"Needed: One-page articles" (1998). *Insecta Mundi*. 369.

<https://digitalcommons.unl.edu/insectamundi/369>

This Article is brought to you for free and open access by the Center for Systematic Entomology, Gainesville, Florida at DigitalCommons@University of Nebraska - Lincoln. It has been accepted for inclusion in Insecta Mundi by an authorized administrator of DigitalCommons@University of Nebraska - Lincoln.

Needed: One-page articles

We often have several pages to fill in each issue of *Insecta Mundi*. This is due to the practice we follow of starting each full length article on the right hand page. This provides a better appearing separate. As logic will predict, about half of the articles end on a right hand page, thus leaving the last left hand page blank. A blank page in a scientific journal is the same as throwing away money! So, we scramble around trying to find something to fill these pages, often with little success: better to leave it blank some say.

You, as a member of CSE may publish 1 page notes in these spaces free of charge, sometime within a few weeks of submission. However, we cannot provide you with separates. It is possible to describe a new species, with an illustration, and have it published within 6 weeks of submission (but unlikely). Nevertheless, members are invited to make use of this space (this page is an example). Biological notes; new distribution records; catalog corrections, and similar materials are suitable. Why not take advantage of this space?
