ABSTRACT. A taxonomic list of valid genera in the subfamily Hesperiinae from the Old World assigned to tribes is provided. This list is based on phylogenetic analysis of genomic sequence data complemented by morphological considerations. As a result, there are no *incertae sedis* non-fossil genera in the family Hesperiidae.

Keywords: taxonomy, classification, genomics, phylogeny, biodiversity.

ZooBank registration: http://zoobank.org/CCF59E03-048E-440A-B310-4830DD2BB5C5

Here, we summarize tribal assignment for the Old World Hesperiinae Latreille, 1809 genera currently regarded as valid (Lees et al. 2003; Warren et al. 2008; Warren et al. 2009; Fan et al. 2016; Toussaint et al. 2018; Cong et al. 2019; Huang et al. 2019; Jiang et al. 2019; Li et al. 2019b; Zhang et al. 2022), with comments about several others. No changes to nomenclature or synonymy are proposed. These results are not new but are mostly scattered throughout our previous publications (Cong et al. 2019; Li et al. 2019; Zhang et al. 2012) and are catalogued here for convenience. The following treatment is deduced from the genomic tree shown in Fig. 1 based on our previously published datasets (Zhang et al. 2022), complemented with morphological considerations. The methods used are detailed in Li (2019a) for experimental work and data processing and in Zhang et al. (2022) for phylogenetic tree construction. Twelve tribes are ordered phylogenetically. Genera are listed alphabetically within each tribe to facilitate visual search. We conclude that presently there are no *incertae sedis* non-fossil genera in the entire family Hesperiidae because all genera have been assigned to tribes. All tribes are monophyletic in our analyses.

Family **Hesperiidae** Latreille, 1809

Subfamily Hesperiinae Latreille, 1809

Tribe Aeromachini Tutt, 1906

Aeromachus Nicéville, 1890 Ampittia Moore, 1881 Arnetta Watson, 1893 Baracus Moore, 1881 Creteus Nicéville, 1895 Halpe Moore, 1878 Halpemorpha Huang, Fan & Chiba, 2019 Lepella Evans, 1937 Onryza Watson, 1893 Pedesta Hemming, 1934 Pithauria Moore, 1878 Praethoressa Huang, Chiba & Fan, 2019 Prosopalpus Holland, 1896 Sebastonyma Watson, 1893 (includes Parasovia Devyatkin, 1996) Sovia Evans, 1949 Thoressa Swinhoe, 1913

Tribe Ceratrichiini Grishin, 2019

Argemma Grishin, 2019 Ceratrichia Butler, 1870 Herila Larsen & Collins, 2012 Meza Hemming, 1939 Pardaleodes Butler, 1870 (includes Ankola Evans, 1937)

Tribe Astictopterini Swinhoe, 1912

Acada Evans, 1937 Acleros Mabille, 1885 Actinor Watson, 1893 Andronymus Holland, 1896 Artitropa Holland, 1896 Astictopterus C. Felder & R. Felder, 1860 Caenides Holland, 1896 Ceratricula Larsen, 2013 Chondrolepis Mabille, 1904 Cupitha Moore, 1884 Dotta Grishin, 2019 Eogenes Mabille, 1909 Flandria Larsen, 2013 Fresna Evans, 1937 Fulda Evans, 1937 Galerga Mabille, 1898 Gamia Holland, 1896 Gorgvra Holland, 1896 Gvrogra Lindsey & Miller, 1965 Hidari Distant, 1886 Hollandus Larsen & Collins, 2015 Hypoleucis Mabille, 1891 Isoteinon C. Felder & R. Felder, 1862 Kedestes Watson, 1893 Lennia Grishin, 2022 Leona Evans, 1937 Lissia Grishin, 2019 Melphina Evans, 1937 Melphinyet Larsen, 2012 Moltena Evans, 1937 Monza Evans, 1937 Mopala Evans, 1937 Nervia Grishin, 2019

Noctulana Larsen, 2012 Osmodes Holland, 1892 Osphantes Holland, 1896 Paracleros Berger, 1978 Paronymus Aurivillius, 1925 Parosmodes Holland, 1896 Perrotia Oberthür, 1916 (includes *Miraja* Evans, 1937) Platylesches Holland, 1896 Pteroteinon Watson, 1893 Rhabdomantis Holland, 1896 Semalea Holland, 1896 Teniorhinus Holland, 1892 Trida Grishin, 2022 Tsitana Evans, 1937 Xanthodisca Aurivillius, 1925 Xanthoneura Eliot, 1978 Xanthonymus Grishin, 2019 Zographetus Watson, 1893 Zophopetes Mabille, 1904

Tribe Gretnini Grishin, 2019

Gretna Evans, 1937

Tribe Taractrocerini Voss, 1952

Arrhenes Mabille, 1904 Banta Evans, 1949 Bibla Mabille, 1904 Cephrenes Waterhouse & Lyell, 1914 Kobrona Evans, 1935 Mimene Joicey & Talbot, 1917 Ocybadistes Heron, 1894 Oriens Evans, 1932 Pastria Evans, 1932 Potanthus Scudder, 1872 Sabera Swinhoe, 1908 Suniana Evans, 1934 Taractrocera Butler, 1870 Telicota Moore, 1881 Tiacellia Evans, 1949

Tribe Erionotini Distant, 1886

Acerbas Nicéville, 1895 Avestia Grishin, 2019 Cerba Grishin, 2019 Erionota Mabille, 1878 Gangara Moore, 1881 Ge Nicéville, 1895 Hyarotis Moore, 1881 Ilma Swinhoe, 1905 Lotongus Distant, 1886 Matapa Moore, 1881

Oerane Elwes & Edwards, 1897 Pirdana Distant, 1886 Plastingia Butler, 1870 Ploetzia Saalmüller, 1884 Praescobura Devyatkin, 2002 Pseudokerana Eliot, 1978 Pseudopirdana Chiba & Tsukiyama, 1993 Pudicitia Nicéville, 1895 Pyroneura Eliot, 1978 Quedara Swinhoe, 1919 Salanoemia Eliot, 1978 Scobura Elwes & Edwards, 1897 Suada Nicéville, 1895 Suastus Moore, 1881 Unkana Distant, 1886 Zela Nicéville, 1895

Tribe Notocryptini Swinhoe, 1913

Ancistroides Butler, 1874 (includes Notocrypta Nicéville, 1889 and Udaspes Moore, 1881) Kerana Distant, 1886 Tamela Swinhoe, 1913

Tribe Ismini Grishin, 2022

Iambrix Watson, 1893 *Idmon* Nicéville, 1895 *Isma* Distant, 1886

Tribe Eetionini Grishin, 2022

Eetion Nicéville, 1895

Tribe Psolosini Grishin, 2022

Koruthaialos Watson, 1893 (includes Stimula Nicéville, 1898) Psolos Staudinger, 1889

Tribe Baorini Doherty, 1886

Afrogegenes de Jong & Coutsis, 2017 Baoris Moore, 1881 Borbo Evans, 1949 Brusa Evans, 1937 Caltoris Swinhoe, 1893 Gegenes Hübner, [1819] Iton Nicéville, 1895 Parnara Moore, 1881 Pelopidas Walker, 1870 Polvtremis Mabille, 1904 Prusiana Evans, 1937 Pseudoborbo Lee, 1966 Torbenlarsenia Kemal & Koçak, 2020 (Larsenia Chiba, Fan & Sáfián, 2016 is preoccupied) Tsukiyamaia Zhu, Chiba & Wu, 2016 Zenonia Evans, 1935

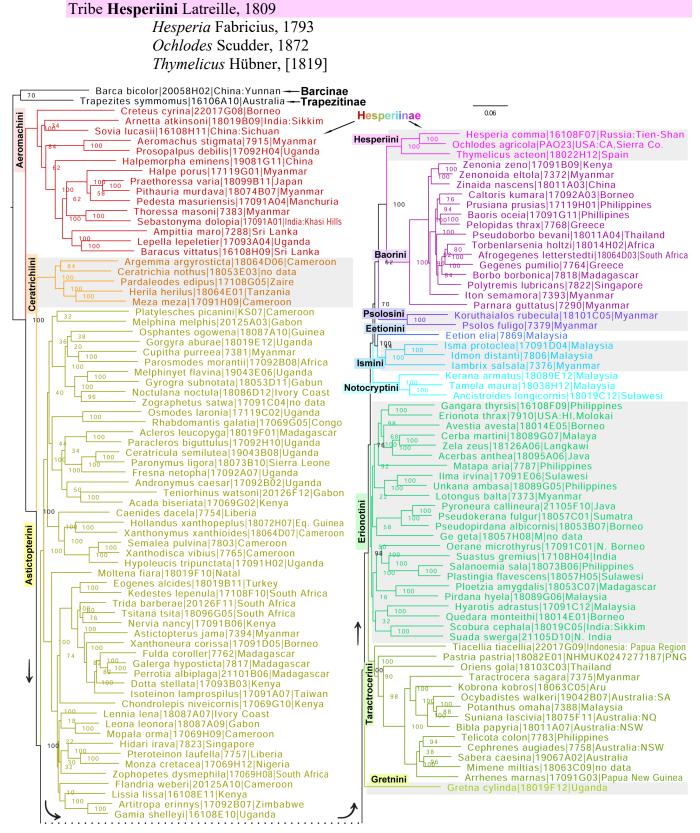

Fig. 1. A phylogenetic tree of representative Hesperiinae (mostly type species of their genera) constructed from all proteincoding autosomal genes in the nuclear genome. Specimen/sample codes and general localities are given. The numbers of dataset partitions (Zhang et al. 2022) supporting the branches are shown by corresponding nodes. The tree is folded over to fit on a page, and black arrows guide the direction of viewing. Detailed analysis of the results will be presented elsewhere.

ACKNOWLEDGMENTS

We acknowledge Ping Chen and Ming Tang for excellent technical assistance. We are grateful to David Grimaldi and Courtney Richenbacher (AMNH: American Museum of Natural History, New York, NY, USA), Blanca Huertas, David Lees, and Geoff Martin (BMNH: Natural History Museum, London, UK), Jim Fetzner, Bob Androw, Vanessa Verdecia, Cat Giles, and the late John Rawlins (CMNH: Carnegie Museum of Natural History, Pittsburgh, PA, USA), Weiping Xie (LACM: Los Angeles County Museum of Natural History, Los Angeles, CA, USA), Théo Léger, Wolfram Mey, and Viola Richter (MFNB: Museum für Naturkunde, Berlin, Germany), Rodolphe Rougerie (MNHP: Muséum National d'Histoire Naturelle, Paris, France), Matthias Nuss (MTD: Museum für Tierkunde, Dresden, Germany), Jeff Smith and Lynn Kimsey (UCDC: Bohart Museum of Entomology, University of California, Davis, CA, USA), Robert K. Robbins, John M. Burns, and Brian Harris (USNM: National Museum of Natural History, Smithsonian Institution, Washington, DC, USA), Axel Hausmann, Andreas Segerer, and Ulf Buchsbaum (ZSMC: Zoologische Staatssammlung München, Germany), for granting access to the collections under their care and stimulating discussions; Ernst Brockmann and Kojiro Shiraiwa for specimens and leg samples, the late Paul A. Opler and Evi Buckner-Opler for collecting specimens under the California Department of Fish and Game permit SC13645; Gerardo Lamas for critical review of the manuscript and correcting several mistakes. We acknowledge the Texas Advanced Computing Center (TACC) at The University of Texas at Austin for providing HPC resources. This study was supported in part by the HHMI Investigator funds and by grants from the National Institutes of Health GM127390 and the Welch Foundation I-1505.

The Taxonomic Report is a platinum open access peer-reviewed publication of The International Lepidoptera Survey (TILS)

The International Lepidoptera Survey is registered as a non-profit Limited Liability Company (LLC) in the state of Virginia, U.S.A. The Taxonomic Report (TTR), ISSN 2643-4776 (print) / ISSN 2643-4806 (online) is published for the purpose of providing a public and permanent scientific record. Articles are peer-reviewed but not necessarily through the anonymous editor-mediated review process. Typically, the authors are encouraged to solicit reviews of their manuscripts from knowledgeable lepidopterists before submission. TTR appears in digital, open-access form, is disseminated as a hardcopy to select institutional repositories, and is available as printed copy upon request at the discretion of authors and/or the editor. Printing and postage charges may apply. An initial run of 25 copies is printed on paper to meet ICZN Code recommendation 8B. All published TTR articles are freely available at the archival TTR website (http://lepsurvey.carolinanature.com/report.html) and via the following digital repositories:

Internet Archive (<u>https://archive.org/</u>) Biodiversity Heritage Library (<u>https://www.biodiversitylibrary.org</u>) Zobodat (<u>https://www.zobodat.at/</u>) Zenodo (<u>https://zenodo.org</u>) Digital Commons (<u>https://digitalcommons.unl.edu</u>)

TILS Purpose

TILS is devoted to the worldwide collection of Lepidoptera for the purpose of scientific discovery, determination, and documentation, without which there can be no preservation.

TILS Motto

"As a world community, we cannot protect that which we do not know"

Articles for publication are sought

Manuscripts may deal with any area of research on Lepidoptera, including faunal surveys, conservation topics, life histories and foodplant records, matters of nomenclature, descriptions of new taxa, methods, etc. Taxonomic papers are particularly welcome. There are no publication charges for authors. Before submitting a manuscript, email **TTR editor**, **Harry Pavulaan**, **606 Hunton Place NE**, **Leesburg**, **VA**, **20176**, **USA** at <u>intlepsurvey@gmail.com</u> (cc: to <u>harrypav@hotmail.com</u> if you do not receive a reply within one week) to initiate discussion on how to best handle your material for publication, and to discuss peer review options.
