Correction to the 2001 (13th) Report of the NOU Records Committee

Joel Jorgensen reports that the photo of the White Ibis mentioned in the 13th NOURC Report (NBR 71: 98) was taken at Johnson WPA 19 Aug, not Funk WPA. The bird was originally discovered at Funk WPA on 9 Aug, and then it presumably moved to Johnson WPA 12-19 Aug. See Silcock, W.R., "Fall Field Report, August-November 2001". *The Nebraska Bird Review* 69: 158-189.
