TIMBER BUYERS FOR NEBRASKA TREES

Dept. of Forestry, Fisheries & Wildlife
and Nebraska Forest Service

Issued in furterance of Cooperative Extension work, Acts of May 8 and June 30, 1914, in cooperation with the U.S. Department of Agriculture. Leo E. Lucas, Director of Cooperative Extension Service, University of Nebraska, Institute of Agriculture and Natural Resources.

INTRODUCTION

This directory can help timber owners locate a market for their trees. An estimated 28,600,000 board feet (b.f.) of timber is harvested annually in Nebraska.

Nebraska sawmills process about 24,900,000 b.f. while out-of-state mills handle 3,700,000 b.f. Timber exported from Nebraska is mostly high quality. Veneer walnut logs may travel as far as Japan or Germany to be processed. Black walnut accounts for 2,700,000 b.f. of the annual harvest leaving the state. Most of the remaining 1,000,000 board feet is cottonwood.

The following list includes companies or buyers who purchase timber in Nebraska. Only companies and buyers who returned questionnaires are listed. Omissions are unintentional or because of our inability to identify or locate buyers. Sawmill operators in Nebraska also buy timber. Endorsement of timber buyers is neither intended nor implied. Additions or corrections to this list should be submitted to the **Department of Forestry, Fisheries and Wildlife, 101 Plant Industry Building, University of Nebraska 68583-0814.**

Joe Range, Extension Forester
