## EDITOR'S CORNER

The *Transactions of the Nebraska Academy of Sciences* publishes results of original research by members of the Academy in good standing. It is indexed in Biological Abstracts, Cambridge Scientific Abstracts, and Fish and Fisheries Worldwide and is received by more than 600 libraries worldwide. Presentation of a paper at the annual meeting of the Academy is not a prerequisite or a guarantee of publication in the *Transactions*. Persons wishing to submit a paper for consideration should consult the inside back cover of this volume for information about preparation and style of manuscripts. Manuscripts are reviewed by at least two referees, including at least one from outside the author's institution. Following review by the referees and the editorial board, the author is notified whether or not the paper is accepted for publication and, if accepted, of necessary revisions.

Many thanks to those individuals who served as manuscript reviewers for the current volume. In the interest of anonymity, they are not listed here. However, their contribution is deeply appreciated and they have all been thanked individually.
