**INSECTA MUNDI** is a journal primarily devoted to insect systematics, but articles can be published on any non-marine arthropod. Topics considered for publication include systematics, taxonomy, nomenclature, checklists, faunal works, and natural history. *Insecta Mundi* will not consider works in the applied sciences (i.e. medical entomology, pest control research, etc.), and no longer publishes book reviews or editorials. *Insecta Mundi* publishes original research or discoveries in an inexpensive and timely manner, distributing them free via open access on the internet on the date of publication.

*Insecta Mundi* is referenced or abstracted by several sources, including the Zoological Record and CAB Abstracts. *Insecta Mundi* is published irregularly throughout the year, with completed manuscripts assigned an individual number. Manuscripts must be peer reviewed prior to submission, after which they are reviewed by the editorial board to ensure quality. One author of each submitted manuscript must be a current member of the Center for Systematic Entomology.

Guidelines and requirements for the preparation of manuscripts are available on the *Insecta Mundi* website at <http://centerforsystematicentomology.org/insectamundi/>

**Abstract.** The firefly species described by Carl Linnaeus in 1758 and 1767 (Coleoptera: Lampyridae) were checked to determine the actual dates of publication. Nine out of twelve species were originally described in 1758 and not in 1767 as published in the majority of firefly literature. *Lampyrus hespera* Linnaeus, 1767 as a **junior synonym** of *Aspisma lampyrus* (Linnaeus, 1758) is established.

**Key words.** *Cantharis*, nomenclature, dates of publication, Systema Naturae.

**Resumen.** Se revisaron las especies de luciérnagas descritas por Carl Linnaeus in 1758 y 1767 (Coleoptera: Lampyridae) para la determinación de fechas de publicación. Nueve de las doce especies fueron originalmente descritas en 1758 y no en 1767 como aparece publicado en la mayoría de la literatura de luciérnagas. Se establece *Lampyrus hespera* Linnaeus, 1767 como **sinónimo** de *Aspisma lampyrus* (Linnaeus, 1758).

**Palabras clave.** *Cantharis*, nomenclatura, fechas de publicación, Systema Naturae.

**ZooBank registration.** urn:lsid:zoobank.org:pub:C04B88B3-DDBF-4878-B43E-71642AFC8AAA

### Introduction

Carl Linnaeus, the father of modern taxonomy and binomial nomenclature, described over 12,000 species of animals and plants in the 10th edition of his monumental work *Systema Naturae* (Linnaeus 1758). Nine of these species were fireflies which were described in the genus *Cantharis* Linnaeus. After Geoffroy (1762) described the genus *Lampyrus*, Linnaeus (1767) moved the nine species into *Lampyrus* and also described three new species for a total of 12 species of fireflies described by him. In over 90% of the published taxonomic literature on fireflies, the wrong date of description (1767) is used for the species described in 1758. *Lampyrus hespera* Linnaeus, 1767 was found to be a junior synonym of *Aspisma lampyrus* (Linnaeus, 1768), which is here established.

This paper is a continuation of efforts to deal with nomenclatural mistakes (Keller and Branham 2018a, b, c; Ballantyne and Keller 2021; Keller 2021; Keller and Ballantyne 2021) continued throughout the last 264 years of firefly literature (e.g. Olivier 1910; McDermott 1966; Ballantyne et al. 2019; Keller and Branham 2021; Pérez-Hernández et al. 2022) and current online databases such as the Integrated Taxonomic Information System ([www.its.gov](http://www.its.gov)). In this paper I evaluate every species described by Linnaeus and provide the correct date of description and additional remarks if necessary.

### Materials and Methods

Linnaeus' 1758 and 1767 publications were compared to establish the correct date of publication for the firefly species he described. Additionally, other important firefly literature was examined to establish the most used dates of publication for any of the Linnaeus firefly species. Correct citations are written in bold.

## Results

### Lampyridae Rafinesque

#### Luciolinae Lacordaire

#### Luciolini Lacordaire

### *Abscondita* Ballantyne, Lambkin, and Fu

#### *Abscondita chinensis* (Linnaeus, 1758)

*Cantharis chinensis* Linnaeus 1758: 401.

**Remarks.** This species was published in Linnaeus (1758) in the genus *Cantharis* and moved to *Lampyris* by Linnaeus (1767: 645). This species was not newly described in 1767 as published in the vast majority of firefly literature.

### *Luciola* Laporte

#### *Luciola italica* (Linnaeus, 1758)

*Cantharis italica* Linnaeus 1758: 401.

**Remarks.** This species was published in Linnaeus (1758) in the genus *Cantharis* and moved to *Lampyris* by Linnaeus (1767: 645). This species was not newly described in 1767 as published in the vast majority of firefly literature.

### Lamprohizinae Kazantsev

#### Lamprohizini Kazantsev

### *Lamprohiza* Motschulsky

#### *Lamprohiza splendidula* (Linnaeus, 1767)

*Lampyris splendidula* Linnaeus 1767: 644.

**Remarks.** One of three species described by Linnaeus (1767).

### Lampyrinae Rafinesque

#### Cratomorphini Green

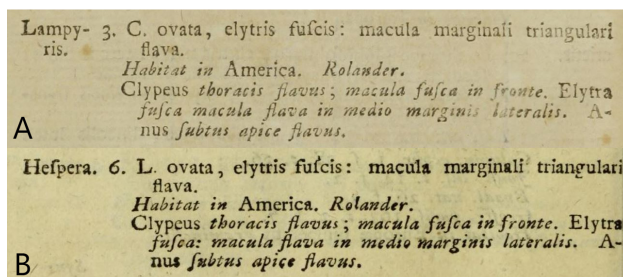

### *Aspisoma* Laporte

#### *Aspisoma lampyris* (Linnaeus, 1758)

*Cantharis lampyris* Linnaeus 1758: 400.

*Lampyris hespera* Linnaeus 1767: 644. **New synonym.**

**Remarks.** This species was erroneously referred to as *Aspisoma hesperum* Linnaeus, 1767, but the valid name is *Aspisoma lampyris* (Linnaeus, 1758). In fact, *Lampyris hespera* Linnaeus, 1767 is a junior synonym of *A. lampyris* (Linnaeus, 1758) as both share the same exact description (Fig. 1).

**Figure 1.** Comparison of Linnaeus' descriptions. **A)** Description of *Cantharis lampyris* Linnaeus, 1758. **B)** Description of *Lampyris hespera* Linnaeus, 1767 **new synonym.**

### ***Aspisma ignitum* (Linnaeus, 1758)**

*Cantharis ignita* Linnaeus 1758: 400.

**Remarks.** This species was published in Linnaeus (1758) in the genus *Cantharis* and moved to *Lampyris* by Linnaeus (1767: 645). This species was not newly described in 1767 as published in the vast majority of firefly literature.

## **Lampyrini Rafinesque**

### ***Lampyris (Lampyris) Geoffroy***

#### ***Lampyris noctiluca* (Linnaeus, 1758)**

*Cantharis noctiluca* Linnaeus 1758: 400.

**Remarks.** This species was published in Linnaeus (1758) in the genus *Cantharis* and moved to *Lampyris* by Linnaeus (1767: 643). This species was not newly described in 1767 as published in the vast majority of firefly literature.

## ***Pelania* Mulsant**

#### ***Pelania mauritanica* (Linnaeus, 1758)**

*Cantharis mauritanica* Linnaeus 1758: 401.

**Remarks.** This species was published in Linnaeus (1758) in the genus *Cantharis* and moved to *Lampyris* by Linnaeus (1767: 645). This species was not newly described in 1767 as published in the vast majority of firefly literature.

## **Photinini LeConte**

### ***Photinus* Laporte**

#### ***Photinus corruscus* (Linnaeus, 1767)**

*Lampyris corrusca* Linnaeus 1767: 644.

**Remarks.** One of three species described by Linnaeus (1767).

***Photinus lucidus* (Linnaeus, 1758)**

*Cantharis lucida* Linnaeus 1758: 400.

**Remarks.** This species was published in Linnaeus (1758) in the genus *Cantharis* and moved to *Lampyris* by Linnaeus (1767: 645). This species was not newly described in 1767 as published in the vast majority of firefly literature.

***Photinus marginatus* (Linnaeus, 1767)**

*Lampyris marginata* Linnaeus 1767: 644.

**Remarks.** One of three species described by Linnaeus (1767).

***Photinus phosphoreus* (Linnaeus, 1758)**

*Cantharis phosphorea* Linnaeus 1758: 400.

**Remarks.** This species was published in Linnaeus (1758) in the genus *Cantharis* and moved to *Lampyris* by Linnaeus (1767: 645). This species was not newly described in 1767 as published in the vast majority of firefly literature.

***Photinus pyralis* (Linnaeus, 1758)**

*Cantharis pyralis* Linnaeus 1758: 400.

**Remarks.** This species was published in Linnaeus (1758) in the genus *Cantharis* and moved to *Lampyris* by Linnaeus (1767: 644). This species was not newly described in 1767 as published in the vast majority of firefly literature.

## Acknowledgements

I thank Erin Powell (FDACS-DPI) for help with the original draft. Michael Geiser is thanked for bringing the problems with the dates of publication to my attention, and Mike Ivie (Montana State University, Bozeman, MT, USA) for answering some questions about the ICZN. Also, Cristian Beza-Beza (Department of Entomology and Plant Pathology, North Carolina State University, Raleigh, NC, USA) for help with the Spanish abstract. I thank Gareth Powell (FDACS-DPI) and Davide Dal Pos (University of Central Florida, Orlando, FL, USA) for pre-submission reviews of the manuscript. And lastly, I thank the Florida Department of Agriculture and Consumer Services, Division of Plant Industry (FDACS-DPI), for support of this work.
