This Article is brought to you for free and open access by the Nebraska Game and Parks Commission at DigitalCommons@University of Nebraska - Lincoln. It has been accepted for inclusion in Nebraska Game and Parks Commission -- White Papers, Conference Presentations, & Manuscripts by an authorized administrator of DigitalCommons@University of Nebraska - Lincoln.

# 2002 Licensed Angler Survey

## Summarized Results

May 2005

Don Gablehouse, Fisheries Division Chief

### Survey Procedures

On October 22, 2002, 5000 six-page surveys (Appendix 3) were sent to a stratified-random sample of Nebraska anglers drawn from the 2001 licensed anglers database. The database included all anglers who purchased a fishing license in 2001 as well as all lifetime fishing permit holders who purchased their license before or during 2001. The database did not include those possessing a free permit, such as veteran's or senior citizen permits. The survey subsample (2.6% of the 2001-licensed angler database) was stratified such that the proportions of surveys in the subsample (4366 residents and 634 non-residents) matched the proportions of resident/non-resident license holders.

Two weeks after the original mailing, a postcard reminder was sent to all 5000 survey recipients. While postage procedures did not allow for non-deliverable surveys to be identified, 691 of the reminder postcards were returned as undeliverable indicating a valid mailing of 4309 surveys (2.2% of the 2001 licensed angler database).

Surveys were completely anonymous and contained no identifying identification. Respondents were asked their zip code which was used during analysis to identify their Fisheries Division district of residence.

### Survey Responses

Surveys were received through May of 2003 with 1386 of 4309 surveys returned. This represented a 32.2% response rate. Response rates varied by district from 36.8% in District 2 to 19.5% in District 5. Generally, the more urbanized the district, the lower the response rate observed. Due to the differing

response rates among districts, future surveys may need to be stratified by district to more accurately represent Nebraska anglers.

District	Response Rate (%)
I	28.2
II	36.8
III	28.5
IV	24.5
V	19.5
VI	26.7

Approximately 28.1% of the returned surveys were received at least four days (to allow for transit time) or more following the mailing of the reminder postcard. Due to this substantial increase in survey responses due to the reminder card, it is recommended that the same methodology be used in future surveys.

#### Permit Types

Surveys were mailed to a similar distribution of permit types as were present in the 2001 angler database. This indicates that stratification by residency coupled with a large enough sample size (i.e. number of surveys mailed) allowed a representative distribution of permit types to be drawn into the subsample without further stratification. Although slightly different response rates altered the permit distribution of survey respondents, the final distribution was sufficiently similar to the database and subsample to eliminate the need for any further stratification by permit type (other than by residency) in future surveys.

### Gender

Eighty-three percent of survey respondents who responded to the gender question were male. Older age groups (55+) had higher proportions of female anglers than did younger age groups. Districts 2 (21.4%), 4 (24.4%), and 6 (23.9%) had the highest proportions of female anglers while districts 3 (13.6%) and 5 (13.6%) had the lowest. Resident and non-resident anglers had similar proportions of male and female anglers.

### Age

The most prominent age group among respondents who gave their age was 45-54 years old (28.1%), followed by 35-44 year olds (24.6%). Non-resident anglers had a much older age distribution than did resident anglers, with only

10.7% of non-resident anglers being younger than 35 years old and 28.6% younger than 45 years old versus 21.5% and 47% for instate-anglers.

The 65+ age group was not accurately represented in the database as senior citizen permits receive free permits after age 70 and were not included in the sample populations. Looking at respondents between the ages of 16 – 64 as compared to the 2000 NE Census data, 2002 permits were oversold in the 35-44, 45-54, and 55-64 years-old age groups and undersold in the 16-24 and 25-34 years-old age groups. Likewise, a higher percent of angler respondents came from the older age groups (45-54, 55-64) at the expense of the younger age groups (16-24, 25-34, 35-44) when compared to the 1995 Nebraska Anglers survey. This indicates a decline in the average proportion of younger anglers in Nebraska from 1995 to 2002.

Age Group	1995 Angler Survey (%)	2002 Angler Survey (%)	2000 Census (%)
16-24	10	7.7	24.1
25-34	20	13.7	19.8
35-44	31.1	26.3	23.5
45-54	24.4	30.8	20.1
55-64	14.4	21.5	12.5

This is likely due to the increasing number of recreational opportunities available to younger generations competing with angling for limited recreational time periods. The complete licensed angler database should be analyzed to determine if this change in age distributions is related to survey subsample selection or represents an actual trend in license sales.

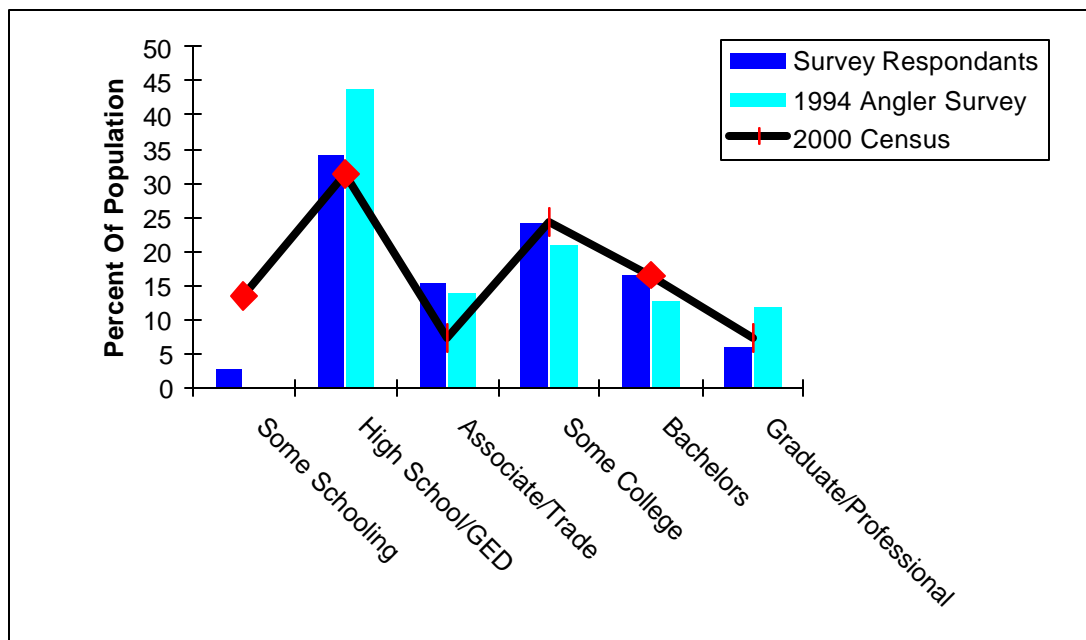

### Household Income

Median household income in Nebraska rose from \$26,016 in the 1990 US Census to \$39,250 in the 2000 US Census. Mean household income of Nebraska anglers, however, dropped from \$37,409 in 1995 to \$34,608. For the first time in recent history the mean household income of Nebraska anglers has fallen below the median household income of Nebraska citizens and may indicate that future license increases may meet with increasing resistance. Non-resident anglers had a mean household income of over \$4000 more than did resident anglers. Districts 4, 5, and 6 had a markedly higher mean household income than did districts 1, 2, and 3.

Region	Mean Household Income
Resident	\$34,100
Non-resident	\$38,258
District 1	\$30,412
District 2	\$29,167
District 3	\$30,852
District 4	\$36,833
District 5	\$35,724
District 6	\$34,954

### Education

The distribution of educational backgrounds among 2002 Nebraska anglers was similar to that found in the 2000 Nebraska Census with the exception of Associate/trade school graduates and high-school dropouts. Compared to the 1994 angler survey, our licensed angler population is losing highly educated professionals and those with only a high-school diploma while making gains in those with some level of college education including associate or bachelor degrees.

### Ethnicity

Caucasian anglers comprised the vast majority of the 2001 licensed anglers, far surpassing that proportion of the overall Nebraska population. Conversely, most minorities were underrepresented in the respondents of the 2002 licensed angler survey.

Ethnicity	2002 Angler Survey (%)	2000 Census (%)
Caucasian	95.0	84.1
Middle Eastern	0.2	
Hispanic	1.2	5.5
African American	0.5	4.0
Asian	0.6	1.3
American Indian	0.6	0.9
Pacific Islander	0.1	0.0
Other	1.1	2.8
Multi-ethnic	0.7	1.4

### Did You Fish In 2002?

Seventy-four percent of survey respondents (selected from a pool of 2001 fishing permit holders) fished during 2002. Of the 234 respondents who did **not** fish during 2002, 123 (52.6%) still purchased a fishing license. Therefore, the

retention rate of Nebraska permit holders from 2001 to 2002 was 91.9%.

However, 8.1% of Nebraska anglers who bought a permit during 2002 did not go fishing. These people represent a contingent of Nebraska fishing permit sales that may be lost in the future if these anglers cannot be recruited into active angling.

### Reasons For Not Fishing

Across the board, the main reason anglers who fished in 2001 did not fish in 2002 was lack of time. In the 1995 Nebraska Statewide Angler Survey, “no longer enjoy fishing” was given as a reason as frequently as “lack of time”. “No longer enjoy fishing” was the most infrequently cited answer during the 2002 survey, although it scored substantially among ex-anglers above the age of 65 and in District 3. While “lack of time” was still the single highest reason for not fishing in 2002, it was only identified by 27% of non-fishing respondents over the age of 65 resulting in more widely distributed answers for this age group, including “too expensive” (13.6%) and “dissatisfaction with previous trips” (13.6%). In 2002, approximately 3.8% of ex-anglers were lost to semi-permanent reasons (physically unable to or no-longer enjoy fishing), indicating that a large proportion of the anglers who didn’t buy a permit in 2002 may still be recruited to license sales in future years with targeted marketing and management efforts.

### Satisfaction

On a scale of 1-5 with 1 representing “Very Satisfied” and five representing “Very Dissatisfied”, Nebraska anglers ranked their satisfaction with

2002 fishing experiences a 2.58. No significant differences were found between districts, between age groups, or by gender.

	N	Mean	F	p
District 1	85	2.46	2.043	0.070
District 2	42	2.43		
District 3	168	2.44		
District 4	89	2.65		
District 5	408	2.64		
District 6	218	2.76		
16-24 Years Old	83	2.53	0.659	0.655
25-34 Years Old	146	2.55		
35-44 Years Old	277	2.58		
45-54 Years Old	318	2.66		
55-64 Years Old	210	2.50		
65+ Years Old	90	2.68		
Male	928	2.56	1.905	0.168
Female	194	2.69		
Resident	1010	2.61	5.217	0.023
Non-resident	112	2.35		

Non-resident anglers had a significantly higher satisfaction with their fishing experiences in Nebraska than did resident anglers. Due to a greater commitment of time, travel, and expenses to non-resident anglers, non-resident anglers who have not had positive, past fishing experiences in Nebraska likely don't return and may account for the higher satisfaction of non-resident anglers.

Angler satisfaction has been tracked during the 1997, 1998, 2000, and 2001 Nebraska Annual Social Indicator Survey (NASIS); however, the NASIS survey uses a 4-point rather than a five-point response format. This change, while increasing the variance among answers, did allow respondents to remain neutral during the Licensed Angler Survey while forcing a positive or negative response during the NASIS surveys. Even though neutral respondents in surveys will lean toward positive responses when forced to choose, angler

satisfaction was lower during the 2002 licensed angler surveys than in the previous NASIS surveys. This may be due to the bias in respondent selection pools, reflect poorer angling conditions due to the severe drought in Nebraska during 2002, rising expectations of today's anglers, or some combination of these factors.

	Survey	Positive	Negative	Neutral
1997	NASIS	88%	12%	NA
1998	NASIS	79%	21%	NA
2000	NASIS	89%	11%	NA
2001	NASIS	85%	15%	NA
2002	Current Survey	57%	25%	18%

### Days Fished

Of the 191,033 licensed anglers in 2002, 158,748 fished at least one day during between January and October. The average days fished (angler trips) by a Nebraska angler during this period was 27.4 days. However, the data was skewed to higher values (skewness index above 1 indicates a distribution significantly different from a normal distribution) so the median value of 18 is a more appropriate measure of angler trips taken by the average Nebraska angler. This results in an estimated 2,857,464 angler trips taken by Nebraska anglers during 2002. This is comparable to the figure of 3.2 million angler-trips and a mean of 16 angler trips estimated for Nebraska in the 2001 USFWS Fishing, Hunting, and Wildlife-Related Recreation survey (FHWRR). This survey covered all twelve months of the 2001 year with the majority of angler trips occurring during the months of May through August.

	Skewness	Trips Per Angler	
		Mean	Median
January	3.7	1.1	0
February	4.3	1.0	0
March	3.5	1.7	0
April	2.2	3.6	0
May	1.6	5.3	3.0
June	1.4	6.0	4.0
July	1.6	5.5	3.0
August	1.9	4.7	2.0
September	2.5	3.4	0
October	3.8	1.9	0
Total	2.1	27.7	18.0

  

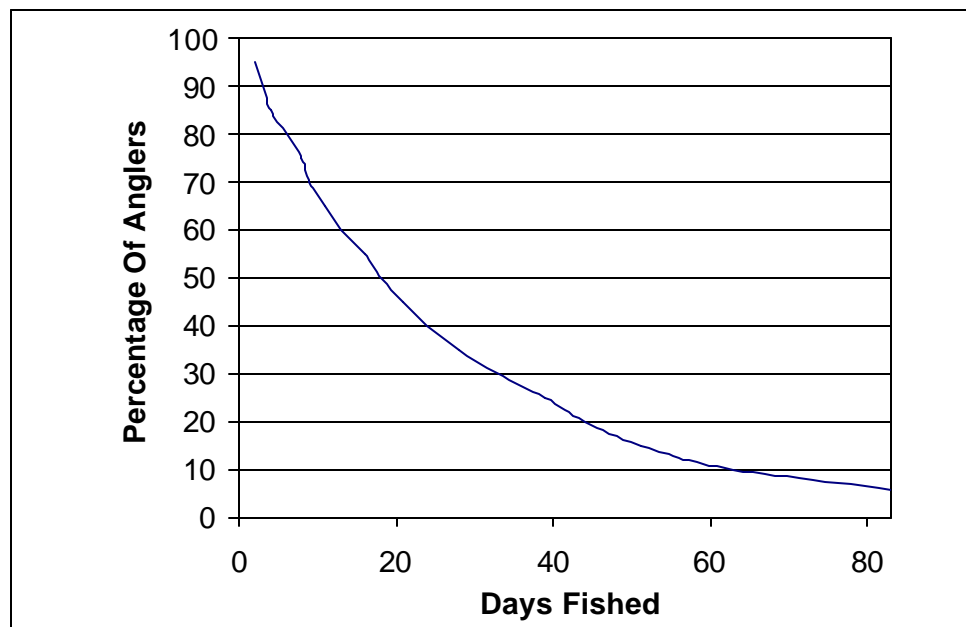

Percentile	Trips Per Angler
5	2
10	3
25	8
33	10
50	18
66	30
75	39
90	63
95	83

Twenty-five percent of Nebraska anglers fished LESS THAN 9 days during 2002.

Another 25% of Nebraska anglers fished MORE THAN 38 days in 2002, with

10% fishing more than 62 days.

### Distances Traveled

Resident Nebraska anglers traveled an average of 46.1 and 86.9 miles to their most-visited and favorite waterbodies, respectively. For 78.8% of resident

anglers, their most-visited waterbody was within 60 miles. Significant differences were seen among mean distances traveled to fish favorite waterbodies by district and residency while districts, age groups, gender, and residency demographics all had significantly different mean distances traveled to anglers most-visited waterbody. District 5 anglers traveled the farthest to fish both favorite and most-visited waterbodies while District 4 anglers traveled the least in both categories. Older anglers traveled farther to fish their most-fished waterbodies than did their younger counterparts.

	Favorite				Most-Visited			
	N	Mean	F	p	N	Mean	F	p
District 1	84	57.2	7.028	>0.001	87	40.3	4.9	0.000
District 2	40	57.9			42	41.8		
District 3	165	66.9			166	37.2		
District 4	86	42.1			89	27.3		
District 5	399	118.0			407	53.3		
District 6	218	79.4			218	50.2		
16-24 Years Old	82	81.3	0.854	0.512	83	36.7	3.249	0.006
25-34 Years Old	145	91.4			146	45.8		
35-44 Years Old	269	103.9			275	57.4		
45-54 Years Old	311	105.9			317	67.4		
55-64 Years Old	205	93.2			212	67.9		
65+ Years Old	91	97.9			90	89.3		
Male	914	100.4	1.716	0.191	928	59.8	4.134	0.042
Female	187	90.6			193	71.3		
Resident	992	86.9	95.908	>0.001	1009	46.1	239.49	<0.001
Non-resident	108	206.3			112	200.1		

Districts 1, 2, and 4, anglers over 65 years old, and non-resident anglers showed the lowest mean difference between travel times to their favorite and most-visited waterbodies indicated that a larger percentage of those groups may consider their most-visited waterbodies to be their favorite.

Mileage Difference (Favorite – Most Visited)	
District 1	16.9
District 2	16.1
District 3	29.7
District 4	14.8
District 5	64.7
District 6	29.2
16-24 Years Old	44.6
25-34 Years Old	45.6
35-44 Years Old	46.5
45-54 Years Old	38.5
55-64 Years Old	25.3
65+ Years Old	8.6
Male	40.6
Female	19.3
Resident	40.8
Non-resident	6.2

### Fishing Method

Seventy-five percent of Nebraska anglers fished from the shore at least once during 2002 while 67% utilized a motorized boat for fishing. District 1 and district 6 residents had the highest use of motorized boats while also having the lowest percentage of their anglers fishing from the bank. While 17.9% of all Nebraska anglers ice fished during 2002, 50% of District 2 anglers ice fished. Additionally, ice anglers were primarily male and residents of Nebraska.

### Fishing Technique

Ninety-nine percent of Nebraska anglers fished with a rod and reel during 2002. A number of those anglers also utilized other fishing techniques. Fly-fishing and set lines were used by 8.8% and 8.4% of 2002 anglers, respectively. District 1, 2, and 3 anglers showed a higher participation in flyfishing while set lines were the most popular among young (16-24 year old) anglers and among District 5 anglers. Archery was also most popular among young anglers (less

than 34 years old). While snagging was only used by 1.7% of anglers, 3.5% of respondents replied that they fished for paddlefish during 2002 indicating the snagging technique was likely higher utilized than indicated.

### Waterbody Type

Public lakes, reservoirs, and ponds were the most popular type of waterbodies among 2002 anglers. Privately-owned waters, however, were highly utilized by 2002 anglers in Nebraska. Private waters (ponds and sandpits) were the second most commonly-utilized waterbody type encompassing 61%, 54%, and 48% of District 2, 3, and 5 anglers. Streams, rivers, and canals (which are primarily surrounded by private access in Nebraska) were fished by 24% of 2002 anglers and expressed similar usage patterns across all Districts. Sandhill lakes, although fairly limited geographically, were utilized by residents of all Districts, including 13% of District V residents, who had the farthest to travel to utilize sandhill lake fisheries.

Waterbody Type	2002 Survey	1995 Angler Survey (10/1994 – 3/1995)	1995 Angler Survey (4/1995 – 9/1995)
Private Ponds and Sandpits	41.3%	16.9%	13.4%
Other Streams, Rivers, and Canals	24.1%	15.7%	17.8%
Sandhill Lakes	17.6%	3.5%	2.8%
Missouri River	16.8%	5.5%	4.1%
City Park Ponds	9.1%	2.0%	4.5%

### Preferred Species

To determine the preferred fish species among Nebraska anglers in 2002, each respondent was asked to select their single favorite species to target. In order, the preferred species for Nebraska anglers were walleye/sauger, largemouth bass, and channel catfish. Fourth on the list was anglers who had no particular preference for species (9.9% of respondents) indicating that 1 in 10 of Nebraska anglers are generalists in their fishing and not species specific. Crappie rounded out the top five.

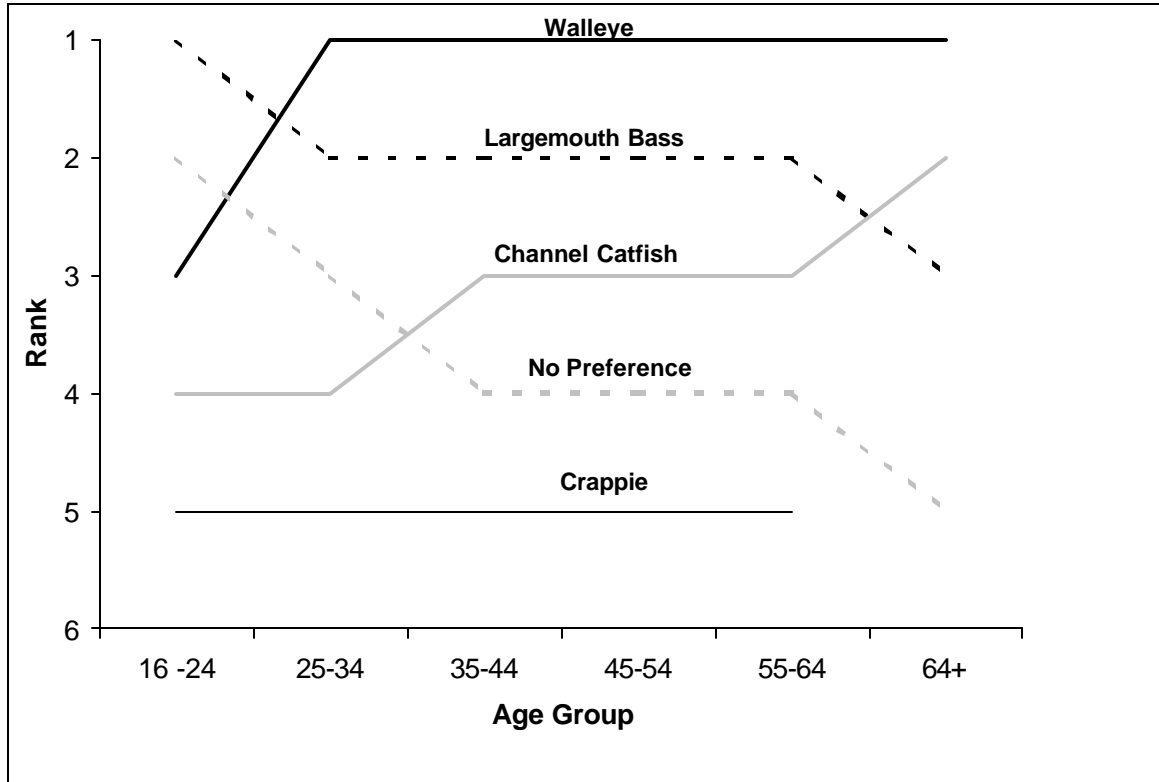

Rank	Species	% Of Respondents
1	Walleye	31.0
2	Largemouth Bass	19.0
3	Channel Catfish	13.1
4	No Preference	9.9
5	Crappie	6.8

Walleye anglers and largemouth bass anglers make up the largest and second largest angler groups in all districts except District 1. In Districts 3 and 5, Largemouth bass anglers outnumber walleye numbers, however these two districts contain larger proportions of bass waters and less walleye waters than do the other districts. In District 1, generalist anglers actually make up the second largest angler group.

Rank	District 1	District 2	District 3	District 4	District 5	District 6
1	Walleye	Walleye	Largemouth Bass	Walleye	Largemouth Bass	Walleye
2	No Preference	Largemouth Bass	Walleye	Largemouth Bass	Walleye	Largemouth Bass
3	Trout	No Preference	No Preference	No Preference	Channel Catfish	Channel Catfish
4	Channel Catfish	Yellow Perch	Channel Catfish	White Bass	No Preference	No Preference
5	Misc.	Channel Catfish	Crappie	Trout	Crappie	White Bass

Preferred target species seems to have a correlation with age among Nebraska anglers. Young anglers (16-24) prefer to angle for largemouth bass or to be a generalist angler. However, the preference for being a largemouth bass or generalist angler decreases with age. Conversely, the preference for walleye and channel catfish angling increases with age.

### Species Sought During 2002

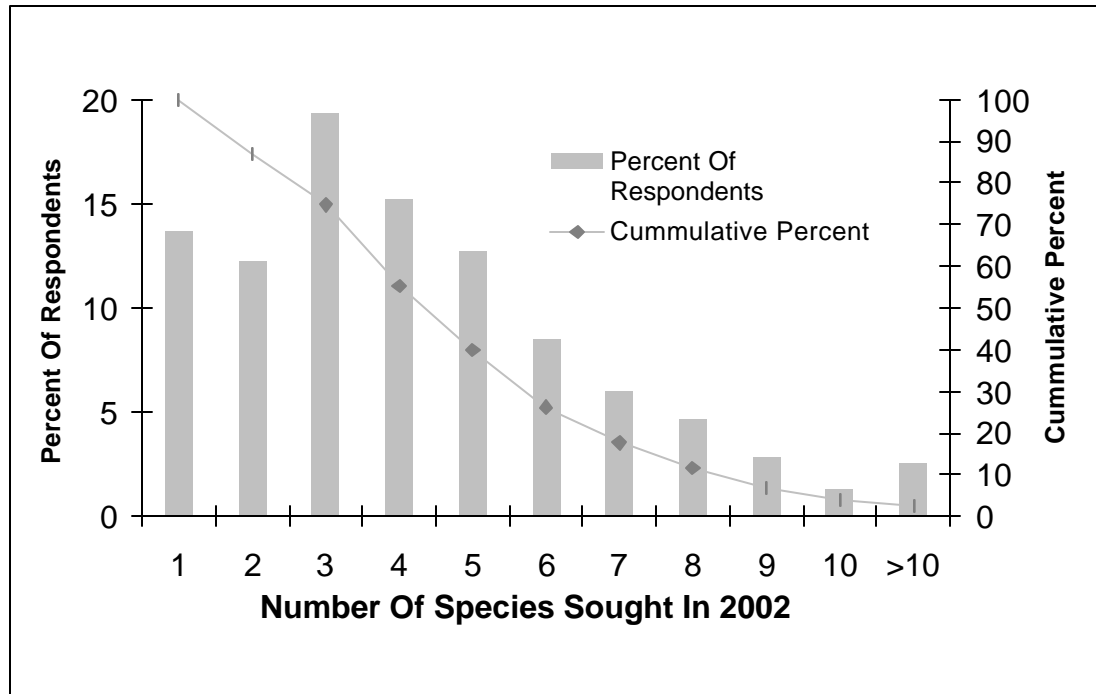

A particular angler's preferred species may not always be a comprehensive indication of that angler's fishing habits so respondents were also asked to indicate ALL species which they fished for on at least one occasion throughout 2002. Preferred species indicates what angling opportunities may need targeted improvements to improve angler satisfaction while sought species may indicate what is currently the most popular opportunities available for Nebraska anglers. Crappie were the most sought species in Nebraska during 2002 with 46% of anglers attempting to catch them at least once. Crappie were followed by largemouth bass and walleye. While walleye may be the most preferred fish in Nebraska, crappie occupied a larger amount of anglers' time during 2002.

Rank	Species	% Of Respondents
1	Crappie	46.1
2	Largemouth Bass	45.7
3	Walleye	44.9
4	Catfish	39.3
5	Bluegill/Sunfish	34.1

Species sought varied among districts. Although walleye, largemouth bass, and crappie were highly sought, bluegill/sunfish, white bass, and yellow perch were important fisheries for some districts.

Rank	District 1	District 2	District 3	District 4	District 5	District 6
1	Walleye	Crappie	Largemouth Bass	Walleye	Largemouth Bass	Walleye
2	Crappie	Walleye	Crappie	White Bass	Crappie	Crappie
3	Bluegill/Sunfish	Yellow Perch	Channel Catfish	Smallmouth Bass	Channel Catfish	White Bass
4	Largemouth Bass	Bluegill/Sunfish	Walleye	Largemouth Bass	Bluegill/Sunfish	Largemouth Bass
5	Yellow Perch	Channel Catfish	Bluegill/Sunfish	Wiper	Walleye	Channel Catfish

While some anglers had no preference for any particular species, most individual anglers sought a number of different species during 2002. Three-fourths of the respondents fished for 3 or more species throughout the year. Forty percent fished for at least 5 species during 2002. Almost 12 percent of anglers fished for 8 or more species during the year.

### Catch and Release Tendencies

When asked about the release tendencies for the types of fish respondents attempted to catch, three groups were apparent. The group of fish most likely to be released by anglers included largemouth bass, muskellunge, smallmouth bass, and northern pike. The group of fish most likely to be kept by anglers during 2002 included crappie, white bass, walleye, yellow perch, channel catfish, and trout. Trout were the only fish to average more likely kept than released by anglers. Wipers, bullhead, carp, and bluegill/sunfish grouped between the other two groups and represented the moderately-harvested species. Flathead catfish could have easily fit into either the moderately-harvested or more-harvested group. Both size restrictions and population size structures could impact this question and may explain why species with common size restrictions such as largemouth bass and muskellunge are more-likely to be

released than species like yellow perch or channel catfish. Three of the top four most-preferred species as well as three of the top four most-sought species were in the more-harvested group of fish.

### Nebraska Park Entry Permit

Anglers over 65 years old (64.0%) and District 3 anglers (63.9%) used areas requiring a park permit substantially less than other anglers; however, almost 3 out of 4 Nebraska anglers (73.8%) fished at a waterbody during 2002 that required a Nebraska Park Permit. During 2002, 88,150 annual park permits (not including duplicates) and 57,156 daily park permits were sold. If 73.8% of the 158,748 Nebraska anglers who fished during 2002 purchased a Nebraska park permit, 117,156 park permits were sold to allow anglers to fish.

Many Nebraska anglers are married or living with other Nebraska anglers which causes this value to be overestimated. According to the 2000 Nebraska

Census, 58.6% of Nebraska households are coupled, meaning two adults are present. Using the assumption that the same proportions of Nebraska anglers are married (and each to another Nebraska angler), a conservative estimate of 82,830 park permits were sold to Nebraska anglers. The actual number of park permits sold to allow anglers fishing access is likely somewhere between these two estimates, meaning that 57% to 81% of Nebraska park permit sales in 2002 may be attributed to fishing access.

#### Checked By Conservation Officer

Twenty-two point six percent of Nebraska anglers who fished during 2002 were checked at least once by a conservation officer. Younger anglers (16-35 years old) were checked more often than older (55+ years old) anglers. Non-Resident anglers (28.3%) were checked more often than resident anglers (21.8%), likely due to the fact non-resident anglers frequently fish the common and high-quality fisheries where enforcement efforts are concentrated. Among resident anglers, those living in districts 2 and 4 were checked at a substantially higher rate than districts 1, 2, 5, and 6.

#### Information on Nebraska Fishing

The single, most-used source of information on fishing in Nebraska during 2002 was family and friends (66.1% of respondents). While as a agency the NGPC has little input into this information venue, it does indicate that if agency messages get disseminated, anglers themselves will help spread the word. Two sources that the NGPC does have the ability to use to disseminate information, bait and tackle shops (50.7%) and the Nebraska Fishing Guide (49.0%), were

also highly-used sources of information. Efforts to produce a quality fishing guide and communicate ideas, programs, or concerns with bait and tackle shops will likely reach the highest number of anglers in Nebraska. The second tier of information venues for Nebraska fishing information includes many sources which the agency can use as a direct avenue to promote messages and included the NGPC website, NEBRASKALAND, other newspapers, state parks/facilities, Outdoor Nebraska newspaper, and the Outdoor Nebraska Television program (16.0%). The Outdoor Nebraska Television program only ran for the first few months of 2002 and may have had an even larger impact had a full season been aired.

While the NGPC website saw frequent usage by Nebraska anglers, the website was primarily utilized by younger and middle-age anglers (16-54 years in age) and was not as important to older anglers (55+) which constitutes a larger age class of Nebraska anglers. Two venues which require significant time investments from NGPC personnel, the Nebraska State Fair and sports shows, were used by few anglers (3.6% and 8.5%, respectively) as a source of information about fishing in Nebraska.

### Angler Motivations

The motivations for fishing of Nebraska anglers was assessed using 17 items based on motivation scales used in recent studies of anglers<sup>12</sup>. Each item

---

<sup>1</sup> Wilde, G. R. and R. B. Ditton. 1999. Differences in Attitudes and Fishing Motives Among Texas Catfish Anglers. Pages 395-406 in E. R. Irwin, W.A. Hubert, C. F. Rabeni, H. L. Schramm, Jr., and T. Coon, editors. Catfish 2000: Proceedings of the International Ictalurid Symposium. American Fisheries Society, Symposium 24, Bethesda, Maryland.

<sup>2</sup> Ross, M. R. and D. K. Loomis. 2001. Put-and-Take Fisheries: Investigating Catch and Retention Assumptions. Fisheries 26(2): 13-18.

was answered on a five-point Likert scale indicating its degree of importance to the angler, with a 1 indicating “Not At All Important” and a 5 indicating “Extremely Important”. Across all anglers, the two most important items were “for the fun of catching fish” (mean of 4.06) and “to be outdoors” (mean of 4.02). The least important item across all anglers was “to compete for prizes or money” (mean 1.19). Males were more likely to place more importance on fishing “for the challenge or sport” (male mean=3.3, female mean=2.92) and “to catch a trophy fish” (male mean=2.33, female mean=1.86). Females placed more importance than males on fishing for “family recreation” (male mean=3.48, female mean 3.98) and “for the fun of catching fish” (male mean 4.04, female mean=4.18).

Similar items were combined into subscales to analyze the importance of four different motivation constructs. The four motivational subscales created and assessed were: Psychological and Physiological motivation, Natural Environment motivation, Social motivation, and Fishery Resource motivation.

Question	Subscale
For the challenge or sport	Psychological and Physiological
For relaxation	Psychological and Physiological
To experience adventure and excitement	Psychological and Physiological
For physical exercise	Psychological and Physiological
To experience new and different things	Natural Environment
To be outdoors	Natural Environment
To experience natural surroundings	Natural Environment
To be close to the water	Natural Environment
To be with friends	Social
To get away from other people	Social
To get away from the daily routine	Social
For family recreation	Social
To compete for prizes or money	Fishery Resource
To obtain fish for eating	Fishery Resource
To catch a trophy fish	Fishery Resource
For the fun of catching fish	Fishery Resource

The greatest importance was placed on the natural environment (mean = 3.55), followed by social interactions (mean = 3.35), psychological and physiological motivations (mean = 3.17) and fisheries resources (mean = 2.98). This suggests that while fisheries resource motivations (i.e. catching fish for sport, food, enjoyment) are important, some of the other factors surrounding the fishing experience bear considerably more significance to anglers.

Males rated fishery resource motivations significantly more important than females ( $T = 2.63$ ,  $p < .01$  male mean = 2.96, female mean = 2.78). The other three subscales were not significantly different between genders.

	<b>Gender</b>	<b>N</b>	<b>Mean</b>	<b>Std. Dev.</b>
Psychological and Physiological	Male	912	3.15	.77
	Female	195	3.26	.85
Natural Environment	Male	917	3.59	.83
	Female	191	3.57	.83
Social	Male	912	3.33	.84
	Female	190	3.40	.83
Fishery Resource	Male	920	2.96	.81
	Female	192	2.78	.89

Comparisons of the four angler motivation subscales by age are highlighted in the graphs below. An ANOVA indicated significant differences by age for the social motivation subscale ( $F = 3.85$ ,  $df = 5$ ,  $p = 0.003$ ) and the fishery resource motivation subscale ( $F = 2.54$ ,  $df = 5$ ,  $p = 0.027$ ). A post-hoc Tukey t-test indicated a significant difference on the social subscale between anglers 65 and older (mean 3.13) and anglers 34-44 (mean = 3.48). Across the age groups, social motivation seems to peak for the 34-44 year old anglers and decrease considerably with the older groups of anglers. For the fishery resource motivation, a post-hoc Tukey t-test indicated a significant difference between

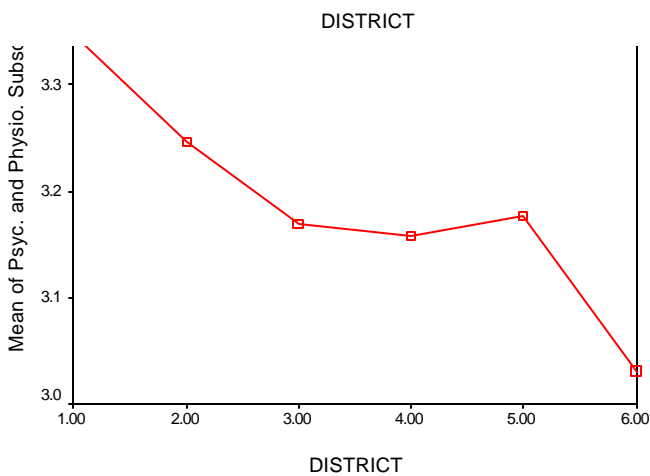

anglers 55-64 (mean = 2.79) and young anglers between 16-24 (mean = 3.12).

Importance of fishery resource is the highest for the youngest anglers and decreases across age groups, reaching the lowest point with 55-63 year-old-anglers.

While ANOVAs were not significant for the other two subscales, psychological and physiological motivations for fishing seem to increase until middle age, where the importance begins to decline for anglers 55 and older. The natural environment subscale varies among age groups, with the lowest scores for the 16-24, 55-64, and 65 and older anglers.

When analyzing the four angler motivation subscales by district, only one subscale was significant, the psychological and physiological subscale ( $F = 2.26$ ,  $df = 5$ ,  $p = 0.046$ ). A post-hoc Tukey t-test indicated a significant difference ( $p = 0.02$ ) between District 1 (mean = 3.35) and District 6 (mean = 3.03). District 1 anglers indicated the greatest importance for psychological and physiological motivations for fishing while District 6 anglers reported the lowest levels of importance. Trends for the other three subscales were not significant.

Motivations were also further combined into two subscales to examine anglers motivations according to catch-related items and all other motivations. For all groups, catch-related motivations always scored lower than other motivations. The importance of catch-related motivations differed significantly between male and female anglers, resident and non-resident anglers, and among age groups while other motivations also differed among resident and non-resident anglers and age groups.

Item	Subscale
To be outdoors	Other
For the experience of the catch	Catch
To experience natural surroundings	Other
To be with friends	Other
For the challenge or sport	Catch
For relaxation	Other
To experience new and different things	Other
To get away from other people	Other
To compete for prizes or money	Catch
To experience adventure and excitement	Other
To obtain fish for eating	Catch
To be close to the water	Other
For physical exercise	Other
To catch a trophy fish	Catch
To get away from the daily routine	Other
For family recreation	Other
For the fun of catching fish	Catch

### Angler Attitudes

The attitudes of Nebraska anglers towards fishing were measured by 16 items designed to assess the importance of harvesting fish, catching fish, the number of fish caught, and the size of fish. Each item was answered on a five-point scale, with 1 indicating “Strongly Disagree” and 5 indicating “Strongly Agree”. Across all anglers, the item with the highest level of agreement was “a fishing trip can be successful even if no fish are caught” (mean = 3.66). The item with the lowest response was “I want to keep all the fish I catch” (mean = 1.95). This suggests that Nebraska anglers agree that there is more to a successful fishing trip than catching fish, as indicated by the previous set of analyses examining the underlying motivations of anglers. Further, few anglers indicated that they want to keep all the fish they catch, suggesting that many anglers practice catch and release practices.

The 16 attitude items were combined into four attitude subscales to assess anglers' attitudes towards the importance of: **catching** something, **harvesting** fish, the **size** of fish caught, and the **number** of fish caught towards the successfulness of a trip. Looking at the four subscales, anglers placed the greatest importance on the size of the fish caught (mean = 3.22), followed by the number of fish caught (mean = 2.99), catching something (mean = 2.89) and harvesting their catch (mean = 2.60).

Based on an independent samples t-test, males rated the size of fish as being significantly more important than females ( $t = 4.434$ ,  $df = 1127$ ,  $p = 0.001$ ; male mean = 3.28, female mean = 3.01). However, females rated harvesting their catch significantly more important than males ( $t = 3.291$ ,  $df = 1122$ ,  $p = 0.001$ ; male mean = 2.56, female mean = 2.79). The remaining two subscales, catch and number, were not significantly different between men and women. The table below summarizes mean scores and standard deviations for each of the four subscales by gender.

	Gender	N	Mean	Std. Dev.
Catch	Male	932	2.90	.86
	Female	197	2.76	.93
Harvest	Male	928	2.56	.87
	Female	196	2.79	.92
Size	Male	930	3.28	.77
	Female	196	3.01	.77
Number	Male	928	2.98	.81
	Female	195	3.02	.84

Significant differences were found by age for all subscales, except for the subscale assessing the importance of catching something. The harvest subscale indicated a significant effect for age ( $F = 3.64$ ,  $df = 5$ ,  $p = 0.003$ ), with older

anglers placing greater importance on harvesting fish than younger anglers.

Younger anglers placed greater importance on the size of the fish than the middle age anglers ( $F = 3.63$ ,  $df = 5$ ,  $p = 0.001$ ). Likewise, more emphasis was placed on the number of fish caught by the younger anglers ( $F = 3.73$ ,  $df = 5$ ,  $p = 0.001$ ). However, young anglers make up a relatively small proportion of the licensed anglers of Nebraska compared to the other angler groups. Thus, the importance of harvesting fish, which increased for each age cohort, carries more practical significance, as more fish are likely to be harvested by the larger, older angler groups.

What is your age

What is your age

What is your age

What is your age

Analyses indicated significant differences in attitudes by district for every subscale besides number of fish caught. Districts 2 and 5 placed greater emphasis on catching something than the other districts ( $F = 2.79$ ,  $df = 5$ ,  $p = 0.016$ ). The desire to harvest fish was the greatest for District 2 ( $F = 2.77$ ,  $df = 5$ ,  $p = 0.003$ ). Finally, size of fish caught was seen as more important in District 5 than the other districts ( $F = 2.31$ ,  $df = 5$ ,  $p = 0.043$ ). Graphs below summarize the difference in angler attitudes by district. Some of the differences in attitude preferences by district might be related to the types of fish the district anglers are seeking and any unique age distributions within districts. Future analyses will need to investigate this area further.

**For each month, indicate about how many DAYS you fished in Nebraska during 2002.**

Answers : 1, 2, 3, 4, 5, 6-8, 9-11, 12-14, 15-17, 18-20, Over 20

Data presented are mean, median, standard deviation, and skewness index (values over 1 are significantly different from a normal distribution). Midpoints were used for data expansion with a value of 25 used for the "Over 20" response.

**Appendix 3**  
**2002 Nebraska Licensed Angler Survey**

# 2002 Nebraska Angler Survey

The following questions ask about your fishing habits and experiences in Nebraska during 2002.

For each question, completely darken the circle that best matches your response. Select only ONE response for each question, unless instructed otherwise. Skip any items that you do not wish to answer. Your responses will remain anonymous. We will not match your responses to your name. Please return your completed survey in the enclosed envelope. Thank you for your time!

## Section A: The following questions ask about your typical experiences fishing in Nebraska during 2002. Remember to darken your response and choose only ONE option, unless directed otherwise.

### 1. What type of Nebraska fishing permit did you have during the 2002 license year?

- |  |  |
|--|--|
| <input type="radio"/> Resident annual fish | <input type="radio"/> Lifetime fish & hunt     |
| <input type="radio"/> Resident 3-day fish  | <input type="radio"/> Fee-exempt permit        |
| <input type="radio"/> Resident hunt/fish   | <input type="radio"/> Non-resident 3-day fish  |
| <input type="radio"/> Lifetime fish        | <input type="radio"/> Non-resident annual fish |
|  | <input type="radio"/> I did not have a permit  |

### 2. Did you fish in Nebraska during 2002?

- Yes (*skip to #4 below*)     No

### 3. If NO, why didn't you fish in Nebraska during 2002?

- |  |   |
|--|---|
| <input type="radio"/> Lack of time                         | <input type="radio"/> Too expensive             |
| <input type="radio"/> Dissatisfied with past fishing trips | <input type="radio"/> Physically unable to fish |
| <input type="radio"/> No one to fish with                  | <input type="radio"/> No longer enjoy fishing   |
| <input type="radio"/> Lack of access to fishing areas      | <input type="radio"/> Other                     |

*If you did not fish in Nebraska, skip to page 5, item #1*

### 4. What types of water bodies did you fish in Nebraska during 2002? (select all that apply)

- |  |   |
|--|---|
| <input type="radio"/> Private ponds and sandpits | <input type="radio"/> Other public lakes, reservoirs, and ponds |
| <input type="radio"/> City park ponds            | <input type="radio"/> Platte River                              |
| <input type="radio"/> Public sandpits            | <input type="radio"/> Missouri River                            |
| <input type="radio"/> Sandhill lakes             | <input type="radio"/> Other streams, rivers, and canals         |

### 5. Which methods of fishing did you use during 2002? (select all that apply)

- |                                     |  |
|-------------------------------------|--|
| <input type="radio"/> Bank / wading | <input type="radio"/> Motorized boat     |
| <input type="radio"/> Ice fishing   | <input type="radio"/> Non-motorized boat |
| <input type="radio"/> Float tube    | <input type="radio"/> Other              |

### 6. What techniques did you use during 2002? (select all that apply)

- |  |  |
|--|--|
| <input type="radio"/> Rod & reel           | <input type="radio"/> Underwater spear |
| <input type="radio"/> Fly-fishing          | <input type="radio"/> Surface spear    |
| <input type="radio"/> Set lines/limb lines | <input type="radio"/> Snagging         |
| <input type="radio"/> Archery              | <input type="radio"/> Other            |

### 7. About how far is the one-way distance from your residence to your favorite Nebraska water body?

- |  |  |
|--|--|
| <input type="radio"/> 10 or less miles | <input type="radio"/> 61 to 100 miles  |
| <input type="radio"/> 11 to 20 miles   | <input type="radio"/> 101 to 250 miles |
| <input type="radio"/> 21 to 40 miles   | <input type="radio"/> 251 to 500 miles |
| <input type="radio"/> 41 to 60 miles   | <input type="radio"/> Over 500 miles   |

### 8. About how far is the one-way distance from your residence to your most visited Nebraska water body?

- |  |  |
|--|--|
| <input type="radio"/> 10 or less miles | <input type="radio"/> 61 to 100 miles  |
| <input type="radio"/> 11 to 20 miles   | <input type="radio"/> 101 to 250 miles |
| <input type="radio"/> 21 to 40 miles   | <input type="radio"/> 251 to 500 miles |
| <input type="radio"/> 41 to 60 miles   | <input type="radio"/> Over 500 miles   |

### 9. How satisfied were you with your fishing experiences in Nebraska during 2002?

- Very satisfied
- Somewhat satisfied
- Neutral
- Somewhat dissatisfied
- Very dissatisfied

### 10. Did you fish at a water body that required a Nebraska Park Entry Permit during 2002?

- Yes                       No

Turn over the page

**Section B:** This section asks you to identify your favorite fish to catch in Nebraska, and then asks about the fish you attempted to catch in Nebraska during 2002.

**1. Which type of fish do you prefer to fish for in Nebraska? (Select only ONE)**

- Striped bass
- Wiper
- White bass
- Largemouth bass
- Smallmouth bass
- Bluegill / Sunfish
- Crappie
- Yellow perch
- Walleye / Sauger
- Northern pike
- Muskellunge / Tiger musky
- Drum
- Channel catfish
- Blue catfish
- Flathead catfish
- Bullhead
- Sturgeon
- Carp
- Trout
- Paddlefish
- Other
- I do not prefer any particular type of fish

**2) Which types of fish did you try to catch in Nebraska waters during 2002?** (Only select fish you specifically tried to catch. If you typically fished for whatever was biting, select the option "I fished for anything".)

**3) Thinking about the types of fish you tried to catch this year, how many LEGAL-sized fish did you keep?** (Answer for only the fish you selected in the previous question. If you did not catch a legal-sized fish, leave the circles blank.)

SELECT THE TYPES OF FISH YOU ATTEMPTED TO CATCH DURING 2002 (select all that apply)		Kept All 1	Kept Many 2	Kept Half 3	Kept A Few 4	Kept None 5
Striped bass	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

## Section C: This section asks about how often you fish and the reasons why you fish.

1. For each month, indicate about how many DAYS you fished in Nebraska during 2002. Only darken ONE circle for each month.

Estimate the number of DAYS each month you fished in Nebraska during 2002												
	NONE	1	2	3	4	5	6-8	9-11	12-14	15-17	18-20	OVER 20
Jan.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Feb.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
March	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
April	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
May	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
June	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
July	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Aug.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Sept.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Oct.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

2. Indicate the importance for each item as a reason why you fish...	NOT AT ALL IMPORTANT	SLIGHTLY IMPORTANT	MODERATELY IMPORTANT	VERY IMPORTANT	EXTREMELY IMPORTANT
To be outdoors	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
For the experience of the catch	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
To experience natural surroundings	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
To be with friends	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
For the challenge or sport	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
For relaxation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
To experience new and different things	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
To get away from other people	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
To compete for prizes or money	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
To experience adventure and excitement	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
To obtain fish for eating	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
To be close to the water	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
For physical exercise	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
To catch a trophy fish	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
To get away from the daily routine	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
For family recreation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
For the fun of catching fish	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Turn over the page 

**Section D:** The following questions ask you about your catfish experiences in Nebraska. If you have NOT fished for catfish in 2002, then skip this section and go on to the next page, Section E.

REMEMBER TO SELECT ONLY ONE RESPONSE FOR EACH QUESTION.

**1. How many days during 2002 did you attempt to catch catfish?**

- No attempts [skip to next page, Section E, Item #1]
- Once
- 2-4 days
- 5-9 days
- 10-19 days
- 20-29 days
- 30-49 days
- 50-69 days
- 70-120 days
- Over 120 days

**2. What type of catfish do you prefer to catch?**

- Blue
- Channel
- Flathead
- Bullhead
- No preference

**3. What is the farthest one-way distance in Nebraska that you have traveled to fish for catfish during 2002?**

- 10 or less miles
- 11 to 20 miles
- 21 to 40 miles
- 41 to 60 miles
- 61 to 100 miles
- 101 to 250 miles
- 251 to 500 miles
- Over 500 miles

**4. What time of day do you usually fish for catfish?**

- 3 am to 8 am
- 8 am to noon
- Noon to 6 pm
- 6 pm to 10 pm
- 10 pm to 3 am
- A variety of times

**5. Which catfish harvest option would you prefer?**

- Catch and release six small and keep one large catfish **OR**
- Catch and keep six small and catch no large catfish

**6. Which catfish harvest option would you prefer?**

- Catch and release three medium and keep one large catfish **OR**
- Catch and keep three medium and catch no large catfish

**7. Which catfish harvest option would you prefer?**

- Catch and keep six small and release one large catfish **OR**
- Catch and release six small and keep one large catfish

**8. Indicate how much you agree with each of the following statements about fishing for catfish.**

	STRONGLY DISAGREE	DISAGREE	NEUTRAL	AGREE	STRONGLY AGREE
I am happy with my success fishing for catfish in Nebraska	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I support regulations on catfish to increase their numbers	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I would recommend fishing for catfish in Nebraska to others	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I am against catfish bag limits	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
It is becoming more difficult to catch a catfish in Nebraska	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I am against catfish length limits	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I am concerned about pollution where I fish for catfish	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I am satisfied with the size of catfish I catch in Nebraska	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I support regulations on catfish to increase their size	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I would fish in a lake with large <u>channel</u> catfish even if I was not allowed to use live-bait fish	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Thinking about your experiences fishing in Nebraska in 2002....	12 inches or less	13- 16 inches	17- 20 inches	21-24 inches	25-28 inches	29- 32 inches	Over 32 inches	Did NOT catch a catfish	Did NOT release a catfish
9. What is the largest <b>flathead</b> catfish you <u>caught</u> this year?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
10. What is the largest <b>channel</b> catfish you <u>caught</u> this year?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
11. What is the largest <b>flathead</b> catfish you <u>caught and released</u> this year?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
12. What is the largest <b>channel</b> catfish you <u>caught and released</u> this year?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Go on to next page

**Section E:** These questions ask for your thoughts about fishing in general and to tell us a little bit about yourself. Remember, your responses will remain anonymous.

1. Indicate how much you agree with each of the following statements about fishing.	STRONGLY DISAGREE	DISAGREE	NEUTRAL	AGREE	STRONGLY AGREE
A fishing trip can be successful even if no fish are caught	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The bigger the fish I catch, the better the fishing trip	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I'm happiest with a fishing trip if I catch at least the limit.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I want to keep all the fish I catch	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The more fish I catch, the happier I am	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I'm just as happy if I release all the fish I catch	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
If I thought I wouldn't catch any fish, I would not go fishing	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I am the happiest with a fishing trip if I catch a challenging game fish	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I usually eat the fish I catch	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I would rather catch one or two big fish than ten smaller fish	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
When I go fishing, I'm just as happy if I don't catch a fish	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I'm just as happy if I don't keep the fish I catch	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I like to fish where I know I have a chance to catch a trophy fish	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
A successful fishing trip is one in which many fish are caught	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
A full stringer is the best indicator of a good fishing trip.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
When I go fishing, I am not satisfied unless I catch at least something	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

**2. What is your gender?**

- Female                       Male

**3. What is your age?**

- 16-24                               45-54  
 25-34                               55-64  
 35-44                               65 and older

**4. What is your ethnicity?**

- Caucasian                       American Indian  
 Hispanic                               Pacific Islander  
 African American               Other  
 Asian                                       Multi-ethnic  
 Middle Eastern

**5. What is the highest education you have achieved?**

- Some schooling               Bachelors degree  
 High school or GED               Masters degree  
 Associate/trade degree               Doctorate, law, or medical degree  
 Some college                       Other

**6. What is your household income?**

- Less than 10,000               50,000 to 59,999  
 10,000 to 19,999               60,000 to 79,999  
 20,000 to 39,999               80,000 to 100,000  
 40,000 to 49,999               Over 100,000

**7. Were you checked by a Nebraska conservation officer wearing a sidearm while fishing during 2002?**

- Yes                       No

**8. What is your zipcode?**

Write the number in the boxes and darken the circles.

<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
<input type="radio"/> 0	<input type="radio"/> 0	<input type="radio"/> 0	<input type="radio"/> 0	<input type="radio"/> 0
<input type="radio"/> 1	<input type="radio"/> 1	<input type="radio"/> 1	<input type="radio"/> 1	<input type="radio"/> 1
