Table S1. Sensitivity analysis of social vulnerability variables.

Tuble 51. Sensitivity analysis of social vulnerability valuables.	
Variable	IRR (95% CI)
Theme-1 (Socioeconomic)	1.70(0.77-3.73)
Theme-2 (Household composition & Disability)	3.19(1.57-6.47)
Theme-3 (Minority status & Language)	6.84(3.08-15.19)
Theme-4 (Housing & Transportation)	1.10(0.49-2.46)
All themes (Overall vulnerability)	1.62 (0.75-3.49)
Persons below poverty estimate ¹	0.59(0.27-1.27)
Civilian (age 16+) unemployed estimate ^{1*}	2.65(1.19-5.93)
Per capita income estimate ¹	0.58(0.25-1.34)
Persons with no high school diploma (age 25+) ¹	1.06(0.45-2.53)
Persons aged 65 and older ²⁺	0.07(0.02-0.24)
Persons aged 17 and younger ²⁺	3.83(1.76-8.34)
Single parent households with children under 182*	2.49(1.12-5.50)
Minority (all persons except white, non-Hispanic) ^{3*}	5.48(2.35-12.74)
Persons (age 5+) who speak English "less than well" estimate ^{3*}	6.03(3.13-11.60)
Housing in structures with 10 or more units estimate ⁴	2.43(0.97-6.07)
Mobile homes estimate ⁴	0.23(0.07-1.00)
Households with more people than rooms estimate ⁴	0.68(0.30-1.55)
Households with no vehicle available estimate ⁴	1.06(0.48-2.31)
Persons in institutionalized and noninstitutionalized group quarter ⁴	0.55(0.22-1.19)

* - Significant estimates-Included in adjusted_1 model); + - Significant estimates-Not included in the adjusted_1 model (Age related variables excluded in adjusted_1 model as the analysis is restricted to pediatric population); ¹ - Theme 1 variables; ² - Theme 2 variables; ³ - Theme 3 variables; ⁴ - Theme 4 variables; the variables are percentile proportions per watershed. The IRR and 95% confidence intervals were estimated using a generalized linear model accounting for pediatric population density.
