

Duncan announced as president of AURP Executive Committee

Daniel Duncan, [Nebraska Innovation Campus](https://innovate.unl.edu/) Development Corporation Executive Director, has been elected as president of the [Association of University Research Parks \(AURP\)](https://www.aurp.net/) for a two year term.

The association announced its 2018-2019 Board of Directors and newly elected leadership during a luncheon at the 2018 International Conference hosted by the University of Maryland's Discovery District in College Park, MD.

AURP is a professional association of university-related research and science parks. The organization's mission is to foster innovation, commercialization and economic growth through university, industry and government partnership.

"I was honored to be voted in as president of the AURP Executive Committee," said Duncan. "I'm excited about the opportunity to collaborate with such a strong group of research park leaders as we look to expand global partnerships."

Duncan noted that the relationships developed with other AURP members, especially the international connections, have the potential to help Nebraska Innovation Campus expand its global presence.

In his role as president of the AURP Executive Committee, Duncan will continue to raise the banner for university research parks and communities of innovation throughout the United States and around the world.

Duncan's two-year term began following the October AURP 2018 International Conference. The AURP Executive Committee includes research park leadership from RTP (Durham, N.C.), UA Tech Park (Tucson, Ariz.), Centennial Campus, NC State University (Raleigh, N.C.), Georgia Tech (Atlanta), and Cummings Research Park (Huntsville, Ala.).

About AURP

The Association of University Research Parks is a professional association of university related research and science parks. AURP's mission is to foster innovation, commercialization and economic growth through university, industry and government partnerships.
