Abstract

This paper describes the way of assigning pure notations for the Personality Facet, Level 4 [P4] ie. Work Facet, in Literature subject [O]. The provisions are given by S.R.Ranganathan, who has structured various editions of Colon Classification Scheme for documents classification in the libraries. According to S.R.Ranganathan (1960), the subjects associated with the Work Facet [P4] in Literature should be constructed based on certain rules. The classifier should keep those rules in their mind while constructing work number of author for the literature related documents. The rule says that the notation should be allotted for this level [P4] based on the works range of the authors. ie. Author works within/equal to 8, author works within/equal to 64 and above 8, author works within/equal to 512 and above 64. As per the instructions given by S.R.Ranganathan, the notations have been structured here for the authors who have different work numbers. The tables have been structured under the headings Works: 1 to 8, Works: 1 to 64, Works: 1 to 512 and Works: 1 to 4096. The rules let the classifiers to formulate the notations for the works of authors without limitations. The divisions of the group numbers are infinite. Colon Classification Scheme lets the classifiers to construct the notations for any number of works of author whose works fall under the Work facet [P4]. Worked out exercises for a few select authors' works have been vouched here along with the identified notations using the structured tables. The extended device fulfils the demands of Canons for array in Idea Plane and Canons for work in the Notational Plane. The canons such as canon of helpful sequence, canon of consistent sequence, canon of synonym, canon of homonym, canon of co-extensiveness, canon of extrapolation in array have been satisfied by this device. S.R.Ranganathan's brilliance in Mathematics works well here to form the notations for the Work [P4] facet in a systematic way. His future predictions are awesome and extraordinary.

Keywords: Ranganathan,S.R., Colon Classification, Call Number, Notation, Literature, Personality Facet,Level Four, P4, Work

Introduction:

Notation, it may be recollected, is the system of ordinal numbers used to represent the classes in a scheme of classification (S.R.Ranganathan, 1937). Colon Classification is a powerful scheme developed by S.R.Ranganathan and the first edition was released in the year 1933 for the systematic classification of documents in the libraries using well structured call numbers. Colon Classification is not like other classification schemes as it uses an analytico-synthetic approach while structuring the call numbers for the documents. It doesn't provide the readymade notations for the documents in all the occasions. Colon Classification enables the classifiers to trace the required notations from various locations as per the rules stipulated by S.R.Ranganathan in order to synthesise a call number. However, the classifiers need to be

strong in the concepts associated with the Canons, Postulates and Principles, Isolates, Devices, Phase relations, etc. The present study focuses on Literature subject, which is identified by the main class [O] where the available facets are namely [P] Language, [P2] Form, [P3] Author and [P4] Work (S.R.Ranganathan, 1960). The study aims at the level four of Personality facet within the first round ([1P4] Work) only and no other facets have been vouched here.

S.R.Ranganathan's Techniques:

According to S.R.Ranganathan (1960), the work contained or treated about in the book should be taken as the focus in the Work Facet. Further, he says that *Work* is not equal to *Book* and should be termed as *Work Inequality*. S.R.Ranganathan has framed the given rules to structure the notation for the works of author. If the numbers of works of the author does not exceed eight, the works should be arranged in chronological sequence or, if it is impossible, in any arbitrary sequence, and the numbers 1, 2, 3...8, respectively should be assigned to the works. If the number of works of an author is greater than eight and does not exceed sixty four, the works should be arranged in chronological sequence or, if it is impossible, in some convenience sequence and they should be divided successively into groups of eight each, and the numbers 1, 2, 3...8, respectively should be assigned to the groups. Such a number may be termed group numbers. Then to get the actual work of the works in any groups, 1, 2,3...8, respectively should be put after the group number, thus, each work will consist of two digits, the first digit indicating the group into which the book falls and the second indicating the work in the group. If the number of works is greater than sixty-four and does not exceed 512, the same device may be extended. That is, the work will consist of three digits, the first digit showing the major group of 64 works into which the work falls, the second digit showing the sub-group of the major group into which the book falls, and the third digit indicating the work in the sub-group. In this sequence, if the number of works is greater than five hundred and twelve, the same device may be further extended. That is, the work will consist of four digits where the group, sub-group, work also occurred as per the guidelines discussed above.

Notations for the Works:

The given Table 1 (Works: 1 to 8) explores the digits, which can be used as notations for the works of author, if the number of works does not exceed 8.

Table 1: Number of works up to 8

For instance, if the author work is '6' then the notation will be '6'. The 7th work of the author will be denoted by the notation '7' and so on.

Works: 1 to 8

Work Number	Notation
1	1
2	2
3	3
4	4
5	5
6	6
7	7
8	8

Table 2: Number of works greater than 8 and does not exceed 64

Works: 1 to 64

Work Number	Notation	Work Number	Notation
1	11	33	51
2	12	34	52
3	13	35	53
4	14	36	54
5	15	37	55
6	16	38	56
7	17	39	57
8	18	40	58
9	21	41	61
10	22	42	62
11	23	43	63
12	24	44	64
13	25	45	65
14	26	46	66
15	27	47	67
16	28	48	68
17	31	49	71
18	32	50	72
19	33	51	73
20	34	52	74
21	35	53	75
22	36	54	76
23	37	55	77
24	38	56	78
25	41	57	81
26	42	58	82
27	43	59	83
28	44	60	84
29	45	61	85
30	46	62	86
31	47	63	87
32	48	64	88

The given Table 2 (Works: 1 to 64) explores the digits, which can be used as notations for the works of author, if the number of works is greater than 8 and does not exceed 64.

For instance, if the author work is '6' then the notation will be '16'. The 7th work of the author will be denoted by the notation '17'. The 47th work of the author will be denoted by the notation '67'. The 57th work of the author will be denoted by the notation '81' and so on.

Table 3: Number of works greater than 64 and does not exceed 512

The given Table 3 (Works: 1 to 512) explores the digits, which can be used as notations for the works of the author, if the number of works is greater than 64 and does not exceed 512.

The Works have been categorized under the term 'Works' like;

Works: 1 to 64;

Works: 65 to 128;

Works: 129 to 192;

Works: 193 to 256;

Works: 257 to 320;

Works: 321 to 384;

Works: 385 to 448;

Works: 449 to 512.

For instance,

The 6th *work of the author* will be denoted by '116'

[Taken from the Table Works: 1 to 64];

The 7th *work of the author* will be denoted by '117'

[Taken from the Table Works: 1 to 64] ;

The 57th *work of the author* will be denoted by '181'

[Taken from the Table Works: 1 to 64] ;

The 147th *work of the author* will be denoted by '333'

[Taken from the Table Works: 129 to 192] ;

The 157th *work of the author* will be denoted by '345'

[Taken from the Table Works: 129 to 192] ;

The 347th *work of the author* will be denoted by '643'

[Taken from the Table Works: 321 to 384] ;

The 447th *work of the author* will be denoted by '787'

[Taken from the Table Works: 385 to 448] and so on.

Works: 1 to 64

Table 4: Number of works greater than 512 and does not exceed 4096

The given Table 4 (Works: >512 and <4096) explores the digits, which help to find notations for the works of author, if the number of works is greater than 512 and does not exceed 4096. Any author, who has completed more than 512 works, may collect the notations from this table. The works have been categorized under the terms as shown below;

Works	
From	To
1	64
65	128
129	192
193	256
257	320
321	384
385	448
449	512
513	576
577	576
641	704
705	768
769	832
833	896
897	960
961	1024
1025	1088
1089	1152
1153	1216
1217	1280
1281	1344
1345	1408
1409	1472
1473	1536
1537	1600
1601	1664
1665	1728
1729	1792

The notations for the each works range have been identified and distributed for better understanding as shown below.

Works: 1 to 64

1791	4487
1792	4488

From the above tables, the notations for the works would be traced as discussed below.

The 6th *work of the author* will be denoted by ‘1116’

[Taken from the Table Works: 1 to 64];

The 7th *work of the author* will be denoted by ‘1117’

[Taken from the Table Works: 1 to 64];

The 57th *work of the author* will be denoted by ‘1181’

[Taken from the Table Works: 1 to 64];

The 447th *work of the author* will be denoted by ‘1787’

[Taken from the Table Works: 385 to 448];

The 1047th *work of the author* will be denoted by ‘3137’

[Taken from the Table Works: 1025 to 1088];

The 1500th *work of the author* will be denoted by ‘3844’

[Taken from the Table Works: 1473 to 1536] and so on.

The given tables enable the classifiers to assign notations to the author works up to 1792. In case, if the number of works of the author is more than this level, the group can be extended up to 4096 as discussed here. Dr.S.R.Ranganathan’s rules pertaining to the author’s works need to be adhered while extending the groups and sub-groups.

Worked Out Exercises:

The works of a few popular Tamil writers namely *Akilan*, *Kalki* and *Pattukkottai Prabakar* have been taken here as an example for the purpose of tracing suitable notations using the S.R.Ranganathan guidelines.

The facet formula for the Main Class Literature as per Colon Classification 6th edition (S.R.Ranganathan, 1960) is,

O [P], [P2] [P3], [P4] *where*

O Literature

Table 5: Facets and Terms

Facet	Term
[P]	Language
[P2]	Form
[P3]	Author
[P4]	Work

Table 6: Exercise-1

Akilan was one of the popular Tamil writers noted for his realistic and creative writing style. His works such as historical novels, social novels, short stories fall within the range of 64.

Number of Works	Notation Captured from the Table 2 (Works >8 and <64)	Notation Captured from the Works Range	Call Number
1	11	Works 1 to 64	O31, 3N22,11
2	12	Works 1 to 64	O31, 3N22,12
3	13	Works 1 to 64	O31, 3N22,13
4	14	Works 1 to 64	O31, 3N22,14
5	15	Works 1 to 64	O31, 3N22,15
10	22	Works 1 to 64	O31, 3N22,22
and so on			

The Table 6 depicts the works of *Akilan* and the notations, which have been selected from the related works tables. The last column explores the structured call numbers for various works. The call number includes main class [O (Alphabet Capital Letter)], regional language [31 (Tamil)] opted in the document, form of the document [3], authors' year of birth ([M99] Selected from the *Time Isolate* available in the *Chapter-3* of *Part-2* i.e. *Schedules of Classification, Pg.2-7*) and the notation for author's works (Table 3).

Table 7: Exercise-2

Kalki, was a popular writer, journalist, poet, critic and Indian independence activist. His works include over 120 short stories, 10 novellas, 5 novels, 3 historical romances etc. The call numbers for some of the works of this author are given in the Table 7.

Number of Works	Notation Captured from the Table 3 (Works >64 and <512)	Notation Captured from the Works Range	Call Number
1	111	Works 1 to 64	O31, 3M99,111
2	112	Works 1 to 64	O31, 3M99,112
3	113	Works 1 to 64	O31, 3M99,113
4	114	Works 1 to 64	O31, 3M99,114
5	115	Works 1 to 64	O31, 3M99,115
10	122	Works 1 to 64	O31, 3M99,122
99	253	Works 65 to 128	O31, 3M99,253
100	254	Works 65 to 128	O31, 3M99,254
101	255	Works 65 to 128	O31, 3M99,255
102	256	Works 65 to 128	O31, 3M99,256
and so on			

The notations for the works have been selected from the related works tables. The last column explores the structured call numbers for various works. The call number includes main class [O (Alphabet Capital Letter)], regional language [31 (Tamil)] opted in the document, form of the document [3], authors' year of birth ([M99] Selected from the *Time Isolate* available in the *Chapter-3* of *Part-2* i.e. *Schedules of Classification, Pg.2-7*) and the notation for author's works (Table 3). As per the rules, the favoured language may be denoted as O- instead of O31.

Table 8: Exercise-3

The prolific Tamil writer *Pattukkottai Prabakar* has written more than 600 publications, which encompass 250 short stories, more than 300 novels, and above 85 serial stories. The call numbers for this author works are explored towards the Table 8.

Number of Works	Notation Captured from the Table 4 (Works >512 and <4096)	Notation Captured from the Works Range	Call Number
1	1111	Works 1 to 64	O31,3N58,1111
2	1112	Works 1 to 64	O31,3N58,1112
3	1113	Works 1 to 64	O31,3N58,1113
4	1114	Works 1 to 64	O31,3N58,1114
5	1115	Works 1 to 64	O31,3N58,1115
10	1122	Works 1 to 64	O31,3N58,1122
99	1253	Works 65 to 128	O31,3N58,1253
100	1254	Works 65 to 128	O31,3N58,1254
199	1417	Works 193 to 256	O31,3N58,1417
200	1418	Works 193 to 256	O31,3N58,1418
299	1563	Works 257 to 320	O31,3N58,1563
300	1564	Works 257 to 320	O31,3N58,1564
399	1727	Works 385 to 448	O31,3N58,1727
400	1728	Works 385 to 448	O31,3N58,1728
499	1873	Works 449 to 512	O31,3N58,1873
500	1874	Works 449 to 512	O31,3N58,1874
599	2237	Works 577 to 640	O31,3N58, 2237
600	2238	Works 577 to 640	O31,3N58, 2238
and so on			

The above table depicts the author's (Pattukkottai Prabakar) works and the notations, which have been selected from the related works tables. The last column explores the structured call number for various works. The call number includes main class [O (Alphabet Capital Letter)], regional language [31 (Tamil)] opted in the document, form of the document [3], authors' year of birth ([N58] selected from the *Time Isolate* available in the *Chapter-3 of Part-2* i.e. *Schedules of Classification, Pg.2-7*) and the notation for author's works (Table 4). As per the rules, the favoured language may be denoted as O- instead of O31.

Table 9: Comparison between the Notations of various works

Table 9 helps to compare the notations traced for various works that exist in the call numbers. Select authors' works are vouched here for the purpose of defining call numbers where S.R.Ranganathan (1960) guidelines for structuring works of authors have been adhered to.

Column 1: Author's various works range has been sequenced as 1, 2, 3, 4, 5....10.....99, 100.

Column 2: The first digit in the work numbers showing the major group of 8 works (Table 2), the second digit indicating the work in the group. (11, 12, 13, 14, 15, 22)

Column 3: The first digit in the work numbers reflecting the major group of 64 Works (Table 3), the second digit showing the sub-group of the major group, and the third digit indicating the work in the sub-group. (111,112, 113, 114, 115, 122, 253, 254)

Column 4: The first digit in the work numbers showing the basic major group of 512 works (Table 4), the second digit reflects the sub-group of major group, the third digit showing the sub-group of sub-group, and the fourth digit indicating the work in the sub-group. (1111, 1112, 1113, 1114, 1115, 1122, 1253, 1254)

Number of Works	Call Number [Notation Captured from the Table 3 (Works >8 and <64)] Works of <u>Akilan</u>	Call Number [Notation Captured from the Table 3 (Works >64 and <512)] Works of <u>Kalki</u>	Call Number [Notation Captured from the Table 4 (Works >512 and <4096)] Works of <u>Pattukkottai Prabakar</u>
1	O31, 3N22,11	O31, 3M99,111	O31,3N58,1111
2	O31, 3N22,12	O31, 3M99,112	O31,3N58,1112
3	O31, 3N22,13	O31, 3M99,113	O31,3N58,1113

The arrays of the sequence in the notations for the works in the group and sub-groups available in the columns 2, 3 and 4 can be observed from the comparisons Table 9 where S.R.Ranganathan techniques for defining the notations for various works have been proved. As per the rules, the favoured language may be denoted as O- instead of O31.

Further, the structured notations have fulfilled the demands of *canons for array in Idea Plane and canons for work in the Notational Plane* where *canon of helpful sequence, canon of consistent sequence, canon of synonym, canon of homonym, canon of co-extensiveness, canon of extrapolation in array* have been satisfied.

Conclusions:

Tamil Nadu is one of the states in India, where the writer *Rajesh Kumar*, who is one of the prolific Tamil novel writers and also very popular for his detective novels, crime novels and science fiction, has written more than 1500 novels so far. Another prolific writer *Subha (D. Suresh and A.N. Balakrishnan)*, the writing partners, who are well known for stories, detective novels and screenplays in Tamil films have vouched 450 short novels and more than 400 short stories in their publications account. *Pattukkottai Prabakar* is one of the prolific Tamil writers with more than 250 short stories, above 300 novels, and above 85 serial stories. *Kalki*, was an Tamil writer, journalist, poet, critic and Indian independence activist. His writings include over 120 short stories, 10 novellas, 5 novels, 3 historical romances etc. *Akilan* was a Tamil author noted for his realistic and creative writing style. He has 2 historical novels, 14 social novels, 19 short stories etc., in to his credits.

In libraries, there would be a chance to face many authors with more number of works as discussed here. When situation arises, one question will flash in the mind of all the librarians.

How to maintain the systematic arrangements? No doubt, the answer would be definitely the Colon Classification Scheme. In order to control the works of authors, well structured notations are essential that could be attained with the help of Colon Classification Scheme where S.R.Ranganathan concepts behind the structure of notations play a vital role. When author works fall in the range between 1 and 8; above 8 and below 64; above 64 and below 512; above 512 and below 4096 and so on, the structured tables may help the librarians to construct a suitable notation by which the Class Literature collections would be organized in a systematic way.

It would be crystal clear from the worked out exercises where the call numbers enable the librarians to have a systematic arrangement of any author's works in their libraries using S.R.Ranganathan Colon Classification scheme as it has its own capability to fulfil the requirements of documents that fall under the Class Literature. The flexibility/hospitality of the notations in Colon Classification scheme always meets the demands of the present as well as the future libraries. However, as per S.R.Ranganathan's instructions, the scheme needs to be updated at regular intervals in order to control the documents in the libraries. Structuring notations for authors various works, which have been discussed here are good examples that may let anyone to realize the capability and flexibility of Colon Classification scheme as well as S.R.Ranganathan's predictions.

To sum-up, Dr.S.R.Ranganathan, who restlessly worked for the development of Colon Classification scheme, is still living in the hearts of the library professionals. His works associated with the classification and cataloguing were extraordinary. S.R.Ranganathan has used wonderful techniques in this scheme, which may not be easily captured by the classifiers as it demands enough skills and experience. It may take enough time to understand the rules behind the construction of call numbers. Enumerated schemes are often approached by modern library professionals rather than an analytico-synthetic scheme. S.R.Ranganathan spent his whole life time for developing such kind of classification scheme. But, the complications in understanding the principles behind any classification schemes keep the LIS professionals stay away from it. However, S.R.Ranganathan's contributions remain accountable in the history.

Acknowledgement:

I would like to dedicate this paper to Dr.S.R.Ranganathan (Father of Library Science in India)
