of the grant proposal.

Joseph G. Svoboda
University of Nebraska-Lincoln Archivist

EVALUATION OF THE BESSEY PAPERS

Charles E. Bessey was one of the prominent leaders of American science during the late 19th-early 20th centuries. His career as a botanist, professor, and university administrator spanned forty-five of the most important years in the development of modern American science. Bessey was a prodigious letter writer whose preserved correspondence is not only massive but informative and interesting. Aside from part of his early career in the 1870's, he kept copies of the letters he wrote and the originals of those received. The collection contains everything from letters to and from local farmers and nurserymen, to scientists throughout the country and abroad, to state and national politicians and government officials. Although most of the collection consists of correspondence, there are lectures and reports covering many scientific, teaching, and administrative topics.

The period and topics covered by the Bessey Papers are significant. Most of the important developments during the first fifty years of the land-grant college movement are treated in the Papers. These include such topics as: the debate over the nature of land-grant colleges, the relationship of the colleges to agriculturalists and agricultural organizations, the beginning and development of agricultural experiment stations, the struggles to provide a scientific basis for agriculture and agricultural education, and the relationship between the new agricultural education and traditional university studies. The Papers contain much material on other aspects of education during this period. Bessey was interested not only in reforming university education but was also very active in reforms in secondary instruction and was involved nationally with the Committee of Ten.

A second major area covered by the Papers is the "new botany" movement. This was an attempt to shift botany away from the traditional concentration on taxonomy toward evolution and physiology, from static to evolutionary classification, from form to function. Bessey wrote a pioneer textbook for the "new botany" and was an active proponent of the movement throughout his life. Thus there is much in the Papers of a technical nature on evolution, classification, ecology, pathology, and structural physiology.

Closely tied to the "new botany" was a professionalization movement by American botanists. Again Bessey was a leader in this movement, and there is an abundance of material in the Papers on the growth of American scientific organizations, both nationally and locally. In particular, his correspondence involves the American Association for the

Advancement of Science, the Botanical Society of America, and the Society for the Promotion of Agricultural Science.

Bessey also strongly supported the development of the U.S. Department of Agriculture, and much of the correspondence centers on the critical period in the growth of the USDA as a scientific institution. The Bessey Papers coincide with the development of the USDA from its early and largely non-scientific days to its emergence by World War I as an internationally-recognized research institution. Many of Bessey's students acquired scientific posts with the USDA. Therefore, much information on the inner workings of the scientific bureaus is in this correspondence. In addition to agriculture, the Bessey Papers contain an abundance of material on conservation and forestry.

An important feature of Bessey's correspondence was his continued contact with his students after their graduation. This is significant because so many of his students became prominent in numerous areas of botany and agricultural science, including ecology, physiology, plant pathology, and forestry. As a result, the Papers include discussions and descriptions of a variety of scientific activities in every section of the United States in addition to the emphasis on the Prairies and Great Plains where Bessey resided during his entire scientific career.

BIOGRAPHICAL SKETCH OF CHARLES EDWIN BESSEY, 1845-1915

Charles Edwin Bessey was born in a log house on a farm in Wayne County, Ohio, 21 May 1845, the son of Adnah and Margaret (Ellenberger) Bessey.

. . .When old enough, he took up and engaged in all the work then common on a large farm, and it is a matter of pride with him to this day that there is no kind of farm work which he did not learn to do well. He attended the country school and was fortunate in having several unusually scholarly and inspiring teachers. Later he attended two academies in which he prepared for college. On the death of his father in 1863, he took up teaching in order to earn money to enable him to continue his education. For a time he engaged in surveying for the same purpose. He graduated from the Agricultural College at Lansing, Michigan and was at once elected to the chair of Botany and Horticulture in the Iowa Agricultural College where he remained fifteen years.

During this period, he found time to study with Asa Gray, the great Botanist, at Harvard University. In 1884, he resigned his position in Iowa, and accepted the chair of Botany and Horticulture in the University of Nebraska, which a few years later was changed to the chair of Botany alone. During nearly the whole period of his connection with the University of Nebraska, he has been Dean of the Industrial College, and the three years, 1888-1891, and again for a year in 1899 to 1900, he acted as the Chancellor for the University.

He is a member of the State Horticultural Society; has been for many years the Botanist for the State Board of Agriculture; was for several years the first Director of the Experiment Station; is now the Botanist of the Station; and has been President of the Nebraska Academy of Sciences and the State Teachers Association.

From 1880-1897 he was the botanical editor of the American Naturalist, and since 1897 has occupied a similar position on Science.

He has published several books on Botany, and

many reports, reviews and articles in the scientific papers, and the proceedings of learned societies.¹

Charles Bessey was certified to teach at seventeen. In July 1866 he entered Michigan Agricultural College, where he came under the influence of Albert Nelson Prentiss and William James Beal, two botanists noted for their teaching skills. He graduated from the scientific course in 1869 and remained as an assistant in horticulture, but soon left to inaugurate botany and horticulture at Iowa Agricultural College, Ames.

At Ames he took part in the first Farmers' Institute held in Iowa (1870-71). He was the guiding spirit in the founding of the old Iowa Academy of Sciences and was elected its president in 1875 and re-elected regularly for several years. In August, 1872, Bessey was elected to membership in the American Association for the Advancement of Science, and at that meeting met Dr. Asa Gray. Consequently, during the winter of 1872-73 he spent three months at Harvard studying with him. In that same year, 1872, he received the degree of master of science from Michigan Agricultural College and was promoted to a full professorship at Ames.

He was invited to lecture on Botany at the University of California-Berkeley in 1875 and then returned to Harvard to study under the mycologist William Farlow. In 1879, the University of Iowa conferred the degree of doctor of philosophy upon Bessey in recognition of his publication in Botany and a partial reward for what he had already accomplished for the state of Iowa.

Under the recommendation of Asa Gray, he prepared the textbook Botany for High Schools and Colleges from 1878 to 1880, which introduced cryptogamic botany and physiological plant anatomy into American colleges. His second highly successful text, Essentials of Botany (1884), had seven editions by 1896. He wrote more than 150 papers and reviews, but his writings on plant phylogeny, Evolution and Classification

¹Autobiographical sketch written by Bessey on January 3, 1905 for the Nebraska Farmer, Lincoln. Remainder of the biography taken from the following publications:

"A Brief Sketch of the Life and Work of Charles Edwin Bessey,"

Pool, Raymond J., American Journal of Botany, 2 (December, 1915), 505-518.

Dictionary of Scientific Biography, Gillispie, Charles Coulston, Editor; Scribner's Sons, 1970.

A more complete biographical sketch can be found by referring to the above publications and the biographical material written about Bessey in the collection.

(1893) and Phylogenetic Taxonomy of Flowering Plants (1915), established his permanent place in botany. Bessey gave direction to botanical literature through his associate editorship of the American Naturalist and Science, two of the most influential journals of the time. He offered the first laboratory course in botany at the University of Minnesota in the summer of 1881, using compound microscopes borrowed from Iowa Agricultural College. His crowning scientific honor came at the Minneapolis meeting of the American Association for the Advancement of Science in 1910-11, when he was elected national president.

With much urging, he became Professor of Botany at the University of Nebraska in September, 1884. Bessey's ability as a college administrator was recognized at various times by the regents of the University of Nebraska. He was Dean of the Industrial College from 1884-88 and 1895-1909 when he was made head dean. He served on two occasions as acting chancellor (1888-1891 and 1899-1900).

Bessey was one of the pioneers who did much to lay the foundations of American botany. Much of the time Bessey gave to study and writing was devoted to a painstaking survey of the structure and evolution of the main groups of the plant world. Bessey was also an effective and loved teacher. His powerful presentation of subject matter in the classroom and the laboratory was magnified by a personality which, because of its quaint paternal cordiality, won the admiration of thousands of students. Bessey's deep, modulated voice and his genial, persuasive, generous, perennially enthusiastic manner made him popular as a lecturer and officer in many of the some twenty organizations to which he belonged. In his forty-five years as a college professor, he had over 4,000 students in his classes. This was the work closest to his heart and in this he felt that he had fulfilled a divine commission. The love for young people and for the work of the teacher kept him young in spirit and vigorous in action to the end.

On December 25, 1873, Charles Bessey married Lucy Athearn of West Tisbury, Massachusetts. They had three sons: Edward, Ernst, and Carl, all of whom graduated from the University of Nebraska. Edward and Carl specialized in electrical engineering. Ernst specialized in Botany and became internationally known as a mycologist. Charles Edwin Bessey passed away at his home in Lincoln on February 25, 1915, after a critical illness of four weeks.

EDITORIAL COMMENT

This microfilm edition of Charles E. Bessey Papers includes primarily the materials preserved by the University of Nebraska-Lincoln Archives. Additional materials were transferred over the years to the collection by the University of Nebraska Department of Botany and the University of Nebraska State Museum through the courtesy of Professors William W. Ray and Robert B. Kaul. Some additional materials were acquired as photo-reproductions from other repositories in the United States.

Almost all materials in the collection were filmed. The most notable exceptions were Bessey's published materials and items scattered in various record groups in our University Archives. The latter are to be found mainly in the papers of the Board of Regents and relate to Bessey's two acting chancellorships, and in the records of the University of Nebraska Sem-Bot Club founded by Bessey shortly after his arrival on the University of Nebraska campus. Total number of documents reproduced in the microfilm edition is approximately 43,230.

The materials in the edition have been divided into five groups, each having a somewhat different internal structure. The first four groups consist of Bessey's incoming and outgoing correspondence and comprise some 34 rolls of film. The arrangement of correspondence follows a chronological/alphabetical pattern: within each year the letters are filmed in alphabetical order by names of correspondents. The letterpress books are filmed in chronological order. The fifth series under the general heading, Botany Department, Correspondence and Records, consists of a variety of materials touching upon Bessey's administrative and teaching responsibilities at the University of Nebraska. Also attached to the last roll of film is the personal file including biographical items and some presumably unpublished articles and photographs. Finally, there is a partial bibliography of Bessey's works.

Many documents in the Bessey collection are damaged or faded and some are practically illegible. As a rule, targets indicating such condition have been filmed with relevant documents. Poor legibility due to fading is particularly noticeable in several volumes of letterpress books. Whenever possible the pages or the portions of pages having weak contrast have been transcribed, and the typed transcripts have been filmed with the originals. In some cases only the transcripts were filmed because of poor quality originals. When reproductions of primary Bessey letters were obtained from other repositories they were filmed in their proper place in

our letterpress books.

Corrections to the microfilm have been effected by splicing retakes of omitted or poorly photographed documents to the end of appropriate rolls of film. In these instances the sequence of retakes was indicated on the boxes of applicable rolls of film.

A reduction ratio of 12 to 1 was employed in this microfilm edition. In a few isolated cases this ratio was modified to accommodate oversized items.

ROLL DESCRIPTION

- I. Incoming and Outgoing Correspondence, 1865 - 1890
Filmed by years and thereunder alphabetically by name of correspondent.

*There are no extant outgoing letters for these years in our collection. Outgoing letters in this series are photocopies obtained from other institutions.

- Roll 1. Incoming and Outgoing Correspondence,
1865 - 1879 H
Roll 2. Incoming and Outgoing Correspondence,
1879 I - 1885 M
Roll 3. Incoming and Outgoing Correspondence,
1885 O - 1890

- II. Incoming Correspondence, 1891 - 1904 L
Filmed by years and thereunder alphabetically by name of correspondent.

- Roll 3. Incoming Correspondence, 1891 B
Roll 4. Incoming Correspondence, 1891 C - 1893 F
Roll 5. Incoming Correspondence, 1893 G - 1894 N
Roll 6. Incoming Correspondence, 1894 O - 1895 R
Roll 7. Incoming Correspondence, 1895 S - 1897 A

pg. 1 - 472
Index at beginning of volume 7.
- Vol. 8 25 June 1895 - 31 Aug. 1895,
pg. 1 - 60
- Roll 28. Outgoing Correspondence - Letterpress Books,
1895 - 1897
Vol. 8 (cont.) 1 Sept. 1895 - 2 Oct. 1896,
pg. 61 - 489
Vol. 9 2 Oct. 1896 - 30 Sept. 1897,
pg. 1 - 588
- Roll 29. Outgoing Correspondence - Letterpress Books,
1897 - 1898
Vol. 9 (cont.) 1 Oct. 1897 - 25 Jan. 1898,
pg. 589 - 999
Vol. 10 26 Jan. 1898 - 31 Aug. 1898,
pg. 1 - 585
- Roll 30. Outgoing Correspondence - Letterpress Books,
1898 - 1900
Vol. 10 (cont.) 1 Sept. 1898 - 25 Mar. 1899,
pg. 586 - 996
Vol. 11 25 Mar. 1899 - 29 Dec. 1900,
pg. 1 - 565
- Roll 31. Outgoing Correspondence - Letterpress Books,
1901 - 1902
Vol. 11 (cont.) 2 Jan. 1901 - 15 May 1901,
pg. 566-937
Vol. 12 15 May 1901 - 15 Jan. 1902,
pg. 1 - 580
- Roll 32. Outgoing Correspondence - Letterpress Books,
1902
Vol. 12 (cont.) 16 Jan. 1902 - 19 June 1902,
pg. 581 - 993
Vol. 13 19 June 1902 - 31 Dec. 1902,
pg. 1 - 417
Partial Index at beginning of volume 13.
- Roll 33. Outgoing Correspondence - Letterpress Books,
1903 - 1904
Vol. 13 (cont.) 3 Jan. 1903 - 27 Oct. 1903,
pg. 418 - 1001
Vol. 14 29 June 1903 - 27 Feb. 1904,
pg. 1 - 387
Index at beginning of volume 14.
- Roll 34. Outgoing Correspondence - Letterpress Books,
1904 - 1905
Vol. 14 (cont.) 1 Mar. 1904 - 30 Mar. 1904,
pg. 388 - 500

Vol. 15 30 Mar. 1904 - 31 Mar. 1905,
 pg. 1 - 991
 Additions - April & May 1905 (incomplete)
 Index at beginning of volume 15.

INDEX

Only the bulk correspondence in the collection is indexed. If the letterpress books contain an index, it is designated in the roll description. A large part of the correspondence is written to Bessey requesting information on Botany class equipment and herbaria or requesting his publications or reports, plant identifications and disease queries. These and the important subject matter and organizations referred to in the letters are noted in the index. Known former students of Bessey are designated by an asterisk. The location of the authors is also shown. The first number indicates the year in which the letter was written. The number in parentheses refers to the microfilm roll number.
