Grand Island Senior High 2020

University Of Nebraska Lincoln

Abstract

This was a project to see the effect of memes on society and if memes have a positive or negative change. This is important because our society changes very easy and it is good to see some of the ways it is being changed and if these kinds of changes are hurting or helping us. Although memes have had a mixed impact on society, the majority of their societal effects have been positive.

(Big Chungus meme)

Conclusions & Discussion

My research suggests that there is a lot of change in society from memes and these changes are very positive. Memes are our safe place and when they are brought into our learning areas or communication ways then it helps us cope with many different things. Future topics that could be research could be how meme culture can be used to influence our lives and how we think and do.

Key points

- Communication changes
- Classroom changes
- Can make someone famous
- Individual Positive effects on people
- individual Negative effects on people
