Scientific Note

A new state record for *Rhizophagus sayi* Schaeffer
(Coleoptera: Rhizophagidae)

A specimen of *Rhizophagus sayi* Schaeffer collected in a flight trap at 29°34½' N 82°29' W in Alachua County, Florida, on 23-I-1993, by R.W. Lundgren prompted a search of unidentified specimens in the Florida State Collection of Arthropods. The search resulted in the discovery of seven additional Florida specimens with the following data: "FLA., Dixie Co. 3.5mi. N. Old Town 13-I-1980 Coll. M.C. Thomas", 2; "FLORIDA: Alachua Co. Gainesville 3-XII-1983 Coll. M.C. Thomas", 1; "FLORIDA: Alachua Co. San Felasco Hammock 4-II-1983 M.C. Thomas", 3; same, except date is 12-II-1983. These specimens comprise a new state record for *R. sayi*, which Bousquet (1990) re-

corded from most of the eastern United States except for Florida and Georgia.
