PREFACE

This report was compiled in response to numerous requests for historical price data for the major crops and livestock classes produced in Nebraska. Prices received by producers are reported for 1960-1994 or for the period listed in each table heading.

The data was compiled from Nebraska Agricultural Statistics, Nebraska Agricultural Statistics Service and Agricultural Prices, USDA; Livestock, Meat and Wool Market News, Livestock and Grain Market News, Agricultural Marketing Service, USDA; and from Agricultural Statistics Board, National Agricultural Statistics Service, USDA. The reader should note that each table in the report indicates the price source as either an Omaha, Nebraska or (as listed) price received by producers.

Calendar year average prices (simple averages of the January through December prices) are provided in each table. For crops, weighted marketing-year averages are also provided. Ten-year monthly and yearly averages (1985-94) and length-of-table price period monthly and yearly averages are included at the bottom of each table.

The author has adjusted some data series to provide a complete price series and in some cases has interpolated prices for selected months. The reader should note that weight classifications for reporting feeder cattle prices changed in 1970 and again in 1992. Specific information on the necessary changes, adjustments and data sources are contained in the footnotes of the respective tables.

It is the intention of the author to update this report annually. Appropriate additions, revisions or deletions will be made at those times. Requests for the updated reports should be sent to the Department of Agricultural Economics, Institute of Agriculture and Natural Resources, 208 H.C. Filley Hall, UNL-East Campus, Lincoln, Nebraska 68583-0922.
