RDAR Center

(Rural Drug ddition Research Center)

The Goal of the RDAR Community its to study and understand the full range of the effects of substance use in the rural communities of the Midwest. With ever growing health concerns it is their hope that their research will help rural communities in their region to understand regional substance use experiences and inform outreach, prevention, and treatment efforts.

UCare 2019-2020

Nebraska Center for Virology

The Nebraska Center for Virology is a biomedical research center committed to excellence. They strive to create an environment that will stimulate cross-fertilization to produce a new generation of innovative researchers that seed to understand all parts of virology. They seek to understand the mechanics of viral pathogenesis and replication to enable design of novel vaccines and therapeutic strategies to block disease.

Annual Report/ Photography

RHC

(Rural Health Cohort)

The RHC is a five-year study of substance use in the Midwest. In this program they will use peer-based recruitment to help grown and maintain the cohort over a five-year period. Though the use of mobile technology developed by the LNC (Open Dynamic Interaction Network cellphone software) and confidential questioning regarding attitudes, emotions, activities, locations, and relationships they hope to gain an understanding of substance use in the Midwest.
