This Article is brought to you for free and open access by the Institut für Biologie der Martin-Luther-Universität Halle-Wittenberg at DigitalCommons@University of Nebraska - Lincoln. It has been accepted for inclusion in *Erforschung biologischer Ressourcen der Mongolei / Exploration into the Biological Resources of Mongolia, ISSN 0440-1298* by an authorized administrator of DigitalCommons@University of Nebraska - Lincoln.

Erforsch. biol. Ress. Mongolei (Halle/Saale) 2016 (13): 83-122

## **Bibliographia phytosociologica et floristica Mongolia<sup>1</sup>**

### **Pars IV**

W. Hilbig

#### **Abstract**

In Ergänzung zu den bisherigen drei Teilen der Bibliographie vegetationskundlicher, vegetationsökologischer, floristischer und pflanzengeographischer Arbeiten über die Mongolei wird in dieser Arbeit Teil IV der Bibliographie vorgelegt. Er umfasst im Wesentlichen den Zeitraum 2007 bis 2014. Auch Publikationen zur Vegetationsgeschichte und zum botanischen Naturschutz werden berücksichtigt.

**Key words:** bibliography, Mongolia, geobotany, ecology, flora, plant-geography

#### **Einleitung und Erläuterungen**

In Ergänzung zu den bisherigen drei Teilen der Bibliographie vegetationskundlicher, vegetationsökologischer, vegetationsgeschichtlicher, botanisch-taxonomischer, floristischer und pflanzengeographischer Arbeiten über die Mongolei (Äußere Mongolei, ehemalige Mongolische Volksrepublik) wird der vierte Teil vorgelegt. Er stellt die Fortsetzung der bisherigen Teile (HILBIG 1991, GUBANOV & HILBIG 1993, HILBIG 2007) dar und umfasst Publikationen aus dem Zeitraum von 2007 bis 2014 sowie einige Nachträge aus dem Zeitraum bis 2006. Auch Würdigungen von Forschern, die in der Mongolei im Rahmen der oben angeführten Fachgebiete tätig waren, wurden in die Bibliographie aufgenommen. Bei Veröffentlichungen in mongolischer Sprache wird, abgesehen von einigen Ausnahmen, in Klammern die Übersetzung des Titels angegeben, meist in der Sprache der Zusammenfassung. Dabei wird auch die Sprache der Veröffentlichung und der Zusammenfassung in einer anderen Sprache angeführt (z. B. mong./russ.; mong./engl.). Häufig werden in englischsprachigen Publikationen bei Literaturziten russisch und mongolisch publizierter Arbeiten diese nur in englischer Übersetzung zitiert. Bei einigen dieser Publikationen, die mir nicht direkt zugänglich waren, sind die Titel mit dem Vermerk (mong. bzw. russ.) nur in Englisch, Deutsch oder Russisch in Klammern zitiert. Die kyrillischen Buchstaben werden bei Publikationen in Russisch und Mongolisch nach der deutschen Bibliotheksumschrift in lateinische Buchstaben transkribiert (s.u.).

In englischsprachigen Publikationen, z. T. auch in Publikationen in russischer und in deutscher Sprache, werden die Autorennamen, aber auch geographische Bezeichnungen (Orts-, Fluss- und Gebirgsnamen) in der nicht einheitlichen englischen Umschrift wiedergegeben. Das führt dazu, dass z. B. der kyrillische Buchstabe ц (c) als ts transkribiert wird und der Autor unter dem Anfangsbuchstaben T läuft. Dabei wird/werden bei der Abkürzung des Vornamens teilweise nur der erste Buchstabe - T. oder aber auch der zweite Anfangsbuchstabe - Ts. angeführt, beim kyrillischen Buchstaben Ш mal nur S., mal Sh., in anderen Fällen entsprechend. Der mongolische Autor C. Žamsran wird in verschiedenen Publikationen auch als Ts. Jamsran, Ts. Zamsran, aber auch als Z. Schamsran angeführt. Der mongolische Buchstabe ө (ö) wird, vor allem in russisch publizierten Arbeiten häufig als u angegeben, desgleichen der mongolische Buchstabe ү (ü). Der mongolische Autor Ölzijchutag erscheint als Ulzijchutag bzw. Ulziykhutag. In vorliegender Bibliographie werden einige Namens-Querverweise gegeben.

---

<sup>1</sup> Ergebnisse der Mongolisch-Deutschen Biologischen Expeditionen seit 1962, Nr. 328.

In Teil 3 der Bibliographie (HILBIG 2007) wurden von der russischen Publikationsreihe *Biologičeskie Resursy i prirodnye Uslovija Mongolskoj Narodnoj Respubliki* (Biol. Res. priir. Uslov. MNR), weitergeführt als *Biologičeskie Resursy i prirodnye Uslovija Mongolii* (Biol. Res. priir. Uslov. Mongolii) bzw. *Biological Resources and Natural Conditions of Mongolia* (Biol. Res. natural Conditions Mongolia), in der zusammenfassende Ergebnisse der Sowjetisch- bzw. Russisch-Mongolischen Komplexen Biologischen Expedition der Akademien beider Länder veröffentlicht wurden, die Bände 1-44 sowie Bd. 46 angeführt. Inzwischen wurden mir weitere Bände bekannt, die am Ende der Arbeit zitiert werden. Die russischen Zeitschriften *Botaničeskij Žurnal* und *Novosti Sistematiki vyssich Rastenij* werden unter der Abkürzung *Bot. Ž.* bzw. *Novosti Sist. vyssich Rast.* angeführt. Als mongolische Zeitschriften werden im wesentlichen *Botanikijn chüreeleengijn Erdem šinžilgeenijn Büteel Mongol Uls šinžlech Uchaany Akademi* (Bot. chür. Erdem šinžilg. Büteel) und *Mongolian Journal of biological Sciences* (Mong. J. biol. Sciences), beide Ulaanbaatar, angeführt. Erstere wird bei Literaturzitatzen teilweise nur mit dem russischen Titel *Trudy Instituta Botaniki Akademii Nauk Mongolii* oder in den letzten Jahren mit dem englischen Titel *Scientific Proceedings of the Institute of Botany of MAS (Mongolian Academy of Sciences)* angegeben. Die von der Martin-Luther-Universität Halle-Wittenberg in Halle herausgegebene deutsche Publikationsreihe mit dem Titel *Erforschung biologischer Ressourcen der Mongolischen Volksrepublik* (Erforsch. biol. Ress. MVR) heißt ab Band 9 (2005) *Erforschung biologischer Ressourcen der Mongolei* (Erforsch. biol. Ress. Mongolei) mit gleichzeitig ausgewiesenem englischen Titel *Exploration into the Biological Resources of Mongolia*, der inzwischen bei englischsprachigen Titeln zitiert wird.

## Summary

In addition to the hitherto existing three parts of the bibliography of geobotanical, ecological, floristic and plant-geographical papers on Mongolia the part IV of the bibliography is given. It comprises in the main point the period from 2007 until 2014. In addition, publications on vegetation history and botanical nature protection are considered.
