Carlsbad, CA 92008

Dear Mr. Shoemaker:

RE: Activity No. 9706(m)

Your continuing education activity entitled **“IPM for Bed Bugs in Healthcare Facilities”** has been reviewed and approved for 1 hour of continuing education credit toward IPM for Applicators, Field Representatives and Operators. The activity is approved effective April 11, 2019 and the approval will remain in effect for three years, after which re-approval is required.

All providers must notify the Board 30 days prior to the presentation of any Board approved activity.

Title 16, California Code of Regulations (CCR), Section 1953 requires that each licensee attending this activity receive a certificate of completion. Additionally, all providers of continuing education are required to submit a course attendance roster to the Structural Pest Control Board (SPCB) within five working days after every course instructed. If the courses are completed online, then a single roster for all course completions is required to be submitted to SPCB within five working days after the month's end. For the purpose of maintaining these standards, activities may be audited by the Board.

If you have any questions you may contact me at 916-561-8700.

Sincerely,

A handwritten signature in blue ink that reads "Jamie Bg".

Jamie Buchholz
