## **Comments from Dean Gary Cunningham**

The current world-wide economic downturn can and is having a discouraging influence on attitudes and expectations for the future. These discouraging influences could be very strong for those of us who are dependent on public support to finance our creative efforts to discover new knowledge. When the economy is bad, it is easy for the general public to see scientific research as a luxury that can be postponed until times are better. The unavoidable decreases in public support for higher education will have real impacts on university research programs across the nation. The University of Nebraska will not be an exception. All signs point to less of an economic impact for Nebraska than in other states, but we will not escape some damage. Slowing of the growth and improvement of ARD research programs that you have achieved over the past several years, will be difficult to avoid without leveraging our state investments by seeking additional competitive funding.

There are some positive signs from the federal government. I don't want to sound like a Pollyanna, but both the American Recovery and Reinvestment Act of 2009 (the stimulus package) and the FY 2009 omnibus appropriation bill (for the federal fiscal year that started October 1, 2008) contain funding for research and research infrastructure Funding for which ARD scientists should be very competitive.

You should have already begun seeing email notices from the ARD and other University offices and from the relevant federal funding agencies about some of these opportunities. The ARD office will continue to keep you informed as new opportunities are announced. I know that many of you have been responding to these newly emerging opportunities. I am confident that you will continue to have the level of great success that has characterized ARD scientists in the recent past. If you do, then we should all be able to not only survive, but flourish during the economic downturn. As always, the ARD office is ready to assist you in obtaining grant support for your work.

Gary Cunningham  
Dean and Director

## **Agriculture and Food Research Initiative (AFRI)**

AFRI replaces the former National Research Initiative and the Initiative for Future Agriculture and Food Systems programs and addresses six priority areas:

- 1.) plant health and production and plant products
- 2.) animal health and production and animal products
- 3.) food safety, nutrition and health
- 4.) renewable energy, natural resources and environment
- 5.) agriculture systems and technology
- 6.) agriculture economics and rural communities

### Specialty Crop Research Initiative (SCRI)

The Specialty Crop Research Initiative (SCRI) was established to solve critical industry issues through research and extension activities. Specialty crops are defined as fruits and vegetables, tree nuts, dried fruits, and horticulture and nursery crops, including floriculture. SCRI will give priority to projects that are multistate, multi-institutional, or trans-disciplinary; and include explicit mechanisms to communicate results to producers and the public. Projects must address at least one of five focus areas: research in plant breeding, genetics, and genomics to improve crop

characteristics; efforts to identify and address threats from pests and diseases, including threats to specialty crop pollinators; efforts to improve production efficiency, productivity, and profitability over the long term; new innovations and technology, including improved mechanization and technologies that delay or inhibit ripening; and methods to prevent, detect, monitor, control, and respond to potential food safety hazards in the production and processing of specialty crops.

**Direct Link to the RFA:** [http://www.csrees.usda.gov/funding/rfas/pdfs/09\\_specialty\\_crop.pdf](http://www.csrees.usda.gov/funding/rfas/pdfs/09_specialty_crop.pdf)

**Letter of Intent Due: March 23, 2009**

**Application Deadline: April 15, 2009**

### **Funding for Range/Pasture/Grassland**

#### [Range/Pasture/Grassland RFP](#)

**Proposal Deadline: Friday May 1st, 2009, at 4 PM Central Time**

Income from the Helen Porter Van Spronsen Charitable Trust, Sampson Range and Pasture Management Endowment, Ralph H. Bainbridge Memorial Fund, and Arch and Frances Jorgensen Fund is used to support research on:

- Pasture Management
- Rangeland Management
- Beef Production and Grassland Research and Development
- Rangeland Management and Ecology of Beef/Range Systems
- Range and Livestock Research at the Gudmundsen Sandhills Laboratory\*
- Rangeland Natural Resource Management
- Rangeland Ecology
- Study of Native Grasses

[\*Does not exclude range and livestock research at other locations]

A RFP is issued in mid-March in odd-numbered years for 2-year projects. Fund income can typically support funding at approximately \$30,000/year per project.

---

**Fall 2008 Graduate Census**

Graduate student data represents students enrolled on the sixth-day census (Fall 2008) and non-enrolled students actively pursuing graduate degrees. The graduate program in the Agricultural Research Division (College of Agricultural Sciences and Natural Resources and the College of Education and Human Sciences) increased 6.5% from Semester 2007 to the Fall Semester 2008. Thirty-three percent of the graduate students in CASNR degree programs are supported by assistantships (state appropriated GTA; fellowships; and international agency or foreign country support). Nineteen percent of the students in the College of Education and Human Sciences are supported. Twenty-nine and one half percent of CASNR students were not enrolled in IANR graduate programs on the sixth day of the semester.

## Proposals Submitted for Federal Grants (November and December 2008)

The following is a listing of proposals that were submitted during November and December 2008 by faculty for federal grant programs. While not all grants will be funded, we are appreciative of the faculty members' outstanding efforts in submitting proposals to the various agencies.

PI	Co-PI	Sponsor (Funding Agency)	Title	Amt. Requested
Black, Paul	Concetta DiRusso	NIH	Fatty acid transport in eukaryotes	\$1,811,250.00
DiRusso, Concetta	Paul Black	NIH	High throughput screens for fatty acid uptake inhibitors	\$328,599.00
Heng-Moss, Tiffany	Thomas Hunt	Univ. of Minnesota	Soybean aphid management	\$55,575.00
Shapiro, Charles	S Knezevic, J Brandle, R Wright, M Bernards, R Ferguson, E Sarno, R Little	North Central Regional SARE	Cover crop management systems for eastern Great Plains - Utilizing winter wheat in an organic crop rotation	\$164,680.00
van Donk, Simon	L Stalker, R Funston, J Volesky, R Klein, S Melvin, M Stockton	NCR-SARE	How does corn residue grazing and baling impact sustainability and profitability of crop and livestock producers?	\$174,576.00
Nickerson, Kenneth	Dong Wang, Audrey Atkin	NIH	Candida albicans responses to farnesol	\$1,205,967.00
Hanson, Paul	Robert Joeckel, Mark Kuzila	USGS	2009-2010 STATEMAP	\$272,138.00
Wegulo, Stephen		USDA-CSREES	Cultivar characterization and prediction of stagonospora nodorum blotch severity as a decision tool	\$20,001.00
Benson, Andrew	Jens Walter, Stephen Kachman	NIH	Modeling heterogeneity for safe cancer prevention and detection	\$302,845.00
Herpel, Rachael		NSF	Agrichemical contaminants in the Elkhorn River Watershed: A systems analysis	\$83,366.00
Barletta, Raul		Penn State Univ. Lead	JDIP: Role of MAP1152 in the biology and pathogenesis of mycobacterium avium subsp. paratuberculosis	\$43,626.00

Lyon, Drew	Gary Hein, Paul Burgener	USDA-CSREES-NCR IPM	Management of RWA in barley	\$55,053.00
Hiller, Timothy	Scott Hygnstrom, Stephen Vantassel	Animal Welfare Institute	Effectiveness of a humane, non-lethal technique for racoon removal from human-occupied structures in urban areas	\$10,000.00
Van Etten, James	David Dunigan, Ming Kang, Irina Agarkova, James Gurnon	NIH	DNA repression and gene express	\$1,439,860.00
Baenziger, Peter		Dept of Agriculture-CSREES	National Needs Graduate Fellowships-Plant breeding and genetics	\$36,000.00
Pickard, Gary	Patricia Sollars	NIH	Retinal neurons afferent to the circadian system	\$814,245.00
Xia, Yan		NSF	Agrichemical contaminants in the Elkhorn River Watershed: A systems analysis	\$180,341.00
Harveson, Robert		USDA	Bacterial wilt in alternate crops	\$17,483.00
Jackson, Tamra		USDA-CSREES	Regional in-field diagnostics training for IPM practitioners	\$58,114.72
Pickard, Gary	Patricia Sollars	NIH	5HT presynaptic inhibition of retinal input to the SCN	\$317,718.00
Vidaver, Anne		Dept of Agriculture-ARS	Developing a national recovery plan for gumming disease of grasses and ryegrass toxicity caused by rathayibacter toxicus	\$19,700.00
Billesbach, David		Dept of Energy-Berkeley Nat lab	Development and field testing of a rapidly deployable carbon dioxide flux management system	\$8,781.00
Mackenzie, Sally A	Tom Clemente, Dong Wang, Michael Fromm, Ismail Dweikat	NSF-IGERT	IGERT: Creating a 21st century Center of Excellence for Molecular Plant Breeding and Genomics Education	\$3,000,000.00
Hruskoci, James	Paul Read, James Schild, Vaughn Hammond	USDA SCBGP	NDA Saskatoon berry production study	\$8,330.00
Samal, Ashok	C Xun-Hong, M Hayes, K Hoagland, J Holz, D Marx, L Soh, A Tomkins, M Goodchild, S Shekhar	UNL - NSF-PIRE	A volunteer geographic information computing framework for global hydrologic analysis	\$2,994,250.00

Francis, Charles	Mark Burbach, Gina Matkin	Environmental Protection Agency	Development of an urban food leadership coop in support of a local food system	\$9,946.00
Powers, Thomas		National Science Foundation	NSF challenging dogma and correcting fundamental understanding regarding latitudinal diversity of nematodes	\$45,093.00

## Grants and Contracts Received (November and December 2008)

Dept/Unit	PI	Co-PI	Sponsor (Funding Agency)	Amount Funded
AGRH	Baenziger, Peter		Dept of Agriculture-CSREES	\$18,000.00
AGRH	Baenziger, Stephen		USDA-Univ of Calif-Davis	\$47,500.00
AGRH	Francis, Charles		USDA-SARE	\$10,000.00
AGRH	Wortmann, Charles		NE Soybean Board	\$16,900.00
AGRH			Miscellaneous grants under \$10,000 each	\$31,000.00
ANSC	Calkins, Chris		NE Beef Council	\$25,250.00
ANSC	Calkins, Chris		NE Beef Council	\$39,595.00
ANSC	Jones, Steven		National Pork Board	\$20,000.00
ANSC			Miscellaneous grants under \$10,000 each	\$23,000.00
