**REPAIRS AND ADJUSTMENTS:** No repairs or adjustments.

**NOTE 1:** The performance figures on this report are the result of replacing the electronic engine control module of the Versatile 400 with the Versatile 375 module.

**NOTE 2.** The manufacturer declares that the average time between active regenerations is 36 hours, while operated in Auto Filter Cleaning Mode, at rated speed, full PTO load, under steady state conditions.

**REMARKS:** All test results were determined from observed data obtained in accordance with official OECD, SAE and Nebraska test procedures. This tractor did not meet the manufacturer's remote hydraulic flow claim of 58 GPM (220 l/m) with the standard pump. The manufacturer's remote hydraulic flow claim of 113 GPM (428 l/m), with high flow system, was not verified. For the maximum power tests the fuel temperature at the primary fuel filter was maintained at 130°F (55°C). The performance figures on this summary were taken from a test conducted under the OECD Code 2 test procedure.

We, the undersigned, certify that this is a true and correct report of official Tractor Test No. **2066**, Nebraska Summary 884, November 25, 2013.
