INSECTA MUNDI (ISSN 0749-6737) is the quarterly journal of The Center for Systematic Entomology. Short papers on broadly defined insect systematics are published, including descriptions of new taxa, informal taxonomic notes, bibliographies, checklists, catalogs, and reviews.

For papers about new insect species, INSECTA MUNDI provides authors early publication so that the species may be included in other books and catalogs.

Authors are fully responsible for the contents of their papers, however, all papers are reviewed by the Editorial Board and by individuals with special expertise. Acceptance by a majority of the editorial board is a requirement for publication.

Research notices and other noncommercial news is published at the discretion of the Editorial Board. New literature reviews are also published.

INSECTA MUNDI is distributed worldwide to entomology libraries and publishing taxonomists.

Announcements and advertisements are accepted; rates upon request.

SUBSCRIPTIONS (four issues per year)

Individuals: \$25.00 per year

Libraries: \$50.00 per year

Foreign subscribers add \$6.00 for postage

Send subscription orders to:

Sandhill Crane Press, Inc.
2406 NW 47th Terrace
Gainesville, FL 32606 USA

MANUSCRIPTS

Send manuscripts and queries to:

M. C. Thomas, Editor
INSECTA MUNDI
c/o Florida State Collection of Arthropods
P.O. Box 1269
Gainesville, FL 32602 USA

Notice of acceptance/rejection within two weeks. Include (U.S.) postage if you want your manuscript returned.

No page charges are made. However, all authors are required to subscribe. Separates can be ordered upon acceptance.

INSTRUCTIONS TO AUTHORS

General

1. All papers must adhere to The International Rules of Nomenclature.

2. Papers are limited in length to 25 printed pages. Longer papers may be published in parts, or the author(s) may elect to pay the full price of addi-

tional pages; details upon request.

3. Papers may be in English, French, German, Italian, Portuguese, or Spanish. An English summary is required for non-English papers.

4. Publisher will design, typeset, and assemble text and artwork for publication.

Content

5. Each new taxon must be illustrated and included in a new key, or as an addendum to an existing key. The only exceptions to this rule are:

- A. the publication of a replacement name for a homonym,
- B. for a new combination of a species or subspecies.

6. Type species of each genus must be stated, with the manner of designation and reference to the designation.

7. Start the paper with an Abstract defining your conclusion. Follow with an Introduction that describes the scope and purpose (not a summary) of the paper.

8. Distribution data may be summarized. For new taxa or comprehensive species studies, full data from labels may be given. Include the names of collections in which the specimens are deposited.

9. List references under Literature Cited; follow the format shown in this issue.

10. Footnotes are prohibited; use Text Notes at the end of the paper. Provide a separate sheet/file with captions and legends for photos, tables, and artwork.

Materials

11. Text: The publisher uses MS-DOS personal computers to prepare each issue. When possible, supply your paper on MS-DOS 360k 5-1/4" diskettes and a hardcopy printout. Most popular word processor formats are acceptable; write for instructions. Text may also be submitted in ASCII format, but special preparation is required; write for instructions.

Other computer formats and typewritten papers will be converted and charged to author at cost.

12. Photos, Tables, and Artwork: Whenever possible, illustrations should be assembled into plates. Maximum dimensions of printed artwork are: 1-column 3.25" x 9" (2.75:1) and 2-column 6.75" x 9" (1.3:1). Please take these dimensions and proportions into account when assembling plates. Number individual figures. Use scale lines. Attach captions to back of illustration. Do not mix photos and line art on same plate. Photos extra: \$10 per page. Color available at extra cost. Artwork will be returned upon publication.
