“Caterpillar” Tractors

## FOREWORD

This booklet contains the assembled recommendations of several oil refining companies for lubricants for "Caterpillar" tractors.

When a certain brand of oil, or a certain company selling an oil, is favored by the user, this booklet will indicate what grade of oil from that company can be used most successfully in his tractor. Since these recommendations, in each case, represent the best judgment of the manufacturer, the tractor owner should use the recommended grade of whatever brand of oil he may select.

Recommendations for the "Caterpillar" 2-Ton are found on pages 4 to 19; for the "Caterpillar" Twenty and Thirty on pages 20 to 35; and for the "Caterpillar" Sixty on pages 36 to 51.

Lubricant manufacturers are listed alphabetically under each tractor model, while on pages 52 to 54 will be found an alphabetical index of trade names or brands.
