Anyone who sees evidence of nesting, young, or adult birds carrying nesting material, food, or fecal sacs, can submit the information without the use of a special form. The information should be easily separated by species and county. This information will be included in the Nebraska Nesting Survey by letters rather than by numbers.

Anyone who has found, or expects to find, an active nest is invited to request Nest Record Cards to use in reporting the nest. Each nest requires a separate card, except for colonial nesting species, which require a separate card for each visit to the site.

Send your Nest Record Card requests, completed cards, and other nesting information to Dr. Esther V. Bennett, 1641 Devoe Drive, Lincoln, Neb. 68506.
