Official TELEPHONE DIRECTORY

DECEMBER 77

(BOB BOLIN)

2. AUTOSEVOCOM (SECURE VOICE NUMBER FOR FSTC). The number for the WIDEBAND Secure Voice for FSTC is 851-1750, ext 2524 Drop 4. (When the distant end gets the Pentagon at 851-1750 and ask for ext. 2524, Fort Belvoir will answer, then ask for Drop 4 and FSTC will answer.) For NARROWBAND have them (Ft. Belvoir) call 851-1380 and ask for Drop 4 and FSTC will answer. Any question call ext 412, Communication Office. (DRXST-CM)

EMERGENCY: FIRE/POLICE: 500
MEDICAL: 444

COMMERCIAL: 804 296-5171
202 484-1860

AUTOVON: 274-7110 FOR OPERATOR ASSISTANCE
274-7 (PLUS THREE DIGIT EXTENSION)

MINIMIZE

AR 105-34

MINIMIZE is a procedure used during periods of crisis or other abnormal periods to reduce the volume of record and long distance telephone traffic ordinarily transmitted electrically.

MINIMIZE applies to ALL users of DOD communications systems, including originators-of card and tape traffic.

Procedures. When **MINIMIZE** is imposed, users of DOD electrical communications facilities must determine that:

1. The information to be forwarded is required to avoid a seriously detrimental impact on mission accomplishment or safety of life.
2. Electrical transmission is the only way to get the information to the addressee in sufficient time to accomplish its purpose.

Alternate Means of Communications. The US mail, the US Armed Forces Courier Service, or an individual as a courier or messenger should be used instead of using electrical means when **MINIMIZE** is imposed.

Authority to Impose and Cancel MINIMIZE. Commanders are authorized to impose **MINIMIZE** within their command or area of command responsibility unless specifically denied by appropriate higher authority. The Joint Chiefs of Staff impose it worldwide as well as in any specific area. The Joint Chiefs of Staff or the commander concerned, as appropriate, will cancel **MINIMIZE** when no longer required.

SUBJECT: Official Telephone Directory

SEE DISTRIBUTION

1. This directory is published in accordance with Chapter 5, AR 105-23. It is the property of the US Government and is intended solely for official use by members of this organization and activities officially associated with FSTC. Distribution is limited to activities and individuals who receive their telephone service from the FSTC telephone system and to other official users on an individual request basis. Providing copies of this document or information contained herein to outside commercial sources is prohibited by paragraph 5-5b, AR 105-23.
2. Changes will be published in the Weekly Bulletin as they occur. A new directory normally will not be issued more than twice each year unless unusual circumstances arise, such as a mass move of personnel or offices.
3. The Chief, Communications Management (DRXST-CM) will maintain the master directory in accordance with paragraph 5-4f, AR 105-23. Any discrepancies noted should be brought to the attention of that office, telephone extension 577.

FOR THE COMMANDER:

ROBERT H. GRASSI
LTC, Infantry
Executive Officer

SECTION I - General Information	1
SECTION II - AUTOSEVOCOM Instructions	5
SECTION III - Organizational Section	9
SECTION IV - Miscellaneous Section	15
SECTION V - Alphabetical Section	19

WARNING

The FSTC telephone system is leased from the Central Telephone Company of Virginia. Under no circumstances will subscribers move, alter, place attachments on or make additions to the telephone equipment of this system. All work incident to the installing, removing, or changing of telephone equipment must be performed by CENTEL personnel. Contact the Communications Management Office, Ext 577, for assistance.

SECTION I

GENERAL INFORMATION

1. Telephone Switchboard Operating Hours. The FSTC switchboard is operated from 0715 until 1630 hours on business days only.

2. Non Duty Hour Answering Capability. AUTOVON telephones have direct inward and outward dialing capability and are operational continuously. Local commercial trunks do not have direct inward dialing capability and require switchboard operator assistance. During non duty hours certain office telephones are "patched" at the switchboard to afford direct inward dialing. The numbers and offices which are provided this service are:

<u>COMMERCIAL NUMBER</u>	<u>REGULAR FSTC EXT</u>	<u>OFFICE</u>
296-5170	594	Federal Protective Service Guard Desk
296-5171	410	Federal Protective Service Guard Desk
296-5182	503	Federal Protective Service Guard Desk
296-5178	481	Foreign Language Research Branch
296-5179	599	Special Security Detachment
296-5181	593	Communication Center (GENSER)
296-5183	404	Office of the Commander
296-5184	633	Computer Center
296-5185	690	GSA Shop, Room B-16

Additional night service can be prearranged by coordinating requirements with the FSTC Telephone Supervisor, X-577. This service will convert the designated extension to a standard commercial telephone reachable by dialing the commercial number. Extensions converted in this manner need not dial the prefix "9" for an outside line. Night service lines can neither be used to dial another FSTC extension, AUTOVON, Washington Foreign Exchange (FX) lines, nor can they be called by dialing a three digit FSTC number.

3. Local Commercial Calls. Commercial calls can be placed to the Charlottesville area by dialing the prefix "9" and waiting for a dial tone change before dialing the local number. The following are not

local calls; long distance information, calls to area code 800, and collect calls. Dial "0" for these services.

4. Commercial Long Distance Telephone Calls.

a. The FSTC switchboard operators handle all commercial long distance, collect, long distance information, third party number billing, and calls to area code 800. Dial "0" for operator assistance.

b. The FSTC Operator will complete official long distance calls through AUTOVON and interconnecting local switchboards to the maximum extent practicable. The operators maintain a list of AUTOVON switchboards capable of extending official calls.

c. Long distance official toll calls may be placed after duty hours, on weekends, or while away from the building by previously coordinating official needs with the FSTC Communications Office, Ext 577.

5. AUTOVON. Most DOD offices within the US can be reached by using the AUTOVON network. Dial "8" for AUTOVON access then the seven digit number desired. The FSTC Operator will provide AUTOVON information.

6. Outgoing Washington, D.C. FX Calls. Calls to DOD offices, including DARCOM and Pentagon buildings, or commercial numbers in the Washington area may be made by dialing prefix "7" then the seven digit commercial number desired.

7. Incoming Washington, D.C. FX Calls. Non DOD and DOD agencies in the Washington area can call FSTC toll free commercially by dialing 484-1860. The FSTC Operator will answer and complete the call. This service is not available during non business hours when the switchboard is closed.

8. Overseas Calls. The FSTC Operator will provide assistance in placing overseas calls. Dial "0" for assistance.

9. AUTOSEVOCOM Calls. AUTOSEVOCOM terminals are located in the Imagery Analysis Branch, SCIFA-1 and Room 507 See SECTION II of this directory for complete AUTOSEVOCOM information.

10. Telecopier (facsimile) Service. Unclassified material may be transmitted by telecopier to most DOD installations and commercial companies in the US. Call the Communication Center, Ext 593 for further information relative to this service.

11. Rotary Hunt. Rotary hunt is the ability of telephone equipment to check additional lines in the same office if the desired number is busy. For example, if when calling 453 and finding it busy, 454, and then 455 are checked automatically for an unused line. If all three lines are in use, then and only then is a busy signal returned. Otherwise the caller is connected to an unused line. This directory reflects the use of the rotary hunt system in that only the first number in a rotary series is listed. Call the FSTC Operator for information relative to rotary hunt number groupings.

12. Telephone Repair. All telephone equipment problems will be reported to the FSTC Operator, Ext 577. Do not call the local telephone company.

13. Communications Security Monitoring. Communications security monitoring is authorized for security purposes (AR 380-53). Use of government owned, leased, or contracted communications facility implies consent to communications security monitoring.

14. Unofficial Calls. Unofficial calls are not permitted. A commercial pay telephone is located in the hall of the 1st floor near room 105.

SECTION II

AUTOMATIC SECURE VOICE COMMUNICATIONS (AUTOSEVOCOM)

1. FSTC secure voice service is extended from the Fort Belvoir secure cord board (SECORD); therefore, all outgoing and incoming calls are switched by the Fort Belvoir SECORD operator.
2. The two FSTC AUTOSEVOCOM telephones located in the Imagery Analysis Branch, SCIFA-1 and room 507 share a single wideband circuit to the Fort Belvoir SECORD. The circuit is normally switched to the SCIFA-1 instrument. Approximately five minute notice to the FSTC Operator is requested to activate the room 507 instrument.
3. AUTOSEVOCOM number for contacting FSTC.
 - a. Pentagon secure 2524 (which is the Ft Belvoir SECORD) then ask for Drop 04 (FSTC). The above is valid for calls originating in the Washington area, NSA (Ft Meade, Md), FTD Wright Patterson, AFB Ohio, or any location worldwide having wideband secure service access to the Pentagon secure exchange.
 - b. 851-1380 (Fort Belvoir SECORD) then ask for Drop 04. For use by counterparts who do not have wideband secure service through the Pentagon secure voice exchange.
4. Operating Assistance. Call the COMSEC Custodian, Ext 587; the Communication Center, Ext 660 or the Chief Operator "O".
5. AUTOSEVOCOM Directory Assistance. Worldwide AUTOSEVOCOM directory assistance is available by calling the offices listed in paragraph 4, above.
6. SECURITY. When used in an office environment with cryptographic security equipment doors locked, the AUTOSEVOCOM terminal is unclassified. Discussions should be limited to SECRET and below unless authentication procedures for TOP SECRET have been employed. Authentication is addressed in the succeeding paragraph. Do not operate radios, recording devices or nonsecure telephones in the same room (area) while classified conversations are in progress.
7. AUTHENTICATION. (1) TOP SECRET calls may be placed from either secure telephone. Authentication procedures should be employed. Required authentication tables are stored by the COMSEC Custodian. The tables and assistance are available by calling extension 587 or 660. (2) Special Intelligence calls may be placed only from the SCIFA-1 secure telephone. Contact the above mentioned official for authentication assistance.

8. OPERATING CONTROLS. Three buttons on the left of the AUTOSEVOCOM telephone and a cipher switch are operational. A brief explanation follows:

- PUSH-TO-TALK (PLAIN) - Push-to-talk button must be depressed to talk to the SECORD operator.
- PLAIN INDICATOR - Flashes when phone is not in the secure mode. Do not discuss classified data when this indicator is blinking.
- ALARM DISABLE - Light illuminates and sounds an audible alarm when equipment malfunctions. Depress the ALARM DISABLE button and notify COMSEC personnel on Ext 587 or 660.
- CIPHER SWITCH - The white button located on the left of the telephone cradle. Pull this button up to transfer from plain to secure when instructed to do so by the SECORD operator.

9. PROCEDURES FOR PLACING A SECURE CALL.

a. If call is to be TOP SECRET or SI follow instructions contained in paragraph 7, above.

b. Coordinate the call with distant counterpart via nonsecure telephone to insure his availability.

c. If the call is to be placed from Room 507, dial the FSTC operator from a nonsecure telephone and request the AUTOSEVOCOM be switched to room 507, then proceed as follows:

(1) Pick up the secure telephone and the SECORD operator (Fort Belvoir) will answer. It is not necessary to dial. Remember, you must depress the push-to-talk button to speak to the operator.

(2) Provide the following information: Precedence (highest authorized is PRIORITY); the number of desired party to include any extension. The operator will ask you to wait as she completes the connection. Upon completing the connection, the operator will instruct you to "go secure". On receiving these instructions, lift the CIPHER SWITCH (white button on top left of the cradle).

(3) After completing the above, you are in the secure mode and classified information may be discussed.

(4) When completed, simply return the handset to the cradle. If the call was made from room 507, telephone the FSTC operator and request she switch the AUTOSEVOCOM back to SCIFA-1.

10. PROCEDURES FOR RECEIVING A SECURE TELEPHONE CALL.

a. If call is to be TOP SECRET or SI follow instructions contained in paragraph 7, above.

b. Request distant counterpart to coordinate incoming secure calls by nonsecure telephone in advance. Proceed to the AUTOSEVOCOM terminal at the arranged time. If the call is to be received in room 507, request the FSTC operator to switch the circuit to that room.

c. Upon receipt of a ring, pick up the handset, depress the push-to-talk button and identify yourself to the operator.

d. Upon receipt of instructions from the operator to "go secure", pull up the CIPHER SWITCH located on the left side of the cradle. You are now in cipher and classified information may be discussed.

e. When the call is completed, replace the handset in the cradle.

f. Upon completion of a call from room 507, call the FSTC operator and request the circuit be switched back to SCIFA-1.
