Abstract

Human trafficking is not just the traffic of people but also sex trafficking, organ harvesting, and modern-day slavery. Human trafficking has taken the lives of many adults and children over the years. It can happen to anyone no matter the place. It is important to be aware and attentive. Trafficking can be the kidnapping of people and sending them around the world for prostitution or unpaid labor work against their will and rights. Human trafficking can also be the trafficking of organs, also known as the black market.

Conclusion

The findings of this research was not surprising. It is shocking to learn the small details that one would have never guessed were happening.

The development of technology has really been a tool used by these predators. It is important to be aware of those around us. Human trafficking can be anywhere and can happen to anyone.

Important future research would include exploring the lives of survivors.

Key Points

- Victims easily get lured by pimps due to their false promises. They promise better lives, good jobs, and money to pay off their education.
- Some victims may decide to join sex trafficking just for money. Once in, the chance of getting out may not be an option and then they are held against their will.
- Both young and older people are being used against their will for sex and manual labor around the world.
- Some victims are taken to fight in wars and are put to work and most of the time treated badly. They are made to work for long hard hours with no food or water.
- The traffic of organs has become really common and it is often known as the black market. Being an illegal business many people who are desperate take it into use.
- Over the years the use of technology has become a major tool for pimps when capturing their victims
