## 1989 (SIXTY-FOURTH) SPRING OCCURRENCE REPORT

Two hundred and eighty-nine species (plus the possibility that the Empidonax sp. was one not listed) are listed in this report, from 13 locations, plus 36 counties reported in 7 "spot check" columns or as notes in regular columns. In 1988 there were 306 species from 15 locations plus 13 "spot check" columns involving 34 counties; in 1987 288 species from 13 locations and 6 "spot check" columns involving 9 counties; 1986 304 from 13 locations and 9 "spot check" columns involving 24 counties; and 1985 296 from 13 locations and 9 "spot check" columns (plus additions on *NBR* 53:70) involving 22 counties.

The "spot check" columns are for infrequent visits to an area, and the lack of an entry for a particular species may be due to visits at the wrong time, or inadequate observing time. The average reader can just take the symbols in these columns as indicating that the species was present; those who want to know when and in which county can get that information from the symbols, which are given separately for each column. The symbols have different significance in each column.

The symbols used in the regular columns are:

Ja, Fe, Mr, Ap, My, and Je for the months.

Ja, Re, My, Ap, May, and June

are there, but did not record.

P to indicate a species which is present all of the year, although the same individuals may not be present during the whole year, and the numbers may vary greatly.

(p) for probable permanent species for which reports were not spread over the whole period.

R in the Sioux and Dawes columns for species recorded in the northern parts of the respective counties in the last third of June.

S to indicate the compiler knows the species remained after 30 June, but the lack of such indication does not necessarily mean the species did not remain.

W - to indicate the species was present before 1 January.

W - S to indicate a species which arrived before 1 January and stayed after 30 June. It is similar to P, but the pattern is not always true.

X in the Cass column to indicate observations in Otoe Co. 16 June.

x and a month indicates that the exact date in the month was not reported.

+ in the Whooping Crane line to indicate locations on the tabulation mentioned in the Whooping Crane Report, page 82. Other locations, not on the tabulation, are also mentioned. Only those dates given on the individual column reports are shown on the tabulation.

\* to indicate a comment in the text.

The number of species reported, contributors (to the extent known), and special comments are (spot check columns are given at the end):

Antelope, see E.

Box Butte, Alliance. 67 species, Doug G. Thomas, reporter.

Boyd, see D.

Buffalo, see B.

Butler, see Sharp-shinned note in Lancaster.

Cass, Elmwood, 169 species and the possibility that the Empidonax species was one not listed, Gertrude Wood, reporter, Alan Grenon, David Stage. X indicates observations in Otoe Co. (immediately south) by David Stage Je 16. Mrs. Wood saw the Black-throated Blue Warbler at Platte

River State Park for about 10 minutes, with 7x35 and 8x50 binoculars.

Cedar, Laurel, 160 species, David Stage, reporter. The Red Crossbills were reported at a feeder in Hartington in the month of February.

Chase, see A.

Clay, see E.

Cuming, see F.

Custer, see B.

Dakota, South Sioux City, 178 species, Bill Huser, reporter, Jerry L. Probst. All species marked \* were also recorded Ja 21, just before Snyder's Bend froze up. The Black-billed Magpie dates are estimated from a dead nestling found in their last year's nest. The birds themselves were neither seen nor heard.

Dawes, Crawford, 78 species, Jim Minyard, reporter, and observations (marked R) by Larry Einemann in the northern part of the county the last third of June (Fort Robinson and Chadron State Parks, Crawford, and Chadron).

Dixon, see F.

Douglas, (and Sarpy), 226 species and the possibility that the Empidonax species was not one listed, Tanya Bray, R. G. Cortelyou, Alan Grenon, Ruth Green, Clyde and Emma Johnson, Babs and Loren Padelford, reporters, Bill Adler, Duane Bright, George and Marian Brown, Kathleen Crawford-Rose, Julie Eilers, Sam and Essie Grill, Jackie Howe, Phil Swanson. A Black-crowned Night-Heron was also reported Je 26, a Killdeer on Ja 31, a Ring-billed Gull Ja 20, a Coot Ja 1, and a Yellow-bellied Sapsucker Ja 8.

Dundy, see A.

Furnas, see C.

Gage, see Robin note in Lancaster.

Garfield, see B.

Greeley, see D.

Hall (and Howard), Grand Island and Cairo, 127 species, Helen Seim, Wm. W. Lemburg, reporters, Norris Alfred, Paul Bedell, Linda Flaheerty, Drew Justin, Pat Scroggins, Ruth Strauch, David Stage. The Loon was in breeding plumage. A Wood Duck was reported Ja 14.

Hamilton, see Polk.

Harlan, see C.

Hayes, see A.

Hitchcock, see A.

Holt, see D.

Howard, see Hall.

Knox, Creighton, 169 species, Mark A. Brogie, reporter, Ed. M. Brogie, Ellen Brogie, Lona Schrier, Larry Roper.

Lancaster, Lincoln, 192 species, Tanya Bray, Mabel B. Ott, Larry Einemann, Norma Johnson, Paul and Karla Kaufman, Thomas E. Labedz, Babs and Loren Padelford, reporters. A Hooded Merganser was also reported Je 2. Russ and Carol Krupicka, Rising City, Butler Co., had a Sharp-shinned Hawk taking sparrows in their back yard in mid-February. The Prairie Falcon was seen in the vicinity of 33rd and Holdrege for several days by John Dinan and other Game Commission employees. A Franklin's Gull was reported Ja 24, a Ring-billed Ja 31, and a Herring Ja 4. A Snowy Owl was

b Fe 4	My 7	n	P	(p)		B, 54 species, Buffalo (B), Custer (C), Garfield (G), Logan (n), Loup (p), Sherman (S). David Stage, Tom Labeledz. a = Je 10 (p), b = Je 10 (G), c = Je 10 (n), d = Je 10 (C), e = Je 10 (B), f = Je 23 (S), g = Je 23 (B), A = a,b,c,d,e, B = A+f, C = a,b,c,d,f, D = a,b,d, E = D,e+f, F = D+f, G = a,c,d, H = G,e+f, I = G+f, J = a,d+f, K = b,c,d,e, L = K+f, M = b,c,d,f, N = b,d,f, O = b,f+g, P = c+f, Q = P+d, R = d+f, X = Mr 19 and 20. Tom Labeledz saw an albino Sandhill Crane north of the Rowe Sanctuary Mr 19 and 20. NBR 54:20 reports an albino Sandhill Crane seen 9 March 1985, south of the Platte River just west of Overton. The two sites would be around 25 miles apart.
1 Je 30	- S	o	X			C, 36 species, Furnas (F), Harlan (H), Phelps (P), Red Willow (R), Bill Huser, David Stage. a = Mr 19 (P), b = Je 10 (R), c = Je 10 (F), d = Je 10 (P), e = Je 10 (H), g = b,c,d, h = g+e, i = b,c,e. Bill Huser, Tom Labeledz, David Stage. Bill Huser saw a Prairie Falcon at Funk Lagoon Mr 19. He learned later that the Raptor Recovery Center (Lincoln) had released two Prairie Falcons there the day before.
