**REPAIRS AND ADJUSTMENTS:** No repairs or adjustments.

**Note:** The performance figures on this report are the result of replacing the electronic engine control module of the Case IH Steiger 430 with the Case IH Steiger 380 module.

**REMARKS:** All test results were determined from observed data obtained in accordance with official OECD, SAE and Nebraska test procedures. The pull in 2<sup>nd</sup> gear was limited to avoid excessive tractor bouncing. For the maximum power tests, the fuel temperature at the injection pump inlet was maintained at 102°F (39°C). The manufacturer's claim of 75 dB(A) cab sound level, with Luxury cab, was not verified. The performance figures on this Summary were taken from tests conducted under the OECD Code II test procedure.

We, the undersigned, certify that this is a true and correct report of official Tractor Test No. **1908**, Nebraska Summary 576, February 8, 2008.
