Agricultural Research Division News

Office of the Dean, 207 Ag Hall, P.O. Box 830704, Lincoln, NE 68583-0704, Phone (402) 472-2045, FAX (402) 472-9071

October 1998

Volume 33, Number 1

Comments from the Dean

Dear Colleagues:

By the time this issue of ARD News reaches your desk, I will have completed 10 years of service as Dean and Director. It is almost unbelievable that a decade has passed in the seemingly short time since I moved from Plant Sciences to Agricultural Hall. It has been a period characterized by a personal steep learning curve, an incredible number of meetings with administrators and faculty, a few frustrations, but, most of all, by satisfaction in seeing ARD faculty achieve tremendous success in research and graduate education.

During the last 10 years, ARD faculty FTE in tenured or tenure-leading lines has decreased from 144.5 to 126.3. In this period, state appropriations have increased by 67 percent, grant income has increased by 92 percent, outputs of theses and dissertations has increased by 28 percent, total refereed journal articles increased by 10 percent and total books and book chapters published increased by 13 percent. At the same time, the number of crop varieties and germplasms released from our breeding programs has significantly increased and the number of patents awarded to our faculty has also increased. We now have significant royalty streams coming to IANR units from licensing intellectual property developed by faculty and staff.

These accomplishments are a tribute to the dedication, creativity and hard work of ARD faculty and staff. The outputs from your research projects are widely recognized throughout the U.S. for high quality and as a result our research program are growing in stature. Thanks to each of you for your support of what we are attempting to accomplish in the Agricultural Research Division. I really appreciate the assistance and encouragement provided to me by ARD faculty and staff. Keep up the good work!

Darrell W. Nelson
Dean and Director
Agricultural Research Division

The North Central Region (NCR) Sustainable Agriculture Research and Education (SARE) Program

The North Central Region (NCR) Sustainable Agriculture Research and Education (SARE) Program is a USDA competitive grants program first authorized by the 1990 Farm Bill. The purpose of the SARE program is to generate and disseminate information that is sound and practical about alternative farming systems believed to have the potential to increase the sustainability of agriculture.

Three types of grants are administered under the program and include:

- *Research and Education Grants* — awarded to researchers, producers, educators and other individuals working together to promote sustainable agriculture ideas and practices. Preproposal applications are available mid-July and due mid-September.
- *Producer Grants* — awarded to farmers and ranchers working on on-site projects within the region. Applications are available early-February and due late-April.
- *Professional Development Program Grants* — awarded to persons who develop educational programs related to sustainable agriculture specifically for Extension, NRCS, and other agricultural professionals. Applications are available early-December and due mid-February

The FY-98 funding cycle was completed this past June. The following Nebraska individuals have been recommended for FY-98 funding:

- *Research and Education Grants* — Wyatt Fraas from the Center for Rural Affairs in Hartington Burt Weichenthal from the UNL Panhandle Research and Extension Center in Scottsbluff

It is the policy of the University of Nebraska-Lincoln not to discriminate on the basis of gender, age, disability, race, color, religion, marital status, veteran's status, national or ethnic origin or sexual orientation.

- *Producer Grants* — John Ellis of York; David Kreutz of Aurora

The FY-99 Call for Preproposals for research and education grants is available now and has a deadline of Sept. 11. Applications may be obtained by contacting:

Revised Guidelines for ARD Travel Reimbursement Program for Prospective Graduate Students

.....

Listed below are revised guidelines for the ARD Travel Reimbursement Program for Prospective Graduate Students. The ARD Advisory Council revised the guidelines to clarify some ambiguous provisions in the previous version. The program concept remains as originally conceived in 1987.

- The following guidelines pertain only to the funds available through the ARD Travel Reimbursement Program. Departments are free to reimburse prospective graduate students from other sources or to use funds from other sources to supplement funds distributed through this program.
- The purpose of the ARD Prospective Graduate Student Travel Reimbursement Program is to assist in attracting high quality graduate students into the ARD research programs. The program is for recruitment purposes and is not intended to be used to support interviews of prospective graduate students. The objective is to assist departments in convincing students who have been offered an assistantship to actually enroll at UNL
- A special account will be established in the ARD dean's office to provide administrative units with a source of funds to partially reimburse travel expenses for prospective graduate students who wish to visit the department/district center before making a decision. Each ARD administrative unit will be eligible to receive funding to reimburse up to two (2) students per calendar year from this account. Only individuals who have been offered graduate research assistantships will be eligible for reimbursement.
- Departments/district centers will be permitted to use their own resources to reimburse prospective graduate students beyond the two per year supported from this special Dean's account if they desire to do so.

- ARD administrative units may receive funds from this program to assist in reimbursing accounts from which funds have been taken to cover some or all of the expenses incurred by prospective graduate students (who have been offered an assistantship) while visiting the UNL campus. Amounts equal to 50 percent of the student's expenses, or \$200, whichever is less, can be awarded to help defray the costs of transportation, lodging and meals.
- Each department/district center will establish its own appropriate screening procedures. The departmental graduate committee or an equivalent committee at the district center, will work with their respective unit administrator in making decisions with regard to which potential candidates are eligible to receive travel support from either the dean's travel account or from departmental/district center resources.
- Requests for reimbursement from the Dean's Travel Account will be submitted by the department head/center director to the dean of the Agricultural Research Division.

Approved 7/06/98 - ARD Advisory Council

Mussehl Endowment

.....

Six proposals were submitted for the Mussehl Endowment. This substantial endowment was established in the University of Nebraska Foundation by the Mussehl estate to support poultry research programs at UNL. Projects eligible for support from the Endowment include poultry management, health, nutrition, physiology, waste management and use and poultry product research. The following proposals were funded:

| | |
|-------------------|---|
| Sheila Scheideler | Animal Science Department |
| Davis Clements | Biological Systems Engineering Department "Dicalcium Phosphate from Eggshells" Funded: \$10,000 |
| Sheila Scheideler | Animal Science Department "Ideal Amino Acid Ratios for Albumen Formation in the Laying Hen" Funded: \$ 9,768 |
| Sheila Scheideler | Animal Science Department "Effects of Trace Mineral Protein Supplement and Calcium Level on Egg Shell Quality in Older Laying Hens" Funded: \$10,000 |
| Mindy Brashears | Food Science and Technology Department "Competitive Inhibition of Food-borne Pathogens in Poultry Products" Funded: \$10,000 |
| Nancy M. Lewis | Nutritional Science and Dietetics Department |
| Sheila Scheideler | Animal Science Department |
| Rosemary Wander | Nutritional and Food Management (Oregon State) |
| Tim Carr | Nutritional Science and Dietetics Department "Potential Health Benefits of the Inclusion of Eggs in Diets of Physically Active Adults" Funded: \$10,000 |

Shelly McKee Food Science and Technology Department
 Mindy Brashears Food Science and Technology Department
 "Efficacy of Feeding Egg IgY from Hens
 Immunized against *Salmonella enteritidis* (SE)
 to Treat and Prevent SE Infection in Hens"
 Funded: \$10,000

Nebraska Corn Development, Utilization and Marketing Board Funding July 1, 1998 - June 30, 1999

.....

The following projects were approved by the
 Nebraska Corn Development, Utilization and Market-
 ing Board for July 1, 1998-June 30, 1999 funding:

| | | |
|---|---|----------------|
| Milford Hanna | Glucaric Acid — A Potential Large Scale Commodity Chemical From Corn Starch | 34,130 |
| Viswas Ghorpade Milford Hanna | Pilot Scale Synthesis of Levulinic Acid Via Reactive Extrusion | 46,300 |
| Milford Hanna Qi Fang Gerald Biby | PLA Based Visa, Master Card and Memory/Smart Cards | 36,948 |
| Robert Hutkins | Isolation and Properties of Extreme Acideophiles Capable of Producing Lactic Acid | 38,750 |
| David S. Jackson | Alkaline Cooking (Corn and Tortilla Chip, Tortillas) of Nebraska Corn | 24,494 |
| Thomas Franti Dean Eisenhauer Kyle Hoagland Mike Dosskey | Development and Testing of Field Techniques for Estimating the Effectiveness of Grass Filter Strips | 21,320 |
| Drew Lyon Jurg Blumenthal | Short Season Dryland Corn for the Nebraska Panhandle | 2,000 |
| K. Arumuganathan Kulvinder S. Gill | Sorting and Micro-Cloning of Individual Maize Chromosomes | 54,750 |
| David S. Jackson Curtis L. Weller Randy L. Wehling | Measuring Corn's Intrinsic Value: Assessment of Value for Industrial Uses | 22,515 |
| | Total | 281,207 |

Nebraska Dry Bean Development, Utilization and Marketing Board Funding July 1, 1998 - June 30, 1999

.....

The following projects were approved by the
 Nebraska Dry Bean Development, Utilization and
 Marketing Board for July 1, 1998-June 30, 1999:

| | | |
|--|---|-------|
| Gary Hein Ron Seymour | Development of Infestation Techniques Further Studies into the Behavior an Impact of the Western Bean Cutworm in Dry Beans | 5,750 |
| Robert Wilson John Smith | Using a Crop Desiccant to Facilitate Harvest of Dry Beans | 5,200 |
| Jim Schild David Nuland Tony Merrigan Larry Peterson Howard Schwartz | Evaluation of Growth Compounds on Regrowth and Yield Following Hail | 3,000 |

| | | |
|--|---|---------------|
| Gary Yuen Dermot Coyne Eric Kerr James Steadman Howard Schwartz | Fusarium Wilt of Bean in Western Nebraska | 6,000 |
| Durward Smith | Improved Product Quality and Non- Conventional Utilization of Dry Edible Beans | 5,700 |
| James Steadman Dale Lindgren Janelle Fenton | Pathogenic Variability of the Bean Rust Fungus in Nebraska and the Search for Stable Rust Resistance | 5,500 |
| David Nuland Jim Schild Tony Merrigan | Commercial Evaluation of Two Great Northern Breeding Lines | 3,200 |
| C. Dean Yonts | Polyacrylamide (PAM) — A Method to Control Irrigation Induced Soil Erosion in the Production of Dry Beans | 3,500 |
| David Nuland Dale Lindgren James Steadman Dermot Coyne | Evaluation of Dry Bean Cultivars for Disease Reaction and Performance in Western Nebraska | 5,700 |
| Dermot Coyne James Steadman Anne Vidaver David Nuland Dale Lindgren Durward Smith | Breeding Great Northern and Pinto Dry Beans with Multiple Disease Resistance Combined with Improved Seed Quality, Yield and Plant Type | 14,409 |
| Chuck Hibberd | Increasing the Production Efficiency and Market Value of Dry Edible Beans Through a Collaborative, Integrated Research and Extension Program at the Panhandle Research and Extension Center | 24,000 |
| | Total | 81,959 |

Nebraska Grain Sorghum Development, Utilization and Marketing Board Funding July 1, 1998 - June 30, 1999

.....

The following projects were approved by the Nebraska
 Grain Sorghum Development, Utilization and Marketing
 Board for July 1, 1998-June 30, 1999 funding:

| | | |
|--|---|---------------|
| Robert N. Klein Paul Nordquist | Nebraska Hybrid Grain Sorghum Seed Strip Test | 7,500 |
| David J. Andrews | Using New Genetic Diversity to Develop Grain Sorghum Germplasm with Good Adaptation to Eastern Nebraska | 20,836 |
| Z B Mayo Lisa Silberman | Sorghum Insect Pest Management in Nebraska | 8,100 |
| Max D. Clegg Lenis A. Nelson David Baltensperger | Sorghum Grown and Grain Fill Under Cool Sub-optimal Nighttime Temperatures | 4,500 |
| Jerry Eastin | Improving Stress Resistance, Yield Potential and Market Value by Altering Seed Number, Seed Weight and Plant Color | 25,995 |
| Roger Stockton Stephen C. Mason | Ethylene Improvement in Grain Sorghum Cold Tolerance During Germination | 2,800 |
| | Total | 69,731 |

Nebraska Soybean Development, Utilization and Marketing Board Funding Oct. 1, 1998 - Sept. 30, 1999

The following projects were approved by the Nebraska Soybean Development, Utilization and Marketing Board for Oct. 1, 1998 - Sept. 30, 1999 funding:

| | | |
|--------------------|-------------------------------------|----------------|
| George Graef | Winter Nursery Support for Soybean | 29,800 |
| James E. Specht | Breeding and Genetic Research | |
| George Graef | Development of Improved Soybean | 130,800 |
| James E. Specht | Varieties for Nebraska | |
| James R. Steadman | Management of Sclerotinia Stem Rot | 30,952 |
| George Graef | by Development of Resistant Soybean | |
| | Cultivars and Induced Resistance | |
| Robert M. Caldwell | Nitrogen Fertilization of Soybean: | 33,134 |
| | A Precision Farming Approach to | |
| | One Million Research Plots | |
| Milford Hanna | Soybean Form Oil | 3,952 |
| Thomas E. Clemente | Modification of Soybean Lipid | 37,520 |
| Paul Staswick | Composition by Down Regulation of | |
| | Fatty Acid Desaturase Genes | |
| Hossein Nouredini | Development of a Continuous | 22,172 |
| | Process for Enzymatic Hydrolysis | |
| | and Glycerolysis of Soybean Oil | |
| Robert M. Caldwell | Phosphorus Requirements and | 34,500 |
| | Improved Fertilizer P | |
| | Recommendations for Nebraska | |
| | Soybeans Grown in Rainfed and | |
| | Irrigated Systems | |
| | Total | 322,830 |

Nebraska Wheat Board Funding July 1, 1998 - June 30, 1999

The following projects were approved by the Nebraska Wheat Board for July 1, 1998-June 30, 1999 funding:

| | | |
|----------------------|-----------------------------------|--------|
| David R. Shelton | Selecting Nebraska Wheats for | 35,420 |
| P. Stephen Baenziger | Processing Needs of Domestic and | |
| C. James Peterson | Foreign Markets | |
| Robert A. Graybosch | | |
| P. Stephen Baenziger | Improving Winter Wheat Varieties | 46,600 |
| David R. Shelton | for Nebraska | |
| David Baltensperger | | |
| Lenis A. Nelson | Variety Testing of Public Winter | 12,000 |
| | Wheat Varieties Developed Outside | |
| | of Nebraska | |
| C. James Peterson | Hard White Wheat Development for | 65,000 |
| David R. Shelton | Nebraska | |
| David Baltensperger | | |
| Robert Graybosch | | |
| John E. Watkins | Lessening the Impact of Leaf and | 20,000 |
| P. Stephen Baenziger | Stem Rust and Wheat Streak Mosaic | |
| | Virus on Nebraska Wheat Varieties | |
| Gary L. Hein | Impact of High Plains Disease on | 9,880 |
| John E. Watkins | Wheats Being Developed for Wheat | |
| | Curl Mite and Wheat Streak Mosaic | |
| | Resistance | |
| Drew Lyon | Utilizing Spring Seeded Wheat in | 7,000 |
| | Dryland Cropping Systems | |

Robert Graybosch Development of Waxy Wheats 10,000
C. James Peterson
David R. Shelton

Total 170,480

Proposals Submitted for Federal Grants

The following is a listing of proposals that were submitted after August 1998 by faculty for federal grant programs. While not all grants will be funded, we are appreciative of the faculty members' effort in submitting proposals to the various agencies.

Dermot Coyne and James R. Steadman — USAID — Biology, Epidemiology, Genetics, and Breeding for Resistance to Pathogens of Beans with Emphasis on Those Causing Bacterial and Rust Diseases — \$87,500

Gail A. Wicks — USDA/FAS/ICD/RSED/SCP — Use of Reflectance Technology to Identify Weed Competitive Wheat Cultivars — \$30,000

Gail A. Wicks — USDA/FAS/ICD/RSED/SCP — Use of Reflectance Technology to Measure Herbicide by Wheat Cultivar Interactions — \$30,000

Michael Zeece — USDA/FAS/ICD/RSED/SCP — Ubiquitin-Proteasome-Dependent Degradation of Myofibrillar Proteins — \$30,000

James W. King — A Descriptive Study of Selected Australian Distance Education Activities in Agriculture and Forestry — \$5,000

Lenis A. Nelson — USDA/FAS/ICD/RSED/SCP — Using Statistical Procedures and Molecular Markers to Partition Genotype by Environment Interaction in Maize — \$5,000

Albert Weiss — USDA/BARD — Title Prediction of Wheat Quality from Physiological and Physical Understanding of Growth and Development — \$185,000

Steve Waller — USDA/CSREES — Sustainable Agriculture Research and Education (SARE) Program for the North Central Region — \$25,875

Kenneth G. Hubbard and Steven J. Meyer — NSF — Climate Data Delivery System: Climate Information for Federal Agencies — \$123,505

Shripat Kamble — USDA/Special Research Grants — Nebraska Participation in the National Agricultural Pesticide Impact Assessment Program — \$22,527

Vadim Gladyshev — NIH — Polymorphisms in the Selenoprotein Gene and Cancer Risk — \$925,587

Julie Savidge — USDA Forest Service — Breeding Success and Habitat Parameters of Burrowing Owls on the Buffalo Gap National Grassland — \$20,000

James E. Kinder — USDA/BARD — Regulation of LH Secretion in the Perioovulatory Period as a Strategy to Enhance Ovarian Function and Fertility in Dairy and Beef Cows — \$221,600

John B. Campbell — USDA/ARS — Biology and Control of Stable Flies Afflicting Cattle in Pastures — \$45,000

Z B Mayo — USDA/ARS — The Role of the Greenbug Holocycle in Generating Biotypic Diversity — \$1,000

Fernando A. Osorio — USDA/FAS/MSD — Characterization of an Emerging Vesicular Disease that can be Mistaken for Foot-and-Mouth Disease — \$10,000

John Foster — USDA/ARS — Techniques for Identification, Cryopreservation and Genetic Sexing of the Primary Screwworm — \$60,000

Grants and Contracts Received August and September, 1998

New or Revised Projects

The following station projects were approved recently by the USDA Current Research Information System:

NEB-11-111 (Biological Systems Engineering) Characterization and Modeling of Odor Emissions from Animal Production Facilities

Investigator(s): D. D. Schulte, S. B. Verma, D. P. Billesbach, and R. K. Koelsch
Status: New State project effective July 1, 1998

NEB-12-268 (Agronomy) Sustainable Farms, Landscapes and Rural Communities in Nebraska: An Agricultural Systems Team Approach

Investigator: Charles A. Francis
Status: New Hatch project effective July 1, 1998

NEB-12-269 (Agronomy) Cropping Systems for Uncertain Environments: Decision Aids for Managing Soil and Weather Variability

Investigator: Robert M. Caldwell
Status: New Hatch project effective July 1, 1998

NEB-13-142 (Animal Science) Value-Added Processed and Manufactured Meat Products

Investigator: Roger W. Mandigo
Status: New Hatch project effective June 11, 1998

NEB-13-143 (Animal Science) Enhancing the Global Competitiveness of U.S. Red Meat

Investigator(s): Chris R. Calkins and Dillon M. Feuz
Status: New Hatch project that contributes to regional project W-177 effective Oct. 1, 1997

**NEB-16-078 (Food Science and Technology)
Evaluation and Characterization of Antioxidants from
Plant Sources**

Investigator: Susan L. Cuppett

Status: New Hatch project effective June 10, 1998

**NEB-17-072 (Entomology) Ecology and Management
of Diabrotica Species**

Investigator: L. J. Meinke

Status: New Hatch project effective June 18, 1998

**NEB-17-073 (Entomology) Dynamic Soybean Insect
Management for Emerging Agricultural Technologies
and Variable Environments**

Investigator: Leon G. Higley

Status: New Hatch project that contributes to regional
project S-281 effective Oct. 1, 1997

**NEB-20-061 (Horticulture) Development of
Glyphosate Resistant Buffalograss**

Investigator(s): T. P. Riordan, T. E. Clemente, S. Fei, and
R. V. Klucas

Status: New State project effective July 1, 1998

**NEB-23-003 (Biometry) Innovative Design and
Analysis of Agricultural Experiments**

Investigator(s): W. W. Stroup and E. T. Paparozzi

Status: New State project effective July 1, 1998

**NEB-27-003 (School of Natural Resources) Exchange
of Carbon Dioxide and Other Atmospheric Trace
Gases in Vegetated Ecosystems**

Investigator: Shashi B. Verma

Status: Revised Hatch project effective April 1, 1998

**NEB-29-008 (Industrial Ag Products Center)
Biodegradable Plastics from Corn Starch and
Soybean Oil**

Investigator(s): M. A. Hanna and V. Miladinov

Status: New State project effective July 1, 1998

**NEB-43-064 (West Central Research and Extension
Center) Cow-Calf-Yearling Beef Production Systems**

Investigator(s): D. C. Adams, T. Milton, T. J.

Klopfenstein, R. T. Clark and J. D. Volesky

Status: New State project July 1, 1998

**NEB-92-032 (Family and Consumer Science) New
Relational Perspective in Developmental Psychology
and Its Applications to Education and Child Care**

Investigator: C. P. Edwards

Status: New Hatch project effective June 10, 1998

**NEB-92-034 (Family and Consumer Science) Three
Cohorts of Teenage Mothers Regional Comparisons
and Sex Education**

Investigator: S. T. Russell

Status: New Hatch project effective July 9, 1998

University Funds May Not Be Used For Individual Memberships and Subscriptions

.....

In March, 1996, the Vice Chancellor's Council approved a policy that prohibits the use of university funds for purchase of individual memberships in scientific organizations or personal subscriptions to journals. The policy statement is provided below:

- No university funds (appropriated, grants, contracts, indirect cost recovery, or revolving) may be used to purchase individual memberships in professional societies or other periodicals.
- University funds may be used to purchase institutional memberships in civic or professional organizations or to purchase institutional subscriptions for journals or other periodicals.
- University of Nebraska Foundation funds may be used to purchase personal memberships or subscriptions if individual endowments are established for this purpose.

The policy was adopted because several cases of abuse were discovered and because council members believe that faculty members have personal responsibility to be members of their professional or scientific society.

Binational Agricultural R & D Fund (BARD)

.....

The BARD program was established in 1977 by the governments of Israel and the United States to promote cutting edge, collaborative agricultural R & D activities of interest to both countries in public and non-profit private institutions. The annual income for the fund is about \$12.5 million. About 90 percent of the income is allocated for research grants supporting collaborative projects involving both U.S. and Israeli scientists. Some 3 percent of the income is invested in post-doctoral training and in sponsoring workshops. In 20 years of operation, BARD has awarded \$120 million in research grants for 800 joint projects in the agricultural sciences. Grants are typically three years in duration and provide from \$300,000 to \$350,000.

IANR scientists receiving awards in recent years include Raul Barletta (Veterinary and Biomedical Sciences), Mark Morrison (Animal Science) and Martin Dickman (Plant Pathology). Please consider submitting a joint grant proposal with an Israeli colleague during the next round of competition.

John B. Campbell — USDA/ARS — Biology and Control of Stable Flies Afflicting Cattle in Pastures — \$45,000

Z B Mayo — USDA/ARS — The Role of the Greenbug Holocycle in Generating Biotypic Diversity — \$1,000

New or Revised Projects

The following station projects were approved recently by the USDA Current Research Information System:

NEB-11-111 (Biological Systems Engineering) Characterization and Modeling of Odor Emissions from Animal Production Facilities

Investigator(s): D. D. Schulte, S. B. Verma, D. P. Billesbach, and R. K. Koelsch

Status: New State project effective July 1, 1998

NEB-12-268 (Agronomy) Sustainable Farms, Landscapes and Rural Communities in Nebraska: An Agricultural Systems Team Approach

Investigator: Charles A. Francis

Status: New Hatch project effective July 1, 1998

NEB-12-269 (Agronomy) Cropping Systems for Uncertain Environments: Decision Aids for Managing Soil and Weather Variability

Investigator: Robert M. Caldwell

Status: New Hatch project effective July 1, 1998

NEB-13-142 (Animal Science) Value-Added Processed and Manufactured Meat Products

Investigator: Roger W. Mandigo

Status: New Hatch project effective June 11, 1998

NEB-13-143 (Animal Science) Enhancing the Global Competitiveness of U.S. Red Meat

Investigator(s): Chris R. Calkins and Dillon M. Feuz

Status: New Hatch project that contributes to regional project W-177 effective Oct. 1, 1997

Successful Grant Proposal Writing

Contracts and grants continue to be a very important component of support for ARD faculty research, providing about one-third of the research support annually. While the amount of grant and contract support needed for individual programs to be successful varies greatly, nearly all programs require some external support in addition to appropriated funds if they are to be cutting-edge productive efforts.

The growth in contract and grant support for ARD faculty is good evidence of improved grantsmanship skills and effort. ARD encourages research faculty to continue to improve their skills through various opportunities, such as training workshops conducted by the UNL Office of the Vice Chancellor for Research, self-study with references such as the ARD publication "*Playing to Win*" by Dr. David Stanley, participation in review panels, and other opportunities.

A recent article in the publication *E-TRAIN*, The Environmental Training Newsletter for Small Communities, noted some other opportunities for improving proposal writing skills. It identified three Internet sites that provide information aimed at improving proposal writing skills.

The first site, "Grantseeking 101," is a commercial site with basic grant finding and writing information. It also offers a forum for discussion with other people interested in sharing advice or resources for grant writing. The site has an online catalog selling grant writing-related books and software. The site address is: <http://www.grantscape.com/omaha/grants/services/101.html>

The second site, "A Proposal Writing Short Course," is maintained by a nonprofit service organization, The Foundation Center, and includes a two-part free proposal writing course. It also provides links to the foundation's other services related to grantsmanship. The site address is: <http://dncenter.org/onlib/prop.html>

The third site has an interesting title, "Some Reasons Why Proposals Fail." It contains many aspects of grant proposal writing and is maintained by the University of Wisconsin Grants Information Center. It also provides information about other sites related to this subject. Address of this site is: <http://www.library.wisc.edu/libraries/Memorial/grants/proposal.htm>

In the area of grantsmanship, anything a faculty member can do to help get a competitive edge through writing better proposals or identifying additional sources will be helpful. These web sites can be an opportunity to enhance skills of ARD faculty.

Agricultural Research, Extension and Education Reform Act of 1998

The portion of the Farm Bill that authorizes all of the USDA research programs was finally passed by Congress and signed by President Clinton in the early summer. This legislation will have a significant impact on many of our research programs. A summary of major changes mandated by this legislation is presented below:

- Land Grant Universities must show that they have obtained input from stakeholders regarding research needs and priorities. We intend to use the IANR strategic planning process to obtain broad-based stakeholder input.
- We must submit a "plan of work" to CSREES that documents all programs to be funded by Hatch and regional research funds during the next five years. This is a new requirement that will require significant effort by the ARD office.
- The ARD peer and merit review procedures must be approved by CSREES before Hatch funds are allocated to the University of Nebraska.
- Twenty-five percent of Hatch funds must be spent on multi-state, multi-disciplinary and multi-functional programs. These allocations must be documented in the "plan of work."
- The indirect cost rate for NRI grants was increased to 19 percent.
- The "Initiative for Future Agricultural and Food Systems" was authorized. This new initiative provides \$120 million per year for five years for competitive grants addressing "mission oriented" research.

Diane says

Correction can help, but encouragement can help far more.
